An official with the agency building the already-delayed Metro Rail subway affirmed the fire inside the service tunnel between the Union Station terminal and a maintenance yard would delay construction on the subway, scheduled to open in late 1993.

Of more immediate concern to commuters and officials were developments above the tunnel, officials largely reopened the Hollywood Freeway, one of the area's most heavily traveled arteries.

Two northbound lanes were opened at 5:45 p.m. Monday, bringing the total of usable lanes to four, including a drivable shoulder and a busway open for cars. The right lane, shoulder and the separate busway were reopened at 6:50 a.m. on the first business day since Friday's fire.

The final two left lanes remained closed, although officials said they may reopen Tuesday.

Dave Roper, deputy district director for the state Department of Transportation, said shoring work inside the portion of the tunnel under the freeway was making ''excellent progress'' and had nearly reached the

center line of the freeway as crews moved toward the south end of the tube.

While the fire in the long-awaited subway system burned itself out Sunday morning, the wreckage left behind proved far more difficult to repair than experts initially predicted.

Crews were working around the clock to shore up supports under the portion of the freeway above the burned-out tunnel. But the shoring was proving to be a difficult task.

Officials were concerned that the collapse of 200 feet of the tunnel underneath the freeway had compromised the structural integrity of the busy freeway, which carries an average 210,000 vehicles a day.

Caltrans engineers said Saturday the fire damage was mostly confined to the tunnel and there was no real damage to the freeway roadbed itself. Still, they were concerned the fire had undermined the freeway supports.

Steve Leung, Caltrans traffic systems chief, said reinforcements were needed because of the possibility the tunnel ''could cave in'' under the weight of traffic.

The tunnel was one of two parallel service tunnels being built to eventually shuttle trains from a maintenance yard to the Union Station passenger terminal in downtown.

The fire was the most serious setback in the construction of the $1.4 billion, 4.4-mile segment of the subway system, which already is months behind schedule and about $135 million over initial cost projections.

#90198u0370 07/17/1990 ~United Press International

(JULY 17) UPI - Scott Garrelts started the season by digging himself a deep hole, but after his latest victory he's now standing on level ground.

Garrelts pitched his best game of the season Monday night, tossing a three-hitter in the San Francisco Giants' 6-1 victory over the Pittsburgh Pirates.

By doing so, Garrelts evened his record at 7-7 after beginning the 1990 campaign with a 1-6 record through May 31.

''For myself, it's been one start (at a time), not to try to do too many things,'' Garrelts said. ''At 1-6, you do that and you dig yourself a bigger hole. You just keep working at it.''

Garrelts, last season's ERA leader, did just that and has gone 6-1 in his

last nine starts, including a 5-1 record in seven road starts.

It was slow going for Garrelts in the early stages of the season, who lost three of his first six starts, and didn't capture his first victory until his seventh start.

His lack of success through the first three months, in a way, has mirrored that of the Giants team.

''The first half was frustrating,'' Garrelts said, ''for myself, and the team wasn't playing really well. We weren't getting the pitching, hitting. Now we are starting to put things together and play good baseball.''

And not surprisingly, Garrelts is finding his groove as well.

The defending NL Champion Giants had a 17-28 on May 28. Since then they have gone 31-12 with a .721 winning percentage.

The Giants have won six of their last seven and 10 of their last 12. They have climbed to a season-high eight games over .500, yet remain 7 1-2 games behind the NL West-leading Reds.

''There's plenty of time,'' Matt Williams said. ''It's a question of them not playing well. We're playing very well, now. Playing good defense, getting good pitching. If you can do those things, you can win.''

Rick Reed, 2-1, took the loss for the Pirates.

Garrelts, meanwhile, allowed just one run on three hits, in pitching his third complete game of the year.

''After a slow start, he's been outstanding,'' Giants Manager Roger Craig said. ''He's in a groove and it's a big lift. He has better stuff, he's just not throwing the ball down the middle of the plate.''

Garrelts allowed a second-inning single to Bobby Bonilla, who was erased on a double play. The other hits were Andy Van Slyke's infield single and a run-scoring single by Sid Bream that scored Barry Bonds in the seventh.

''We haven't been swinging the bats consistantly,'' Pirates Manager Jim Leyland said. ''And tonight he (Garrelts) just power pitched us. He didn't go with the split finger much, he came at us with fastballs.''

After taking a 1-0 lead in the second on Terry Kennedy's RBI double, San Francisco increased it to 2-0 on Kevin Mitchell's RBI single.

In the seventh, a passed ball by catcher Don Slaught gave the Giants their third run. San Francisco scored twice more in the eighth on a run-scoring

single by Jose Uribe and a botched rundown play after a pickoff. Mitchell's sacrifice fly in the ninth capped the scoring for the Giants.

Elsewhere in the National League, Cincinnati blasted Montreal 8-3, Houston beat New York 4-1, Philadelphia crowned Atlanta 7-2, Chicago edged San Diego 4-3 and Los Angeles grounded St. Louis 5-2.

In the AL, it was: New York 3, Kansas City 2; Minnesota 3, Boston 2; Baltimore 7, Texas 6; Detroit 5, Chicago 4; Oakland 3, Cleveland 0; Toronto 4, Seattle 3 and Milwaukee 3, California 1.

Reds 8, Expos 3

At Cincinnati, Eric Davis smashed his fifth-career grand slam to power Cincinnati. Davis' 12th home run put the Reds ahead for good 4-3 in the sixth. Barry Larkin, Joe Oliver and Chris Sabo also hit home runs to help reliever Tim Layana, 4-0, gain the victory. Zane Smith, 5-7, gave up seven runs and absorbed the loss.

Astros 4, Mets 1

At Houston, Mark Portugal gave up three hits over 6 2-3 innings to pace Houston. Craig Biggio drove in a run and scored another to help Portugal improve to 4-8. Portugal retired 16 straight hitters between the first and seventh innings and Larry Anderson worked the final 2 1-3 innings for his third save. Bob Ojeda, fell to 4-4.

Phillies 7, Braves 2

At Atlanta, Terry Mulholland pitched a six-hitter and Dickie Thon ripped four of 15 Philadelphia hits to power the Phillies. Mulholland, 4-3, pitched his first complete game of the season while Marty Clary fell to 1-6, allowing eight hits and three runs over 5 2-3 innings.

Cubs 4, Padres 3

At Chicago, Marvell Wynne hit a two-run double and winning pitcher Mike Harkey added an RBI single to lift Chicago. Harkey, who improved to 7-4, gave up six hits over six innings and Mitch Williams recorded the last out for his 10th save. Eric Show, 1-7, took the loss in his first start since May 13.

Dodgers 5, Cardinals 2

At St. Louis, Mike Scioscia drove in two runs in a four-run sixth inning and Terry Wells picked up his first major league victory to lead Los Angeles. Wells pitched 6 2-3 innings to improve to 1-1 and Jay Howell pitched the final 2 2-3 innings for his seventh save. Bob Tewksbury fell

to 4-2.

#90198u0399 07/17/1990 ~United Press International
ATLANTA (JULY 17) UPI - Personal animosity, not skin color, led to the firing of a black clerk by her black supervisor at the Atlanta Internal Revenue Service office, a federal judge ruled.

U.S. District Judge Charles A. Moye Jr. on Monday rejected a damage suit by Tracy Morrow, seeking back pay and her job back on grounds she was fired because she had lighter-colored skin than her supervisor, Ruby Lewis.

Moye had ruled earlier this year that discrimination based on skin color could occur, but he said there was ''no meaningful testimony'' during the six-day, non-jury trial that indicated Lewis was color-biased.

Instead, Moye said, Morrow's poor attitude probably fueled personal animosity between her and her darker-skinned supervisor during her four months on the job in 1986.

''A personality conflict alone does not establish invidious discrimination '' the judge ruled.

Morrow's strongest evidence, Moye said, were remarks Lewis allegedly made to her behind closed doors, such as ''You need some sun,'' and ''You think you're bad.''

But the judge said in his 19-page order that Morrow did not prove the remarks were ''uttered for any reason other than the personal animosity (the women) might have had for each other.''

On the other hand, Moye said, the government presented ''ample evidence (Morrow) may have been insubordinate, immature, impatient, disrespectful and unmanageable.''

Attorney Hillard J. Quint, who represented Morrow, said she was ''not totally surprised'' by the ruling.

Now, he said, ''It's time to move on with her life.''

-30- 1794
#90198u0400 07/17/1990 ~United Press International
(JULY 17) UPI - A native New Englander returned to Fenway Park and roughed up the Red Sox.

Minnesota's Paul Sorrento, who grew up and attended high school in the

Boston area and makes his off-season home in nearby Peabody, Mass., tripled in the winning run in the ninth inning Monday night to lift the Minnesota Twins to a 3-2 victory over the Boston Red Sox.

The native son, who helped knock the Sox out of first place in the AL East even got the benefit of a lucky bounce off the famed Green Monster.

With Minnesota trailing 2-1, Kent Hrbek led off the ninth with an opposite-field double off Jeff Gray, 1-3. Greg Gagne ran for Hrbek and scored on Brian Harper's one-out single to center for a 2-2 tie.

Sorrento then followed with a drive to left-center field. The ball caromed off the wall and hit Red Sox center fielder Kevin Romine in the face. As the ball rolled along the warning track, Harper circled the bases and scored the go-ahead run.

Although Sorrento was cut down at the plate trying to stretch it into an inside-the-park home run, the damage was already done.

''I imagine if they would have played it cleanly, I would have had to hold at third,'' said Harper. ''I was just reaching second when it took the weird bounce away from both outfielders. I just started running hard.''

Romine left the game after the play, with a bruise over his left eye and was scheduled for x-rays.

To add insult to injury, it was the first ninth inning come-back for the Twins this season. Minnesota had been 0-40 when it trailed after eight innings.

''It was certainly a weird play,'' Sorrento said. ''I thought for sure it would be in the gap and then it took that weird hop.''

Sorrento's hit came in front of his parents and a number of friends, but one of his old college buddies wasn't too pleased.

''It was a good piece of hitting by him,'' said Gray, a teammate of Sorrento's at Florida State. ''I had him 0-2 and I couldn't put him away.''

''Maybe when you're struggling you try a little too hard,'' he said. ''Maybe I was trying to be too perfect in the ninth.''

The Red Sox, who have now lost seven of their last eight, dropped back into second place 1-2 game behind the Toronto Blue Jays.

The Red Sox took a 1-0 in the first on Tony Pena's double-play grounder but the Twins tied the score in the third on Dan Gladden's fielder's choice.

Boston regained the lead at 2-1 in the sixth on an run-scoring error by second baseman Fred Manrique.

Juan Berenguer, 7-2, pitched 1 1-3 of scoreless relief for the win and Rick Aguilera worked the ninth for his 22nd save.

Elsewhere in the American League: New York nipped Kansas City 3-2, Detroit edged Chicago 5-4, Baltimore downed Texas 7-6, Oakland blanked Cleveland 3-0, Toronto topped Seattle 4-3, Milwaukee bounced California 3-1.

In the NL, it was: Cincinnati 8, Montreal 3; San Francisco 6, Pittsburgh 1; Philadelphia 7, Atlanta 2; Chicago 4, San Diego 3; Houston 4, New York 1; Los Angeles 5, St. Louis 2.

-- AROUND THE AL --

Blue Jays 4, Mariners 3

At Seattle, Jimmy Key allowed just three hits over seven scoreless innings and Fred McGriff hit his eighth home run in 16 games to lead Toronto into first place in the AL East. Key improved to 5-5. and Tom Henke recorded the final out for his 17th save. Erik Hanson dropped to 10-7.

Athletics 3, Indians 0

At Oakland, Calif., Scott Sanderson and Gene Nelson combined on a six-hit shutout and Mike Gallego had three hits and an RBI to power Oakland. Sanderson, 11-5, gave up four hits, walked two and struck out eight over 8 1-3 innings. Nelson gained his fourth save. Al Nipper fell to 2-3.

Tigers 5, White Sox 4

At Detroit, Alan Trammell's solo homer with two outs in the ninth inning off reliever Donn Pall, 1-4, snapped Chicago's road winning streak at 11 games. Reliever Mike Henneman pitched to four batters to improve to 5-5.

Brewers 3, Angels 1

At Anaheim, Calif., Rob Deer's solo homer snapped a seventh-inning deadlock and Ron Robinson scattered 10 hits over 7 1-3 innings to lead Milwaukee. Mark Langston, 4-11, pitched his third complete game of the year, all of which have been loses. Robinson improved to 3-1 and Dan Plesac notched his 15th save.

Orioles 7, Rangers 6

At Baltimore, Brad Arnsberg walked Mickey Tettleton with the bases loaded

and none out in the ninth inning to lift Baltimore. Kenny Rogers took the loss and fell to 3-5. Gregg Olson, 5-3, entered the ninth to pick up the win.

Yankees 3, Royals 2

At New York, fourth-inning homers by Steve Balboni and Bob Geren helped snap the Yankees' five-game losing streak. Jeff Robinson, 2-5, gave up two runs on four hits and two walks while striking out one in six-plus innings in his first start of the year. Dave Righetti pitched the ninth for his 18th save. Pete Filson, 0-1, took the loss.

#90198u0415 07/17/1990 ~United Press International

BELGRADE, Yugoslavia (JULY 17) UPI - Serbia's communist President Slobodan Milosevic Tuesday was elected chairman of a leftist party he formed in an effort to retain power in Yugoslavia's biggest republic and win badly needed funding.

Milosevic and Socialist Alliance President Radmila Andjelkovic were the only candidates for the post. Milosevic won with a 1,228-66 vote, election commission official Savo Skundric said.

About 1,300 congress delegates elected a 111-member main committee of a new Socialist Party of Serbia from the list of 159 candidates. Most of the main committee members were veteran communist officials.

''Serbia is making efforts to pull out of a serious economic crisis, Milosevic, the 49-year-old undisputed nationalist leader of 8.5 million Serbs said to the founding congress. ''The main goal of our party is a rich society ... in which all of us can live in peace.''

He told weary and sleepy delegates that Serbia, exposed to the pressure of conservative and right-wing parties, had to ''unite all left-oriented forces to safeguard peace.''

The main aim of the congress was the merger of Serbia's ruling but near-bankrupt Communist Party and the Socialist Alliance, a communist-ruled mass political organization whose assets are estimated at about $60 million.

The merger dissolves the Serbian Communist Party after 45 years of absolute rule.

The newly formed Serbian Socialist Party gives Milosevic, whose former Communist Party was declining in popularity, strong support that may help him defeat the mostly right-wing opposition in Serbia's first multi-party

elections to be held in the first half of 1991.

Milosevic's communists control Serbian state-owned news media. The opposition has almost no access to state-run radio and television stations.

During the congress debate early Tuesday, farmer Jovisa Nikolic warned the congress, ''The change of the name of the party will not change much, it will not make the situation any better. We have to work, not to sit and discuss issues at sessions.''

The communist Serbian leadership, at odds with four of Yugoslavia's six republics, also pledges to continue the political dismantling of the late President Josip Broz Tito's personality cult and his alleged anti-Serbian policies, and support the estimated 2 million Serbs who live in other Yugoslav republics.

Serbian communists have been under mounting pressure to call multi-party elections following the collapse of Marxist rule across Eastern Europe and the April victories of right-wing nationalist parties in the Yugoslav republics of Croatia and Slovenia in the nation's first free balloting since the 1945 communist takeover.

#90198u0466 07/17/1990 ~United Press International

ATLANTA (JULY 17) UPI - Former Atlanta Mayor Andrew Young campaigned across Georgia in a final push to win the Democratic gubernatorial nomination and move a step closer to becoming the state's first black governor.

Barring a major upset in Tuesday's voting, Young - with guaranteed support from Georgia's sizable black electorate - was virtually assured of winning at least a spot in an Aug. 7 runoff against his top rival, Lt. Gov. Zell Miller, who leads Young in opinion polls.

Young criss-crossed the state on a flying tour Monday after addressing a predominantly black crowd in the heart of his Atlanta stronghold. Emphasizing his mayoral administration's achievements of bolstering Atlanta's economy and educational opportunities, Young told a group of ministers that he wants the chance to do the same for the rest of Georgia.

''People ... look with envy on Atlanta at what economic development has done for the city, what education has done for its young people,'' Young said. ''They look at the opportunities in Atlanta and say, 'Why hasn't the state done anything like that for us?'''

The August runoff will be held pending a ruling by a federal judge on a lawsuit claiming the state's runoff system is discriminatory. The suit,

filed by several black leaders, asks for a change to a plurality system in which the top vote-getter in a primary would win the party's nomination.

Democratic state Sen. Roy Barnes, state Rep. Lauren McDonald and Lester Maddox, the former segregationist governor who has returned for what likely will be his last political hurrah, were trailing far behind in the polls going into Tuesday's primary.

The real test for Young would be in a runoff.

Miller, powered by name recognition resulting from his 16 years in the lieutenant governor's office and his backing of a state lottery to benefit educational improvements, appeared to have has a significant lead over Young.

The polls showed Miller as the top vote-getter in Tuesday's primary by some 6 percent over Young and a 10-point winner in a runoff.

Miller, who billed himself as the ''candidate of change,'' also traveled across the state Monday to urge people to vote and remind them of his support of a state lottery. Polls have shown the lottery to be the single most important issue on the minds of Democratic voters, hence Miller's secret to success.

The winner of the Democratic nomination is likely to meet state Rep. Johnny Isakson in November to determine the successor to Gov. Joe Frank Harris, who will be leaving office after serving the maximum two terms allowed by law.

Isakson, the Republican front-runner, may be able to win a majority of the vote in Tuesday's GOP primary and avoid a runoff.

Two other GOP contenders, former Gwinnett County School Board Chairman Bob Wood and former Superior Court Judge Greeley Ellis, traded off in the polls as the runner-up in the race. Former Army Col. Eli ''Link'' Veazey was a distant fourth.

#90198u0505 07/17/1990 ~United Press International

(JULY 17) UPI - Around the world... around the clock... U-P-I has the latest news.

Rescue workers continue to comb through the rubble of collapsed buildings in and around Manila, trying to find survivors of yesterday's earthquake in the Philippines. Rescue efforts are centered on several hotels in a resort town 60 miles north of the capital. The quake killed 193 people and left 20-thousand others homeless.

Soviet President Gorbachev has removed a major obstacle to German reunfication. Gorbachev yesterday dropped his opposition to NATO membership for a united Germany. He made the announcement at a joint news conference with West German Chancellor Helmut Kohl, who's visiting the Soviet Union.

Arab League ministers meeting in Tunisia have backed away from a full endorsement of P-L-O Chairman Yasser Arafat's criticism of U-S Middle East policy. But the ministers say they support the P-L-O's refusal to meet Washington's demands for resuming talks.

NASA's top administrator, Richard Truly, says he welcomes a Bush adminstration order to form an independent task force to study the space agency's future. NASA has lost considerable public and congressional support in the wake of several embarrassing setbacks involving the shuttle fleet and the Hubble Space Telescope.

The Los Angeles District Attorney's Office is investigating the mysterious fire in an uncompleted underground subway tunnel. The fire forced officials to close the Hollywood Freeway during the weekend, causing major traffic delays. Two lanes out of six remain closed as workers shore up damaged support beams.

#90198u0526 07/17/1990 ~United Press International

(JULY 17) UPI - The lawyers for the three defendants charged with beating and raping a jogger in New York's Central Park in April 1989 say the victim's courtroom testimony did NOT hurt their case. The woman unexpectedly took the stand yesterday and testified about her difficulty in recovering from the attack. She was NOT able to remember any details about the so-called ''wilding'' incident.

38 firefighters and civilians were injured yesterday when a five-alarm blaze broke out on the 51st floor of the world famous Empire State Building. It took firefighters one hour to extinguish the blaze as spectators lined the street below. Officials say the skyscraper will be open for business this morning.

The judge presiding over the drug and perjury trial of Washington, D-C, Mayor Marion Barry has ordered the arrest of a reluctant prosecution witness. Bettye Smith, a former city employee and long-time Barry associate, says she canNOT testify because of stress-related health problems.

California's San Quentin Prison is under a lock-down this morning following the weekend discovery of weapons in three different areas and a

racial fight. The incident involved about 120 black and Hispanic convicts in the prison's minimum security unit. The clash ended when a guard fired a warning shot.

A woman described as an obsessed fan of actress Sharon Gless has been sentenced to six years in prison for twice breaking into the actress's home. Prosecutors say the woman intended to sexually assault Gless and commit suicide in front of her. Gless starred in the television series ''Cagney and Lacey.''

#90198u0641 07/17/1990 ~United Press International

(JULY 17) UPI - Rescuers continue the search for survivors of Philippines quake... Poland joins the ''two-plus-four'' talks on German unification... and Democrats press on with civil rights bill. The latest news from the wires of U-P-I, next:

A rescue coordinator in the Philippines says the cries of children and adult voices can be heard coming from some of the buildings flattened by yesterday's major earthquake.

Rescue teams are using blowtorches and chain saws in an effort to reach the survivors before it's too late.

Government officials say the quake killed 193 people, but the Red Cross reports 221 people have died. The Philippine social welfare department says nearly 20-thousand people are homeless.

Rescue efforts are focused on several hotels in a resort town about 60 miles north of Manila. Officials say about 250 people are trapped in the luxury Hyatt Terraces hotel and the Nevada hotel. Another 500 to 600 more are trapped in factories at the Export Processing Zone.

A U-S Embassy spokesman says he is trying to confirm reports that four officials of the U-S Agency for International Development are among those trapped in the Nevada Hotel. He says A-I-D was hosting a seminar at the hotel.

The U-S Geological Survey in Colorado says the quake measured seven-point-seven on the Richter Scale, more powerful than last October's California earthquake.

Poland enters the ''two-plus-four'' talks on German unification today in Paris.

Although Poland is NOT one of the so-called ''Big Four'' victors from World War Two... Warsaw does have a vested interest in German

reunification. After the war, the Soviet Union moved Polish borders up to 100 miles to the west.

Warsaw wants a treaty to secure the post-war border, which runs along the Oder and Neisse rivers... before the United States, Britain, France and the Soviet Union relinquish their control over Germany.

The West German government says Poland's treaty demand is legally impossible because only the Parliament of a unified Germany can ratify such a treaty.

Both West and East German parliaments already have declared the Oder-Neisse Line as the border between Poland and Germany.

Poland's foreign minister said on his arrival in Paris for the unification talks that Warsaw would be satisified if the Oder-Neisse border pact were signed immediately after political unificiation of Germany is completed.

Earlier this year, West German Chancellor Kohl angered Poland by hinting that a united Germany might NOT accept the Oder-Neisse border.

#90198u0655 07/17/1990 ~United Press International

(JULY 17) UPI - Senate Democrats have scheduled a vote for this afternoon that may cut off debate and force a vote on an important civil rights bill.

Weeks of discussion have failed to produce a compromise agreement between the White House and the Senate... and the Democrats are going on the offensive.

The bill would reverse six 1989 Supreme Court decisions that civil rights advocates claim undermine on-the-job protections for women, blacks, and other minorities. Similar legislation is being considered in the House.

President Bush is opposed to the current bill which many Republicans fear will establish a system of quotas in hiring and promotions.

Republican Senator Nancy Kassebaum of Kansas has introduced a new bill. But the Leadership Conference on Civil Rights says Kassebaum's proposal is a ''masquerade'' that would hurt the fight for civil rights.

President Bush is asking congressional leaders to help pass a proposed Constitutional amendment requiring a balanced budget.

Bush sent a letter yesterday to House Speaker Thomas Foley and other key leaders, asking the House to adopt the measure.

The House is scheduled to vote on the measure today. Democratic leaders oppose the measure and are confident it will fail again.

Bush's appeal coincided with a mid-year economic report that hiked the 1991 deficit by 10-BILLION dollars to nearly 170-BILLION.

The increased deficit estimate may seem business as usual to most Americans... but it represents a direct threat to their wallets.

Although the projected 1991 deficit jump seems small.... several analysts agreed it's a sign the nation is facing severe economic woes and possibly recession.

#90198u0723 07/17/1990 ~United Press International

BEIJING (JULY 17) UPI - A senior Japanese official, in Beijing to explain Japan's easing of economic sanctions against China, urged the Chinese government Tuesday to take substantial steps toward restoring ties with Western nations, Japanese sources said.

But Deputy Foreign Minister Hisashi Owada, in a meeting with Chinese Foreign Minister Qian Qichen, left his recommendation vague and did not detail specific measures China could take on human rights, said the sources, who declined to be further identified.

Owada met with Qian on the second day of a three-day visit, the highest-level Japanese visit to Beijing since Chinese troops suppressed the pro-democracy movement in June 1989, firing on unarmed protesters in Beijing to crush six weeks of unrest.

Owada is briefing the Chinese on Japan's decision to restore a $5.4 billion concessional lending package frozen after the crackdown. Japan is the first of the industrialized nations to ease sanctions imposed in the wake of the Beijing violence.

President Bush indicated during last week's summit of the leading

industrial democracies, the ''Group of Seven,'' that the United States would wait for further progress on human rights in China.

According to Japanese sources briefed on the talks, Owada did not discuss last year's unrest with Qian but outlined the G-7 position on China, noting it had eased somewhat but remained tough.

He said the G-7 nations hoped China would continue to make progress and sought ''real efforts'' by Beijing, but he did not bring up specific suggestions such as freeing more political prisoners, the sources said.

''As China moves forward, relations with the G-7 nations will improve,'' one source quoted Owada as saying.

During the 40-minute meeting, Qian reiterated the Chinese official line, saying, ''Sanctions would have no benefit for either China or Western nations,'' the sources said.

Most of the Western sanctions remain in place, including suspension of high-level political visits to Beijing, a halt in military cooperation and blocking new lending, including loans from the World Bank except for ''human needs'' projects.

Japan is expected to release the ''yen-loan'' package gradually, beginning with public welfare lending and ''untied'' credits, those not linked to purchases of Japanese goods and services.

The Japanese loans are expected to resume later this year, but only about $800 million of the package is likely to be freed in the first batch.

#90198u0760 07/17/1990 ~United Press International

(JULY 17) UPI - Poland enters the ''two-plus-four'' talks on German reunification in Paris today. Warsaw wants a border treaty with a unified Germany before the responsibilities of the four World War Two allies end. The Bonn government says such a treaty is legally impossible because only the Parliament of a unified Germany could approve an agreement like that.

Soviet President Gorbachev has removed what probably was the biggest obstacle to German reunification. The Soviet leader says he NO longer opposes NATO membership for a united Germany. President Bush praised Gorbachev's announcement, calling it a demonstration of ''statesmanship... in the best interest of all Europe, including the Soviet Union.''

Philippine officials say the death toll from yesterday's earthquake has climbed near 200. And they say the number will rise as search teams continue to look for victims beneath the debris of crushed buildings.

Officials say about 250 people are believed to be trapped in the Hyatt Terraces hotel and the Nevada hotel. A rescue coordinator says voices can be heard coming from the rubble. Both hotels are located in a resort town north of Manila.

The product liability trial against the heavy metal band Judas Priest enters its second day in Reno, Nevada, today. Lawyers for the parents of two young men who committed suicide say the band's album ''Stained Class'' contained subliminal messages that drove the youths to kill themselves. If successful, the suit would force record companies to screen lyrics or face having to pay huge punitive fines in similiar cases.

(JULY 17) UPI - Stock prices on the Tokyo Stock Exchange darted higher for the fifth consecutive trading day Tuesday, encouraged by easing U.S. interest rates.

The blue-chip Nikkei Stock Average of 225 selected shares, which posted a 377.36 point gain Monday, added another 150.55 points to 33,172.28.

The broader-based Tokyo Stock Exchange Price Index of all major shares, which climbed 30.32 points Monday, added 7.15 points to 2,407.31.

An estimated 600 million shares changed hands, compared with 610 million shares Monday.

Advances outpaced declines 505 to 409, while 217 issues remained unchanged.

Elsewhere in Asia, stock prices posted losses in light trading on the Hong Kong Stock Exchange amid consolidation and profit-taking following last week's rally that added more than 130 points to the market.

The closely-watched Hang Seng Index, which fell 18.31 points Monday, dropped 24.91 points to 3,463.94.

Among the narrower indexes, industrials lost 19.60 points, financials inched up 1.13, utilities plunged 70.72 and properties fell 24.07 points.

The Hong Kong market shot up more than 130 points in spirited trading last week.

Volume amounted to a light 1.77 billion shares, down sharply from Monday's heavy turnover of 2.50 billion shares.

In Singapore, stock prices slipped on the Singapore Stock Exchange as bargain hunters moved in following three days of robust gains.

The key Straits Times Industrial Index, which gained 11.54 points Monday, fell 4.90 points to 1,571.04. The narrower All Singapore Index slipped 0.55 points to 446.32.

An estimated 105.6 million shares changed hands, compared with 109.9 million shares Monday.

In Australia, stock prices closed higher on the Sydney Sharemarket on continued general domestic buying.

The closely-watched All Ordinaries Index, which gained 7.2 points on Monday, climbed 15.4 points or 1 percent to 1,623.9.

The key index has gained 8.2 percent since the July 1st start of the fiscal year.

An estimated 109.2 million shares changed hands, compared with 86.1 million shares Monday.

(JULY 17) UPI - The Nuclear Regulatory Commission is proposing new rules that would allow nuclear plants to extend their operating licenses. The older plants would be allowed to operate beyond the initial 40-year federal license if they take steps to upgrade aging pipes and safety systems. 35 of the nation's 112 commercial reactors face license expiration between the year 2000 and 2014.

The militant environmental group Earth First! staged an anti-logging demonstration at the gates of the Plum Creek Manufacturing Company in Belgrade, Montana, yesterday. Lumber millworkers who were eating their lunch outside scoffed as about protesters chanted and danced around in animal costumes. The Gallatin County sheriff says there were NO arrests.

The family of Yusuf Hawkins, the teen-ager slain last summer by a white mob in New York's Brooklyn section, is expected to refuse a plea from one of the defendants in the case. The lawyer for John Vento says his client will plead guilty to manslaughter to avoid murder charges. But the Hawkins family adviser, the Reverend Al Sharpton says- ''Vento is asking for mercy but he's shown NO mercy to Yusuf or his family.''

Alaska state police shot a female grizzly bear that led its three cubs into an Anchorage neighborhood looking for food. Kathy Melter says she, her husband, and their three children were indoors Sunday when the bears climbed up the second story balcony of their home for the second straight day. Melter says it's too bad officials were NOT able to catch the mother

in a trap, but in her words- ''We caN'T be terrorized.'' State wildlife biologists had been trying to catch the bears for weeks.

#90198u0812 07/17/1990 ~United Press International

WASHINGTON (JULY 17) UPI - The United States posted a trade deficit of $7.73 billion in May, an increase of 5.8 percent over April, the Commerce Department reported Tuesday.

May exports totaled $32.79 billion, up 2.3 percent from the previous month while imports totaled $40.52 billion, a gain of 2.9 percent, according to the monthly report compiled by the department's census bureau.

The report was generally in line with forecasts by private economists.

The Commerce Department said the nation's trade deficit with Japan plunged 33 percent in May to $2.97 billion for a year-to-date shortfall of $16.52 billion.

The United States also reported an $811.6 million trade surplus with Western Europe in May, for a year-to-date surplus of $1.36 billion, but also tallied a deficit of $1.71 billion with the Organization of Petroleum Exporting Countries.

The year-to-date deficit with OPEC stands at $9.56 billion.

The government said that petroleum imports, which have been at their highest levels since the 1970s gasoline crunch, surged to an estimated 277,558 barrels in May, the largest total since January. But the monthly pricetag, $4.32 billion, was the second lowest for the year, reflecting a worldwide oil glut.

''The April-to-May change in exports reflected increases in automotive vehicles, parts and engines, capital goods and consumer goods and a decrease in foods, fees and beverages,'' the Commerce Department said.

''The April-to-May change in imports reflected increases in industrial supplies and materials, and automotive vehicles, parts and engines, and a decrease in capital goods,'' the department also said.

Looking ahead, a market letter by Mitsubishi Bank in New York, said ''The recent weakness in the economy has held down import demands.''

''Our monthly foreign trade survey of air carrier companies, seaports, and trucking firms that are involved with moving imports and exports, remains optimistic that the pace of exports will continue to outpace imports,'' the letter indicated.

''Nonetheless, in the near term, as manufacturing activity strengthens a bit, the pace of imports could temporarily outpace exports.

#90198u0846 07/17/1990 ~United Press International

WASHINGTON (JULY 17) UPI - U.S. industrial production advanced 0.4 percent in June while capacity utilization inched up 0.2 percentage point during the month to 83.5 percent, the Federal Reserve said Tuesday.

Private economists had expected a 0.2 percent increase in production in June, and a slightly better showing in the utilization of the nation's plants and factories.

''The output of motor vehicles and parts rose substantially, and the extremely hot weather pushed up utility output,'' the Federal Reserve said. ''Combined, these increases accounted for three-fourths of the June increase.''

#90198u0892 07/17/1990 ~United Press International

WASHINGTON (JULY 17) UPI - U.S. industrial production advanced 0.4 percent in June, according to government figures.

Private economists had expected a 0.2 percent increase in production in June.

''The output of motor vehicles and parts rose substantially, and the extremely hot weather pushed up utility output,'' the Federal Reserve said. ''Combined, these increases accounted for three-fourths of the June increase.''

The Federal Reserve also estimated that industrial production increased 0.6 percent in May after falling by a revised 0.2 percent in April and gaining a revised 0.4 percent in March.

By selected industries, production gained 0.7 percent in June in the consumer goods sector, advanced 0.9 percent for business equipment, but fell 0.5 percent for construction supplies. Materials gained 0.2 percent.

By industry groups, June manufacturing production was up 0.5 percent, with production of durable goods - expensive items made to last three or more years - also ahead by 0.5 percent. Non-durable goods posted a 0.4 percent gain.

Although production at the nation's mines tumbled 1.5 percent in June, production at American utilities soared 2.1 percent for the month, the Federal Reserve said.

#90198u0941 07/17/1990 ~United Press International
(JULY 17) UPI - Philippine officials say the death toll from yesterday's earthquake has risen to 196. Search teams are concentrating their efforts on two towns north of Manila where 750 people are believed to be trapped beneath crushed hotels and factories. Officials say there's hope some victims may be alive because sounds can be heard coming from the rubble.

U-S Ambassador to the Philippines Nicholas Platt says three officials of the U-S Agency of International Development were rescued from the rubble of the Nevada hotel alive. But a fourth official pulled from the debris was dead. The quake has left about 20-thousand people homeless.

Poland entered the ''two-plus-four'' talks in Paris today, seeking an immediate border treaty with Germany. But it appears Poland's bargaining power is diminished since Soviet President Gorbachev yesterday announced he has NO objections to a united Germany in NATO.

Arab League foreign ministers say they will try to re-start U-S P-L-O talks that were suspended by President Bush. But the ministers, attending a meeting in Tunisia, also say they support P-L-O Chairman Yasser Arafat's refusal to give in to Washington's demands for re-opening the dialogue.

Iraq has freed a British nurse who had been jailed on espionage charges that led to the hanging death of her journalist companion. Iraqi Embassy officials in London say President Saddam Hussein cut short Daphne Parish's sentence on humanitarian grounds. British officials say the woman's release is a step toward better relations.

#90198u0949 07/17/1990 ~United Press International
(JULY 17) UPI - In Tokyo, the Fisheries Agency says Japan will suspend driftnet fishing in the South Pacific when new season begins in the fall. Driftnetting also is called the ''wall of death'' fishing technique because it randomly traps fish and sea mammals, such as dolphins. The United Nations has set a ban on driftnetting to begin in December.

The world-famous Empire State Building proved as sturdy as it is tall yesterday when a fire broke out on the 51st floor. Depression-era construction techniques are being credited for helping contain the blaze which could have devastated the skyscraper. It took firefighters about one hour to extinguish the fire.

E-P-A Administrator William Reilly says the United States and Canada will

begin negotiating an air quality accord in Ottawa next month. Reilly says the talks will focus on acid-rain, improving the Great Lakes, and eliminating other cross-border pollutants.

The American Academy of Pediatrics wants hospitals to place all newborns in infant car safety seats when they are discharged. A statement in the July issue of the academy's journal says newborns should be taken home in car safety seats whether they are healthy, premature, or infants with special needs.

A Los Angeles judge has ordered a woman who has been harassing actress Teri Garr to stop contacting her. Garr said the woman, who goes by several aliases, including Morgan Brook and Susan Hull, repeatedly called her on the phone, wrote letters and would knock on her door sometimes as often as three times a day.

-30- 1718

#90198u0956 07/17/1990 ~United Press International

LUSAKA, ZAMBIA (JULY 17) UPI - President Kenneth Kaunda Tuesday blamed the British news media for causing Iraq to hang an Iranian-born British journalist on espionage charges and to jail a British nurse, who was just released at Kaunda's request.

Daphne Parish, 52, was freed by Iraq Monday and flown to Zambia, where she appeared at a news conference Tuesday with Kaunda.

Kaunda said the British press carried ''outrageous articles'' over the charges that Parish and journalist Farzad Bazoft had spied for Israel, and the reports had ''angered'' Iraqi President Saddam Hussein.

Bazoft was hanged last March and Parish was sentenced to 15 years in jail.

''It is this outrageous approach to human problems that made Saddam carry out the sentences,'' Kaunda said, adding Bazoft ''might have lived if it had not been for the British press.''

Parish, who arrived in Lusaka by private jet from Baghdad late Monday after Hussein released her virtually unannounced, looked composed and relaxed after serving four months in jail. She thanked Kaunda for ''taking the initiative'' toward her release and said she would return to Britain on a commercial flight Tuesday night.

But Parish left most questions to Kaunda, who noted, ''I want to welcome our sister Daphne to Zambia from our brotherly people of Iraq, from my illustrious brother Saddam Hussein.''

Kaunda revealed he wrote a secret letter to Hussein appealing for Parish's

release, who was jailed in March, and clemency for the 31-year-old Bazoft.

Parish's release was expected to improve Iraqi-British relations, which deteriorated sharply after Iraq hanged Bazoft.

Kaunda is also expected to consolidate his position as a statesman and leader only weeks after bloody food riots and an abortive coup attempt in late June presented the most serious threat to his 26 years of uninterrupted rule.

Iraqi Ambassador to Zambia Moussa Alsoudani said Kaunda's request for Parish's freedom on humanitarian grounds was granted because ''everyone is happy when a person is released at the request of a friendly country.''

Bazoft was on an assignment for The Observer newspaper, when Iraq charged Parish helped him enter a restricted military base near Baghdad disguised as a doctor. He was investigating a report, denied by Iraq, that some 700 people were killed in a massive explosion at the base last year, and he collected soil samples in the area.

London said the espionage charges against Bazoft were false and that he was merely overzealous in his search for a story.

Bazoft's execution prompted Britain to withdraw its ambassador to Baghdad, suspend ministerial visits and expel Iraqis receiving training with the British military.

Parish had worked for 15 years as a nurse in Iraq before she was imprisoned.

#90198u0973 07/17/1990 ~United Press International

ATHENS, GREECE (JULY 17) UPI - Iranian President Akbar Hashemi-Rafsanjani said Tuesday officials from Iran and Iraq have been meeting in Geneva to develop a means for establishing a durable peace in the Persian Gulf, Tehran radio reported.

Rafsanjani told a high-ranking council of clerics that Iraq's attitude has improved and prospects for peace are brighter.

''The state of no-war-no-peace between the two countries is to the benefit of the oppressor powers,'' said Rafsanjani, quoted in a Tehran radio dispatch monitored in Athens.

The meeting follows face-to-face talks in Geneva two weeks ago between Foreign Minister Ali Akbar Velayati of Iran and Iraqi Foreign Minister Tariq Aziz. Their meeting was the first since a cease-fire in August 1988

ended the eight-year war between the two countries.

The Geneva talks are expected to pave the way for a summit meeting between Rafsanjani and President Saddam Hussein.

Rafsanjani said seven groups of experts from Iran and Iraq were currently meeting in Geneva to set out each country's position.

He said although Iran is building up its military, ''the peace talks must continue.''

Rafsanjani said the move toward peace in the region ''has had a good effect and has brought about changes in the price of oil.'' It has also resulted in more cooperation between the countries of the Gulf region, he said.

Last week the United Arab Emirates and Kuwait announced large cuts in their oil output shortly after Iranian Oil Minister Gholamreza Aqazadeh began a visit to Abu Dhabi. The production cuts brought about a rise in oil prices on the world market.

Iran and Iraq held several rounds of peace talks between August 1988 and April 1989, but the discussions broke down when Iran insisted that Iraqi troops pull back from territory captured during the war.

Iraq has insisted the two countries press ahead with an exchange of war prisoners, and that Tehran allow Iraq to clear the Shatt al Arab estuary of sunken vessels clogging it since the war began in September 1980.

In April, Saddam broke the deadlock when he suggested in two letters to Rafsanjani that he and the Iranian president should hold a summit meeting to establish peace in the region.

Rafsanjani agreed in principle, but said lower-level officials should hold preliminary talks to set out points of dispute which could then be settled at the summit with Saddam.

#90198u1012 07/17/1990 ~United Press International

ATLANTA (JULY 17) UPI - Former Atlanta Mayor Andrew Young campaigned across Georgia in a final push to win the Democratic gubernatorial nomination and move a step closer to becoming the state's first black governor.

Barring a major upset in Tuesday's voting, Young - with guaranteed support from Georgia's sizable black electorate - was virtually assured of winning at least spot in an Aug. 7 runoff against his top rival, Lt. Gov. Zell

Miller, who leads Young in opinion polls.

Young criss-crossed the state on a flying tour Monday after addressing a predominantly black crowd in the heart of his Atlanta stronghold. Emphasizing his mayoral administration's achievements of bolstering Atlanta's economy and educational opportunities, Young told a group of ministers that he wants the chance to do the same for the rest of Georgia.

"People ... look with envy on Atlanta at what economic development has done for the city, what education has done for its young people," Young said. "They look at the opportunities in Atlanta and say, 'Why hasn't the state done anything like that for us?"'

A judge, ruling on a lawsuit claiming the state's runoff system is discriminatory, decided Tuesday the August runoff can be held. The suit, filed by several black leaders, asked for a change to a plurality system in which the top vote-getter in a primary would win the party's nomination.

Democratic state Sen. Roy Barnes, state Rep. Lauren McDonald, and Lester Maddox, the former segregationist governor who has returned for what likely will be his last political hurrah, were trailing far behind in the polls going into Tuesday's primary. The real test for Young would be in a runoff.

Miller, powered by name recognition resulting from his 16 years in the lieutenant governor's office and his backing of a state lottery to benefit educational improvements, appeared to have has a significant lead over Young. The polls showed Miller as the top vote-getter in Tuesday's primary by some six percent over Young and a 10-point winner in a runoff.

Miller, who billed himself as the "candidate of change," also traveled across the state Monday to urge people to vote and remind them of his support of a state lottery. Polls have shown the lottery to be the single most important issue on the minds of Democratic voters, hence Miller's secret to success.

The winner of the Democratic nomination is likely to meet state Rep. Johnny Isakson in November to determine the successor to Gov. Joe Frank Harris, who will be leaving office after serving the maximum two terms allowed by law. Isakson, the Republican front-runner, may be able to win a majority of the vote in Tuesday's GOP primary and avoid a runoff.

Two other GOP contenders, former Gwinnett County School Board Chairman Bob Wood and former Superior Court Judge Greeley Ellis, traded off in the polls as the runner-up in the race. Former Army Col. Eli "Link" Veazey was a distant fourth.

#90198u1039 07/17/1990 ~United Press International
(JULY 17) UPI - There are conflicting reports from the Philippines as to the number of people killed in yesterday's devastating earthquake. Authorities say the quake killed at least 196 people... including one American... and injured 595. The Red Cross is reporting 221 deaths. Rescue efforts continue to save people who are believed trapped in a half-dozen collapsed luxury hotels and factories.

Economic analysts say that the revised federal budget deficit released by the White House is a sign that the nation is facing severe economic troubles. The projected 1991 deficit jumped about 10-BILLION dollars to nearly 170-BILLION. Barbara Bergmann of American University warns that the combination of the deficit and high interest rates could deepen the effects of a recession.

There's more bad news this morning for the economy. The Commerce Department says the U-S trade deficit climbed to nearly eight-BILLION dollars in May. That's nearly a six-percent hike over April.

NASA rocket engineers are studying whether the fuel leak aboard the grounded shuttle Atlantis can be fixed at the launch pad. NASA official William Lenoir plans to brief reporters today in Washington on the status of the space agency's ongoing investigation into the separate hydrogen leaks, which have grounded two shuttles. NO decisions are expected until after tests this week.

Former Atlanta Mayor Andrew Young is campaigning across Georgia today in a final push to win the Democratic gubernatorial nomination. Thanks to guaranteed support from Georgia's sizable black electorate... Young is virtually assured of winning at least a spot in an August 7th runoff against his top rival, Lieutenant Governor Zell Miller. An August runoff is expected.

BONN, WEST GERMANY (JULY 17) UPI - West German Chancellor Helmut Kohl hailed his meeting with Soviet President Mikhail Gorbachev as a ''breakthrough'' on the way to German unification and expressed confidence Tuesday that all-German elections would take place this year.

A beaming Kohl told a news conference he is now certain the voting will be held Dec. 2. ''I intend to win those elections,'' he said.

He said one of the first priorities after unification will be the signing of a treaty recognizing Poland's borders with what is now East Germany.

Kohl, who returned from talks with Gorbachev in the Soviet Union Monday night, said the agreements he reached with the Soviet leader cleared the way for ''a new page in the history of Germany and Europe.''

Asked how he felt about his meeting with Gorbachev, Kohl said, ''This day, these 24 hours belong to the most important of my life.

''The practical problems we still faced on the way to unity have been solved,'' he said, adding that ''some homework'' still remains to be done.

In what has been heralded as the greatest success in his political career, Kohl obtained Gorbachev's agreement to allow a united Germany to be a member of the North Atlantic Treaty Organization.

Earlier Soviet objections to the concept were the major hurdle in negotiations on the external aspect of German unity, known as the Two-plus-Four process because of the participation of the two German states and the four World War II allies, Britain, France, the Soviet Union and the United States.

Polish Foreign Minister Krzysztof Skubiszewski joined his counterparts from the six nations in Paris for the latest round in negotiations.

Kohl said Tuesday a united Germany will seek to put relations with Poland on a new footing so that ''the past will not catch up with us there.''

He said immediately after unification, the German government will sign an agreement with Poland fully recognizing the Oder-Neisse Line as the border between the two countries.

Although both German parliaments have issued statements recognizing the border, West German officials insist only a united German government can sign a formal border treaty.

Kohl had long stalled on the issue for fear of angering ultra-conservatives in his party who seek the return to Germany of territories east of the Oder and Neisse rivers, ceded to Poland in 1945.

Kohl has recently relented on the issue and said a new Germany will have to formally recognize the border.

He stressed Tuesday that Germany is not ''a world power and I consider it silly to dream the world power dream.''

''The new Germany is not a colossus somewhere in the center of Europe but

is fully imbedded in the European security architecture,'' he said.

Kohl confirmed that Gorbachev had agreed that Soviet troops will leave East Germany within three to four years and that the strength of the German armed forces will be cut - by about half - to 370,000 troops.

Kohl and Gorbachev also agreed Monday that the four wartime allies will lose their post-war occupational status and that Germany will become a fully sovereign state.

''The unification of Germany and Europe are forever linked,'' Kohl said Tuesday.

Kohl also expressed understanding for British concerns about a unified Germany because Britons ''risked their national existence in their fight against Hitler.''

British Trade and Industry Minister Nicholas Ridley resigned Saturday over a controversy sparked by an interview he gave, in which he compared Kohl to Hitler and derided European Community parliamentarians.

''The man had enough punishment,'' Kohl said about Ridley. ''He lost his job and rightly so.''

NEW YORK (JULY 17) UPI - Investors may now compare rates on bank CDs, or certificates of deposit, through a recently launched telephone service. CD Rateline offers New York-area consumers data on the best CD yields offered by more than 100 financial institutions, a company statement said Tuesday.

The service, which can be reached at 1-900-BANK-CDS, costs $1.95 for the first minute and 95 cents for each minute thereafter. CD Rateline is a service of Interactive Communications, a company founded by financial entrepreneurs and brothers Keith and Gary Trauner.

The company said it will expand the service to the Los Angeles and Chicago areas and to Florida state by the end of this year.

#90198u1156 07/17/1990 ~United Press International

BANGKOK, THAILAND (JULY 17) UPI - Opposition parties were set to begin debate on a no-confidence motion Wednesday, charging Prime Minister Chatichai Choonhavan and his entire Cabinet with corruption.

The state-owned television and radio network will broadcast the debate live.

The five opposition parties control only 127 of the 357 seats in Parliament, but they hope their charges will discredit the two-year-old government enough to force Chatichai's resignation and a reshuffle of the six-party coalition government.

''If this government is allowed to continue the administration, there will be more problems that are difficult to solve,'' said Narong Wongwan, leader of the Solidarity Party, the largest opposition party.

''Even though we have not enough votes to overthrow the government, we have enough evidence to show the public that this government is not worthy of this country,'' said Uthai Pimchaichon, a deputy leader of Solidarity.

Uthai said prime minister will be the ultimate target in the censure debate. He said the opposition will start with criticism of Cabinet ministers and conclude with the prime minister.

Opposition sources said Chatichai will be questioned on possession of shares in a trust fund rescued by the government, and allegations he acquired government land for his daughter at a popular beach resort.

Other ministers are under fire for alleged mishandling of government television contracts, rising inflation, destruction of national forests, and sudden increases in personal wealth.

Chatichai has said he will reshuffle his Cabinet to drop those ministers who fail to answer opposition allegations.

#90198u1166 07/17/1990 ~United Press International

GALVESTON, TX (JULY 17) UPI - A German steel mill paid about $2.4 million for the charred Norwegian tanker that exploded and burned off the Texas coast last month, Houston attorney Robert Klawetter said Monday.

The 885-foot Mega Borg, which threatened to break up and spew 38 million gallons of light crude into the Gulf of Mexico, will be towed to Pakistan and cut up for scap, Klawetter said.

An estimated 3.9 million gallons escaped into the Gulf about 57 miles off Galveston, but most of it burned off, evaporated or was broken up naturally by the sun, wind and waves, the U.S. Coast Guard has said.

Klawetter said the buyers' identities have not been disclosed, and the sale was arranged through a ship broker in Gibraltar. "A contract to sell the Mega Borg was signed on July 13," he said. "The new owners are supposed to take possession of the vessel by the 20th.

"The ship is going to be towed to Karachi, Pakistan, where it will be broken up for scrap," Klawetter said. "They anticipate it will take about two months to tow it to Karachi." Klawetter said he did not know what company will do the towing.

An explosion ripped through the Mega Borg's pump room June 8 while crude was being lightered, or transferred to a smaller tanker for transport to a Houston-area refinery. Two men died in the explosion, two are missing and presumed dead and 37 other people were rescued by a nearby vessel.

Klawetter said some parts of the ship, including the engine room, have not been declared free of toxic fumes. The engine room is expected to be searched before the new owners take possession, he said.

Smit American Salvage Inc. still has crews standing by the vessel to make sure no more problems develop. Insurance arbitrators in London will determine how much the salvage firm will be paid for its work, Klawetter said. Arbitration is a routine procedure in the salvage business. The cost of cleaning up the spilled oil has been projected at up to $7 million.

#90198u1172 07/17/1990 ~United Press International

WASHINGTON (JULY 17) UPI - The United States posted a trade deficit of $7.73 billion in May, a modest increase of 5.8 percent or about $400 million over April, as exports continued to show strength, the Commerce Department said Tuesday.

Exports - especially of industrial goods - totaled $32.79 billion, up 2.3 percent from the previous month, according to report by the department's Census Bureau.

But imports hit $40.52 billion, a gain of 2.9 percent.

The government's monthly data, adjusted for seasonal factors, was generally in line with forecasts by private economists.

''Despite the slight worsening, I read it as a positive report on trade mainly because exports are rising,'' said Allen Sinai, chief economist at the Boston Co. ''Trade is the bright spot in our economy at the present time.''

Exports have increased by 12 percent since December, Sinai said.

Jerry Jordon, chief economist for First Interstate Bancorp in Los Angeles, said, ''I think the trade deficit is going to go away faster than most people believe because world demand is rising.''

''We're going to have a mirror image of the consumer-led expansion of 80s '' Jordan said, but this time because of growth in the industrial sectors of Europe and Asia.

The Bush administration expressed satisfaction with the report.

''We can be encouraged by our continued steady export growth,'' Commerce Secretary Robert Mosbacher said.

The Commerce Department said the nation's trade deficit with Japan plunged 33 percent in May to $2.97 billion for a year-to-date shortfall of $16.52 billion.

The United States also reported an $811.6 million trade surplus with Western Europe in May, for a year-to-date surplus of $1.36 billion, but also tallied a deficit of $1.71 billion with the Organization of Petroleum Exporting Countries.

The year-to-date deficit with OPEC stands at $9.56 billion.

The government also said that petroleum imports, which have been at their highest levels since the 1970s gasoline crunch, surged to an estimated 277,558 barrels in May, the largest total since January.

But the monthly pricetag, $4.32 billion, was the second lowest for the year, reflecting a worldwide oil glut.

''The April-to-May change in exports reflected increases in automotive vehicles, parts and engines, capital goods and consumer goods and a decrease in foods, fees and beverages,'' the Commerce Department said.

''The April-to-May change in imports reflected increases in industrial supplies and materials, and automotive vehicles, parts and engines, and a decrease in capital goods,'' the department also said.

Looking ahead, a market letter by Mitsubishi Bank in New York, said, ''The recent weakness in the economy has held down import demands.''

''Our monthly foreign trade survey of air carrier companies, seaports, and trucking firms that are involved with moving imports and exports, remains optimistic that the pace of exports will continue to outpace imports,'' the letter said.

''Nonetheless, in the near term, as manufacturing activity strengthens a bit, the pace of imports could temporarily outpace exports,'' the Mitsubishi letter said.

#90198u1216 07/17/1990 ~United Press International

(JULY 17) UPI - At least one American died in the severe earthquake that hit the Philippines yesterday. U-S Ambassador Nicholas Platt says three

officials of the U-S Agency for International Development trapped in a hotel while attending a seminar were rescued... but another was pulled out of the ruins dead. NO additional details were released.

Authorities say at least 196 people were killed by the earthquake... and rescue workers are working against the clock to save hundreds of others trapped in collapsed buildings.

The nation's trade deficit reached seven-pointBILLION dollars in May... a report generally in line with forecasts by private economists. The May trade figure reflects a five-point-eight percent gain over April. The Commerce Department says May exports totaled 32-pointBILLION dollars, up two-point-three percent from April... while imports totaled 40-point-five-BIllION dollars, up two-point-nine percent.

The Federal Reserve sayus U-S industrial production advanced four-tenths of one percent in June. Capacity utilization moved forward by two-tenths of one percent during the month to 83-and-a-half percent. Private economists had expected a production increase of two-tenths of one percent in June and a slightly better showing in the utilization of the nation's plants and factories.

#90198u1234 07/17/1990 ~United Press International

NEW YORK (JULY 17) UPI - PaineWebber Group Inc. Tuesday reported second-quarter earnings of $14.64 million, or 35 cents a share, down from $15.08 million, or 33 cents a share, in the year-ago quarter.

The lower share results reflected the payment of preferred stock dividends during the quarter, the company said.

Revenues for the period rose 8 percent to $468.2 million, from $432.99 million in the second quarter of 1989.

For the first six months of the year, the brokerage firm reported earnings of $25.4 million, or 55 cents a share, up from $24.2 million, or 44 cents a share, in the year-ago period. Revenues for the six-month period of 1990 were $894.2 million compared with $829.9 million in the same period last year.

Shareholders' equity in the New York brokerage firm amounted to $1 billion while PaineWebber said its total capital amounted to $1.6 billion.

''Reduced earnings from merchant banking investments, the industry-wide softness in investment banking and increased cost of litigation settlements negatively affected the quarter,'' said PaineWebber Chairman Donald Marron, who noted ''solid operating performances'' in the equity business.

PaineWebber, which has about 13,150 employees at 273 offices worldwide, said its total retail customer assets rose to $7 billion by the end of the second quarter, compared with $59 billion at the same period last year.

-30- 1589

#90198u1240 07/17/1990 ~United Press International

NEW YORK (JULY 17) UPI - Attorneys for promoter Don King and heavyweight champion James ''Buster'' Douglas reached a settlement Tuesday that allows King to retain his rights to the fighter's first title defense.

''My rights have been restored,'' King said outside Judge Robert Sweet's courtroom at U.S. District Court where the settlement was announced. ''Due process is a wonderful thing. I get my rights back.''

The specific terms of the settlement were not released, but King said he would retain the rights to Douglas's first title defense, against Evander Holyfield on Sept. 21. However, he would sell those rights to The Mirage Hotel and Casino in Las Vegas, Nev., where the fight will be held.

''King has to be paid for assigning his rights,'' said Robert Hirth, King's lawyer. He refused to disclose how much The Mirage would pay for the promotional rights.

''The Douglas-Holyfield fight will come off,'' King proclaimed. But when he was asked if he would promote it he said, ''No.''

When asked who would, King said tersely, ''Mirage.''

The agreement put to rest King's suit against Douglas and his manager John Johnson for breach of contract and against The Mirage for tortious interference of that pact. Douglas has a suit pending against King for breach of contract.

Also present at the announcement were John Sharer, the lawyer for The Mirage owner Steve Wynn, and Stan Hunterton, Douglas's lawyer.

The first word of a settlement came Sunday, when Douglas told his hometown's Columbus (Ohio) Dispatch an agreement had been reached calling for the champion to pay $7 million to King and Atlantic City, N.J., casino owner Donald Trump. In return, King would have no role in Douglas's scheduled Sept. 21 title defense against Holyfield at The Mirage. If Douglas defeats Holyfield, King would promote a Douglas-Mike Tyson rematch at The Mirage.

Though the attorneys Tuesday would not disclose how much King would be paid to turn his rights over to The Mirage, the promoter said the figures reported Monday ''were in the ballpark.''

Douglas won the title with a stunning 10th-round knockout of Tyson Feb. 11 in Tokyo. He and King have been at odds ever since, with Douglas claiming

King tried to reverse the outcome in Tokyo by charging the new champion unfairly received a long count when he was decked in the eighth round.

Despite an exclusive contract with King, Douglas signed a two-fight deal worth at least $50 million with Mirage owner Steve Wynn within days of his victory over Tyson. The deal with Wynn was contingent on Douglas breaking his contract with King.

LONDON (JULY 17) UPI - Five British companies in the Anglo-French group building a tunnel across the English Channel have been charged with violating safety laws in an accident that killed a construction worker, officials said Tuesday.

The Health and Safety Executive, a government-appointed agency that oversees enforcement of occupational safety rules, said the companies failed to ensure the safety of Gary Woodward, 32, who was crushed between the tunnel boring machine and other equipment on Oct. 23, 1989.

Woodward was one of six workers killed since January 1989 on the British side of the 31-mile Channel Tunnel rail link, agency spokesman Mark Wheeler said.

He said two deaths have been reported on the French side of the project but added that France has different reporting rules on construction-related accidents and suggested there may have been more fatalities.

The safety agency said the charges lodged Monday would be the second death-related prosecution case they have brought against the five companies: Balfour Beatty Construction Ltd., Costain Civil Engineering Ltd., Tarmac Construction Ltd., Taylor Woodrow Construction Ltd. and Wimpey Major Projects Ltd.

The firms comprise the British half of Transmanche Link, which along with five French companies are building the Channel Tunnel, the first fixed link between Britain and continental Europe. The tunnel is set for completion by 1993.

The government also reported charges Monday against the suppliers of the tunnel boring machine - The Robbins Co. (UK) Ltd. and Markham and Co. Ltd. - on two counts, including failing to ensure the machine was designed and built to be safe.

All seven companies are scheduled to appear before Dover and East Kent Magistrates Court on Sept. 26.

The British companies were fined the equivalent of $80,000 in March after pleading guilty to a breach of the Health and Safety at Work Act of 1974, which requires companies ''to ensure so far as was reasonably practicable the health, safety and welfare of all employees.''

The charge was brought in connection with the death of David Simes, 36, who was crushed against the framework of the tunnel boring machine by an overhead crane in February 1989.

Of the other four Channel Tunnel workers killed, Wheeler said the HSE is investigating three of the deaths. The HSE took no action in the fourth case after deciding criminal charges were unwarranted, Wheeler said.

#90198u1245 07/17/1990 ~United Press International

WASHINGTON (JULY 17) UPI - Forty North American fishes have become extinct this century and hundreds more are endangered, including several species once so abundant they were commercially fished, new studies show.

The studies, published in the most recent issue of Fisheries, the Bulletin of the American Fisheries Society, update a 1979 survey that found 251 North American fishes have been pushed to the edge of oblivion by industrial and agricultural development that has polluted or drained streams and lakes.

The new studies name 364 fishes in North America that warrant protection, including 103 classified as ''endangered,'' 114 as ''threatened'' and 147 classified as ''special concern''.

Authors of the study said that ''endangered'' fishes are those in danger of extinction throughout a significant portion of their ranges and ''threatened'' refers to fish likely to become endangered within the foreseeable future.

Fish of ''special concern'' are those that may become threatened or endangered by minor disturbances in their habitat or that require additional information to determine their status.

Jack Williams, chairman of the American Fisheries Society's Endangered Species Committee and one of the authors of the studies, said acid rain, mining and irrigation - particularly desert farming - had taken the biggest toll in destroying vital habitats for many fish species.

Among the fish wiped out this century:

-The thick tail chub, once one of the most common fishes in Central

California, vanished during the last few decades as a result of intensive agricultural production that drained the slow-flowing stream beds and lakes that it preferred.

-The blue pike, a popular sport and commercial fish, was found in teeming numbers in the Great Lakes in the early part of the century, only to die out in the late 1960s due to its inability to tolerate growing pollution.

-The longjaw and deep water cisco fish supported a thriving commercial fishery in the Great Lakes just 50 years ago, but succumbed to overfishing.

Williams said while over-exploitation was a factor in wiping out certain fish, most extinctions were caused by broader environmental factors.

''Overall, we are not managing our bodies of water well and the health of aquatic systems are declining,'' said Williams.

He said pollution is so widespread that even fish with large historical ranges - not confined to certain rivers - are threatened.

Williams pointed to the pallid sturgeon, which he said was once a common fish throughout the Mississippi River system, from Montana to Louisiana.

Despite the sturgeon's huge historical range, Williams said, ''it is endangered and in critical shape. This shows how much we have modified this habitat.''

Regions in North America suffering the greatest loss of aquatic life are the Great Lakes, Great Basin, Rio Grande, Valley of Mexico and Parras Valley in Mexico.

Williams said a strong controversy is brewing now over the Colorado River, where virtually all of the native fish species are endangered or of ''special concern.'' In particular, he said, irrigation projects for desert farmers are rapidly sending the razorback sucker and the Colorado squaw fish toward extinction.

#90198u1298 07/17/1990 ~United Press International

MANILA, PHILIPPINES (JULY 17) UPI - Rescuers using spotlights and generators worked into the early morning Wednesday to free hundreds of victims trapped by a major earthquake that killed at least 302 people, officials said.

Rescue efforts were concentrated on the devastated towns of Cabanatuan and Baguio, where about 750 people were reported trapped in a half-dozen toppled hotels and factories.

Television news reports showed the hotels crumbled like accordions, including the luxurious Hyatt Terraces and the Nevada Hotels.

''There are cries of children and voices of people in these hotels,'' said Rudy Roxas, a rescue coordinator in Baguio told a Manila radio station. ''We can't say how many there are but the rescuers were trying to reach them.''

Officials said the earthquake, which hit at 4:26 p.m. Monday, measured 7.7 on the open-ended Richter Scale and was centered at Cabanatuan, 60 miles north of Manila. It was the most powerful temblor to strike the Philippines in 14 years.

Aided by U.S.-supplied lights and generators, rescuers worked throughout Tuesday night and into Wednesday morning, battling rain and time to rescue the hundreds of people still trapped in the rubble.

U.S. military helicopters airlifted 25 victims, including four Americans, for treatment in a hospital at Clark Air Base, Air Force spokesman Lt. Col. Ron Rand said.

U.S. Ambassador to the Philippines Nicholas Platt said three officials of the U.S. Agency For International Development trapped at the Nevada Hotel while attending a seminar had been rescued. He said a fourth U.S. aid official died in the hotel but his name was not immediately released.

The Military Civil Defense said the quake had killed 302 people and injured 672. The dead included 81 in Baguio, 54 in Dagupan City in Pangasinan, 26 in La Union Province, 122 in Nueva Ecija, one in Tarlac and 10 in metroplolitan Manila.

The Red Cross said 19,183 people were homeless.

Baguio, 120 miles north of Manila, remains isolated because of landslides and downed communications and power lines. At least 70 aftershocks have been recorded, officials said.

President Corazon Aquino, accompanied by her 18-year-old daughter Kris, flew by helicopter to Cabanatuan City in Nueva Ecija Tuesday. She consoled relatives of the victims at a building near the toppled six-story Philippine Christian College, where crews were attempting to rescue some 100 people pinned inside.

Aquino later declared an emergency in five hard-hit towns to allow swift relief and rehabilitation operations.

Twenty mangled bodies had been recovered from amid the slabs of concrete and twisted steel in the school that folded like an accordion, officials said. Workers using chain saws, blow torches and flashlights rescued more than 100 students overnight.

In Washington, the Pentagon said it had received no reports of deaths or injuries among the 15,000 U.S. military personnel in the Philippines, including those at Camp John Hay near Baguio.

U.S. civilian rescue teams with search dogs were on their way to the Philippines to assist in rescue efforts, the Pentagon said.

U.S. Ambassador to the Philippines Nicholas Platt contacted Aquino and Philippine Defense Secretary Fidel Ramos and told them the United States has made an initial aid commitment of $25,000, said State Department spokesman Richard Boucher.

Philippine-based U.S. troops airlifted to Cabanatuan and Baguio helped in the rescue effort.

''Obviously, we can't clean up this mess in one day,'' said 1st Lt. Kim Hawk, head of a team of 100 U.S. troops airlifted from the nearby Clark Air Base.

In Baguio, officials said 21 bodies taken from collapsed buildings were brought to the campus of St. Louis University, where weeping relatives tried to identify them.

Aside from the rescue effort at the hotels, workers also were trying to retrieve 31 people buried at the University of Baguio who are feared to be dead, workers said.

Cadets at the Philippine Military Academy led the rescue effort at the factories at the export zone, the armed forces spokesman said. Officials requested for medicine, painkillers and jackhammers and helicopters flew survivors from stricken buildings to the PMA parade grounds where tents were put up.

#90198u1318 07/17/1990 ~United Press International

WASHINGTON (JULY 17) UPI - The government has ordered the makers of fish oil capsules to stop claiming they reduce cholesterol levels or cut the risk for heart disease, officials said Tuesday.

The Food and Drug Administration sent letters to 67 fish oil manufacturers June 28 requiring them to stop making the claims because there is insufficient evidence to support them, said FDA spokesman William Grigg.

''While there are some studies that indicate some promise in this regard ... FDA has decided that the evidence is not so clear cut it should be commercialized,'' he said.

Annette Dickinson of the Council for Responsible Nutrition in Washington, a trade organization for food supplement manufacturers, said the group was surprised and disappointed by the action and intended to appeal the decision.

''Their decision was made on the basis of a 2-year-old submission from us. There has been an abundance of new evidence in the past two years that further supports our position,'' she said. ''We continue to believe that some type of claim about fish oils is appropriate.''

The FDA would consider any new evidence and might reverse the decision if enough data is produced to support the claims, Grigg said.

''This doesn't mean that a year from now you might not have enough data to justify these claims. It's just right now you don't,'' he said.

The agency previously banned a wide range of health claims about fish oil ranging from benefits for diseases ranging from AIDS to arthritis, he said.

''We held up on the cholesterol claims until we reviewed those and discussed them,'' he said.

Meantime, the agency has also requested fish oil manufacturers to submit

evidence supporting the safety of fish oil.

''We'd like the associations involved to provide additional historical data on the safe use of these oils to make sure they are oils that are generally regarded as safe and we can have confidence are not harmful,'' he said.

The potential benefit of fish oil first surfaced several years ago when studies found that Eskimos and other people who ate large amounts of fish had lower cholesterol and heart disease rates.

Since then a number of studies have indicated a type of fatty acid in some fish oils may reduce the risk for heart attacks - America's No. 1 killer - by reducing the levels of artery clogging cholesterol in the blood.

But other studies have produced conflicting results, and many scientists still question the value of fish oil for reducing the risk of having a heart attack.

JOHANNESBURG, SOUTH AFRICA (JULY 17) UPI - Nelson Mandela returns home Wednesday after a triumphant 45-day world tour to face deep rifts in the black opposition, government charges he is stalling on talks and a right-wing backlash against racial reform.

Mandela, whose supporters have planned a tumultuous welcome at Johannesburg's Jan Smuts airport to coincide with his 72nd birthday, leaves behind a string of meetings with leaders in 14 nations of Europe, North America and Africa to confront barriers to negotiations aimed at ending white minority rule.

''After all that adulation ... and latitude he was allowed, Mandela must realize he's coming back to a lot of challenges,'' an official of the Department of Foreign Affairs said Tuesday.

His first problem will be coping with assassination threats from the extreme right.

News reports last month said a shadowy group led by a former Nazi was planning to gun down the African National Congress deputy president and de facto leader on the airport apron.

Mandela brushed aside the issue Monday in Mozambique, his last stop.

''I can't afford to worry too much about that,'' he said.

Mandela has noted his longer-term challenges are more important.

He carried across the world the message that only a maintenance of trade sanctions against the government in Pretoria will force it to abandon white minority rule. He said he believes most leaders were receptive to the message.

But the 12-nation European Community, while keeping its sanctions package in place, decided during Mandela's tour to relax time limits for change, and President Bush differed with the black leader when Mandela said President Frederik de Klerk deserves no reward for his racial reform program.

Mandela caused some irritation in Europe and the United States with his praise for longtime ANC supporters Cuba, Libya and the Palestine Liberation Organization and his casual remarks that Britain and the Irish Republican Army should meet as equals to end Northern Ireland's violence.

But his overall statesmanship annulled most of the damage, ''and now I have to get on with the most important matters,'' he said in Mozambique.

The ANC rejects government charges it is stalling in beginning real negotiations over a post-apartheid constitution, saying Pretoria has not yet met all its conditions.

The ANC also demands that the government free all of some 1,500 political prisoners, remove troops from black townships, allow the unrestricted return of an estimated 20,000 exiles and lift a state of emergency in strife-torn Natal province.

De Klerk says the ANC should show signs of good faith by abandoning its 30-year armed struggle against white minority rule.

The parties have undertaken to hold their second round of talks over the obstacles to negotiations - the first was on May 2-4 - as soon as possible.

Mandela has tried to make peace among the black opposition.

To the left of the ANC is the hard-line Pan-Africanist Congress, which rules out all talks with Pretoria until apartheid is abolished, and to the right the Zulu-dominated conservative Inkatha, accused by anti-apartheid alliances of being too close to the government.

Right-wing terrorism threatens to mar any process of talks.

A spree of urban bombings over the past two weeks aimed at mainly black targets has unnerved whites as well as blacks and frustrated a government already edgy over reaction to its reforms.

De Klerk has vowed to stamp out the right-wing threat, which Mandela last week called ''without doubt, a serious factor to consider.''

But the black leader has also noted, ''Nothing is going to stop us from eventually gaining our rightful, free position in this society.''

#90198u1341 07/17/1990 ~United Press International

MONTREAL (JULY 17) UPI - Civil rights lawyer William Kunstler will join Mohawks trying to negotiate an end to a seven-day standoff with police that earlier claimed the life of a police officer.

Kunstler, of New York City, was scheduled to arrive Tuesay in Montreal, a spokeswoman said. He was invited by the Mohawks to join their negotiating team.

''He's identified with movements like this,'' Mahtowin, a Kunstler spokeswoman who uses her Sioux Indian name, said in New York.

A Canadian Armed Forces spokesman, Capt. Rick Jones, said administrative staff had been moved into the area in case the government orders army involvement in the situation. But Jones denied reports that troops were being prepared for action.

More than 1,000 police have laid siege to a Mohawk encampment on the Kanesatake reserve next to Oka, Quebec, outside Montreal since last Wednesday following an abortive police assault.

The Mohawks occupied the Oka site and set up a roadblock four months ago to prevent the expansion of a golf course on land they claim is theirs.

Police eased their blockade Tuesday and are allowing Mohawks to bring small amounts of groceries into the encampment.

Also, Red Cross personnel were allowed in to treat minor injuries and police reportedly placed a cellular phone in the encampment to help communicate with the Mohawks.

Negotiations between the Mohawks and the Quebec provincial government were set to resume Tuesday afternoon.

Kunstler is helping defend Mohawks accused of obstructing a federal investigation into the shooting down of a Vermont National Guard helicopter last March over a Ganienkeh Mohawk encampment near Altoona, N.Y.

Kunstler also was involved in negotiations in 1973 of the Indian

occupation at Wounded Knee, S.D. Kunstler also was involved in negotiations to end the Attica, N.Y., prison occupation in 1971.

Jones said administrative and support personnel have been moved to Montreal in case the government orders the army to intervene in the standoff.

''They could be used to facilitate Canadian Forces supports to the provincial authorities if requested,'' Jones said.

A Quebec police officer killed in last Wednesday's assault on the Kanesatake Mohawks was buried Monday. Police say it may never be known if a police or Mohawk bullet felled Cpl. Marcel Lemay, 31.

Indians throughout Canada are demanding the federal government get involved in the negotiations and reportedly are planning road blockades and demonstrations across the country to press their case.

A protest was planned Tuesday on Parliament Hill in Ottawa.

At the Kahnewake reservation just south of Montreal, tension continues to mount between French-speaking residents of the adjacent town of Chateauguay and Mohawks who blocked a bridge in solidarity with the Kanesatake Mohawks.

The blockade cuts off a main link to Montreal, forcing commuters to make long detours, and is becoming a rallying point for anti-native sentiment among French-speaking Quebecers expressing their desire for the province to separate from Canada.

Hundreds of Chateauguay residents have gathered to burn Mohawks in effigy, and to warn residents not to sell food to the Mohawks. But there are also reports that residents are smuggling food into the Mohawk encampment.

There has still been no movement by either side to comply with an agreement reached Saturday that would have the police reduce their contingent at Oka in exchange for the dismantling of the bridge blockade.

Police at both standoff sites have been accused of assaulting Mohawks and reporters. Officers have refused comment on their numbers and tactics.

Mohawks from the troubled St. Regis reserve, which straddles the U.S.-Canadian border near Massena, N.Y., have joined the hundreds of Indians at the golf course in Oka.

#90198u1359 07/17/1990 ~United Press International

BEIRUT, LEBANON (JULY 17) UPI - Shops on the once-bustling streets of East Beirut's Nabaa neighborhood have reopened with the relative calm of a Vatican sponsored cease-fire but few Lebanese Christians venture forth to

risk their safety or their savings.

''I open my shop every day, but I don't receive customers,'' said Agob Wartanian, 40, whose stock of precious pieces of gold glinted in a dusty window along a shell-pocked street.

''People appear to tend to save their money for another possible period of violence,'' he sighed. ''They feel that the present truce may collapse.''

Troops of two rival Christian warlords have been using the streets of Christian East Beirut as a battleground in a turf war since January.

A militia loyal to Samir Geagea, a 39-year-old who backs an Arab League-mediated peace plan, has been attempting to dethrone Gen. Michel Aoun, who has controlled Beirut's 310-square-mile Christian sector for years with the backing of his tough, well-disciplined troops.

The Vatican negotiated a cease-fire between the two rivals that has been in effect since May 17, but previous cease-fires have given way as the forces lobbed heavy artillery and rockets at each other, smashing apartment buildings, schools and parks.

For Christian East Beirut, life has become one of constant tension and uncertainty, made worse by the fact the forces of the two Christians have been beefing up their positions in recent weeks. Many war-weary residents believe the cease-fire is just breathing room for the rivals to revamp their positions as they prepare to slug it out once more.

The Armenian neighborhoods of Dora, Nabaa and Burj Hammoud are largely intact, spared the heavy hits of the war, but residents say they have suffered all the same.

''I and my two children and wife were not physically hurt during the latest warfare, but I don't feel psychologically sound,'' said a 38-year-old Armenian money changer who gave his name as Garabet.

The smartly dressed businessman said he feels constanst distress.

''Many relatives and friends were hurt or suffered losses in the fighing '' he said. ''We feel trapped in a vicious circle since the civil war broke out in 1975.''

The East Beirut turf war has been the latest in a series of internal struggles in Lebanon that have taken the lives of more than 135,000 people since 1975, the start of the civil strife.

The inter-Christian struggle between Aoun and Geagea has killed more than 1,000 people since January and forced some 200,000 Christians to flee the

country for a more secure life. The exodus has triggered fears that there may not be many Christians left to rule once the power struggle is ended.

In the nearby neighbrohood of Ashrafiyeh, a predominately Maronite Christian area encircled by Aoun's followers, the effects of war are everywhere.

Many roads are blanketed with the debris of battle - twisted metal, burned out cars and blocks of concrete. But shops, pharmacies and bakeries were opened over the weekend, and merchants displayed selections of fruit, fresh vegetables and bread on roadside wooden stands.

In the smouldering summer heat, dozens of children picked their way through the streets on their way home from school.

''It's a terrible experience,'' said Rola Haddad, 17, a student at the Saint Coeur seconday scool in Ashrafiyeh. ''We are forced to attend extra classes every day to complete the scheduled program. It seems we will be deprived of long picnics in the mountains because we have to study more.''

May Shukair, the director of the Anglican School For Greater Beirut, said she has decided to cancel several classes, notably music and sports, so that her students can complete the year's studies that were interrupted by the fighting.

One resident, Gabriel Karam said his three daughters have suffered from the interrupted studies and condensed program.

''I try to help them study at home but it's very painful,'' he said. ''Our children bore the brunt of the war.''

Camille Mourad, the director of the Sagesse School, contends ''many students have lost the capability to concentrate'' because of the constant fighting.

But on the shell-pocked gate of the school building, a statement by the great Lebanese philospher, Jibran Khalil Jibran, the author of the Prophet says:

''I would have chosen Lebanon as my country in case I was born without one.''

JAKARTA, INDONESIA (JULY 17) UPI - A Saudi envoy insisted Tuesday there was no sabotage or violence behind a recent tunnel disaster near the holy city of Mecca, where more than 1,400 Moslems died during the annual hajj pilgrimage.

Abdul Aziz al-Zamil, the Saudi minister of industry and electricity, extended a special letter of condolence from Saudi King Fahd to President Suharto over the deaths of more than 600 Indonesian pilgrims in the tunnel tragedy.

The Saudi minister later told reporters his government has denied all accusations that sabotage or electrical short circuits caused hundreds of people in the tunnel to panic and try to escape, a stampede that resulted in the deaths of 1,426 pilgrims.

''There was no demonstration or violence among the hajj pilgrims,'' Al-Zamil said. ''There was also no explosion at the time.''

However, he confirmed that seven pilgrims fell from a bridge near the tunnel because of overcrowding.

Indonesian Religious affairs Minister Munawir Syadzali, who accompanied Suharto at the meeting with the envoy, said more information was needed to determine the causes of the stampede.

''Therefore, the president has assigned me to go back to Saudi Arabia for further investigation about the tragedy,'' said Syadzali, who is scheduled to depart for Saudi Arabia Thursday, accompanied by Parliament members.

Al-Zamil's visit to Indonesia take place as some Indonesian parliamentarians and Moslem leaders have criticized the Saudi government's handling of the tragedy.

Syadzali, who was in Saudi Arabia when the incident took place, said Saudi authorities buried Indonesian pilgrims in the absence of Indonesian officials in a mass funeral one day after the tragedy occurred.

This year's hajj pilgrimage drew a record high 81,000 Indonesian pilgrims, including three government ministers and several senior officials. Indonesia has the world's largest Moslem population.

PRAGUE, CZECHOSLOVAKIA (JULY 17) UPI - A hostage crisis at the Czechoslovak Embassy in the Cuban capital of Havana, which developed after five Cuban dissidents sought refuge, appears to be over, Czechoslovak authorities said Tuesday.

Shortly after the five Cuban asylum seekers sought refugee last week, seven other Cubans - suspected of being agents - entered the embassy and took the original five prisoners along with several Czechoslovak diplomats.

Czechoslovak radio reported Tuesday the Cubans had not actually been seen leaving the embassy grounds, but a spokesman for the Czechoslovak Foreign Ministry said, ''No Cubans are now in the Czechoslovak Embassy.''

Details were sketchy, and the ministry spokesman said it was not known where the Cubans had been taken or whether the original five asylum seekers still seek to leave for Czechoslovakia.

Czechoslovak Foreign Ministry spokesman Lubos Dobrovsky told the CTK news agency that the hostage-takers ''used karate holds and blows which made Czechoslovak diplomats believe they had had professional training.''

Dobrovsky also told the news agency that only a few minutes before the seven Cubans attacked the embassy building, the police cordon around the embassy compound had been reinforced and TV crews appeared.

One of the original five was taken to a hospital late Monday reportedly suffering from unspecified heart problem.

Deputy Foreign Minister Vojtech Wagner left for Havana aboard a regularly scheduled flight Monday night to pursue talks with the Cuban authorities.

VATICAN CITY (JULY 17) UPI - Pope John Paul II has named Lawrence Patrick Henry as archbishop of the Metropolitan Church of Cape Town, South Africa, the Vatican announced Tuesday.

Henry, 55, had been auxiliary bishop and archdiocesan administrator in Cape Town, where the post of archbishop fell vacant some time ago.

The new archbishop was born in Cape Town on July 27, 1934, ordained as a priest on Dec. 22, 1962, and named titular bishop of Cenculiana on April 27, 1987.

#90198u1404 07/17/1990 ~United Press International

WARSAW, POLAND (JULY 17) UPI - A government commission has lowered the number of people believed to have perished at the Auschwitz death camp during World War II from 4 million to 1.5 million and conceded the overwhelming majority were Jews.

The decision to revise the official number of those killed in the Nazi camp was a formal rejection of original figures generated after the war by the Soviet Union, which still holds the records kept by the camp's commanders.

It is also in line with figures used by historians in West Germany, the United States and Israel who have documented the number of victims of the Holocaust.

Poland's former communist government relied on the figure of 4 million as part of a propaganda effort to make Auschwitz a symbol of Nazi oppression of all peoples, not just the Jews.

The revision was made by a commission appointed by the Culture Ministry which is determining the future direction of a museum at Auschwitz, known in Polish as Oswiecim.

A Soviet commission which came to Auschwitz in February 1945 after its liberation put the number of victims at more than 4 million. That number was questioned by historians in the West, but not in Poland until very recently.

Franciszek Piper, head of the history department of the Auschwitz Museum, told the Solidarity newspaper Gazeta Wyborcza that examination of the evidence shows at least 1.1 million people died in the camp, including 960,000 Jews. Some 233,000 survived Auschwitz.

The newspaper said the real figure may be higher but does not exceed 1.5 million.

The commission examined transport records, numbers assigned to prisoners and statistical data from ghettos around Europe to arrive at the figure.

Along with the Jews, 150,000 Poles, 23,000 Gypsies and 15,000 Russian prisoners of war were brought to the concentration camp.

Sam Eskanazi, a spokesman for the U.S. Holocaust Memorial Museum in Washington, said the change by the Polish commission reconciles the numbers of Auschwitz dead with those generally accepted by Western historians.

He said it does not change the figure of 6 million Jews killed by the Nazis.

The question of how many people died at Auschwitz and who they were hit a raw nerve among Jews last summer when Roman Catholic Cardinal Jozef Glemp said the camp was as much a tragedy for non-Jewish Poles as for the Jews.

The Polish cardinal was defending the right of a group of Carmelite nuns to maintain a convent alongside the Auschwitz grounds, which was protested by Jewish groups around the world. After the protests and intervention from Rome, Glemp agreed that the nuns could find a new home.

The Auschwitz Museum appealed to the Soviet government to return the archives of the camp to help establish the true number of those killed.

Gezeta Wyborcza also reported Tuesday that plaques saying 4 million people died at Auschwitz have recently been taken down from the camp's International Monument of Fascism Victims.

#90198u1419 07/17/1990 ~United Press International

LONDON (JULY 17) UPI - Stock prices closed higher in active trading Tuesday on the London International stock exchange boosted by a buoyant futures market.

The blue-chip Financial Times 100-stock index, which climbed 24.3 points Monday, closed up 8.5 points at 2,415.0. The narrower top 30 industrial average added 12.0 points to 1,912.9.

Volume amounted to around 494 million shares compared with only 346 million shares changing hands Monday.

Analysts said the market was supported early in the session by continued hopes of an eventual cut in British interest rates and an active futures market.

London's strong advances were later undercut as the market ran out of steam, despite an encouraging opening performance on Wall Street, as profit-takers moved in late in the session.

On the economic front, the Treasury reported Britain's public sector

borrowing requirement, the most widely used measure of the government deficit or surplus, showed a deficit of around $4.16 billion in June, compared with a deficit of $2.75 billion in May.

Market forecasters were expecting a deficit of around $1.6 billion for the month.

Analysts said although the deficit was larger-than-expected, the market ignored the report as many investors marked prices higher to seek sellers of stock to cover short positions and to attract more two-way trades.

On the trading floor, among the most widely traded stocks, Fitch Lovell climbed $1.24 to $4.75 after Booker announced it was launching a $554 million bid for the catering and food distribution rival. Booker fell 30 cents to $6.97 on the news.

Elsewhere, Rothmans gained 25 cents to $13.80, Security Services dropped 32 cents to $8.80, RMC fell 24 cents to $10.99 and Micro Focus lost 24 cents to $13.

In Frankfurt, stock prices on the Frankfurt Stock Exchange closed slightly lower in light trading.

The closely watched German Stock Index, which added 0.27 points Monday, eased 2.86 points to 1,929.00.

Traders said there was some options related position-squaring, dragging prices slightly lower.

#90198u1422 07/17/1990 ~United Press International

PORTLAND, Ore. (JULY 17) UPI - Louisiana-Pacific Corp. reported Tuesday second-quarter earnings of $38 million, or $1.01 a share, down 21.5 percent from the record $48.4 million, or $1.27 a share, in the second quarter last year.

The company's sales of $501.5 million in the second quarter were off 4.7 percent from the record $526.1 million figure of a year ago.

Earnings for the first half of the year were $73.8 million, or $1.96 a share, off 16.4 percent from the $88.3 million, or $2.32 a share, in the first six months of 1989. Revenues for the period were $976.3 million, down 1.7 percent from the $993.1 million in the first half of last year.

''Most of the decline resulted from a continued fall-off in pulp markets from the record levels of 1989,'' said Harry Merlo, the company's chairman and president.

''The performance of our building products segment was only slightly below last year's levels, as weakness in lumber was offset by higher prices for Southern plywood and increased volume of our Inner-Seal (strand board) products,'' Merlo said.

In the absence of a dramatic lowering of interest rates and improvement in construction activity, Merlo said the company's performance should remain at below-record levels for the rest of the year.

#90198u1444 07/17/1990 ~United Press International

MOSCOW (JULY 17) UPI - A mild earthquake triggered an avalanche in the Pamirs mountain chain of Soviet Central Asia that killed at least 40 mountaineers, including 13 foreigners, news reports said Tuesday.

The official Tass news agency said 43 people died in the accident Friday, but Vladimir Shataev, coach of the Soviet national mountaineering team, cited 40 deaths and said three climbers likely survived.

In Geneva, the Swiss alpine club also said 43 people died. It said 10 climbers, all Swiss, survived the accident at the two countries' joint expedition base.

Swiss sources, as well as Soviet sources cited by Soviet television, said the avalanche was caused by a mild earthquake.

The avalanche occurred Friday on 23,406-foot Lenin Peak on the border of the Kirghizia and Tadzhikistan republics, but a telegram about the tragedy did not reach the Soviet Mountaineering Federation until Monday, Tass said.

''There has never been a tragedy like this in the history of Soviet mountaineering,'' Shataev said.

Shataev said at least 40 people died in the accident, including 23 Soviets from Leningrad, three from the Tadzhik capital of Dushanbe, one from the Kazakh city of Chimkent, six foreign visitors from Czechoslovakia, four from Israel, two from Switzerland and one from Spain.

The avalanche trapped the victims in a popular camp at 17,400 feet on the highest mountain in the Trans-Alai Range at the northern edge of the Pamirs.

Shataev said three people who had started their descent from the camp are believed to have survived the tragedy, but that a large amount of snow on the mountain was hindering a search effort by 30 people to locate them and to find the bodies of the dead.

The Pamirs, called ''the roof of the world,'' extend into China and Afghanistan on their eastern and southern flanks.

WATAMAGAM, INDIA (JULY 17) UPI - When revenge-seeking paramilitary troops began setting her village ablaze, Ruqayya Bagum fled to a neighboring town with her four children, but her husband remained behind to protect their house.

The security forces, angered by a militant attack on a police patrol nearby, rampaged through Watamagam and neighboring Adina, looting houses and then spraying them with gasoline and setting them afire, witnesses said.

''After I returned, I saw the dead body of my husband lying outside my burned house,'' Begum said Tuesday, while recalling the episode. ''It's all over. Nothing is left for me in this world.''

Paramilitary troops destroyed or damaged 295 houses in the two Kashmiri villages during the July 8 attack. Four villagers from Watamagam were slain in the raid, the witnesses said.

The troops from the Central Reserve Police Force, shot Ghulam Mustafa Zofi 45, a weaver, in the leg, and when he tried to flee, police knocked him to the ground, heaped grass on top of him and set it alight, witnesses said.

''We heard his screams and shouts but we could not go near him because we thought we also would meet the same fate,'' said one middle-aged villager.

Details of the attack on Watamagam and Adina came Tuesday as Indian Foreign Secretary Muchkund Dubey flew to Islamabad, Pakistan, for talks with his Pakistani counterpart, Tanvir Ahmad Khan, on Kashmir.

The four-day visit was aimed at reducing tension between the neighboring

countries over the disputed region, where Moslem militants are waging a violent campaign for independence.

Prime Minister V.P. Singh said he hoped the visit would ''result in the defusing of tensions,'' the Press Trust of India said.

''Our relations with Pakistan are unfortunately not in keeping with the general positive trend in our relationship with our other neighbors,'' the agency quoted Singh as saying in a letter to Indian lawmakers.

India and Pakistan have fought two of their three wars over Kashmir, which is claimed by both countries. India accuses Pakistan of being behind the current secessionist movement in the northern Kashmir Valley.

Moslem separatists in Kashmir have been waging a battle for independence for 2 1/2 years, but the movement gained widespread popular support in mid-January when paramilitary troops opened fire on a group of demonstrators.

Moslem residents of the Kashmir Valley say they need a separate state because the Hindu-dominated administration in New Delhi has for years denied them equal access to development aid, government jobs and educational opportunities.

In the villages of Watamagam and Adina Tuesday, some residents poked through the burned rubble of their three-story homes looking for valuables while others tried to salvage materials for rebuilding.

The village of Adina, 15 miles northwest of the state capital of Srinagar, is mostly made up of weavers who produce Kashmiri shawls. Some of the residents were at work when about 150 paramilitary police attacked the village about noon July 8.

''They sprayed something like gas on our houses, fired at it (with their weapons) and everywhere there was fire,'' said Ghulam Mohammad Ganai, 75. The villagers said the troopers barred them from extinguishing the fires.

''It was only in the evening that a senior police officer came from Srinagar and arranged fire brigades to put out the flames,'' said a government official from the village, who asked not to be identified.

Other residents said police stole valuables from the houses while the village burned. ''They snatched away my golden necklace and even clothes from our house,'' said Halima Bano.

Similar stories were told in neighboring Watamagam, where residents said the police stole cash, jewelry, shawls and clothes.

When police shot dead his 21-year-old nephew, Ghulam Mohammad Mir said he challenged the police official in charge.

"I asked the Sikh commander of the CRPF, 'Why are you killing us?''' Mir said. "He replied, 'It is nothing. We will teach you more lessons, and bitter ones."'

Other residents said it would be difficult for the two villages to overcome the 12 o'clock raid.

''Before noon we were like kings. In the afternoon, we became like beggars '' said Ghulam Din, the Watamagam school principal.

#90198u1480 07/17/1990 ~United Press International

WASHINGTON (JULY 17) UPI - Government regulation of medical devices remains seriously flawed and underreporting of serious problems linked to a crib death monitor shows the need for tougher policies to protect the public, investigators said Tuesday.

Investigators from the General Accounting Office and the Inspector General's Office told a congressional hearing that further steps must be taken to safeguard Americans from the potentially life-threatening risks posed by defective medical devices.

Current Food and Drug Administration regulations enable manufacturers of pacemakers, crib death monitors and similar medical devices to sell their devices without undergoing tests to prove safety and effectiveness. All manufacturers must do to win such approval is show the FDA that their products are substantially equivalent to devices already on the market.

About 94 percent of the 36,000 medical devices currently in use entered the market in such a manner.

''Our review of the (approval) process found material weaknesses which could ... negatively affect the public's confidence in FDA's ability to protect the public health,'' said Richard Kusserow, inspector general for the Health and Human Services Department.

''FDA's reliance upon the 'honor system' does not provide adequate safeguards,'' he added.

The inspector general found many questions about the safety and effectiveness are not identified until after a device is used by the general public.

''For this reason it is critical to have an effective system in place to

detect problems and to take prompt regulatory actions against violative firms when necessary,'' he told a House Energy and Commerce subcommittee.

However, recent investigations have shown some manufacturers apparently are failing to comply with a 1985 law requiring the reporting of deaths and other serious problems associated with devices to the FDA.

A report released Tuesday by the General Accounting Office found ''underreporting of serious problems'' associated with an electronic monitor designed to sound an alarm when a baby at risk of crib death suffers a life-threatening breathing stoppage. About 30,000 of the home monitors, called Model 8200, were sold by Aequitron Medical Inc. of Plymouth, Mass., before the device was replaced by another model last year.

From January 1983 through January 1989, Aequitron received at least 70 complaints of deaths associated with use of the Model 8200 monitor - 56 dated after the death and injury reporting became mandatory, the GAO said. However, only six of the 56 deaths had been reported to the FDA as of September 1989 - and two of the six cases were reported nearly one year after the death occurred, the GAO found.

Aequitron officials could not be reached for comment Tuesday on the report the eighth investigation of medical device regulation the GAO has conducted for the subcommittee in four years.

Carl Wisler, director of the GAO report, emphasized the 1985 regulations require a death or injury to be reported only if it ''reasonably suggests'' a device may have contributed to the problem. And he said the vague language has created serious gaps between manufacturers' and government interpretations of what must be reported.

Wisler said he could not generalize from the Aequitron investigation about whether other manufacturers are underreporting deaths and injuries.

''However, these findings, taken with our earlier findings, raise a concern that the problem-reporting and inspection issues may pertain to a broader segment of the device manufacturing indusry and to the safety and effectiveness of medical devices in general,'' he said.

Wisler and Kusserow supported a provision of bill, co-sponsored by Rep. Henry Waxman, D-Calif, chairman of the subcommittee, that would require hospitals and other medical facilities to report serious problems with devices to the FDA.

Acting FDA Commissioner James Benson testified that such a reporting system ''is neither necessary nor feasible.''

Dr. Sidney Wolfe, director of Public Citizen Health Research Group,

blasted the FDA for failing to move against manufacturers that violate reporting requirements. The FDA lacks the power to impose civil penalties and must resort to criminal action to punish violators.

Wolfe said the FDA has not started criminal proceedings against Aequitron or 34 other companies the the agency found illegally withheld reports of death or injury.

''This attitude of lax enforcement only encourages device companies to behave irresponsibly since they know that even if they are caught they will not be punished,'' he said.

#90198u1481 07/17/1990 ~United Press International

WASHINGTON (JULY 17) UPI - Congress may want to delay final passage of the new farm policy law until budget negotiators can agree on how much to cut in federal spending, Agriculture Secretary Clayton Yeutter said Tuesday.

During a telephone news conference, Yeutter said the farm bill was likely to be altered ''very substantially,'' both to meet spending limits and to accommodate administration objections to policy changes.

Senate leaders planned to begin debate on the five-year bill this week, with the House expected to call its version for debate in the next several days. The administration has threatened to veto the Senate bill because it would spend $5 billion too much and contained some bad ideas.

Negotiations between the White House and Congress on a spending agreement have been fruitless so far. The administration has called for cuts in farm subsidy spending but the House and Senate have aimed at bills that would spend about the same amount of money as if there were no change.

''If Congress passes a farm bill before we have a budget agreement, that bill will have to be revised at a later time ... or, perhaps what is more likely, the farm bill will just be deferred and will not go to final passage until we have a budget agreement and whatever budget parameters are provided for agriculture will have to be inserted in the farm bill,'' Yeutter said during the session with farm broadcasters.

Afterward, he told reporters ''it would only seem logical'' to get the spending guidelines first but the adminstration was not actively seeking to have debate on the farm bill delayed. During the news conference and in comments afterward, Yeutter noted there would be many opportunities to modify the bill before the final version is sent to the White House.

''Whatever does emerge (from the House and Senate) will be changed very substantially in conference (committee deliberations), partially to make

the bill better - and certainly the administration will weigh in heavily in conference and try to have a bill emerge that the president can sign - and partially for budget considerations,'' Yeutter said.

''At some point in time ... we are going to have to deal with the budget issue and that's going to affect policy.''

During the news conference, Yeutter named the seven major administration objections to the House and Senate farm bills. They applied to proposals to prop up crop loan rates, to set a minimum milk suppport price, to give farmers less planting flexibility than the administration proposed, to create a soybean marketing loan, the $59 billion cost of the Senate bill, and House proposals to increase spending on public feeding programs by $5.5 billion.

Yeutter said ''we'll try to'' announce soon tenative terms for the 1991 wheat program so farmers can decide whether to enroll. Terms ordinarilly would have been announced by now but the 1985 farm law expires with the end of the crop year.

Agriculture Undersecretary Richard Crowder said the department was prepared to use the Export Enhancement Program, the major U.S. export subsidy program, ''as aggressively as possible'' to boost wheat prices and to encourage U.S. competitors to agree to trade reforms. The government has forecast the third-largest wheat crop on record this year.

In objecting to changes that would raise loan rates, the administration has included a Senate proposal that would require larger advance subsidy payments to farmers whenever crop loan rates are lowered unilaterally.

Deputy Undersecretary John Campbell said the provision could cost $3 billion billion because of the difficulty in collecting repayments.

#90198u1489 07/17/1990 ~United Press International

(JULY 17) UPI - The all-American pastime knocked the weekly television ratings out of the park last week, as the CBS telecast of the Major League All-Stars baseball game outscored all other shows and landed in the top-rated slot, it was reported Tuesday.

Even the pre-game show of the CBS baseball telecast July 10 was a winner, tying for seventh place with NBC's "A Different World" in the Nielsen ratings for the week ending July 15. NBC's "Cheers," one of the most popular shows of the regular season, slipped to second place, followed by Fox's "The Simpsons."

CBS did not do as well on the entertainment side with two new shows.

"Northern Exposure," which premiered July 12, was left hanging in 46th place. The July 9 premiere of "Primetime Pets" finished 19th, but in its regularly scheduled time period, Friday night at 8:30 p.m., it dropped to 60th place.

NBC outdistanced the pack in the Sunday night movie race. A Canadian-produced film, "Love and Hate: A Marriage Made in Hell," starring Kate Nelligan, finishing in sixth place, one of the network's best rankings for the season.

NBC's Sunday movies have finished on top of the other two networks for four consecutive weeks. The other Sunday movies, CBS's "The Gambler: Part III" folded in 37th place and ABC's "The Man with the Golden Gun" didn't glimmer, finishing in a tie for 50th place with NBC's sitcom "Poochinski."

CBS's "Designing Women" dropped to ninth place from its fifth-place spot the week before and "60 Minutes" finished at No. 10. The only ABC show to place in the top ten was "Roseanne" in fifth place.

For the week ending July 15, NBC squeaked into first place with a 9.8 rating and a 19 share, CBS came in a close second with a 9.7 rating and a 19 share and ABC finished third with a 9.1 rating and an 18 share. Fox finished the week with a 6.2 rating and a 12 share.

For the 43-week year-to-date race, NBC commands the lead with a 13.5 rating and a 23 share, followed by ABC with a 12.1 rating and 21 share and CBS with an 11.5 rating and a 20 share.

In the nightly news race, viewers preferred ABC's "World News Tonight" with Peter Jennings, which weighed in with a hefty 9.4 rating and a 20 share. The "CBS Evening News" with Dan Rather scored an 8.5 rating and a 19 share and "NBC Nightly News" with Tom Brokaw had a 7.8 rating and a 17 share.

Each ratings point represents about 921,000 households. A share is the percentage of TV sets in use that are tuned to a particular show or network. The top programs for the week ending Sunday, July 15, according to the A.C. Nielsen Co., were:

1. Baseball All-Star Game (CBS)
2. Cheers (NBC)
3. The Simpsons (Fox)
4. The Cosby Show (NBC)
5. Roseanne (ABC)
6. NBC Sunday Movie (NBC)
7. (tie) All-Star Game Preview (CBS); A Different World (NBC)
9. Designing Women (CBS)
10. 60 Minutes

#90198u1491 07/17/1990 ~United Press International

(JULY 17) UPI - A senior Japanese politician today defended his characterization of U-S Trade Representative Carla Hills as ''cute but getting on in age.'' The deputy secretary-general of the ruling Liberal Party made the comments in a Toyko speech last night. He also said Hill-quote- ''can be handled easily if you lull her with talk of the Oriental way of life.'' He says he did NOT mean the comments to sound sexist.

Palestinian sources say guerrillas loyal to P-L-O chief Yasser Arafat took up positions 24 miles south of Sidon, drastically expanding their presence in southern Lebanon. Sources say the move is designed to disengage Pro-Iranian Hezbollah gunmen and the Pro-Syrian Shiite Amal forces, who have been fighting for control of the region.

Senate Democrats will try to force a vote today on a major civil rights bill that aims to roll back a series of 1989 Supreme Court decisions that allegedly undercut discrimination protections for miniorities. The move ends weeks of an attempted compromise over the measure. Senate Republicans and the White House have fought the legislation on grounds that it imposes what they see as wrongful racial hiring quotas.

#90198u1510 07/17/1990 ~United Press International

MARSEILLE, FRANCE (JULY 17) UPI - Authorities arrested two security officers working at the French Embassy in Beirut and charged them with organizing an illegal arms traffic network between France and Lebanon, judicial sources said Tuesday.

Investigators were looking into the possibility that the weapons were sold to terrorists.

Patrick Schaller, 38, and Patrick Bessonat, 30, were arrested in Beirut Monday and transferred to Marseille, where they were charged with illegal arms trafficking, according to the judicial sources.

Investigators said the two men shipped Kalachnikov and M-16 rifles as well as revolvers and other weapons and ammunition to France, where they were sold to criminal elements.

They said the weapons were bought in Beirut for $360 each before being transported to Mulhouse in France in the suitcases of the two men, and then sold to criminal elements for between $2,702 and $5,405 each.

#90198u1517 07/17/1990 ~United Press International
MOSCOW (JULY 17) UPI - Police clubbed rioters and fired warning shots to halt clashes that left at least 27 people injured in renewed ethnic violence between Kirghizians and Uzbeks in Soviet Central Asia, news reports said Tuesday.

The official Tass news agency said additional police and soldiers were sent to Osh, a city of 209,000 people in western Kirghizia republic that was the site of violence last month. It said 160 residents had been arrested for violating a curfew imposed in the earlier unrest near the border of Uzbekistan republic.

Soviet television showed troops disembarking from a plane and then setting up barricades in Osh, where it said the violence had caused $64 million worth of damage to houses and other buildings.

Thousands of people in Osh surrounded the regional Communist Party branch and demanded that its leadership resign, the reports said.

A similar incident happened in another region of the country. The independent Interfax news service said demonstrators besieged the local party building in Simferopol, the unofficial capital of the Crimea, where it said Crimean Tatars have set up a tent camp to demand the restoration of their homeland in the Ukraine's southern peninsula.

And ethnic unrest also continued to plague the Transcaucasian area of the world's most ethnically diverse country. Tass said a bomb killed the director of the regional airport in the troubled Nagorno-Karabakh enclave, an area populated mostly by Christian Armenians but located within the mostly Moslem republic of Azerbaijan.

Tass also said militants in the neighboring republic of Armenia raided police posts for weapons.

Interfax meanwhile said Armenians in Azerbaijan opened fire at Azerbaijani homes in several villages. No one was hurt, it said, in the shooting tied to the two ethnic groups' ongoing dispute over Nagorno-Karabakh.

In Kirghizia, Tass said tensions have escalated again in the past two weeks in the region around Osh, the republic's second-largest city. It was the center of ethnic violence in early June in which more than 100 people died.

''The situation in the Osh region of Kirghizia, where ethnic clashes between Kirghizians and Uzbeks flared on July 4, is deteriorating,'' Tass said.

Tass said 27 people had been wounded, including 21 sent to the hospital, in 18 separate clashes between Uzbeks and Kirghizians over a 24-hour period in Osh. It said seven houses, a school and a library were set on fire by young Uzbeks hurling firebombs.

''Law-enforcement officers used night sticks and fired warning shots into the air to halt the disturbances,'' Tass said.

A man's body was found in the local river with stab wounds, but it was not known whether his death was connected with the ethnic clashes, the news agency said. Nine apartments were looted and six cars stoned in the fighting, it said.

Interfax said the throng surrounding the Osh party headquarters was dominated by women who demanded the ouster of ethnic Kirghizians from all police agencies in the city. It said demonstrators in the nearby town of Uzgen made the same demand.

Both news agencies said rallies were staged in other settlements, with local Uzbeks demanding the construction of roads into Uzbekistan. Tass said all Kirghizians had been driven from Uzgen and that the police chief in the town of Aravan was briefly captured by extremists.

The afflicted area along the two republics' border is also at the edge of Fergana Valley, the section of eastern Uzbekistan where more than 100 people died last summer in Uzbek-led pogroms against Meskhetian Turks.

The region's ethnic strife has been fueled by economic problems that have produced chronic housing shortages and one of the world's highest infant-mortality rates.

Moscow has used Uzbekistan as a huge cotton plantation, making it the world's third-largest producer but harming the land and turning the Aral Sea into an ecological disaster.

#90198u1529 07/17/1990 ~United Press International

CAPE CANAVERAL, Fla. (JULY 17) UPI - NASA has a ''glimmer of hope'' the leaky shuttle Atlantis can be fixed and launched as early as Aug. 10, but if the leak persists the repaired shuttle Columbia will be launched instead, around Sept. 1, officials said Tuesday.

''Where are we going from here? We're going back to flight,'' said William Lenoir, NASA's associate administrator for spaceflight. ''Not only do we see the light at the end of the tunnel, but we are out of the tunnel.''

Engineers plan to pump supercold liquid hydrogen rocket fuel back aboard

Atlantis next week in a critical test to find out if adjusting the tightness of 48 bolts around a critical ''flange seal'' succeeded in eliminating the leak that grounded the ship earlier this month.

William Lenoir, NASA's associate administrator for space flight, said if the repair plan works, Atlantis and its five-man, all-military crew could be cleared for takeoff as early as Aug. 10 to kick off a four-day mission to carry a secret Pentagon payload into space.

The grounded shuttle Columbia then could be launched as early as Sept. 10 or so, putting the disrupted shuttle launch schedule back on track and setting the stage for the long-awaited Oct. 5 launch of the European-built Ulysses solar probe aboard the shuttle Discovery.

But Lenoir said a review of paperwork documenting the assembly of the flange shows the bolts were tightened properly the first time around and he was not optimistic that tightening or replacing the bolts will fix the problem.

''When we do the tanking test, if that fails, if we still have the leak - and honestly, that's what we expect to be the case - we'll roll back (to the Vehicle Assembly Building) and proceed to launch (Columbia) somewhere in the first part of September,'' Lenoir said.

Under that scenario, Columbia would be launched around Sept. 1, Lenoir said, and the Atlantis mission would be delayed past the Ulysses flight.

''We are very optimistic we will have at least one flight off before Ulysses and we have a glimmer of a hope we might get two off before Ulysses,'' Lenoir said. ''While we consider it unlikely, we're going to see if it works.''

In one of a series of embarrassing problems for NASA within the past month both Atlantis and Columbia were grounded when hydrogen leaks were detected in the area of massive 17-inch ''disconnect'' fittings where the primary fuel line enters the belly of the orbiters.

Columbia's leak was traced to critical seals inside the disconnect fitting itself, but Atlantis's problem involves the flange where the hydrogen line from the external tank attaches to the disconnect assembly, which allows the tank to be jettisoned in space.

The flange is held together by 48 bolts and an internal seal is present to ensure a leak-free fit between the fuel line and the disconnect hardware. Engineers are hopeful the leak can be fixed by tightening or replacing the bolts.

But Forrest McCartney, director of the Kennedy Space Center, was not so

sure.

''I've personally looked at the running torque (tightness) on those bolts ... and all of them were in the range of where they were supposed to be,'' he told United Press International.

Along with checking the bolts, engineers plan to test the flange itself to make sure critical welds are intact. A problem with a weld would require a roll back to the Vehicle Assembly Building for more extensive and time-consuming repairs.

But NASA Administrator Richard Truly, speaking on ABC television's ''Good Morning America,'' said he is optimistic about resuming shuttle flights as early as the middle of next month.

''We'll be back flying again in just a few weeks,'' he said. ''I think it'll be mid-August to around the first of September.''

In testing expected to take most of this week, engineers plan to use gaseous helium and nitrogen to further characterize the leak aboard Atlantis and to make sure no other problems are present.

They first will remove insulating foam around the flange and check to make sure critical welds are intact. The tightness of the bolts holding the flange together will be tested later this week.

While the flange bolts can be adjusted at the launch pad, gaining access to the seal would require a trip back to the Vehicle Assembly Building so the orbiter could first be removed from the external tank.

#90198u1530 07/17/1990 ~United Press International

CLEVELAND (JULY 17) UPI - The chief federal judge for the Northern District of Ohio has ordered establishment of a national class action to coordinate asbestos-related personal injury and wrongful death suits.

Judge Thomas Lambros, in making the order Monday, wrote that his court has the largest concentration of cases involving asbestos claims in the federal court system with more than 7,000 cases involving over 13,000 claims. Nationally, more than 100,000 claims have been filed.

"This interim order," Lambros wrote, "issues in the interest of preserving and maintaining a jurisdictional status quo in all asbestos-related personal injury and wrongful death actions pending in this court and other federal district courts and state courts throughout the United States."

Lambros was not available Tuesday to answer questions because of an

illness in his family. But the order said it should be modified on recommendations from a recently established ad hoc national coordinating committee of judges having the largest asbestos dockets.

Lambros said he wanted to establish "a vehicle for communication among the judges and lawyers until the ad hoc committee of judges and lawyers have the opportunity to formulate a universal and multi-jurisdictional format."

The order said the asbestos defendants do not have enough money to pay all claims and costs associated with processing the claims. Since 1982, Lambros said, Manville Corp. and other defendants have filed for bankruptcy.

"Further, others are approaching the brink of bankruptcy," the judge wrote. "To forestall bankruptcy, some defendants are paying claims on a matrix system and others on a deferred payment basis. Several defendants have established an association to process claims in the interest of containing costs and deferring the depletion of funds."

#90198u1550 07/17/1990 ~United Press International

WASHINGTON (JULY 17) UPI - President Bush congratulated Soviet President Mikhail Gorbachev and West German Chancellor Helmut Kohl by telephone Tuesday for their agreement on NATO membership for a unified Germany and said the accord moves Europe closer to ''new era of freedom.''

Bush said during a picture-taking session with Republican leaders that he had a 30-minute conversation with Kohl and then talked for 40 minutes with Gorbachev, lauding both leaders for their ''statesmanship.''

The president expanded on his comments during a meeting with the Magazine Publishers of America, saying he also congratulated the Kremlin leader on his political victories at the Communist Party Congress and - referring to the criticisms aimed at Gorbachev - added, ''Talk about getting hit from all sides.''

Bush told the magazine executives that the agreement reached by Gorbachev and Kohl Monday that will allow the reunited Germany, with a limited military force, become a full member of the Western allaince is ''very, very significant and very important.''

''I take pride in the way Europe is moving into this new era of freedom,'' Bush told the publishers. While acknowledging ''some problems ahead,'' he said, ''It's exciting when you think back a year ago where we stand today.''

Bush credited the German-Soviet accord to the unqualified U.S. support for German unification and the ''non-threatening'' policy toward Moscow

adopted at the NATO summit in London in early July.

''Everyone recognized this (unification) was going to happen,'' he explained, but added the debate was over whether Germany, the formidable foe of the allies in two world wars, ''would be a factor for peace.''

Saying his belief on uniting East Germany and West Germany is ''the sooner the better,'' Bush added, ''The best way for stability and peace would be a united Germany which could become a full-fledged member of NATO.''

White House press secretary Marlin Fitzwater said Kohl, who met with Bush just last week at the Economic Summit in Houston, was ''very appreciative of the initiative that Bush had shown'' in the foreign policy effort ''and gave him great credit.''

#90198u1572 07/17/1990 ~United Press International

WASHINGTON (JULY 17) UPI - The Army is conducting an espionage investigation of six soldiers who were arrested in Florida and found to be deserters from the same U.S. intelligence unit in West Germany, the Pentagon said Tuesday.

''At this point the Army is doing a routine counterintelligence investigation. But they say their initial look is (that) it does not appear to be an espionage case,'' Pentagon spokesman Bob Hall said.

The six soldiers, who were being held at Fort Benning, Ga., had access to top-secret material at their unit, the 701st Military 12 in Moscow, will contain clear reference to the Oder-Neisse Line as Poland's western frontier. The talks are due to end before a November summit, in Paris, of the 35-nation Conference on Security and Cooperation in Europe.

Foreign ministers directed their aides to begin drafting the formal conclusions of the two-plus-four negotiations.

The Oder-Neisse Line, drawn along two rivers in 1945, ceded to Poland several former German territories, including Silesia and Pomerania, to compensate for areas in eastern Poland lost to the Soviet Union.

The agreement on German NATO membership, reached after two days of talks in the Soviet Union between Gorbachev and West German Chancellor Helmut Kohl, buoyed Tuesday's talks around a huge circular table at a French foreign ministry conference center.

Soviet Foreign Minister Eduard Shevardnadze termed the accord a ''product of patient and serene diplomacy,'' and said this month's London summit of NATO leaders was the critical step leading to a breakthrough.

Leaders of the Western alliance on July 6 issued a landmark London Declaration, a peace offering to Moscow that invited Gorbachev to NATO's Brussels headquarters and made nuclear arms the alliance's ''weapons of last resort.''

Baker said the NATO summit was ''instrumental'' to the Gorbachev-Kohl agreement, whose terms the United States considers ''quite favorable.''

Baker said he expected the 23 parties to Conventional Forces in Europe (CFE) talks in Vienna would adopt a limit of 370,000 troops in a united Germany, the number agreed upon by Gorbachev and Kohl.

#90198u1583 07/17/1990 ~United Press International

SEATTLE (JULY 17) UPI - Brian Bosworth, hampered by arthritic shoulders, failed his 1990 team physical and was waived Tuesday by the Seattle Seahawks, which three years ago signed the much heralded linebacker to an $11 million, 10-year contract.

''Brian Bosworth had tremendous potential as a professional football player coming out of college,'' said Seahawks Coach Chuck Knox. ''Unfortunately for him, injuries have prevented him from realizing his full capabilities.''

At the end of last season, Bosworth told ESPN he never felt he fit into the Seahawks' defensive scheme.

Bosworth joined the Seahawks in the 1987 supplemental draft, starting 12 games as a rookie, earning all-rookie honors.

But hampered with a left shoulder injury in 1988, Bosworth played only 10 games, and in 1989 he played in just two games before injuring his right shoulder.

He finished his career with the Seahawks playing in 24 games and recording 175 tackles, four sacks, three forced fumbles, one blocked kick and three recovered fumbles.

''Naturally, it's a disappointment to lose a player of Brian's quality,'' said Seahawks President and General Manager Tom Flores. ''After more than one physical examination, our medical department could not pass him.''

Bosworth has spent most of the spring and summer filming a movie, ''The Brotherhood,'' in which he plays an undercover policeman.

Seahawks spokesman Gary Wright declined to comment on the status of

Bosworth's NFL contract, but the Tacoma News Tribune reported over the weekend that Bosworth could collect as much as $7.3 million tax-free because his contract was insured.

NFL documents showed that when he signed with the Seahawks, $75,000 of his first-year salary of $300,000 was deducted so the Seahawks could act as the agent in buying an insurance police that guaranteed his $8.5 million in base salaries through 1996.

According to the newspaper, because Bosworth's money was used to buy the policy, he can collect payments tax free, although he will still have to pay taxes on a $2.5 million signing bonus due after the 1991 season and on another $65,000 he would get this year under the NFL collective bargaining agreement.

Bosworth was due to be paid $600,000 in base salary by the Seahawks this year.

Neither Bosworth nor his New York agent Gary Wichard were available for comment Tuesday.

#90198u1589 07/17/1990 ~United Press International

JERUSALEM (JULY 17) UPI - Israel, prompted by Syrian President Hafez Assad's visit to Egypt, snatched the opportunity Tuesday to renew its call to begin peace negotiations with one of its most ardent foes.

But opposition leader Shimon Peres warned the government against trying to hold talks with Syria in place of negotiations with Palestinians, who have waged an uprising against Israel's occupation of the West Bank and Gaza Strip for 2 1/2 years.

Israeli officials were reacting to remarks attributed to Assad during his visit this week to Egypt, the only Arab nation to have made peace with Israel. During the visit, Assad said he wanted a just and comprehensive peace and sought an international peace conference.

Assad's statements were not new and his preference for an Israeli withdrawal and demilitarization of the Golan Heights, part of Syria before the 1967 Israeli-Arab war, remained firm. Israeli political sources characterized recent statements as moderate and regarded as positive his expressed willingness to move toward a political settlement.

''I think that he is beginning to see himself, with a little help from us, as a dove of peace, a dove of peace that is not changing its demands but is changing its form,'' said Peres, leader of the center-left Labor Party.

Last month shortly after Parliament approved Israel's new right-wing coalition government, Prime Minister Yitzhak Shamir called on Assad as well as other Arab leaders to negotiate peace with Israel without prior conditions.

Yossi Ben Aharon, a top Shamir aide, said Israel was not receiving direct messages from Syria but if Assad was willing to begin negotiations, ''We will be happy to receive the Syrian president with respect, even in Jerusalem.''

''If Syria is willing to break out of the circle of violence and wants to enter political negotiations, Israel will certainly support this,'' Deputy Foreign Minister Binyamin Netanyahu told Army Radio.

Israel has been technically at war with Syria since the 1948 creation of the state. In the 1967 Israeli-Arab war, Israel captured the Golan Heights from Syria and after the 1973 Yom Kippur War a new cease-fire line was established slightly west of the post-1967 war position.

In 1981, Israel extended Israeli law, jurisdiction and administration to the Golan Heights, although most of the Druze residents living in the former Syrian territory have refused Israeli citizenship.

Israelis in the Golan Heights, worried by Assad's preference for an Israeli withdrawal from the area, sent a telegram to Shamir Tuesday saying the ''people of Israel will not give their hand to any crazy adventure that will lead to giving up the Golan.''

Israeli officials emphasized that Israel should not be asked to relinquish territory before negotiations begin and expressed hope that Egyptian President Hosni Mubarak would continue to play a moderating role in the Middle East peace process.

''We do not fear even if they (the Syrians) come to speak with us with the intention of demanding all the territories. At least let them come without preconditions to speak on all issues,'' Ben Aharon said.

Itamar Rabinovich, an expert on Syria at the Tel Aviv University, said ''enormous'' differences remained between Syria and Israel, but he believed that ''the very fact that the language of war has been replaced by the language of peace is very positive.''

#90198u1633 07/17/1990 ~United Press International

RANGOON, BURMA (JULY 17) UPI - Burma's tentative move toward democracy faced another hurdle this week with the commemoration of Martyrs' Day, a national celebration marked last year by political protest and armed

suppression.

The military government, which last year blocked a planned demonstration by the rival National League for Democracy, said this year it would allow others to hold their own activities marking the event Thursday.

But the NLD's general-secretary, Aung San Suu Kyi, placed under house arrest last year after threatening to lead her own Martyrs' Day procession remained confined to her residence despite the NLD's overwhelming victory in May's nationwide elections.

The anniversary marks the date 43 years ago - on July 19, 1947 - when Aung San Suu Kyi's father, Gen. Aung San, Burma's nationalist freedom fighter and founding father of the Burmese armed forces, was killed by political assassins in Rangoon.

The anniversary will be commemmorated as usual in Rangoon by ceremonial laying of wreaths at the Martyrs' Mausoleum, near the Shwedagon Pagoda, where the remains of Gen. Aung San and seven colleagues who died with him were entombed.

But unlike in previous years, the military government that seized power in September 1988 said it will not invite political parties and other organizations to join the official ceremonies and will let them hold their own events.

The government's decision follows the May 27 multi-party elections, in which the NLD won 396 of 485 parliamentary seats despite the house arrests of Aung San Suu Kyi and other top party leaders.

The NLD said it planned to take advantage of the policy to march to the Martyrs' Mausoleum on Thursday morning and lay wreaths at the tombs.

Last year, the NLD under the leadership of Aung San Suu Kyi, turned down the government's invitation to join in the official ceremonies and instead insisted on staging a rival unofficial procession to the Martyrs' Mausoleum.

The authorities at the time refused to allow the procession, making it clear it would be treated as a violation of the decree banning assemblies of more than five persons.

Aung San Suu Kyi was reportedly determined to flout the official ban and lead the procession herself, placing herself at risk before heavily armed security troops.

She was said to have been dissuaded by NLD colleagues only at dawn on Martyrs' Day, and the planned procession was canceled at the last minute.

The following day Aung San Suu Kyi was placed under house arrest for a period of one year, which was to expire on this year's Martyrs' Day.

But Brig. Gen. Khin Nyunt, first secretary of the ruling State Law and Order Restoration Council, said Friday that Suu Kyi has been restricted to her home during Martyr's Day, both to ensure her own safety and to prevent her from continuing in illegal activities.

She was planning to observe the anniversary this year peacefully in her own residence and, Khin Nyunt said, she has been permitted by the authorities to invite some Buddhist monks to her residence for a ritual commemoration ceremony.

#90198u1641 07/17/1990 ~United Press International

MONROVIA, LIBERIA (JULY 17) UPI - Liberian President Samuel Doe's efforts to hold on to power are ''utterly hopeless'' now that rebels control most of the country, a prominent European ambassador said Tuesday.

Despite his trying to recruit a volunteer force from among his own Krahn tribesmen and their Mandingo allies - many of them in their teens - Doe is generally thought to have no chance of defeating rebel leader Charles Taylor.

''The situation for Doe is utterly hopeless and has been for two or three months,'' the ambassador said. ''At the end of June there was still a bit of government but now there is nothing.''

The ambassador, who did not want to be identified, said Taylor's National Patriotic Front appears to have held off from staging any major attacks for at least a week. He said Taylor semed to be waiting for Monrovia - which is without water, has only a few hours of electricity a night and virtually no food - to reach a state of total collapse.

He said Taylor and Doe both appeared to be unwilling to give in - Taylor to suggestions made at peace talks in Sierra Leone that he accept an interim government and Doe to demands from even his closest advisors that he quit.

''I don't see Taylor attacking soon and even less Doe resigning,'' the ambassador said.

''There's no semblance of government, no military chief anywhere and Doe is totally isolated. It's highly irresponsible of him to stay.''

The ambassador said peace talks due to resume on Tuesday in neighboring

Sierra Leone with West African mediators trying to forge a peace settlement were ''completely meaningless.''

He said Taylor, whose forces have battled their way from far northeastern Liberia to the capital in six months, was holding off the final attack because it would cause heavy casualties among his soldiers and civilians and therefore discredit him politically.

Taylor also seems to be fighting a rearguard action against a rival rebel faction headed by Prince Johnson who broke away from Taylor in April. Johnson, who took some of Taylor's crack troops with him, has been mounting attacks on NPF forces near the eastern suburb of Paynesville and north of the city of Careysburg.

Amid a continued lull in fighting in the city, the few remaining Lebanese and Indian shopkeepers were clearing their stocks and preparing to flee. Several said they would sell everything they had and hoped to leave by the weekend.

Liberians trapped in the city continued to line up for hours outside food stores in the hope of buying what little rice or cooking oil remained.

In Paynesville, 10 miles east of the city, an American missionary family of seven had to be evacuated Tuesday because of increasing threats from unruly troops.

#90198u1648 07/17/1990 ~United Press International

SAN SALVADOR, EL SALVADOR (JULY 17) UPI - An off-duty Salvadoran army captain was shot to death near the capital Tuesday by unidentified assailants, the military said.

The officer's wife was wounded in the attack, which the armed forces immediately attributed to leftist rebels.

''The High Command energetically condemns the attack in which the officer, Aristides Reyes, assigned to Military School, died,'' the Armed Forces Press Committee said in a statement.

No one immediately claimed responsibility for the attack in which two men reportedly opened fire on Reyes's car at 7 a.m. in the city of Santa Tecla 7 miles west of San Salvador.

Urban commandos of the leftist Farabundo Marti National Liberation Front however, have targeted off-duty officers in previous attacks. The rebels claimed responsibility for an attack eight days ago in which a major assigned to the Salvadoran military high command legal staff was killed.

The military academy where Reyes, 33, worked has been identified by government investigators as the staging place for a military raid in which six Jesuit priests, their housekeeper and her daughter were killed on Nov. 16.

#90198u1651 07/17/1990 ~United Press International

WASHINGTON (JULY 17) UPI - A woman brought by court order from a Tennessee hospital testified Tuesday she used cocaine with Mayor Marion Barry between 1983 and and 1986 and supplied the drug to him in the weeks before his Jan. 18 arrest.

Bettye Smith - a former city worker who had been hospitalized for stress she said was related to testifying against her longtime friend - became the first witness at Barry's seven-week drug and perjury trial to say the mayor used cocaine prior to 1985.

Smith, who cried and shook when she entered the courtroom and answered in a whisper, ''I'll try,'' when asked by U.S. District Judge Thomas Penfield Jackson if she could testify, said she had an ''intimate'' relationship with Barry, but never a sexual one.

Sometime between Jan. 1 and Jan. 18, this year, Barry came to her Capitol Hill home and accepted cocaine from her, testified Smith, who dressed in black and wore dark sunglasses and a wide-brim hat.

One of 10 misdemeanor cocaine possession charges against Barry alleges he possessed the drug sometime between Jan. 1 and Jan. 18.

But under cross-examination, Smith said she could not be sure the incident occurred in January and admitted it could have been between Christmas 1989 and New Year's Day.

''You can't testify it was January, can you?'' asked defense attorney R. Kenneth Mundy.

''No,'' replied Smith.

Barry, 54, also is charged with three felony counts of perjury and one misdemeanor count of conspiracy to possess cocaine. He could face 26 years in prison and $1.85 million in fines if convicted on all counts.

''He took it and went into the bathroom,'' Smith testified of the last time she claimed to have provided cocaine to Barry. ''I have no idea what he did with it.''

''Was he in there long enough to use the cocaine?'' asked assistant U.S. Attorney Judith Retchin.

''He was in there long enough to use the cocaine. He was in there long enough to use the bathroom,'' said Smith. ''I don't know if he ingested it or what.''

Mundy, in cross-examination, asked Smith: ''Could you tell from the quantity returned (to you) if he had used (cocaine) from it?''

''I did not check the quantity,'' said Smith, adding that she had used some cocaine from the package earlier and finished it later.

Barry was arrested Jan. 18 after being videotaped smoking crack in an FBI-police sting.

Smith was expected to be one of the final prosecution witnesses at Barry's trial, which began June 4. She was the ninth witness to say the three-term mayor used cocaine.

Smith was ordered to testify and was flown to Washington from her hometown of Chattanooga Tuesday morning accompanied by U.S. marshals.

Jackson issued a bench warrant Monday for Smith, who failed to show up for a scheduled court appearance last week.

Smith instead checked herself into the Valley Psychiatric Hospital in Chattanooga, complaining of stress over her court appearance and what she said was her father's pending cancer surgery.

Prosecutors said Smith was reluctant to appear as a witness despite a grant of immunity from prosecution.

Smith testified she took medication Tuesday morning and said her memory of details was not very good. Frequently, she answered questions by saying she did not recall particulars.

Some of Smith's testimony contradicted statements by other witnesses. She said on a November 1987 trip to the Bahamas, at which she served as babysitter for Barry's young son, she used cocaine but never saw the mayor use the drug.

She also said she did not remember using cocaine with restaurateur Hassan Mohammadi, who testified he and Smith shared the drug on the trip.

Mohammadi and another witness both said Barry used cocaine on the trip.

''Other than the fact that I used it, I don't recall who used it,'' said

Smith.

CARLOTS

DES MOINES, Iowa (UPI) - Midwest carlot fresh cut meat trade Tuesday:

Estimated composite of boxed beef cut- out values based on carlot prices of fabricated beef cuts and industry yields, including change from previous day.

Choice 1-3 550-700 lb 117.97 up 38 cents, 700-850 lb 118.12 up 26 cents; select 1-3 550-700 lb 113.18 up 53 cents, 700-850 lb 113.00 up 41 cents.

Pork carlot trading and demand moderate; fresh pork loins were not established except 18-22 lb steady in a thin test; skinned hams mostly 2.00-4.00 higher; seedless bellies not well established; loins 18-22 lb 147.00, 22 lb and up 92.00-95.00; hams 14-17 lb 91.00, 17-20 lb 90.00-91.00, 20-26 lb 94.00-96.00, 26- 32 lb 87.00-88.00, 32 lb and up 76.00; bellies all weights from 12-18 lb 50.00.

CHICAGO (JULY 17) UPI - The grain market rallied to session highs early Tuesday, then retreated on profit-taking and liquidation.

Closing prices were mostly lower on the Chicago Board of Trade as the weather continued to provide most of the pressure.

Favorable conditions were expected the rest of the week for both corn and soybeans. The weekly crop survey showed some improvement in the condition of corn and soybeans, although the crops are not as far along as normal for this time of year.

Corn prices were at or near session lows in active trading. The early buying by commercials was based on ideas that export business may improve because of the lower prices. Light country movement also supported the corn.

Soybeans were lower across the board, pressured by the weather and the weakness in soybean oil and meal.

Wheat turned lower in sympathy with the losses in corn, but had underlying support from the sale of wheat to Algeria and Egypt.

At the close, corn was unchanged to off 3, soybeans down 1 to 2 1/2, wheat up 1/2 to off 1 3/4 and oats down 1 3/4 to 2 cents.

#90198u1698 07/17/1990 ~United Press International

TOKYO (JULY 17) UPI - Japan, in a surprise announcement expected to improve ties with its Pacific neighbors, said Tuesday it will suspend its ''wall of death'' driftnet fishing in the South Pacific starting this fall a full year ahead of schedule.

The decision, applauded by Australia and New Zealand, does not apply however to Japan's massive driftnet operations in the North Pacific, where tens of thousands of dolphins and other marine mammals are killed each year in fishing for squid.

''These nets are walls of death,'' said Ben Deeble of the Greenpeace environmental group.

''Japan has said nothing about its use of driftnets in the North Pacific, where every night this time of year 1,000 boats from Japan, Taiwan and South Korea are laying over 20,000 miles of net, which catch and kill virtually everything that swims into them, from entire schools of tuna and salmon to whales and birds.''

Japan's decision to suspend driftnetting in the South Pacific came two years ahead of an international moratorium set to go into effect under a U.N. resolution. It also followed a similar decision made in November by 20 South Pacific nations at a conference in Wellington, New Zealand. The United States supported the decision.

The Japanese government said in a statement that ''in making this decision Japan has taken into account the grave concerns of the South Pacific island countries over driftnet fishing in the region, and the intentions by these countries to develop albacore fisheries as an indigenous economic resource.''

Hailing the decision, New Zealand Prime Minister Geoffrey Palmer said in Wellington, ''all New Zealanders will share my very real delight at the news today that Japan has decided to stop driftnetting immediately in the South Pacific.''

''I see it as a very clear indication of their understanding of the depth of feeling which the people of the South Pacific have about driftnet fishing.

''This announcement removes a very significant irritant from decisions with Japan about the scope of environmental and other cooperation in the region,'' said Palmer, who will visit Japan next week.

In Australia, Foreign and Trade Minister Gareth Evans welcomed the suspension, but noted Japan has still not moved to ban the practice completely.

Driftnets are curtains of fine monofilament mesh draped by fishing vessels over miles of open sea, indiscriminately snaring and killing large numbers of dolphins, whales, sea birds and turtles, along with the fish and squid they are designed to catch.

Nearly 60 Japanese fishing boats were engaged in driftnet fishing in the South Pacific in the 1988-89 season, catching about 12,000 tons of long-finned tuna. That is about 25 percent of Japan's total long-finned tuna haul, which is used mainly for canned tuna.

Under international criticism, the Japanese fleet was trimmed to 19 boats in the 1989-90 season. Japan said it would halt driftnetting in the South Pacific beginning when the next season starts in the fall.

However, the suspension does not cover the North Pacific, where about 470 Japanese driftnet vessels are licensed to fish for squid.

Together with South Korea and Taiwan, the Asian driftnet fleet in the North Pacific is estimated to number more than 1,000 boats, said Paul Niemeier of the National Marine Fisheries Service in Washington.

#90198u1702 07/17/1990 ~United Press International

LONDON (JULY 17) UPI - Prime Minister Margaret Thatcher parried charges

that she personally inspired an unflattering memo on Germany by declaring her faith in Bonn Tuesday as a staunch military and economic ally.

Thatcher fielded a volley of verbal jousts from the opposition in her first appearance in the lower house of Parliament since the Saturday resignation of Trade and Industry Secretary Nicholas Ridley for his outspoken remarks that Germany harbored designs to dominate Europe.

The Ridley embarrassment was quickly followed by the publication of a memo by Thatcher's secretary on the conclusions of a high-level seminar that said Germany was a bully and egotistical, among other things.

The government on Monday launched an inquiry into who leaked to newspapers the memo about the March seminar at Thatcher's country residence on the implications of German unity.

The memorandum written by Thatcher's secretary, Geoffrey Powell, assessed that relations with a new united Germany would overall be positive, and concluded that ''we must be nice to the Germans.''

But the session attended by Thatcher, Foreign Secretary Douglas Hurd and six experts on Germany also gave an unflattering list of German national character traits as ''angst, aggressiveness, assertiveness, bullying, egotism, inferiority complex, sentimentality.''

It said there were reasons to be concerned about German ''insensitivity to the feelings of others ... their obsession with themselves, a strong inclination to self-pity and a longing to be liked.''

The panel judged that Germans have ''a capacity for excess, to overdo things, to kick over the traces'' and ''a tendency to overestimate their own strengths and capabilities.''

Deputy Labor leader Roy Hattersley said it was inconceivable that Thatcher did not clearly refute the findings.

''Everybody throughout the world now believes that the prime minister's private secretary was not so much reflecting the opinions of the experts, as reflecting the prejudices of the prime minister,'' he said. ''Why doesn't she take this opportunity to refute them.''

Thatcher refused to directly answer the charge, and said it was dishonorable to criticize Powell, who is bound as a civil servant not to publicly comment.

''It was Germany that joined us in stationing Cruise and Pershing (nuclear missiles) at a crucial time,'' she said, refering to Labor's previous policy of unilateral nuclear disarmament. ''We have been staunch allies of

Germany in NATO, and Germany have been staunch allies of ours in NATO and the EEC (European Economic Community).''

The government has been trying to soothe its allies, which were outraged over Ridley's statements last week that European moves toward unity were ''a German racket'' aimed at dominating the continent similar to the strategies of Adolf Hitler.

Ridley also said the French were ''behaving like poodles to the Germans,'' and described the 12-nation European Community as being run by reject politicians.

The embarrassing glimpses of innermost government thoughts has brought to the surface the many doubts about how Britain will integrate with Europe, given the island nation's tradition of becoming involved on the continent only when it perceives an upset in the balance of power.

Thatcher has challenged many of moves that will obligate member nations to relinquish certain sovereign powers to the Brussels-based community by 1992, and once referred to Germany as a new ''European superstate.''

#90198u1704 07/17/1990 ~United Press International

MIAMI (JULY 17) UPI - A heavier-than-usual hurricane season in the eastern Pacific this year may spell relief for communities threatened by Atlantic storms, a National Hurricane Center official said Tuesday.

The 1990 Atlantic-Caribbean hurricane season, which began June 1, has yet to produce a tropical storm, but that in itself is not surprising, said Jerry Jarrell, the deputy director of the hurricane center south of Miami. "It is certanly not unusual. Now, if you go through the end of August without anything, that would be unusual," he said.

However, Jarrell said the busy season under way in the eastern Pacific may foreshadow lighter tropical storm activity in the Atlantic and Caribbean. "We have had a very active season in the eastern Pacific so far. There seems to be a loose connection, when you have an active eastern Pacific hurricane season, you have a light Atlantic hurricane season," Jarrell said.

So far this year, specialists at the hurricane center have tracked six storms and two tropical depressions in the eastern Pacific, Jarrell said. Hurricane season in the eastern Pacific begins May 15. Both seasons last through Nov. 30.

"An early season and a heavy season out there is loosely correlated with a light Atlantic season," Jarrell said. "The data is there, but there are a lot of other things that influence it, and that's a weak factor."

Hurricane researcher William Gray has predicted an active 1990 Atlantic storm season of 11 named storms, including seven that will grow to hurricane strength. The professor of atmospheric science at Colorado State

University is expected to revise his forecast in early August before the busiest part of the season begins. Tropical weather systems are not named until their winds reach tropical storm strength of 39 mph. Storms are classified as hurricanes when their sustained winds reach 74 mph.

Atlantic and Caribbean waters have been quiet so far this year, except for a tropical depression that brought heavy rains to Cuba in late May. By this time last year, two tropical storms had formed, including Allison, which lashed Texas and Louisiana in late June with heavy rains, causing 11 deaths and $500 million in damage.

Barry, the second named storm of the 1989 season, formed in the Atlantic on July 9 and never made landfall. In 1988, the first named storm of the season did not form until Aug. 5. "About half the years, you have a storm in June," Jarrell said. "By the end of July every other year you should have had a hurricane."

#90198u1706 07/17/1990 ~United Press International

BOSTON (JULY 17) UPI - The most widely used treatment for premenstrual syndrome appears ineffective in relieving symptoms of women suffering from the distressing disorder, researchers reported Tuesday.

Ellen Freeman of the University of Pennsylvania said a synthetic version of the hormone progesterone was no more able to relieve symptoms of the syndrome, commonly called PMS, than a phony substitute in a study involving 168 women.

Although progesterone has long been used to treat PMS, Freeman said consistent scientific evidence about its effectiveness has been lacking. She said results of the new study - the largest of its kind - should now make researchers focus on alternative treatments.

An estimated seven million American women experience PMS to a degree that upsets their daily lives. Symptoms, which usually are most severe just prior to the onset of menstruation, can include irritability, nervous tension, headaches, mood swings, fatigue, breast tenderness and abdominal cramps.

Freeman and colleagues compared the ability of vaginal suppositories containing either progesterone or a phony substitute to relieve PMS among the women in the study, who had an average age of 34 and had suffered PMS for an average of eight years.

No significant difference was found between the ability of the progesterone and the placebo to either relieve PMS symptoms, lessen the severity of the symptoms or reduce disruption of daily activities,

researchers reported in the Journal of the American Medical Association. The results indicate that "right now, there is no one wonderful medication for what is currently termed PMS," Freeman said.

Progesterone is a hormone produced by the ovaries to prepare a fertilized egg for implantation in the lining of the uterus. Freeman said doctors have long prescribed synthetic progesterone to relieve PMS in the belief that it had a sedative or tranquilizing effect that could relieve irritability, tension and certain other PMS symptoms.

In the new study, the researchers had the women keep a daily record of their PMS symptoms during the first month of a four-month pre-treatment period. During the third and fourth pre-treatment months, all were given suppositories containing only the placebo.

When the treatment period began, about half received a 400-milligram daily dose of progesterone for 12 days prior to menstruation for the first month followed by 800 milligrams daily for 12 days in the second month. The others received the phony substitute.

During the next two months, the women switched roles, with those who originally received the progesterone getting the placebo and the placebo group receiving the 400- and 800-milligram progesterone doses.

By the end of the study, women in both groups reported some improvement in their symptoms, Freeman said, noting that changes could have resulted simply from "the support, understanding and education they received."

Although PMS can produce a wide range of symptoms, most of the women in the study complained primarily of "mood problems, anxiety, depression, and irritability," said Freeman, a research associate in psychiatry.

Progesterone's failure to relieve the women's symptoms to any significant degree means that researchers should "start looking at other kinds of treatment that could be helpful," Freeman said. Among those currently being studied are drugs that prevent ovulation, similar to those used to treatment an unrelated condition called endometriosis, she said.

#90198u1748 07/17/1990 ~United Press International

BOSTON (JULY 17) UPI - A long-term public health education program apparently succeeded in reducing smoking and other major risks for heart disease among residents of two California communities, scientists said Tuesday.

A five-year multimedia campaign that told community members how they could reduce heart-disease risk factors resulted in drops in their cholesterol

levels and blood pressure as well as smoking rates, said Dr. John Farquhar of Stanford University.

The results indicate that providing information to people about how to improve their health through good nutrition, exercise, and smoking reduction can have a significant impact on mortality risks posed by cardiovascular disease, Farquhar said.

Changes that the community members made in their health habits resulted in a 15 percent drop in their overall mortality risks and a 16 percent reduction in their heart disease risks, Farquhar and colleagues reported in the Journal of the American Medical Association. "The 15 percent reduction in total predicted mortality is a really big number," Farquhar said. "It is more than we thought we might get."

During a 64-month period, residents of the nearby cities of Monterey and Salinas were exposed to educational health messages on radio and television, in newspapers and through various mass distribution messages in print, Farquhar said.

While the education campaign was going on, he said Stanford researchers periodically surveyed a sample of 1,255 people age 25 through 74 in the two communities, measuring their cholesterol, blood pressure, and heart rates as well as asking whether they smoked.

At the same time, the researchers took similar measurements of 1,248 residents in two other California cities, Modesto and San Luis Obispo, who were not exposed to any comparable information campaign.

Modesto and San Luis Obispo were included in the study for comparison purposes because residents were similar in such measurements as education, income, and household size to those in Salinas and Monterey, Farquhar said.

The most dramatic impact of the information campaign was on smoking, he said. While smoking declined ten percent among the Modesto and San Luis Obispo residents during the study, in line with nationwide trends, the drop among the Monterey and Salinas residents was 23 percent, he said.

In addition, those tested in Monterey and Salinas registered average reductions of two percent in cholesterol levels, four percent in blood pressure, and three percent in pulse rate compared to those in Modesto and San Luis Obispo.

"Although minor by clinical standards, these populationwide changes have a potentially large public health significance," the researchers said. Since the changes were greatest for those at highest risk of heart disease - and applied across a broad population spectrum - a "significant decline in total number of cardiovascular disease events could be anticipated," they

said.

Many of the information tools used in the campaign cost relatively little to produce and distribute. They include a six-lesson smoking cessation kit sent through the mail and grocery bag "stuffers" - flyers with nutritional information and menu ideas - placed in supermarket bags, Farquhar said.

Hospitals, businesses and schools in Salinas and Monterey now have taken over many aspects of the Stanford information campaign and have kept it going, he said.

Faruqhar said he believes similar programs could be effective in communities across the country. He said the "cost of not launching such programs is to accept the notion that the energies of communities cannot be harnessed" for health benefits.

#90198u1750 07/17/1990 ~United Press International

(JULY 17) UPI - It's nighttime in the Philippines and rescuers are using spotlights and generators to try to free hundreds of victims trapped in collapsed buildings. Officials now say at least 305 people were killed by yesterday's massive earthquake. Rescue efforts are concentrated on the devastated towns of Cabanatuan and Baguio , where about 750 people were reported trapped in a half-dozen toppled hotels and factories.

Talks on German unification got a boost from Moscow's acceptance of a unified German membership in NATO. West German Foreign Minister Genscher says it'll be easier to reach a deal as so-called two-plus-four talks resume in Paris today. Negotiators for the two Germanys and Big Four war-time allies... Britain, the United States, France and the Soviet Union... will build on successful weekend talks between Soviet President Gorbachev and West German Chancellor Kohl.

Kohl says he's confident all-German elections will take place this year. Kohl told reporters in Bonn that his meeting with Soviet leader Gorbachev was a ''breakthrough'' on the way to German unification. Kohl says he is now certain the voting will be held December 2nd, and he says he intends to win those elections.''

A federal judge in Washington, D-C, ordered the arrest of an ex-city worker prosecutors want to testify in the trial of Mayor Marion Barry. Judge Thomas Penfield Jackson issued a warrant for Bettye Smith who had been scheduled to appear in court last week. Prosecutors say that, instead Smith checked into a Chattanooga, Tennessee, hospital complaining of stress over the case. She has been linked to a 1987 trip to the Bahamas where Barry allegedly used cocaine.

#90198u1777 07/17/1990 ~United Press International

ANCHORAGE, Alaska (JULY 17) UPI - The Coast Guard said Tuesday a newly-invented mechanical rock washer would do more harm than good to oil-fouled beaches and overruled state requests that Exxon put the machine to work.

The $1 million Exxon machine was designed to excavate beaches hit by the Exxon Valdez spill and send oily rocks along on a conveyor belt for hot water washing before returning them to shores.

The rock washer is a new and untried oil spill cleanup tool developed at the behest of the Coast Guard spill coordinator as a way to help clean up the March, 1989, 11-million-gallon tanker spill.

Exxon agreed to move ahead with the Coast Guard's request with reservations.

Exxon cleanup technology advisor John Wilkinson maintained from the outset that ''beach excavation and rock washing techniques are inherently destructive.'' State officials countered that such aggressive treatment was necessary to get at buried oil and clean it up.

Rear Adm. David Ciancaglini asked National Oceanic and Atmospheric Administration scientists to study proposed rock-washing technology and weigh the pros and cons. NOAA, in a 200-page study, concluded that the large mechanical device would do more harm than good by ripping up shores. The study said the oil would degrade on its own in 10 years.

Based on the NOAA report, Ciancaglini said, ''I have determined that the benefits derived from the wide-scale use of the rock-washer would be far outweighed by the detrimental effects caused by its usage.''

Last month Exxon announced that a Seattle company was chosen to develop prototype rock-washers to test their effectiveness on oiled rocks.

Exxon spokesman Joe Tucker said the company was considering whether to pursue development of the rock-washers in light of the Coast Guard rejection.

But a July 7 letter from state cleanup coordinators Randy Bayliss and Colleen Burgh to Ciancaglini, before his rock-washer ruling, stated, ''Given the progress of cleanup to date we do not expect Exxon to complete cleanup in 1990 without the use of mechanical techniques such as excavation and rock washing.''

#90198u1780 07/17/1990 ~United Press International

WASHINGTON (JULY 17) UPI - The Senate, bucking White House opposition, passed a bill Tuesday that would limit clothing and footwear imports in hopes of protecting hundreds of thousands of American jobs threatened by foreign competition.

The Senate voted 68-32 for the bill, which would allow only a 1 percent annual increase in textile imports and would freeze imports of non-rubber footwear, including leather and vinyl shoes, at their 1989 levels.

In 1985 and 1988, President Reagan vetoed similar bills and was sustained. President Bush opposes the current measure, but the size of the vote indicated the Senate could override his veto. It was unclear, however, whether the bill would reach Bush's desk soon because the House bill was stalled in subcommittee.

Republicans, including many leading conservatives, joined with Democrats to back the bill sponsored by Sen. Ernest Hollings, D-S.C., saying it was needed to protect American workers from unfair foreign competitors who are subsidized by their governments and pay low wages.

Opponents said the quotas would boost clothing and shoe costs for American workers while inviting retaliation against U.S. exports, particularly wheat.

Imports now account for 60 percent of the textiles and 80 percent of the footwear sold in America. As imports soared in the 1980s, the nation lost 400,000 textile jobs and employment in the footwear industry fell 45 percent. More than 2 million Americans work in textile and related industries.

During the debate that began last week, supporters denied the bill was protectionist and said it only would create a ''level playing field.''

''We just want fair trade. Free trade doesn't work. It's fair trade that works,'' said Sen. Strom Thurmond, R-S.C.

Several senators singled out China as a particularly unfair competitor, with Sen. Jesse Helms, R-N.C., accusing it of using ''slave labor'' to produce the $3 billion of textiles it sold last year in the United States.

But Sen. Slade Gorton, R-Wash., said it was wrong for America to protect ''inefficient'' industries when it should be seeking relaxed trade rules to help the growing parts of the economy - services such as law, insurance banking and construction - in the world market.

''The tide of history is more trade and not less. The tide of history is

tearing down trade barriers, not raising them,'' said Sen. Phil Gramm, R-Texas.

''The question is are we going to lead, are we going to be the nation that promotes the opening up of world markets, or are we going to succumb to our own individual special interests in trying to buck the tide of history.''

Sen. Bob Packwood, R-Ore., said the Senate should be ''embarrassed'' to debate the bill after President Bush told world leaders at the economic summit last week that the United States wanted to compete ''head to head.''

''This bill is a turkey,'' Packwood said. ''The president will veto this bill.''

Before final passage, the Senate tabled a series of Republican amendments that either would have eliminated the quotas or allowed for their removal if it could be determined that they had led to substantial prices increases.

Under the bill, products from Canada and Israel would be exempt from the quotes because of free-trade agreements with those countries. Caribbean Basin countries would be guaranteed their current market shares, and countries that buy more U.S. farm products would be able to sell more textiles in America.

The measure would cut the budget deficit by $48 million in 1991 because of a program to auction import licenses. Subsequently, it would add hundreds of millions of dollars to the deficit each year because of lost tariffs.

#90198u1789 07/17/1990 ~United Press International

MOSCOW (JULY 17) UPI - Soviet songwriter Mikhail Matusovsky, author of ''Moscow Nights,'' which became the Soviet capital's theme song, has died, the Tass news agency said Tuesday. He was 75.

Although Matusovsky penned many hit songs in his long career, none surpassed ''Moscow Nights,'' which became practically synonymous with Russia.

''Moscow Nights'' is the theme of Moscow Radio, both for its overseas broadcasts and domestic transmissions. The country literally wakes up to the music ever morning on the radio.

Tass did not say when Matusovsky died or give the cause of death.

But his obitituary was signed by Soviet President Mikhail Gorbachev and

authors Chingiz Aitmatov and Valentin Rasputin, both members of Gorbachev's presidential council, and a host of figures from the art world.

The exact translation of the song's title, ''Podmoskovniye Vechera,'' has long baffled music publishers. Literally, it means ''Moscow Suburban Evenings,'' but has been rendered into English simply as ''Moscow Nights.''

During Gorbachev's first Washington summit in December 1987, Van Cliburn played ''Moscow Nights'' as an encore to the delight of the Soviet leader and his wife Raisa, the only ones who knew the words and sang them in the White House.

Matusovsky was born in 1915 in Lugansk, graduated from the Gorky Institute of Literature in 1938, and was a war correspondent on the northeastern front until he was wounded.

The budding lyricist joined the Communist Party in 1945, but the songs that made him famous and set all Moscow and the country to humming were apolitical and intensely human.

''The creative work of the poet-songwriter has become part of the golden heritage of Soviet literature,'' the Tass obituary said. ''The works of Mikhail Matusovsky are marked by the love of his country, and a romantic outlook.

''His work was intended for people, and imbued with faith in the triumph of justice and good, the unlimited capacities of man and love for homeland.''

#90198u1794 07/17/1990 ~United Press International

WASHINGTON (JULY 17) UPI - President Bush, who met last month with South African black leader Nelson Mandela, said Tuesday he is now encouraging South African President Frederik de Klerk to visit the United States.

''I think it is important, having had a good visit with Mr. Mandela ... that de Klerk come here,'' said Bush, who has sought to expedite South Africa's move away from its racist policy of apartheid.

De Klerk had been scheduled to meet with Bush at the White House in mid-June, but canceled the trip after it appeared he would face big demonstrations.

There also had been complaints that Bush should see Mandela first. Since Bush and Mandela met at the White House on June 25, there has been no further word from South Africa on if and when de Klerk would make a visit.

''What we are doing now is encouraging Mr. de Klerk to come here,'' Bush told a news conference with magazine publishers when asked what he was now doing to seek greater reform.

A White House spokesman said afterward: ''We expect de Klerk to come. The president (in his remarks) just reminded him that the offer is out there. We are looking for a mutually convenient date.''

Bush said a de Klerk visit would be controversial. ''There will be lots of picketers out there,'' he said. ''I think they're wrong. I think in de Klerk, you have a new kind of leader in South Africa.''

Bush said in his talks with Mandela, ''I detected quit a respect ... for Mr. de Klerk. Thus, I think it is important for the president to sit down with Mr. de Klerk.''

''In the meantime,'' Bush said, there is ''a lot of diplomacy going on how we can encourage further change by South Africa toward the elimination of apartheid.''

The president reiterated that the United States, at this point, will neither lift nor expand its economic sanctions against South Africa.

Bush said Mandela and de Klerk understand his position, ''although they may not agree with it.''

The president said he had a frank discussion with Mandela. The black leader rejected Bush's plea to renounce violence, but praised the United States for helping foster reform in South Africa.

#90198u1797 07/17/1990 ~United Press International

PASADENA, CA (JULY 17) UPI - The electronic brain of NASA's Galileo space probe fired small rockets Tuesday to fine-tune the craft's trajectory for a December flyby of Earth, the second leg of a three-bank celestial billiard shot to sling the probe toward Jupiter.

The maneuver Tuesday, the third in a series of adjustments to put the $1.5 billion nuclear-powered spacecraft on course for the first of two Earth flybys, began at 11 a.m. PDT based on computer commands radioed to the spacecraft Monday from the Jet Propulsion Laboratory in Pasadena.

A total of 388 tiny rocket pulses over a three-hour period was designed to change the probe's velocity - roughly 51,480 mph relative to the sun - by just 2 mph. Two or three more such maneuvers are planned to set up the Dec. 8 Earth flyby. "The maneuver started on time," said a JPL spokesman.

The nuclear-powered Galileo probe, currently some 85 million miles from Earth, was launched from the space shuttle Atlantis Oct. 18. It is the most sophisticated interplanetary spacecraft ever built and if all goes well, it will drop a probe into Jupiter's atmosphere before going into orbit around the giant planet in 1995 for long-term observations.

But getting there posed a major challenge for NASA. In the wake of the 1986 Challenger disaster, NASA scrapped development of a booster powerful enough to propel Galileo directly to distant Jupiter, some 480 million miles from the sun.

Instead, a less-powerful solid-fuel rocket was used to fire the probe to Venus for the first of three "gravity assist" flybys in which the spacecraft will use planetary gravity to provide the energy needed to reach Jupiter.

The complicated trajectory, designed by researchers at the Jet Propulsion Laboratory, goes by the acronym "VEEGA," which stands for Venus-Earth-Earth-Gravity-Assist.

On Feb. 9, Galileo sailed within 10,000 miles of Venus, using the cloudy planet's gravity to gain about 5,000 mph relative to the sun. At the same time, the probe's trajectory was changed, setting up the first of the two Earth flybys.

Galileo will sail about 600 miles above Africa at 12:34 p.m. PDT on Dec. 8 using Earth's gravity to increase its speed by 11,490 mph, whipping it out toward the asteroid belt between Mars and Jupiter.

It then will fall back into the inner solar system and on Dec. 8, 1992, Galileo will streak 185 miles above South Africa, utilizing Earth's gravity a final time to gain an additional 8,280 mph before heading to Jupiter at an initial velocity of about 87,000 mph relative to the sun.

If all goes well, Galileo will slip into orbit around Jupiter on Dec. 7, 1995, to begin a 20-month tour of the planet and its many moons. The gravity assist technique will be used during flybys of Jupiter's moons to set up future low-altitude flybys of other moons.

Galileo is powered by a pair of "radioisotope thermoelectric generators," or RTGs, that convert the heat generated by the decay of plutonium 238 into electricity.

Each RTG is loaded with about 24 pounds of highly toxic plutonium 238 dioxide and environmentalists have protested the Galileo mission, saying a malfunction could cause the probe to crash into Earth's atmosphere during one of the two high-speed flybys, releasing radiation into the environment.

According to an environmental impact statement, the odds of a release after an accidental re-entry are 1-in-2 million. NASA officials say even in such worst-case scenarios, only small amounts of plutonium could be released, which would not cause a major health threat.

#90198u1801 07/17/1990 ~United Press International

LONDON (JULY 17) UPI - Relatives of victims of the 1988 Lockerbie air disaster charged Tuesday that X-ray devices on the market for nearly two decades could have detected the bomb that blew apart Pan Am flight 103, causing the deaths of 270 people.

Jim Swire, whose 23-year-old daughter was aboard the ill-fated flight, at a press conference also criticized the government's refusal to allow an independent inquiry into the disaster, which is believed to have been caused by Palestinian extremists.

Swire is the spokesman for the U.K. Families Flight 103 activist group, and on May 18 he smuggled a dummy bomb onto a plane at London's Heathrow Airport to demonstrate security flaws.

Derek Dempster, a scientist who said he was an impartial figure requested to make an independent test of a $40,000 bomb detector machine, showed reporters two wrapped items he had scanned, and correctly opened the one which contained a dummy bomb.

He explained the machine - manufactured by British-based Electro Magnetic Systems - used X-rays to analyze objects, which were then compared to known objects stored in the device's computer memory.

The two packages contained identical cassette recorders, one of which had been stuffed with marzipan to simulate Semtex, the Czechoslovakian-made plastic explosive believed used in the bombing of the jet above the skies of the small Scottish town of Lockerbie.

Swire said British airport authorities had failed to detect the exact same package he smuggled aboard a New York bound flight last month to prove that security lapses are still rife, despite the Dec. 21, 1988 disaster that killed all 259 occupants of the Boeing 747 and 11 other people on the ground.

''Technology capable of detecting this kind of device was already available in 1971,'' said Swire, who said first-generation medical CAT-scan devices worked on the same principle.

He admitted ''your chances of getting run over crossing the road are much greater'' than the chance of dying in a airline bombing, but maintained

that the government should devote more money and attention to security.

A Transport Department official said the government was aware of the new EMS machine and its utilization of CAT-scan techniques for bomb detection, but declared that ''these things have to be assessed by a government scientist.''

Swire praised authorities for installing last week another machine, a Thermal Neutron Analysis detector, at London's second airport, Gatwick.

A U.S. presidential commission studying the Lockerbie disaster criticized the new machine because it can only detect quantities of plastic explosives larger than that used in the Lockerbie disaster.

The government is to proceed with a Fatal Accident Inquiry in Scotland on Oct. 1, but Swire's group believes the scope of the investigation is more suited for a car accident than a major disaster. Relatives of the victims also believe security officials will not speak freely.

#90198u1817 07/17/1990 ~United Press International

STOCKHOLM, SWEDEN (JULY 17) UPI - A Soviet teenager who hijacked a domestic airliner and forced it to fly to Sweden became the first person Tuesday to be expelled from Sweden to Soviet Union in 44 years.

Dimitriy Semyonov, 17, was escorted on his flight back home back by four Soviet police officers.

Soviet authorities had promised the Swedish government to punish Semyonov only for the hijacking and not for leaving the Soviet Union, which is a listed crime there.

''Don't forget me. Find out which prison or camp I'm placed in,'' Semyonov said before leaving Arlanda airport outside Stockholm.

Semyonov, who said he expected to be jailed for 10 years and banned from the major Soviet cities for another five years, hijacked an airplane with 121 people aboard during a domestic flight June 9 and forced it to fly to Sweden,

The expulsion was decided by the Swedish government last Thursday after a recommendation from the Swedish Supreme Court.

Acting Prime Minister Lena Hjelm-Wallen said the government was departing from the previous practice of not to expel anyone to the Soviet Union because of the seriousness of the teenager's crime.

Previously, hijackers from the Soviet Union have been sentenced for their crimes in Sweden, where they were also granted political asylum.

Semyonov seized the plane after a quarrel with his father, and his action has been copied by four other young Soviets who hijacked domestic airliners to Scandinavia.

Two planes between Leningrad and Lvov in the Ukraine were hijacked five days apart this month and forced to fly to Stockholm by 19-year-old Soviet army evaders. The two are awaiting the Swedish government's decision, as were the two hijackers held in custody in Finland.

Sweden has not expelled anyone to the Soviet Union since January 1946.

#90198u1866 07/17/1990 ~United Press International

NEW YORK (JULY 17) UPI - A consumer advocacy group charged Tuesday that advertisers are increasingly exploiting unsuspecting children by subtly promoting products through clubs, celebrities, and school programs.

Consumers Union said moviemakers often get in the act too, prominently placing products like Camel cigarettes in scenes of "Who Framed Roger Rabbit," Marlboros in "Superman II" and the Dominos Pizza and Burger King

fast-food chains in "Teenage Mutant Ninja Turtles."

"Kids are a hot market and everyone is cashing in on them," said Jean Kiefer, managing editor of Zillions, a children's version of Consumer Reports, two magazines published by Consumers Union, which released the results of its study of advertising directed at children.

Calling the new tactics deceptive and manipulative, the Consumers Union study said, "Advertisers are attuned to kids' developmental stages. ... At a time when kids need to learn how to consume thoughtfully, numerous promotional messages are teaching the opposite."

The Mount Vernon, N.Y., consumers group described a proliferation of campaigns that sell to American children using subtle and not-so-subtle tactics. One company criticized in the study responded that it was not trying to influence children's behavior with its products.

Estimates of the spending power of children and teenagers vary, with some studies estimating the market targeting children worth $1 billion a week; Forbes magazine has said the market will grow to $60 billion this year, the Consumers Union report said.

Celebrity endorsements - such as director Spike Lee and athlete Michael Jordan promoting high-priced Nike sneakers and singer Michael Jackson for L.A. Gear - were decried as unfair by Zillions editor Charlotte Baecher.

"When celebrities sell status products kids can't afford, they are putting a lot of pressure on kids" and their families, Baecher said. Promotional placement of brand names in movies for children and adults alone has grown from a $10 billion market in 1980 to $64 billion in 1985, she said.

And while television advertisements of cigarettes are banned by federal law, 83 percent of films aimed at youngsters in 1989 were able to show cigarette smoking, she said.

Other soft-sell techniques include "advertorials" that use games and advice columns in magazines, and kids' clubs, most of which charge money to join in return for discount coupon booklets and club merchandise, Baecher said.

Consumers Union cited one ad aimed by Lifetime Learning Systems, a Fairfield, Conn., company that packages materials for classroom promotion. "They're ready to spend and we reach them," reads the caption of the ad.

But the company's founder and president, former teacher Roberta Nusim, defended her business, saying it differs from the controversial Whittle Communications Channel One, the 12-minute daily news program for schools that includes advertising.

Nusim cited Lifetime's "Cartoon All-Stars to the Rescue," an anti-drug program with an introduction by Barbara Bush, which was seen by 16 million elementary school children April 21.

She said the program's sponsorship by McDonald's was subtle, as only a closing Ronald McDonald Children's Charity ad, posters and other classroom materials bore the fast-food chain's corporate logo. The Consumers Union urged that schools be "ad-free zones" and said all ads aimed at children and teenagers should be clearly labeled as advertisments.

#90198u1933 07/17/1990 ~United Press International

WASHINGTON (JULY 17) UPI - The driver of a soft drink truck that rammed a Texas school bus into a water-filled ditch, killing 21 children, was to blame for the accident, the National Transportation Safety Board ruled Tuesday.

In a 3-1 vote, the board ruled the ''probable cause'' of the Sept. 21, 1989 crash was ''the truck driver's inattention and subsequent failure to maintain sufficient control of his vehicle to stop at the stop sign'' at the intersection where the crash occurred.

The impact of the collision in a rural intersection outside Alton, Texas, sent the school bus carrying 81 junior high school students over a 2-foot embankment and into a water-filled ''caliche'' or gravel pit. The board ruled it was the inability of the children to escape from the bus, rather than the collision impact, that caused the 21 deaths.

The driver of the Valley Coca Cola Bottling Co. truck, Ruben Perez, has maintained that the brakes on his tractor-trailer failed.

''He did everything he could to stop that truck,'' said Perez' Austin attorney Bob Binder, who attended the NTSB hearing with a silent Perez. ''I think it's compounding the tragedy to put the blame on the driver when he was given a truck with bad brakes.''

But NTSB chairman James Kolstad said the blame was clear.

''We're saying this is a human performance accident,'' Kolstad said after the vote. ''We found there were deficiencies with the brakes, but the greatest deficiency was in the truck driver's action, not with the brakes.''

Perez, who still faces court action over the accident, showed no emotion and made no comment on the board's ruling.

The panel found that even though Perez' ''inattention'' kept him from stopping at the intersection properly, ''if the truck driver had fully applied his service brakes the entire time, rather than downshifting and applying trailer brakes, he may have been able to stop before impact.''

The board's conclusion came on the recommendation of the NTSB staff, which has been investigating the tragedy for nearly a year.

The panel also found that, ''Contributing to the severity of the accident was the lack of a sufficient number of emergency exits on the school bus to accommodate the rapid egress (exit) of all 81 students.''

The investigators found that only four or five of the students were able to escape from the vehicle's rear emergency exit door because water kept pressing it closed, and that the small size of the side widows made escape more difficult.

Among the board's recommendations was a revision of federal motor vehicle safety standards requiring that emergency doors be designed to remain open and a study to determine if larger windows would improve safety.

#90198u1942 07/17/1990 ~United Press International

(JULY 17) UPI - A Piqua, Ohio, man faces charges today after authorities discovered a quart of nitrogyclerin in the basement of his home. Authorities are in the process of determining how to dispose of the explosive material, which prompted evacuation of residents near the dwelling yesterday.

Nazi-hunter Simon Wiesenthal is charging that East Germany's defunct secret police kept files on many former top Nazi officials who lived in Western countries after World War Two. Wiesenthal told a West German newspaper the files were used to blackmail people who should be brought to trial.

China's government newspaper is reporting an increase in the number of residents infected with the AIDS virus. The China Daily is quoting a

senior health official who says 91 drug addicts have been found to have the deadly virus... raising the total number of reported cases in China to 305.

The American Fisheries Society is reporting new data that show dozens of types of fish have become extinct during the 20th Century... and that hundreds more are in danger of disappearing from Earth. The studies blame acid rain, mining and irrigation for polluting or draining habitats in streams and lakes.

A two-year-old in Macomb, Illinois, apparently is itching to get his driver's license. Robert Crawford says his son, Tommy, reached down and released the emergency brake when he briefly left the youngster alone. The car slowly moved away but was halted by a telephone pole. Tommy was NOT hurt... and Crawford says the youngster tried the same stunt in another car the next day.

OTTAWA (JULY 17) UPI - Canada's international trade balance posted a surplus of $800 million in May, fuelled mainly by significantly increased exports to the United States and declining imports of energy products, Statistics Canada reported Tuesday.

Preliminary data on merchandise trade released by the federal government's data-gathering agency indicated Canada had a surplus of $2.5 billion with all trade partners in the first five months of 1990. The May surplus of $814 million was more than double the previous month's level.

The May trade surplus with the United States alone totalled $935 million, up from the April level of $646 million. Exports to all trade partners totalled $10.5 billion in May, up $488.8 million over the revised April data. Exports to the United States rose by $306 million in May, the agency said. Exports generally in the first five months of 1990 totalled $50.8 billion, somewhat less than the $51.3 billion posted for the same period in 1989.

Canada imported $9.8 billion worth of products in May, virtually unchanged from April. Imports of energy products, particularly crude oil, fell significantly, while imports of automotive parts rose, coinciding with the increased production of motor vehicles by Canadian manufacturers. For the

first five months of 1990, imports totalled $48.3 billion, over $255 million higher than the level reported for the same period last year.

#90198u1974 07/17/1990 ~United Press International

NASHVILLE, TN (JULY 17) UPI - Fundamentalists tightened their control over the Southern Baptist Convention Tuesday by firing the two editors of the church's news service despite jeers from 300 protesters.

As moderate pastors and church members sang hymns outside the door, the 77-member Southern Baptist Executive Committee held a closed meeting for nearly three hours before announcing that Baptist Press editors Alvin Shackleford and Dan Martin had been fired by a three-to-one margin. "This

is truly a day of heartache for Southern Baptists," said Frank Ingraham, the lawyer for the two editors.

Executive Committee members would not comment, and a statement by the Rev. Sam Pace, the committee chairman, did not say why Shackleford and Martin were fired.

But committee members have said the two were guilty of moderate bias in the stories the Baptist Press distributes to church newspapers around the country. Shackleford and Martin denied the allegation, and moderates maintained the "right to know" of church members was at stake.

They accused fundamentalists of conducting a purge of moderates from the church hierarchy since this year's election of conservative Rev. Morris Chapman of Wichita Falls, Texas, as president of the Southern Baptist Convention, the ruling body of the nation's largest Protestant denomination with nearly 15 million members.

"I think we were fired because they want their own minister of information " Martin told his supporters. "They want somebody who's going to be a spin doctor, who's going to put their spin on the story. I've had the opportunity to work with some of God's choice people. I'm sad to see it come to such an end."

The Executive Committee tried to secretly persuade Shackleford and Martin to resign a month ago. They refused and printed the story in the Baptist Press, drawing the ire of fundamentalists and an outcry from church moderates.

About 300 moderate supporters of Shackleford and Martin tried to attend Tuesday's meeting. But the committee decided to meet privately, closing the room's doors as moderates shouted insults. "You ought to be ashamed of yourself!" one church member yelled. "You have no class, and no Christian integrity either!" another shouted.

The Executive Committee's statement said the meeting was closed because of "the need to permit its members to debate the Southern Baptist Convention's business freely without fear that lawsuits would be filed against them for expressing their opinions and without fear that their comments would needlessly harm the professional reputations of two Christian journalists."

A crowd of moderates hooted and booed as an Executive Committee officer read the statement, then refused to answer questions.

Baptist moderates and fundamentalists have feuded bitterly for a decade over their interpretations of the Bible. Moderates maintained that control of the church was the central issue in Tuesday's battle.

"We drove three hours to be here," said Vallerie King, a moderate from Carbondale, Ill. "I feel it's a stand for freedom, freedom of the press and freedom for Baptists."

"This completely violates everything the Baptist church believes in," Gene Puckett of Cary, N.C., said. "What you are seeing here is a very vivid exercise of raw power. Any totalitarian system wants control of the media. This is a totalitarian system."

#90198u2001 07/17/1990 ~United Press International

OAKLAND, CA (JULY 17) UPI - The Alameda County District Attorney's office announced Tuesday that will not file charges against two Earth First! members injured when a bomb exploded in their car.

"We've based the decision on the fact that the evidence presented is insufficient to secure a conviction," Assistant District Attorney Chris Carpenter said.

Judi Bari, 40, and Darryl Cherney, 33, were injured May 24 when the bomb went off in Oakland. They had been headed for Santa Cruz to organize support for the Redwoods Summer campaign against logging interests. Police had suspected they may have made the bomb themselves and it exploded by accident.

Both Bari and Cherney have said they had no knowledge of the bomb. Earth First! leaders have said it must have been planted by opponents who previously threatened Bari.

An alliance of environmental, civil liberities, women's and peace organizations said it was pleased with the decision by the District Attorney's office.

"However, we are outraged that the Oakland police and FBI were allowed to play out their charade for the last eight weeks while there is a would-be killer on the loose," the alliance said in a statement.

The alliance included leaders of Greenpeace USA, Earth Island Institute, Friends of the Earth, Sierra Club, National Organization for Women, California Democratic Party and Environmental Project on Central America.

Their statement also called for congressional probes into the conduct of the Police Department and FBI. And it asked for a broader investigation so "the would-be assassin" of Bari and Cherney "be brought to justice."

Last week police said FBI tests of nails on the bomb carried the same manufacturer's markings as nails found in Bari's Ukiah home. "This is the most significant evidence yet," Sgt. Mike Sitterud said. "The nails found in her Redwood Valley house near Ukiah, and the same nails found around the bomb, connect this bomb to her."

Police had regarded Bari and Cherney as the sole suspects within hours of the bombing. They couple was arrested and then released days later. The

hospitalized Bari said last week that she did not know who tried to kill her and Cherney.

But, she said, "I know who created the political atmosphere to let such a thing take place." She blamed the timber industry, as well as Ukiah and Mendocino County law enforcement agencies.

#90198u2009 07/17/1990 ~United Press International

PARIS (JULY 17) UPI - Foreign ministers of the two Germanys and the four World War II Allies agreed Tuesday that Germany would sign a treaty guaranteeing Poland's western border as soon as unification was completed.

Any non-border issues between Poland and Germany would be resolved in a separate pact between the two countries, apart from auspices of the ''two-plus-four'' talks on German unity. Those talks included the Polish foreign minister for the first time on Tuesday.

In addition, West Germany agreed to meet with Poland later this summer on Polish economic problems, but officials said it was too early to specify possible aid the Germans might offer.

The Poles initially sought a signed border treaty before the four wartime allies relinguished their rights in Germany, but accepted the compromise accord - which amounted to what diplomats termed a ''solemn promise'' that Poland would not be double-crossed on the border issue after unification.

''The question of the confirmation of the border that has been decided is entirely satisfactory,'' Polish Foreign Minister Krzysztof Skubiszewski said after Tuesday's meeting.

In fact, Poland lost bargaining power on Monday, when Soviet President Mikhail Gorbachev said a united Germany could be a member of NATO with no restraints on its sovereignty, thus ruling out residual rights for the four wartime allies.

In Washington, President Bush congratulated Gorbachev and West German Chancellor Helmut Kohl by telephone Tuesday for their agreement on NATO membership for a unified Germany and said the accord moves Europe closer to ''new era of freedom.''

West German Foreign Minister Hans-Dietrich Genscher said a border treaty with Poland would be achieved ''in the shortest possible time after unification,'' and be submitted for ratification by the parliament of a united Germany.

He also said ''it is now clear that German unification will be possible by

the end of this year.''

U.S. Secretary of State James Baker issued a similar timing prediction, expecting completion of German unification by the mid-January first anniversary of Ottawa talks that launched the two-plus-four process.

''We have worked very long and very hard for exactly this result,'' a satisfied Baker said of this week's developments. ''These are the terms supported by the United States since last December when we called for a unified Germany as a member of the NATO alliance.''

He said the parties agreed Tuesday ''on a set of principles to guide the final settlement of the border issue,'' which would guarantee the border's ''definitive character.''

The Paris session was the third at foreign ministers' level for the two-plus-four talks, which involve the two Germanys plus Britain, France, the United States and the Soviet Union. The Poles were invited only to the Paris meeting. The seven foreign ministers appeared jointly at a closing news conference.

Formal conclusion of the talks, which resume Sept. 12 in Moscow, will contain clear reference to the Oder-Neisse Line as Poland's western frontier. The talks are due to end before a November summit, in Paris, of the 35-nation Conference on Security and Cooperation in Europe (CSCE).

Foreign ministers directed their political directors to begin drafting the formal end of the two-plus-four process.

The Oder-Neisse Line, drawn along two rivers in 1945, ceded to Poland several former German territories, including Silesia and Pomerania, to compensate for areas in eastern Poland lost to the Soviet Union.

The agreement on German NATO membership, reached after two days of talks in the Soviet Union between Gorbachev and West German Chancellor Helmut Kohl, buoyed Tuesday's talks around a huge circular table at a French foreign ministry conference center.

Soviet Foreign Minister Eduard Shevardnadze termed the accord a ''product of patient and serene diplomacy,'' and said this month's London summit of NATO leaders was the critical step leading to a breakthrough.

Leaders of the Western alliance on July 6 issued a landmark London Declaration, a peace offering to Moscow that invited Gorbachev to NATO's Brussels headquarters and made nuclear arms the alliance's ''weapons of last resort.''

Baker said the NATO summit was ''instrumental'' to the Gorbachev-Kohl

agreement, whose terms he found ''quite favorable.''

-30- 4612
#90198u2010 07/17/1990 ~United Press International
ATHENS (JULY 17) UPI - Iraq's President Saddam Hussein in a Tuesday broadcast on Baghdad radio accused the United States of plotting with some Gulf Arab states to undermine world oil prices.

Hussein said the oil policy pursued by some Gulf Arab states "is an American policy, (drawn up) at the request of the United States against the interests of the nation and the region's people," Hussein said in the broadcast monitored here.

Hussein warned that Iraq could no longer remain silent. "Raising our voice against the evil is not the final resort, if the evil continues," the president said.

The president said the United States was trying to become the sole superpower in the world by controlling the price of Gulf oil. "This policy is serious to the extent that we cannot keep silent. It inflicts heavy damage on us. It also inflicts damage on the (Arab) nation," he said.

"There should be some effective move to bring things back to their proper place... Iraqis will not forget the proverb that says cutting the throat is better than cutting the means of livelihood," he said.

Hussein did not single out any Gulf state by name. But Iraq took a leading role in a meeting of Gulf states in the Saudi Arabian resort of Jeddah last week to persuade the United Arab Emirates to curb overproduction that has resulted in lower oil prices costing producers billions of dollars.

The meeting resulted in the UAE accepting a previously rejected limit of 1.5 million barrels set by the 13-nation Organization of Petroleum Exporting Countries. The UAE had been pumping more than two million barrels daily. OPEC pumps more than a third of the world's oil and attempts to support prices by limiting the output of its members.

The UAE's refusal to accept a quota led to overproduction by other OPEC members, especially Gulf neighbors Kuwait and Saudi Arabia, that resulted in the current glut of crude oil on world markets.

The price of U.S. crude on the New York Mercantile Exchange has shot up more than $2 a barrel in the last six trading sessions as traders anticipated the UAE knuckling under.

Hussein explained that a decline in oil prices of $1 per barrel represents a $1 billion yearly loss in oil revenues for Iraq, which is trying to

repair an economy ravaged by its eight-year war with Iran.

Since oil prices began plummeting from between $27-$28 a barrel during the war, Iraq has suffered a loss of revenues of $14 billion annually, Hussein said.

"Instead of showing appreciation for Iraqi sacrifices (during the Gulf war), some Gulf rulers stabbed it in the back with poisoned daggers," the Iraqi president said.

Hussein's verbal outburst came two days after reports from Washington said the Defense Department was leading efforts to prevent Iraq from importing industrial furnaces that could be used to make components for missiles or nuclear bombs. His Baghdad radio speech marked the 22nd anniversary of the coup d'etat that brought the ruling Baath Arab Socialist Party to power in Iraq.

#90198u2034 07/17/1990 ~United Press International

WASHINGTON (JULY 17) UPI - Bending to criticism, the National Association of Securities Dealers Inc. said Tuesday it will not puruse a controversial proposal to require companies whose stocks are listed on the NASDAQ market to maintain a bid price of at least $1 for their shares.

In a statement, the association said a revised proposal, approved Friday by the NASD board of governors, must still be approved by the Securities and Exchange Commission before it becomes official.

SEC officials were not available to comment on the revision, and Robert Ferri, an NASD spokesman, said the SEC had not committed to reviewing the rule by any specific date.

In April, the NASD proposed tougher guidelines for companies seeking to enter and maintain a listing on the NASDAQ exchange, which has gained new prominence as it has grown to become the second-largest stock exchange in the United States.

But one aspect of the proposal drew heavy criticism during its public comment period: a clause requiring firms to requalify for listing under signficantly tighter standards if they fail to maintain a float - that is, the value of all shares available to the public - of $200,000 or a minimum bid price of $1 for 10 consecutive days.

In response, NASD modified the proposed $1 standard to permit continued listing of any issue if the company has a public float of at least $1 million and equity of $2 million.

"This change (in the proposal) recognizes that adverse market conditions may temporarily cause a company's shares to fall below $1 without having any serious impact on that company's financial health or its future as a NASDAQ company," the NASD statement said.

WASHINGTON (JULY 17) UPI - A new generation of nuclear reactors touted as ''inherently safe'' have numerous unresolved safety issues and the nuclear industry has not released enough information to persuasively dispute such concerns, a new report charged Tuesday.

The report, done for the Union of Concerned Scienists, an anti-nuclear group, was released as industry officials complained that the Nuclear Regulatory Commission was moving too slowly in reviewing the safety of the new reactor designs.

The industry officials, in comments submitted to the NRC, said government delays in certifying some designs as safe threatened to prevent utilities from incorporating advanced reactors in their plans for building new power plants over the next 10 years. The officials said the NRC is not expected to act on any new design until 1993 at the earliest.

The nuclear industry argues advanced reactors should play a key role in the nation's energy future because, unlike coal- and oil-fired power plants, they do not emit carbon dioxide, the main pollutant linked to global warming.

Several nuclear vendors have designed new types of reactors that are supposed to resolve the safety concerns that have undermined public confidence in the current generation of nuclear power plants.

The reactors are mainly intended to prevent operator errors from causing or aggravating reactor malfunctions, as was the case in the Three Mile Island and Chernobyl nuclear accidents.

Instead of depending on people to activate key shutdown or safety systems, the advanced reactors are designed to be self-monitoring and capable of shutting down on their own should operating problems arise.

However, the report issued by the Union of Concerned Scientists said significant uncertainties remain about the safety of the advanced reactors.

The report, done by MHB Technical Associates, a San Jose, Calif., technical consulting firm, looked at three of the most publicized advanced reactor designs: Westinghouse's Advanced Passive AP-600 pressurized water reactor, General Atomics' Modular High Temperature Gas-Cooled Reactor and General Electric's Power Reactor Inherently Safe Module.

The study said a preliminary review of those designs revealed numerous unresolved safety issues, including:

-The failure of some designs to include containment buildings that could hold in radiation in case of accidents and prevent saboteurs from gaining access to reactors.

-Claims that fewer operators would be needed to operate some advanced reactors and that reactor control rooms need not be built to withstand accident conditions. The report said those changes would represent a ''radical departure'' from current NRC safety philosophy.

-The vulnerability of all three reactors reviewed to internal fires or loss of cooling water accidents.

The report said its review of advanced reactor safety was greatly hampered by the refusal of vendors to publicly release detailed information about their designs for fear of giving away trade secrets to their competitors.

Cathy Roche, spokeswoman for the U.S. Council on Energy Awareness, the nuclear industry's public relations arm, dismissed the report's criticisms of advanced reactors as a predictable effort by anti-nuclear activists.

Roche also said detailed information about advanced reactors would be released during the NRC's formal certification process.

WASHINGTON (JULY 17) UPI - Negotiators face significant obstacles toward reaching agreement on international rules governing financial services in the current round of world trade talks, trade officials said Tuesday.

The on-going trade negotiations, formally called the General Agreement on Tariffs and Trade, have focused on setting rules for 15 areas and are nearing a December deadline.

The current Uruguay Round of talks feature for the first time discussion on setting rules for the growing financial services industry, which has gained importance in the U.S. economy because of the decline in domestic manufacturing.

Last year, U.S. trade in these services, such as banking, securities and insurance, topped $434 billion, or 35 percent of the total U.S. volume of

international trade.

Much of this trade is not covered by GATT rules, which largely regulate trade in goods. "U.S. financial institutions tell us that they feel vulnerable in many of the markets that offer the greatest opportunities for future growth," said William Barreda, the Treasury Department's deputy assistant secretary for trade and investment.

Barreda also told a House task force on the international competitiveness of U.S. financial institutions that the Bush administration has made financial services a priority in the trade talks.

He said U.S. negotiators have drafted a set of provisions on financial services that seek "to give foreign financial institutions the right to establish and operate on terms no less favorable than those applied to domestic firms in like circumstances."

Rep. John LaFalce, D-N.Y., the task force's chairman, said little progress has been made toward a financial services agreement despite months of effort.

The market access obligations have stirred controversy among negotiators because not all countries belonging to the 97-nation GATT are strongly committed as the United States is, said Linda Powers, the Commerce Department's deputy assistant secretary for services.

The overall GATT negotiations have stalled in recent weeks on another matter - the thorny issue of farm subsidies, which the United States is seeking to eliminate over the opposition of most Western European nations.

During last week's economic summit in Houston, leaders of the world's wealthiest nations reached a compromise and agreed to push for the gradual elimination of the subsidies. The move was seen largely as an effort to get the stalled trade talks back on track.

"Without an agreement on agriculture, it is impossible to visage coming to closure on any of these areas," including financial services, said Bruce Wilson, assistant U.S. trade representative for services.

"At this point, the United States is seeking a big package in the Uruguay Round, and if we don't get some of these key areas negotiated we might not get any package at all," Wilson said.

#90198u2098 07/17/1990 ~United Press International

WASHINGTON (JULY 17) UPI - The government proposed new rules Tuesday to help protect workers from exposure to cancer-causing asbestos.

A key part of the proposal, issued by the Labor Department's Occupational Safety and Health Administration, would cut by half the permissible exposure limit of workers to asbestos.

''OSHA believes that the proposals will significantly reduce worker deaths from cancer resulting from exposure to asbestos,'' said Assistant Labor Secretary Gerard Scannell, who heads OSHA.

OSHA estimates more than 2 million workers in auto repair operations, construction, building renovation and maintenance operations would be affected by the proposal, made at the order of the U.S. Circuit Court of Appeals for the District of Columbia.

A public hearing on the proposal is scheduled Oct. 23 in Washington, OSHA said.

Asbestos is a fibrous mineral used for insulation and fireproofing. It becomes hazardous when it crumbles and its fibers are inhaled. Exposure to asbestos can cause lung cancer and a variety of other diseases.

The Environmental Protection Administration last year announced a ban on asbestos to be phased in over seven years. In 1996, production, importation, processing and distribution of asbestos in nearly all products will be prohibited.

#90198u2121 07/17/1990 ~United Press International

WASHINGTON (JULY 17) UPI - Two superpower pacts on nuclear testing went before a Senate committee Tuesday, treaties negotiated in the mid 1970s but kept away from the ratification process until now because of verification concerns.

The treaties are the first submitted by the Bush administration and the final details were resolved and the paperwork signed at the Washington summit last month. Many of the problems with verification technology were resolved in the Reagan administration.

The treaties are the 1974 Threshold Test Ban Treaty that limits the maximum size of underground nuclear tests to a explosive yield of 150 kilotons of TNT, and the 1976 Peaceful Nuclear Explosions Treaty that governs the use of nuclear charges for such purposes as mining, damming rivers, digging harbors or geologic mapping. Even though the treaties have not been formally approved, both the United States and the Soviet Union have abided by their terms.

One reason the two treaties were held up was the concern that without adequate verification the peaceful explosions pact might be used to hide illegal weapons testing.

The verification technology involves on-site monitoring of explosions using a system that can much more accurately measure the yield of a nuclear device than relying solely on seismic shock waves.

At the hearing of the Senate Foreign Relations Committee, administration officials endorsed the two treaties now that the superpowers have agreed on a monitoring program.

The United States has used nuclear charges on a few occasions in the 1960s and early 1970s to attempt to break energy resources out of dense rock formations. The last such explosion, part of a series of tests known as Project Plowshare, took place in 1973. The Soviet Union has used nuclear charges as recently as 1988 for seismic mapping of a large geographic area.

#90198u2158 07/17/1990 ~United Press International
NEW YORK (JULY 17) UPI - The dollar skidded in heavy New York trading Tuesday, caught up in a stampede of cross-rate trading set off when Swiss

officials indicated they would keep interest rates steady to protect their franc.

Currency dealers said the market vigorously sold the dollar after a Swiss National Bank official said that slippage in the Lombard interest rate was temporary and did not signal an easier credit policy.

The German mark and Japanese yen also lost ground against the Swiss franc in so-called cross-trading not directly involving the dollar - but whose effects in the market helped drive the U.S. unit even lower.

"There was a tremendous amount of scrambling on the crosses and on the direct dollar-Swiss (franc) market," said Robert White, a foreign exchange manager for First Interstate Bank Corp. in Los Angeles.

In late New York trading, the dollar was quoted at 1.6435 marks, off more than one pfennig from 1.6546 Monday, and at 147.80 yen, down from 148.10 at the end of the previous session.

Money trader John Nasti of Swiss Bank Corp. said the dollar "never should have been as high as it was" against the Swiss franc, given the spread between U.S. and higher Swiss interest rates.

White said players were positioning themselves for Federal Reserve Chairman Alan Greenspan's Wednesday morning testimony before the Senate Banking Committee, looking for an explanation of the Fed's recent loosening of credit.

He added that data released Tuesday showing the U.S. with a $7.73 billion trade deficit in May "had the smallest impact of any trade number I can remember."

Other New York dollar rates: 1.4045 Swiss francs, off from 1.4170 Monday; 5.5150 French francs, well off from 5.5500; and 1,203.75 Italian lire, down from 1,210. The British pound strengthened to $1.8160 from $1.8028.

In Europe, the dollar closed mostly lower in narrow trading against the major currencies as the U.S. trade figures met market expectations.

Currency analysts said news the U.S. trade deficit increased by a modest $400 million from April failed to boost the dollar because it was in line with economists' forecasts.

"The trade numbers were particularly boring," said currency analyst Nick Murphy of Barclays de Zoete Wedd in London.

Dealers said investors were unwilling to take up long positions on the dollar - that is, expecting the currency will go higher - ahead of

Greenspan's appearance in his twice-yearly Humphrey-Hawkins testimony on the state of the economy and on Fed policy.

The dollar slipped against the German mark in Frankfurt, closing at 1.6505 marks against 1.6525 Monday, but inched higher in Zurich, to 1.4105 Swiss francs against 1.4095. In London, the pound strengthened to close at $1.8110 compared with $1.8040.

The U.S. unit closed marginally lower in Paris, Brussels and Milan, at, respectively, 5.5315 French francs against 5.5555, 34.01 Belgian francs against 34.0250 and 1,208.60 lire against 1,212.85.

Earlier in Tokyo, the dollar weakened against the yen on false rumors the Bank of Japan was about to hike interest rates. The dollar closed at 148.20 yen, down from Monday's 148.43.

In Zurich, gold closed lower at $361 an ounce compared with $363.50 Monday. Gold was also down in London at $361.25 an ounce against $362.75.

Republic National Bank in New York closed cash gold at $361.75 an ounce, off from $363 Monday. The New York Commodity Exchange settled gold at $362 an ounce, down from $363.30.

Silver eased in both Zurich, to $4.85 an ounce from $4.95, and London, to $4.84 an ounce compared wityh $4.90.

Republic closed cash silver at $4.825 an ounce, down from $4.855. Comex silver settled at $4.814 an ounce, off from $4.847.

(JULY 17) UPI - It's Wednesday in the Philippines, where rescue workers are struggling to cope, two days after the most powerful earthquake to hit

the archipelago in 14 years.

The Military Civil Defense says 302 people are known dead so far... but about 750 more are believed trapped in the rubble of a half-dozen hotels and factories. The Red Cross says more than 19-thousand people are homeless.

Rescue efforts are being aided by U-S-supplied lights and generators... but are being hampered by rain. The operations are concentrated on the devastated towns of Cabanatuan and Baguio, where the cries of an unknown number of children could be heard amid destroyed buildings.

Broadcast reports show the buildings in Baguio bent like the folds of an accordion. The city remains isolated because of landslides and fallen telephone and power lines.

American military helicopters airlifted 25 victims, including four Americans, for treatment in a hospital at Clark Air Base. And the Pentagon says American civilian rescue teams with search dogs are on their way to the Philippines to help.

The U-S ambassador to the Philippines, Nicholas Platt, says three officials of the U-S Agency For International Development have been rescued from the Nevada Hotel... but a fourth unidentified American died in the hotel.

In Washington, the Pentagon says it received NO word of deaths or injuries among the 15-thousand U-S military personnel in the Philippines.

The quake measured seven-point-seven on the Richter Scale and was centered 60 miles north of Manila.

#90198u2175 07/17/1990 ~United Press International

WASHINGTON (JULY 17) UPI - John Berentson, chief operating officer of Infotechnology Inc., the parent company of United Press International, Tuesday was appointed vice chairman of the news agency.

A UPI spokesman also said the company is planning to assign ''roughly 100'' members of its financial, sports and general editorial units to work on joint ventures with Financial News Network, which is 47 percent owned by Infotech.

Berentson, 50, who will continue at his Infotech post, replaces Joseph Taussig, who is leaving UPI to pursue other business interests, the company said in a statement.

Dr. Earl Brian, chairman of Infotech and UPI, also said the news agency is reviewing candidates to replace former UPI President Paul Steinle, who resigned in March to start his own media firm.

In addition to assuming his current duties at UPI's parent company in 1989 Berentson also has served as a senior vice president and general manager at FNN. He continues to hold the title of FNN executive vice president.

''Berentson's appointment helps link UPI with Financial News Network and other allies and comes as UPI picks up the pace of its drive to differentiate its news services from those of other news organizations,'' Brian said.

In addition, Brian said UPI and FNN will shift some staff members later this month to two recently formed joint ventures, UPI Financial Information Services and UPI SportsNews Inc.

But UPI spokesman Milt Capps said, ''The exact numbers for strength of the joint ventures and the various UPI and FNN units have not been finally determined.

''However, we expect that on the order of 200 FNN staffers will participate in some way in the joint venture, to varying degrees, and roughly 100 UPI staffers in business, sports and the general, or core editorial, groups will also be affected,'' Capps said.

The UPI staff assignments to the projects ''will principally involve shifting manpower authorization for people who are currently spending some or all of their time reporting sports or business,'' Capps said.

UPI and FNN staffers assigned to the ventures ''will be paid directly by their respective sponsoring organizations,'' Capps said, adding it would be ''premature'' to comment on geographic transfers.

Brian also said UPI, which Infotech acquired from Mexican publisher Mario Vasquez Rana, is nearing completion of other joint ventures for general news, photos, radio and television.

''Locally, regionally and internationally, UPI is creating new alliances and developing new means to anticipate and meet news media demands,'' Brian said. ''UPI is moving rapidly to team with qualified partners in order to share expertise and financial resources.''

#90198u2190 07/17/1990 ~United Press International

NEW YORK (JULY 17) UPI - Stock prices closed lower Tuesday in active trading on the New York Stock Exchange as the closely watched Dow Jones industrial average teased but fell just short of the historic 3000 mark for a second straight day.

The Dow Jones industrial average, which rose 19.55 Monday, was unchanged at 2999.75.

Among broader market gauges, the New York Stock Exchange composite index fell 0.64 to 200.49 and Standard & Poor's 500-stock index fell 1.43 to 367.52. The price of an average share fell 11 cents.

Declines led advances 870-647 among the 2,027 issues crossing the NYSE tape. Big Board volume totaled 176,790,000 shares, compared with 149,430,000 shares traded Monday.

The Dow industrials nosed the historic 3000 mark in early trading, thanks to healthy earnings reported by Merrill Lynch, Upjohn, and Wells Fargo, but slipped after a disappointing report by United Telecommunications, analysts said. Profit-taking and program sales combined to put the reins on the Dow's efforts to stay over 3000 in afternoon trading, they said.

"I think what we saw was a market that made a couple tries but couldn't hold it," said Dennis Jarrett, chief market strategist at Kidder, Peabody & Co. "Traders got a little nervous and began to throw in the towel." "Traders wanted to bank some profits," he said. "They don't want anything to erode."

The 3000 mark is a "psychologically resistant level where people are inclined to take profits in extended issues," said Edward Nicoski, chief technical analyst at Piper, Jaffray & Hopwood in Minneapolis. "I think we went too far too fast," Nicoski said. But analysts said they saw little lasting significance to the Dow's failure to remain above 3000. "This was

just a momentary pause," Jarrett said.

On the trading floor, United Telecommunications was most active, plummeting 8 3/4 to close at 29 1/2. The company reported second-quarter earnings down 55 percent from a year ago and said its plans to buy GTE's 19.9 percent interest in its U.S. Sprint subsidiary - which would make United Telecom sole owner of Sprint - were placed on hold.

GTE, which reported higher second-quarter earnings, followed, off 3/4 to close at 28 1/4, continuing to reflect its planned merger with Contel Corp. Baxter International was third, up 5/8 to 27 1/4.

Merrill Lynch was up 5/8 to 25 1/8, Upjohn was down 1/2 to 41 1/2, and Wells Fargo was up 1 1/2 to 80 1/8. Among the blue chips, AT&T was down 1/8 to 37, IBM was down 1 5/8 to 120 3/4 and General Electric was down 3/8 to 74 3/8.

Prices closed lower in moderately active trading on the American Stock Exchange. The Amex Market Value index lost 1.19 to close at 364.39. Declines led advances 333-233 among the 833 issues traded. The price of an average share fell four cents. Volume totaled 13,330,000 shares, compared with 13,690,000 shares traded Monday. B.A.T. Industries led the Amex issues, unchanged at 11 1/2.

The National Association of Securities Dealers composite index fell 5.11 to 464.49.

#90198u2207 07/17/1990 ~United Press International

SEATTLE (JULY 17) UPI - State and federal officials met Tuesday to discuss a major conference on trade between the United States and China that may be held before the end of the year.

The conference, billed as the largest of its kind ever held in the United States, could draw 300 Chinese delegates. It was postponed earlier this year because of continuing anger at the Beijing government over the crackdown on dissent in China.

Norman Swanson, president of the Center for International Cooperation, which has been working with the Chinese to organize the conference, said the Chinese want to hold it in late November.

The Chinese first proposed the trade conference late last year and said that if it were held successfully, the Beijing government would consider making Seattle a hub for the country's rapidly increasing trade with the United States.

Trade between Washington state and China amounted to about $1.6 billion last year. Washington sends the Chinese Boeing jets and forest products and buys apparel.

Enterprises and officials in Washington state's sister province of Sichwan the provinces of Jiangsu and Hubei and the Tianjin municipality had all expressed strong interest in participating, Swanson said.

He added that the release of astrophysicist Fang Lizhi, China's most prominent dissident has defused much of the animosity in Washington, D.C. As a result, he said, the Chinese government now believes that China's most-favored-nation trading status will be continued.

Revocation of the status for China would effectively end most trade wtih China - and, with it, any interest on either side in the conference.

Dennis Barnes, commercial officer in the Beijing embassy, was meeting Tuesday in Seattle with Swanson and William Abnett, executive director of the Washington State China Relations Council, to discuss organization and possible dates for the conference.

Swanson said the Chinese had met several times in recent weeks with U.S. Ambassador James Lilley and that he understood Lilley not only favored the conference but favored proceeding with it as quickly as possible.

#90198u2217 07/17/1990 ~United Press International

(JULY 17) UPI - Police moved in today to end renewed ethnic clashes in a Soviet Central Asia republic.

Reports reaching Moscow say the lawmen clubbed rioters and fired warning shots to end violence between Kirghizians and Uzbeks. The Tass news agency says at least 27 people were injured in the violence.

It also says additional police and soldiers were sent to the city of Osh, in the western Kirghizia republic. The outbreak of violence comes as a followup to disorder that erupted in the region last month.

Thousands of people in Osh are said to have surrounded the regional Communist Party headquarters and demanded that its leadership resign. A similar incident is reported in another area of the country.

The independent Interfax news service says this came in the unofficial capital of the Crimea.

New York City prosecutors continue to build their case against three defendants accused with the rape and beating of a Central Park jogger last

year.

Police detective Umberto Arroyo told a jury in state Supreme Court in Manhattan today that 15-year-old Raymond Santana... one of the three teen-agers on trial for the attack of the jogger... earlier admitted to the crime. He said Santana signed a written statement in which he described how the gang of youths launched their Central Park attack.

Santana said he was socializing with some friends when the group decided to go to the park to- in his words- ''rip people off.''

He then wrote that the group of teen-agers set upon the jogger as one youth- quote- ''held her arms with his legs'' and another one ''ripped off her clothes.''

But in the statement, Santana maintained he himself did NOT rape the woman.

The written and videotaped confessions from the three defendants taken the day after the attack are crucial to the prosecution's case because NO one has come forth as a witness.

Defense lawyers for the three teen-agers... Santana, Antron McCray and Yusef Sallam... have asserted throughout the trial that the statements were coerced by the police who were pressing to make an arrest.

#90198u2227 07/17/1990 ~United Press International

(JULY 17) UPI - A spokesman for the national space agency today gave reporters at Cape Canaveral an optimistic prognosis for getting America's shuttle program back on schedule.

Says William Lenoir, NASA's associate administrator for spaceflight- ''NOT only do we see the light at the end of the tunnel, but we are out of the tunnel.''

Lenoir was speaking amid NASA efforts to fix the leaky shuttle Atlantis so it can be launched as early as August 10th on a four-day mission to carry a secret Pentagon payload into space.

If the fuel leak cannot be fixed, NASA plans to send up the shuttle Columbia instead, but NOT until around September 1st.

Engineers will pump super-cold liquid hydrogen rocket fuel into Atlantis next week in a test to find out if adjusting some bolts will fix the leak that grounded the ship earlier this month.

Lenoir says if the plan works, Atlantis and its five-man, all-military

crew could be cleared for takeoff next month.

Florida's electric chair again figures in a move by a prison inmate to escape death.

Jerry White had been scheduled to die tomorrow, but the Florida Supreme Court has granted him a 24-hour stay to hear his lawyers' arguments. They claim that the electric chair at the Florida State Prison at Starke is defective and that its use would constitute cruel and unusual punishment forbidden by the U-S Constitution.

The Florida Supreme Court and federal district courts have rejected the faulty chair argument in other recent cases. But White could appeal to a federal appeals court in Atlanta which, in two other cases, granted stays on the same argument.

The legal questions stem from from a botched execution in May. Flames and sparks shot out from under the headpiece worn by the chair's occupant at the time of execution.

#90198u2237 07/17/1990 ~United Press International

NEW YORK (JULY 17) UPI - A Long Island, N.Y., woman has filed a $150 million lawsuit against the makers of the widely prescribed drug Prozac, charging that the ''miracle'' anti-depressant drove her to attempt suicide the woman's lawyer said Tuesday.

In a suit filed Monday in state Supreme Court in Suffolk County, Rhonda Hala accuses Eli Lilly & Co., based in Indianapolis, of failing to properly test the drug.

Prozac, whose generic name is fluoxetine hydrochloride, has been widely described as a ''miracle'' drug for treating depression. It is the most commonly prescribed anti-depressant medication in the country.

Leonard Finz, Hala's attorney, said the Shirley, N.Y., woman became so self-destructive while taking Prozac that she attempted suicide several times by slashing herself with razor-sharp objects hundreds of times over her body.

Hala's doctor took her off the drug after reading a study done by medical researchers at Harvard University that found a link between Prozac and patients who exhibited suicidal behavior, Finz said.

He said since being off the drug, his client has been free of suicidal thoughts but would be ''physically and emotionally scarred for life.''

Hala, a 40-year-old secretary, and her husband, Joseph, are seeking $50 million in compensatory and $100 million in punitive damages.

They accuse Lilly of ''failure to properly test Prozac before marketing it... (and) to warn the public as well as the medical community of its nightmarish consequences,'' Finz said.

The attorney said he believed the suit was the first in the nation filed in a case where a Prozac patient has attempted suicide.

Marie Abbott, a Lilly spokeswoman, said the company had seen the court papers but had no comment.

#90198u2246 07/17/1990 ~United Press International

WASHINGTON (JULY 17) UPI - China is likely to harvest its second record-setting grain crop in a row, the Agriculture Department said Tuesday, but its farmers will face a challenge in feeding the burgeoning population in coming years.

In an ''outlook'' report on agriculture in China, the Economic Research Service said lack of investment was the major constraint on agricultural development during the 1980s.

With China's population expected to reach 1.3 billion by the end of the 1990s and the amount of farmland declining slowly, ''each citizen would be supported by only 0.074 hectares, roughly the size of two basketball courts'' at the end of the decade, the report said.

The figure cited by the report is equal to roughly two-tenths of an acre.

''These trends will force China's farmers to exercise great skill in planting the most advantageous combination of crops,'' the report said. ''It is expected that the area sown to (feed) grains will continue to decrease with more emphasis on expanding wheat, oilseeds and sugar.''

Chinese farmers harvested a record 407 million metric tons of grain in 1989. The research service said this year's crop was projected to range from 407 million to 415 million tons, thanks to improved yields and more land under cultivation.

''A record 97 million-ton summer grain crop already has been harvested and as of mid-July prospects looked good for a bumper fall crop, possibly 310 million-318 million tons,'' the report said.

Cotton and oilseed production also was forecast to climb this year.

The report said U.S. agricultural exports to China this fiscal year were likely to total $1.2 billion, down 20 percent lower from fiscal 1989 due to lower prices and smaller wheat sales. However, it would be much better than the $900 million forecast in late May.

#90198u2250 07/17/1990 ~United Press International

NEW YORK (JULY 17) UPI - The Lipper Analytical Services index of the 30 largest growth mutual funds Tuesday was 521.31, off 0.57 percent.

This index is net asset value weighted and adjusted for capital gains distributions and income dividends. It is based at 100 on Dec. 31, 1968.

-30- 420

#90198u2269 07/17/1990 ~United Press International

(JULY 17) UPI - Voters are going to the polls in Georgia today to determine which Democrat and which Republican will campaign for the governor's mansion.

Incumbent Democratic Governor Joe Frank Harris is leaving office after serving the maximum two terms allowed by law.

On the Democratic side, former Atlanta Mayor Andrew Young wants to be Georgia's first black governor. He's running against four other Democrats, including Lieutenant Governor Zell Miller.

Miller led Young in opinion polls... but Young is expected to win hefty support from the state's large black electorate.

Unless Young pulls off a major upset today... analysts say he'll most likely end up in a runoff election August 7th against Miller.

Whoever gets the Democratic nod is likely to go up against Republican state Representative Johnny Isakson in November. Polls show Isakson is expected to win a clear majority today and avoid the need for a runoff.

Whether to even hold runoff elections has been a topic of debate in Georgia.

But today, U-S District Judge Richard Freeman rejected a lawsuit from black leaders who say a runoff discriminates against minority candidates.

Under Georgia's majority vote law, a candidate must receive more than 50 percent of the ballots to win a party nomination or most general elections.

If NO candidate gets more than 50 percent, a runoff is held between the

two top vote-getters.

A woman friend of Washington, D-C, Mayor Marion Barry reluctantly told a jury today that she supplied him with drugs for year.

Bettye Smith was the first witness to testify she saw Barry used cocaine prior to 1985. She said he used the drug as early as 1983.

She said she also supplied the drug to him in the weeks before his January 18th drug arrest at a Washington hotel.

Smith... a former Washington city worker... was brought to the trial under court order from a Chattanooga, Tennessee, hospital where she was being treated for stress.

Barry's drug and perjury trial is in its seventh week.

-30- 2209

#90198u2281 07/17/1990 ~United Press International

WASHINGTON (JULY 17) UPI - NASA engineers expect to eliminate at least 95 percent of the Hubble Space Telescope's blurry vision by replacing nickel-sized mirrors in a new camera to be installed in about three years, officials said Tuesday.

Any remaining near-sightedness should be reduced to a ''negligible'' level by using motorized ''actuators'' to push or pull on Hubble's apparently flawed 94.5-inch primary mirror to make subtle changes in the mirror's shape.

''We feel ... that we can get the error down to about 5 percent of the existing error,'' said deputy project manager Jean Olivier. ''If we can wind up with a residual uncertainty of 5 percent, we think that's doable on orbit. That leaves us with a sufficient margin. We can take out twice that much with the actuators on the primary.''

Hubble's primary mirror is mounted on 24 such actuators that can be commanded to push or pull as warranted to make changes in the shape of the mirror, which affects the focus of the optical system.

The actuators are not powerful enough to correct the misshapen mirror on their own and, in any case, scientists are hesitant to use the devices for fear of making the problem worse than it already is.

Still, if the corrective mirrors in the replacement camera do not take out enough of the aberration, the actuators could be used as a last resort, Olivier told reporters during a telephone briefing.

''We'd like to keep the actuator capability in our back pocket, so to speak, and never have to use it, but that's kind of a fall back,'' Olivier said. ''I feel that the process of using the actuators is not a real risky thing. However, there are 24 of them and they all have to work. We'd like to not resort to using this system.''

The $1.5 billion telescope, launched from the shuttle Discovery April 25, is expected to revolutionize astronomy by operating above Earth's hazy atmosphere, peering more deeply into the universe and with greater clarity than ever before.

But during the primary mirror's construction 10 years ago, a mistake apparently was made that gave the near-perfect reflector a slightly incorrect curvature. The resulting defect prevents light striking different portions of the mirror from being brought to a focus at the same point.

While NASA officials have said Hubble can still do valuable research and can eventually be fixed, the blunder has triggered a storm of criticism of the space agency.

NASA engineers are studying possible ''quick-fix'' solutions, including using advanced computerized enhancement techniques to compensate for the blurriness.

Another options includes the possibility of installing a donut-shaped shield on the end of the telescope's tube to prevent light from falling on the outer portions of the primary mirror where the problem is most pronounced.

But project scientist Edward Weiler said the reduced light levels would offset the value of improving the telescope's focus.

''It's somewhat attractive but in general, the scientists will not want to risk going up and doing that,'' he said.

Hubble is equipped with five primary instruments, including two visible-light cameras that require a good focus to work properly.

Even before the telescope's launch, NASA was developing a more advanced ''wide field-planetary camera'' to replace the one currently on board.

By modifying mirrors the size of a nickle in the replacement camera, Olivier said, at least 95 percent of the primary mirror's spherical aberration can be counteracted.

The new camera is scheduled for installation during a space shuttle mission in 1993, but Weiler said NASA is looking into making the change

sooner.

Hubble's primary optical system was never tested as a complete unit, which critics say would have revealed the problem well before launch.

Weiler said Tuesday such a ''full system end-to-end test'' will be conducted on the replacement camera to make sure the corrective mirrors will work properly.

#90198u2293 07/17/1990 ~United Press International

CYCLING

American Greg LeMond moved to within five seconds of the overall lead in the Tour de France after making a spectacular surge in the final climb of the 134-mile stage from Blagnac to Luz Ardiden. LeMond placed second in the stage, six seconds behind Miguel Indurain of Spain. Claudio Chiappucci of Italy remained the overall leader.

BASKETBALL

The defending champion United States team, led by Teresa Edwards' 32 points, rallied to defeat Cuba 87-78 in the group-A quarterfinals of the 11th World Women's championship at Kuala Lumpur, Malaysia.

BASEBALL

The Buffalo Bisons have nearly 19,000 commitments for season tickets should the city win a major league baseball expansion team. Officials of the team said they have received the commitments under their ''Your Ticket to the Majors'' program, which began in mid-June after the National League expansion committee announced a timetable for expansion. ... Pittsburgh Pirates officials have scouted 10 Florida cities in search of a new spring training home because Bradenton has failed to agree to refurbish its existing facility. The Pirates have trained at Bradenton's McKechnie Field for 20 years.

COLLEGE

Kentucky Wesleyan College named former Panther assistant coach Wayne Boultinghouse the school's new men's head basketball coach and athletics director. Boultinghouse, 47, replaces Wayne Chapman, who resigned July 6 after leading KWC to its sixth NCAA Div. II national championship last season.

FOOTBALL

Tight end Eric Green, the Pittsburgh Steelers' first-round draft choice, has signed with a new agent and said he expects to miss the start of training camp on Wednesday.

GOLF

Arnold Palmer filed an $8 million suit against a Japanese firm, accusing it of using his name to try to sell interests in his Orlando, Fla., golf resort before it had bought it. The suit, filed in Orange County Circuit Court on Monday, comes two months after WDI System Inc. filed a $3 million suit against Palmer and backed out of a deal to buy the Bay Hill Golf Club for $46 million.

HOCKEY

Boston Bruins forward Andy Brickley underwent surgery to remove a bone mass from his right thigh, an injury that forced him to miss 35 games last season. Brickley, 28, was sidelined in February by the thigh injury, known as myositis ossificans, in which the muscle turned to bone. A doctor said he could resume light activity within several days and can begin training within six weeks.

MOTORCYCLE RACING

Hungarians will have to wait until August to learn whether they will host the first-ever Hungarian Motorcycle Grand Prix in September. Riders from the Rothmans-Honda team trained on the track in July and complained to the International Federation of Motorcycling that the surface and run-off areas were unsuitable.

SKIING

Officials canceled the four-race, season-opening men's World Alpine Cup event at Mount Hutt, New Zealand, due to insufficient snow, but angry organizers vowed to stage the events with or without official sanction. The FIS men's circuit coordinator who inspected the course said there was not enough snow for the two slalom and giant slalom races set to begin July 30.

SOCCER

Cameroon star Roger Milla, who came out of retirement and performed spectacularly in the World Cup, announced his decision to play profesionally in Los Angeles next season while sharply criticizing France. ''I will never play again in France ever. That is for sure,'' Milla, 38, said. ''They treated us far too long as slaves, with absolutely no respect.'' ... The Swedish soccer association announced it will not renew

the contract of national coach Olle Nordin following its poor World Cup performance in Italy where the Swedes were eliminated after losing all three first-round matches.

TENNIS

1990 NCAA singles champion Steve Bryan announced his decision to turn professional after his first-round victory over Kelly Jones at the Sovran Bank Tennis Classic in Washington, D.C. The 19-year old compiled a 53-6 record in two years at the University of Texas.

TRACK AND FIELD

Leroy Burrell, the faster sprinter in the world the past two seasons, will race in the 100 meters July 29 at the New York Games. World record-holder Carl Lewis also is entered in the 100, but the two may not run in the same section. Burrell, 23, posted a 9.94 to win the U.S. title last year and Lewis, the 1984 and 1988 Olympic champion, holds the record with a 9.92 performance.

#90198u2298 07/17/1990 ~United Press International

PIQUA, OH (JULY 17) UPI - A cache of nitroglycerin that forced the evacuation of more than 2,500 residents was detonated Tuesday, causing only minimal damage to the basement where it was found.

A bomb squad had determined that two 16-ounce bottles containing the liquid explosive were too volatile to move and decided to explode the material on site.

For nearby residents, whose homes had been boarded up to resist a powerful blast, the incident ended more with a whimper than a bang.

''There was a small explosion,'' said detective Dave Larger of the Piqua Police Department. ''The basement windows were blown out and the foundation damaged on one side.''

He said the bomb squad used sandbags to buffer the explosion.

All residents except those living on the affected block and from a few houses on a nearby block were allowed to return to their homes Tuesday afternoon, said Linda Houser, administrative assistant to police Chief Donald White.

The nitroglycerin had caused tense moments in the Miami County community. About 2,000 people from 12 city blocks were evacuated from the neighborhood Monday and another 500 evacuated Tuesday before the

detonation. Some residents spent the night at an evacuation center set up at Nicklin Elementary School.

The FBI flew in an agent from Washington with an electronic device called a ''sniffer'' that tests chemical vapors.

The nitroglycerin, some black powder, wire and a detonation device were found at the home of Dana Taylor, 26, Monday morning when police responded to a domestic quarrel at the house.

Taylor was arraigned Tuesday in Miami County Municipal Court on a charge of possession of a dangerous ordnance, a fourth-degree felony, after reportedly threatening to blow up his estranged wife, Karin, 20. Bail was set at $50,000 and he was being held in the Miami County Jail.

Nitroglycerin is a colorless, oily liquid used in dynamite that is sensitive to shock and can blow up with a slight movement or sudden temperature change.

Officials reportedly were considering parceling out the liquid and transportating it in stages to a farm north of town to be detonated. Officials cleared an evacuation route leading to the farm.

City workers also readied the immediate area for a detonation by boarding up houses and preparing to cut off gas and electricity. Fire trucks and hoses were deployed, said city Prosecutor Mike Hemm.

Taylor, described as long interested in rockets and explosives, had threatened to kill his wife once when she was going to leave him, said Taylor's sister-in-law, Cheryl Guerra.

''His solution to everything was to blow it up,'' she said. ''I always thought he was a little bit crazy.''

Dorothy Taylor, his mother, said the situation was exaggerated, and that the chemicals posed no danger because she had seen her son transport them.

''If they (police) thought it was so dangerous, they wouldn't be so close to (the house),'' she said.

Taylor had been designing and testing rockets with the aim of marketing a children's toy, Mrs. Taylor said. She said her son used the chemicals to make fuel for model rockets.

-30- 3380

#90198u2301 07/17/1990 ~United Press International

WASHINGTON (JULY 17) UPI - The Senate opened the way Tuesday for passage

of a major civil rights bill, provoking a veto threat from the White House and a violent outburst by Republicans who said they were treated like ''a bunch of bums.''

The Senate voted 62-38 to impose cloture, which limits debate, after bitter argument over the bill, which would restore legal anti-discrimation safeguards for blacks, women and other minorities in the workplace.

All Democrats, except Sen. James Exon, D-Neb., and eight Republicans voted for cloture. Thirty-seven Republicans voted against.

At the White House, chief of staff John Sununu said, ''The bill, as crafted right now, is a quota bill, and the president has said he would veto that bill.

''President Bush is unequivocally committed to supporting a civil rights bill,'' said Sununu, flanked by Attorney General Dick Thornburgh. ''He is (also) unalterably opposed to quotas.''

An angry Senate Republican leader Robert Dole challenged the Senate to vote on the bill ''right now ... and lay the matter to rest. I don't see any reason to debate the bill ... we are not going to prevail.''

But Senate Democratic leader George Mitchell objected, saying Democrats want to offer some amendments to the original bill, incorporating some changes proposed by the administration.

Sen. John Danforth, R-Mo., said he had talked with Sununu after the vote and said, ''The White House wants to work something out'' and urged Mitchell to give negotiations another 24 hours.

Dole, furious with the Democrats for forcing a vote and equally furious with GOP senators for voting for cloture, berated the Senate.

With deep anger in his voice, Dole said, ''I say let's get another leader on this side ... if we're going to throw away eight or nine votes, I don't want any part of it'' and bitterly criticized GOP colleagues ''who know better than the leadership.''

''If we're going to shove it down the throats of the minority, things are going to get tough around here,'' Dole said to a spellbound Senate. ''We're going to have a different Senate on this side of the aisle.

''To have this jammed down our throats ... it seems to me we're going to be in for a long, hot summer,'' Dole said. ''If we're going to be treated like a bunch of bums, we're not going to have any time agreements, any agreements around here.''

''This is a political game,'' Dole said. ''Forget about the bill. Shove it down their (Republicans) throat. Make the president veto it, trying to put our party on record against civil rights on a cloture vote.''

Dole also charged Democrats ''reneged'' on a deal with the White House, an accusation that Sen. Edward Kennedy, D-Mass., vigorously denied, saying there ''there never was an agreement'' and there were ''fundamental'' differences that could not be overcome.

''I am convinced that the bill before use will lead to a veto,'' Sen. John Danforth, R-Mo., said. ''We're going nowhere. The civil rights community has not won a victory. They have shot down the bill.''

Senate Democratic leader George Mitchell defended his actions in forcing the vote and added, despite Dole's threats, ''I'll continue to do my best to act in a fair and equitable manner ... best calculated to accomplish the public's business.''

The situation in the Senate posed a delicate problem for President Bush who is seeking to open the Republican Party to black voters and who has publicly said several times that he wants a civil rights bill this year.

But Bush has stressed that he will not sign a civil rights bill that would require quotas on the basis of sex or race in hiring, promotions and others actions in the workplace. The administration has also warned that the bill would lead to a trial lawyers bonanza.

Kennedy said he would offer changes in the bill that ''remove the last thin reeds in quotas argument that has been used by opponents of civil rights bill in their attempts to undermine this bill and described as ''hogwash'' claims that the beneficiaries of the legislation would be the trial lawyers.

The Civil Rights Act of 1990 would reverse six Supreme Court rulings handed down in 1989 that Kennedy said ''significantly undermined the struggle to end prejudice in the workplace. They were ominous steps backwards, away from the goal of equal opportunity and justice for all Americans.''

Sen. Orrin Hatch, R-Utah., denounced Democrats for forcing the vote before any amendments are offered and any debate held, calling the move a ''ingenious strategy'' for blocking Republican proposals.

Hatch also called the bill ''terrible'' and ''heinious'' and charged it would overhaul the 1964 Civil Rights bill, overturn 20 years of case precedent, reverse 25 Supreme Court opinions ''and create a litigation bonanza - all in the name of civil rights.''

''Even a cursory review reveals that (the bill) is simply and unalterably a quota bill,'' Hatch said. ''The legislation still eliminates existing defenses to a challenge of discrimination, forcing employers to hire on the basis of race, sex and ethnicity to avoid being sued.''

''In sum, the legislation is still completely flawed, and no proposal to date can cure its myriad defense,'' Hatch said.

#90198u2314 07/17/1990 ~United Press International

(JULY 17) - The oil market underwent a correction Tuesday with prices leveling off after a rise of $2.20 a barrel over the last six trading sessions on the New York Mercantile Exchange.

The standard-setting West Texas Intermediate crude for August delivery eased down 2 cents to end the day on the Merc at $18.65 a barrel, near its high on the day of $18.67. It traded as low as $18.11 a barrel.

Volume was an average 96,744 contracts after a series of heavy trading days.

With a one day interruption, WTI had risen $2.20 over the last six exchange trading sessions from $16.47 a barrel on July 6 to $18.67 a barrel Monday as nations of the OPEC gave increasing evidence they would curb overproduction that had created the world glut of crude oil and driven prices down.

The United Arab Emirates, the main violator of Organization of Petroleum Exporting Countries' production quotas, last week said it would accept a previously refused 1.5 million barrel a day limit.

''There was nothing newsworthy (Tuesday). The market came up too far too fast. This may have been a good correction,'' said Jack O'Dea, manager of the International Energy Futures Group, Dean Witter Reynolds.

''We may not go straight up but I don't think we'll go down a hell of a lot unless there's a surprise in the API's,'' the trader said.

The surprise may have happened.

Peter Beutel of Merrill Lynch Futures Inc. said most traders were expecting the American Petroleum Institute weekly survey to show crude supplies last week dropped 2-4 million barrels and gasoline stocks fell 2-3 million barrels as demand increased from warm-weather driving.

Released after the Merc closed, the API inventory report instead showed crude stocks last week jumped 4.7 million barrels to 385.3 million barrels

53.4 million barrels higher than a year ago. Little relief from the glut was indicated.

Gasoline inventories also jumped 2 million barrels last week to 215.6 million barrels, 7.3 million barrels less than a year ago.

Unleaded gasoline for August delivery fell 0.32 cent on the Merc to 64.12 cents a gallon, while prompt delivery unleaded declined 1.1 cents to 67.95 cents a gallon and 0.9 cent to 61.95 cents a gallon on the New York Harbor and U.S. Gulf Coast cash markets respectively.

On the European spot market, the United Arab Emirates' Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - edged up 4 cents to $15.63 a barrel.

Britain's widely traded North Sea Brent lost 12 cents to $17.85 a barrel.

On the U.S. Gulf Coast cash market, WTI for prompt delivery slipped 5 cents to $18.60 a barrel.

On the Merc, August-delivery heating oil finished the day at 56.08 cents a gallon, down 0.16 cent.

#90198u2341 07/17/1990 ~United Press International

NEW YORK (JULY 17) UPI - U.S. crude oil stocks added to the existing glut by rising 4.7 million barrels last week despite oil traders' expectations they would fall from the warm-weather driving demand, the American Petroleum Institute reported Tuesday.

For the week ended July 13, the API weekly survey showed crude oil inventories rose to 385.3 million barrels from 380.6 million barrels in the prior week and remained way above year-ago levels of 331.9 million barrels.

With crude stocks 53.4 million barrels higher than a year ago, U.S. crude prices may undergo renewed downward pressure after rising more than $2 a barrel over the past week or so.

Oil traders had expected crude stocks to decline 2-4 million barrels as the nations' refineries moved into overdrive in gasoline production.

Crude oil imports rose to 7.0 million barrels a day from 6.2 million barrels a day and were higher than year ago imports of 6.7 million barrels a day.

Gasoline supplies also increased to 215.6 million barrels from 213.6

million barrels in the prior week but stayed below year-ago levels of 222.9 million barrels.

Stocks of unleaded gasoline, which accounts for 90 percent of the domestic market, increased to 166.6 million barrels from 165.4 million barrels a week earlier and remained significantly higher than year-ago levels of 159.1 million barrels.

Gasoline production slipped to 7.2 million barrels daily, from 7.4 million barrels in the previous week and less than year-ago output of 7.4 million barrels daily.

Gasoline imports fell to 487,000 barrels daily from 565,000 barrels daily in the previous week and were less than year-ago imports of 624,000 barrels daily.

U.S. refineries operated at 92.9 percent of capacity last week, compared with 92.6 percent a week earlier and 90.4 percent a year ago.

Inventories of distillate - used for home-heating oil and diesel fuel - rose to 114.7 million barrels from 112.7 million barrels a week earlier and remained above year-ago levels of 110.2 million barrels.

Distillate production declined to 2.9 million barrels daily from 3.1 million barrels daily in the preceding week but was higher than year-ago output of 2.8 million barrels daily.

Distillate imports fell to 281,000 barrels a day from 314,000 barrels a day in the previous week but were higher than year-ago imports of 186,000 barrels a day.

Imports of refined products dropped to 1.9 million barrels daily from 2.3 million barrels daily in the preceding week but were higher than year-ago imports of 2.2 million barrels daily.

#90198u2345 07/17/1990 ~United Press International

WASHINGTON (JULY 17) UPI - As part of a coordinated crackdown on pollution of the Chesapeake Bay, the government filed suit against the District of Columbia Tuesday to clean up wastewater discharges into the Potomac River.

The Justice Department, acting on behalf of the Environmental Protection Agency, took legal action to force the district to comply with discharge restrictions at its Blue Plains Wastewater Treatment plant.

EPA officials said the lawsuit was part of a months-long campaign by the

federal government and the states of Pennsylvania, Virginia and Maryland to crack down on industrial and sewage treatment plants polluting the Chesapeake Bay.

The EPA said a total of 56 enforcement actions had been brought against polluters in the the Chesapeake Bay watershed since April. Penalties assessed or collected under the enforcement actions exceed $3.7 million, officials said.

Among the other facilities cited by state or federal authorities for polluting the bay were, by state:

-In Pennsylvania: Letterkenny Army Depot in Chambersburg; American National Can, Lemoyne; Conrail, East Pennsboro; Berwick sewage treatment plant; Lancaster Area Sewer Authority; Mountaintop Area Joint Sanitary Authority; Corning Asahi Video Products Co., College Township.

-In Maryland: John Hopkins Applied Physics Lab, Laurel; Bethlehem Steel Corp., Baltimore; FMC Corp., Baltimore; Eastern Stainless Corp., Baltimore; Cumberland Wastewater Treatment Plant; Prince Frederick Wastwater Treatment Plant; Poolesville Wastewater Treatment Plant; Winchester Homes, Frederick.

-In Virginia: Royster Co., Chesapeake; Westinghouse, Richmond; U.S. Army Garrison, Fort A.P. Hill; Du Pont, Spruance Plant; City of Richmond sewage treatment works; Spotsylvania County sewage treatment works; Virginia Department of Transportation, highway tunnel in Norfolk.

#90198u2351 07/17/1990 ~United Press International

WASHINGTON (JULY 17) UPI - The House, refusing to yield any of its spending authority, Tuesday rejected a proposed amendment to the Constitution that would require the federal budget be balanced each year.

The amendment received a 279-150 majority vote in favor of the plan, but fell short of the two-thirds vote needed for approval.

Defeat of the amendment had been forecast by House Speaker Thomas Foley, an opponent of the plan.

The Constitution ''should be rarely amended,'' Foley said, calling it a mistake to proceed with the balanced budget amendment ''when the problem has not been a legal or a constitutional deficiency'' but a political disagreement on spending.

But during debate, supporters of the amendment said it was the only way to impose discipline on the spending habits of Congress and the executive

branch.

The proposed amendment would have required that starting with fiscal year 1995 the president would have to submit a balanced budget plan to Congress and would prohibit spending from exceeding the government's income.

The amendment would have allowed spending to exceed receipts only in time of war or if three-fifths of the House and Senate vote for a specific deficit.

The vote marked the second time in a month that the House considered - and rejected - a proposed amendment to the Constitution. The House defeated the flag protection amendment June 21.

Opponents said Congress must face up to the hard decisions on cutting the budget deficit.

House Budget Committee Chairman Leon Panetta, D-Calif., said, ''My fear is that a constitutional amendment is not a place to find courage. It's a place to hide courage. The myths of the '80s are over and the bitter realities of the '90s are here. The time has come to act like it. Vote against the amendment and brace yourself for the very tough choices that are coming in the next few weeks.''

Passage of the amendment was urged by President Bush, who sent a letter to House leaders saying the amendment, along with authority for a line-tem veto, would restore ''fiscal integrity'' to the government.

''Together with political courage and discipline, these tools are vital to solving the problem of budget deficits,'' he said.

Critics scoffed at Bush's endorsement, however, noting that neither Bush nor President Ronald Reagan ever submitted a balanced budget over the past decade despite their avowed support for the constitutional amendment.

The debate took place as congressional and administration negotiators continued their search for a plan to trim this year's budget deficit and slow the debt spiral in coming years. A meeting was scheduled with Bush at the White House Wednesday afternoon.

The budget picture became even more gloomy with Monday's report by the administration raising the estimate of next year's deficit by $10 billion to $168.8 billion.

Foley, D-Wash., said it was important to reach agreement on a plan of spending cuts and tax hikes during the next two or three weeks.

Although balanced budget amendments have been introduced in every Congress

the House has not considered the issue since 1982 when a similar amendment failed to win the needed two-thirds majority. The Senate, by a one-vote margin, approved an amendment in 1986, but the House did not consider it at that time.

Arguing for the amendment Tuesday, Rep. Dan Burton, R-Ind., charged that Congress continues to spend money for new programs despite the soaring U.S. debt. ''There is no discipline in the budgetary process and there will be none unless we amend the Constitution.''

Rep. James Quillen, R-Tenn., said ''we have come to the point ... where change is necessary if we are to leave to our posterity a nation which is not hopelessly buried in debt.''

Rep. Thomas Downey, D-N.Y., an opponent, called the amendment ''a dumb idea ... this charade ... this fraud.''

Downey and others argued the amendment would not solve the problem because Congress would find ways to get around it by taking programs ''off budget '' delaying expenditures to the next year, or using other ''gimmicks.''

Rep. James Traficant, D-Ohio, said ''this country doesn't need a constitutional amendment. It needs a Congress with guts'' to cut spending.

#90198u2369 07/17/1990 ~United Press International

KISSIMMEE, Fla. (JULY 17) UPI - Tupperware Home Parties Tuesday announced a sweeping corporate reorganization and layoffs designed to save the company an estimated $25.8 million through 1992.

The company, faced with declining profits and rising costs, said it will trim 100 jobs at company headquarters in Kissimmee, where the workforce totals 600.

Last month, the company laid off about 300 workers at production plants in Halls, Tenn., and Hemingway, S.C.

''The company's new structure is flatter, leaner, more flexible and more focused on supporting the business goals of the company,'' President Allan Nagle said in a statement.

Another loser in the reorganization was the company's new product design center in North Smithfield, R.I. It is being closed, and product design will be transferred to company headquarters, creating about 100 jobs in Kissimmee, said spokeswoman Lawrie Pitcher Platt.

The reorganization should result in a pretax savings of $25.8 million

through 1992 and savings of $12.5 million annually after that, the company said.

The reorganization would beef up the company's sales operation, adding seven new regional sales vice presidents.

Nagle said changes in lifestyle had cut the company off from its customers.

''It became clear that Tupperware had to reorganize in order to fulfill its mission,'' he said.

However, the company will not abandon its unconventional home sales strategy, which ignores retail outlets in lieu of sales generated primarily through parties, Platt said.

''We feel very strongly that direct selling provides a level of customer service that is unmatched,'' she said.

She said the company was developing alternatives to allow home sales to continue but without parties.

In the first quarter, worldwide sales by Tupperware, a unit of Premark International of Deerfield, Ill., totaled $229 million and the division reported a $10.1 million profit, Platt said.

Bonita Austin, an analyst for Wertheim Schroder & Co. Inc. in New York, estimated that domestically, Tupperware suffered an operating loss of $10 million in 1989 on sales of $350 million.

#90198u2384 07/17/1990 ~United Press International

WASHINGTON (JULY 17) UPI - A woman brought by court order from a Tennessee hospital testified Tuesday she used cocaine with Mayor Marion Barry between 1983 and and 1986 and supplied the drug to him in the weeks before his Jan. 18 arrest.

Bettye Smith, a former city worker who had been hospitalized for stress she said was related to testifying against her longtime friend, became the first witness at Barry's 7-week-old drug and perjury trial to say the mayor used cocaine prior to 1985.

Another longtime Barry friend, Doris Crenshaw, then testified she shared cocaine with Barry at least a dozen times since late 1984, including twice at an Atlanta hotel during the 1988 Democratic National Convention.

But Tuesday's witnesses appeared to cast doubt on two of the 10 misdemeanor drug possession charges Barry faces. He is also charged with

three felony counts of perjury and a single misdemeanor count of conspiracy to possess cocaine.

Assistant U.S. Attorney Judith Retchin said the government expected to rest its case after calling a final witness Wednesday morning, police investigator James Pawlik, to explain telephone records linked to Barry. Defense lawyer R. Kenneth Mundy said he expected to call about a dozen witnesses in Barry's defense.

So far, 10 people have testified that Barry used cocaine in 20 homes, 15 hotels and four boats in the District of Columbia, Atlanta, the Virgin Islands and the Bahamas.

Smith wept and shook when she entered the courtroom and answered in a whisper, ''I'll try,'' when asked by U.S. District Judge Thomas Penfield Jackson if she could testify. She told the jury that she had an ''intimate'' relationship with Barry, but never a sexual one.

Sometime between Jan. 1 and Jan. 18 this year, Barry came to her Capitol Hill home and accepted cocaine from her, Smith testified.

One of 10 misdemeanor cocaine possession charges against Barry alleges he possessed the drug sometime between Jan. 1 and Jan. 18.

But under cross-examination, Smith said she could not be sure the incident occurred in January and admitted it could have been between Christmas 1989 and New Year's Day. She testified that she handed Barry a package of cocaine, but that he went into a bathroom and she never saw him use it.

''You can't testify it was January, can you?'' Mundy asked.

''No,'' Smith replied.

Barry, 54, could face 26 years in prison and $1.85 million in fines if convicted on all counts. He was arrested Jan. 18 after being videotaped smoking crack in an FBI-police sting.

Crenshaw, a political consultant now living in Montgomery, Ala., met Barry in 1966 when both worked in the civil rights movement and worked on Jimmy Carter's presidential campaign in 1980 and Walter Mondale's in 1984, she testified.

Crenshaw said she was in Washington in September, October and November 1989 and that on one of those occasions she and Barry used cocaine in her room at the Mayflower Hotel.

One of the misdemeanor counts charges Barry possessed cocaine between Nov. 7 and Nov. 10, 1989, a count prosecutors had said Crenshaw could

substantiate.

But during cross-examination, defense lawyer Robert Mance asked Crenshaw if it were not ''as feasible that it could have been October or September as it was November?''

''It could have been, Mr. Mance,'' said Crenshaw.

Smith, 45, was ordered to testify and was flown to Washington from her hometown of Chattanooga Tuesday morning accompanied by U.S. marshals. She had checked herself into the Valley Psychiatric Hospital in Chattanooga on July 11, complaining of stress over her court appearance and what she said was her father's pending cancer surgery.

A letter from Smith's psychiatrist, Dr. Al Lee Soloman, was presented at a hearing before a federal magistrate Tuesday morning in Chattanooga at which Soloman requested she not be forced to testify.

''Her thinking, which is being clouded by her mood, is that her testimony will destroy her in the eyes of her parents,'' Soloman's letter said. ''She currently finds suicide to be more acceptable than testifying. She has threatened to commit suicide instead of testifying.''

Smith said she took medication Tuesday morning and said her memory of details was not very good. Often she answered questions by saying she did not recall specifics.

Between 1983 and 1986, she and Barry shared cocaine about five times a year, said Smith, who called herself a ''recreational'' cocaine user.

But in 1987 the mayor stopped using cocaine in her presence, going instead to a bathroom when they would share the drug, Smith testified. ''It made sense to me that he would not do cocaine in front of someone else,'' she said.

#90198u2397 07/17/1990 ~United Press International

WASHINGTON (JULY 17) UPI - The World Bank Tuesday posted a net income of $1.046 billion for its fiscal year ended June 30, slightly down from $1.094 billion in its fiscal year 1989.

The bank's fiscal 1990 earnings were after a $106 million one-time charge to fund staff post-retirement health and insurance benefits and a $357 million provision for losses on loans to countries with repayment arrears that were declared in ''non-accrual status.''

The institution noted that its fiscal 1990 net income also reflected the reduction of its commitment fee on undisbursed loan balances, a measure that saved borrowing countries about $150 million for the year.

The multilateral organization, which is the main source of loans to developing countries, said that in fiscal 1991 it will waive for the second consecutive year two-thirds of its 0.75 percent commitment fee on undisbursed loan balances, saving its borrowers an additional $225 million.

The bank's accumulated loan loss provision rose to $1.25 billion at the end of fiscal 1990, or 40 percent of outstanding loans in non-accrual status. In fiscal 1989, the bank provisioned $358 million for losses on loans.

The total principal balance of loans in non-accrual status declined to $2.9 billion in 1990 from $3.2 billion at the end of fiscal 1989.

Under non-accrual status, the World Bank no longer includes in its balance sheet any interest on its loans to the country.

The bank's reserves-to-loans ratio continued to increase in fiscal 1990 to

10.8 percent from 10.2 percent at the end of fiscal 1989. The organization said it will add $750 million of its 1990 net income to its general reserve to increase the reserves-to-loans ratio to 11 percent by the end of fiscal 1991.

''The World Bank continued to strengthen its financial structure in the just completed fiscal year 1990 and is well-positioned to meet borrowing member countries' evolving needs for development finance'' said Ernest Stern, senior vice president for finance, in prepared remarks.

During fiscal 1990, Guyana and Honduras, two of the nine countries that had been in non-accrual status, fully paid their arrears to the bank, contributing $124 million to net income. Nicaragua, Panama and Zambia also paid part of their arrears.

The bank said that at the end of fiscal 1990, several nations in non-accrual status were developing programs of adjustment that ''give hope that they, too, may soon be able to become current in servicing their debt to the bank.''

On July 2, after the close of fiscal 1990, Guatemala went into non-accrual status because payment on its loans from the World Bank were six months overdue. The principal balance outstanding on loans to Guatemala as of June 30 was $268 million.

Other countries in non-accrual status are Liberia, Peru, Sierra Leone and Syria.

During fiscal 1990, the World Bank's gross disbursements to member countries reached a record $13.9 billion, up from $11.3 billion fiscal 1989. Net disbursements - gross disbursements minus loan repayments - were $6.3 billion in 1990, up from $2.5 billion fiscal 1989.

The bank said it borrowed in the world's financial markets $11.7 billion in 15 curriencies during fiscal 1990 at a cost of 7.99 percent, up from 7.73 percent during fiscal 1989.

#90198u2421 07/17/1990 ~United Press International

MONTREAL (JULY 17) UPI - Seagram's distilled spirits marketing and sales force in the United States will be cut by 177 positions as part of a decision to focus on the company's premium liquor brands, it was announced Tuesday.

Jerome S. Mann, president of The House of Seagram, one of The Seagram Company Ltd.'s four U.S. divisions, said the ''decision acknowledges current realities'' in the marketplace.

In the past year and a half, Seagram's has reduced by roughly half the number of brands it markets in the United States, Mann said.

He also said continuing consolidations in the number of wholesale and retail outlets selling Seagram brands resulted in a ''need to revise our sales and marketing approach''.

Mann said 37 of the 177 marketing, sales and support staff positions to be cut already were vacant and that one of the company's seven regional offices will be closed.

The House of Seagram, based in New York, produces and markets the company's distilled spirits in the United States.

Since 1988, Seagrams has divested a number of its non-premium U.S. distilled brands and streamlined its U.S. operations.

Mann said despite a continued decline in liquor sales, the company increased sales and profit on its premium spirits brands in 1989.

On June 6, The Seagram Company Ltd. reported first-quarter earnings of

$187 million, down 4.5 percent from $196 million in the year-ago period.

Revenues edged up to $1.29 billion from $1.23 billion in the first quarter of 1989.

Seagrams is a producer and marketer of distilled spirits, wines, coolers, fruit juices and soft drinks whose brands include Chivas Regal, Martell Cognacs, Tropicana Pure Premium Orange Juice and Soho Natural Sodas.

#90198u2453 07/17/1990 ~United Press International

LOS ANGELES (JULY 17) UPI - NBC Entertainment President Brandon Tartikoff, who has led the network to five straight years of No. 1 ratings, announced Tuesday he is leaving day-to-day management of prime-time operations to take on ''bigger picture'' issues at the network.

The move, part of an executive shuffle announced during NBC's summer press tour, makes the 41-year-old Tartikoff chairman of NBC Entertainment Group. In that post, he will focus on expanding the network's production of programming and finding outlets for the distribution of these programs.

''What this means is that Tartikoff won't be deciding whether to put 'Cosby' on at 8 or 8:30 any more,'' said entertainment analyst Alex Ben Block, editor of the trade publication Show Biz News. ''Instead, it look as if he'll be deciding how the network is going to grow.''

Block noted that the major networks, who have seen their viewer share decline notably in recent years with the growth of cable programming, need to find growth areas if they are to survive at their current level of operation. The key areas for growth are international markets, which may develop an insatiable appetite for American programming, and the lucrative rerun-sales market.

The three major networks are currently blocked from selling reruns of TV series made by its own studios, but federal regulators may ease or even eliminate those restrictions.

The decision by Tartikoff, who assumed the presidency of the entertainment division a decade ago when the network was mired in third place, comes following months of rumors that he was looking for a change. He had been named chairman of the NBC Program Development Group in October 1988.

Executive Vice President Warren Littlefield, Tartikoff's right-hand man for the past decade, becomes Tartikoff's successor as president of NBC Entertainment. Littlefield, 38, is regarded as much more low-key than the extroverted Tartikoff.

Two other long-time Tartikoff associates - Perry Simon and John Agoglia - also received promotions, with the 35-year-old Simon, senior vice president of entertainment programs, moving to Littlefield's post as executive vice president, prime time programs. Agoglia, the 51-year-old executive vice president of NBC Productions, becomes president of NBC Enterprises.

Tartikoff said in the announcement, ''For all practical purposes, Warren's been running NBC's prime time for the past 18 months and has ably demonstrated he's ready to take on more.

''Knowing that the division is in his and Perry's capable hands, with John in place to lend some valuable assistance, gives me the freedom to devote more time to some of the 'bigger picture' issues I'm interested in,'' Tartikoff said.

Robert Wright, president and chief executive officer of NBC, credited the quartet of executives with the network's success in recent years and said the changes would ensure that the General Electric Co. subsidiary would continue to benefit from their skills.

Wright said that Tartikoff has been important to increased activity by the network in news and sports productions and in activities by network-owned stations.

#90198u2484 07/17/1990 ~United Press International

NEW YORK (JULY 17) UPI - The first half of 1990 brought a slowdown in U.S. merger and acquisition activity overseas, but foreign purchases of American companies surged in value in that period, an accounting firm said Tuesday.

Japanese cross-border acquisitions surged in the first half, said KPMG Peat Marwich, while Sweden emerged as a big new player.

The international accounting firm said U.S. mergers and acquisitions overseas in the period totaled $8.1 billion in 124 deals, compared with 213 such deals for $11.4 billion in the first six months of 1989.

One deal - Philip Morris's agreed acquisition of Swiss chocolatier Jacobs Suchard for $3.8 billion - accounted for a third of the U.S. total.

''Tighter credit requirements and a weakening economy are tempering'' the U.S. appetite for cross-border acquisitions, said Herbert Adler, international M&A partner for the New York-based accounting firm.

Meanwhile, foreign purchases of U.S. companies surged to $27.9 billion in

the first half from $23.9 billion in the year-earlier period, although the number of deals declined to 338 from 392, KPMG said.

Despite the Tokyo Stock Exchange breaks of early 1990, Japanese cross-border acquisitions rose 84 percent in the first two quarters, to $5.3 billion in 114 deals from $2.9 billion in 70 deals in the year-ago period.

Emerging as a major new cross-border M&A player, KPMG said, Swedish companies carried out 71 cross-border transactions for a value of $8.5 billion, sharply up from 51 deals for $700 million in the first half of 1989.

Adler said Swedish business executives want to assure their continued access to the European Community after the EC's 1992 market unification. ''Acquiring EC companies is the quickest way to do this,'' he said.

The firm said sales of companies in Germany and Switzerland, once resistant to foreign purchases, were surging.

German cross-border sales more than quadrupled in the first half of 1990, to $3.8 billion from $900 million, while Swiss foreign sales leaped to $3.9 billion from $700 million in the year-earlier period.

But in each case the surge was produced by one huge deal: Feldmuhle Nobel of Germany was sold to Stora of Sweden for $2.4 billion, and chocolate-maker Suchard went to U.S. conglomerate Philip Morris.

Worldwide, cross-border mergers and acquisitions totaled $62.2 billion in the first half of 1990, involving 1,172 transactions, up $8.6 billion from the $53.6 billion in sales in 1,402 deals in January-June 1989.

British businessmen maintained their position as the most active cross-border buyers, making 305 deals for a total value of $11.72 billion. But this was down from the 424 deals for $12.4 billion seen in early 1989.

British buyers were followed by those of France, at $8.82 billion in 164 deals, Sweden, at $8.49 billion in 71 deals, the United States, at $8.10 billion in 124 deals, and Japan, at $5.29 billion in 114 deals.

#90198u2492 07/17/1990 ~United Press International

NEW YORK (JULY 17) UPI - A police detective Tuesday testified that one of the youths accused of brutally raping a female jogger in Central Park admitted he attacked and sexually assaulted the woman.

Detective Humberto Arroyo told a jury in state Supreme Court in Manhattan

that Raymond Santana, one of three teenagers on trial for the attack on the jogger, signed a written statement in which he described how the gang of youths set upon the woman.

But in the statement Arroyo said he did not rape the woman.

Arroyo's testimony came a day after the jogger herself made a dramatic appearance in court, emerging for the first time in public to describe her difficult course of recovery since the April 19, 1989 attack in an isolated area of Central Park.

The 30-year-old woman said she did not remember any details of the attack, but in a clear, firm voice, she told the jury how she suffers from double vision and a poor sense of balance and has lost her sense of smell.

Arroyo read to the court Santana's three-page handwritten statement, which the defendant gave the day after the attack on the jogger.

In the statement, Santana, 15, said ''I grabbed her (breasts),'' but, ''I did not have sex with her.''

The written and videotaped confessions from the three defendants taken the day after the attack are crucial to the prosecution's case because no one has come forth as a witness to the rape and beating.

Defense lawyers for the three teenagers have asserted throughout the trial that the youths - Santana, Antron McCray, 16, and Yusef Salaam, 16 - were coerced by police who were pressing to arrest somebody for the vicious attack.

Videotapes of the statements made by Santana and McCray were expected to be played for the jury Wednesday.

The three defendants are charged with 13 criminal counts, including attempted murder, rape and sodomy. Three other youths were expected to be tried at a later date.

The defendants are being tried as adults, but will be sentenced as juveniles if they are convicted because of their ages at the time the crime was committed.

In the statement, Santana described how he was socializing with some friends when they decided to go to the park and ''rip people off.''

He then wrote that the group of teenagers set upon the jogger as one youth ''held her arms with his legs,'' ''someone ripped her clothes off,'' and another ''pulled her pants down and had sex with her.''

The jurors were allowed to view the original paper Santana signed, but with certain portions blocked out to prevent them from seeing statements that might incriminate McCray and Salaam.

According to state law, statements made by one defendant that might incriminate another defendant at the same trial are not admissible in court.

In afternoon testomony, clothing taken from the defendants after their arrest and previously introduced as evidence was identified by Mary Veit, a police laboratory chemist.

Veit said she had tested the items for blood and semen stains and found semen on McCray's dark blue underwear briefs and Santana's dark blue sweatshirt, and human blood on Salaam's black leather jacket.

Veit also identified several items of clothing from Kevin Richardson, a suspect to be tried with two other defendants, that also contained possible traces of semen.

Trial was to resume Wednesday at 10 a.m.

#90198u2497 07/17/1990 ~United Press International

WILMINGTON, Del. (JULY 17) UPI - ICI Americas said Tuesday it plans to create a new business to better concentrate on higher added value chemical markets.

The new business, ICI Specialties, will bring together several existing businesses including Color and Fine Chemicals, Specialty Chemicals and C & P Resins. It will be comprised of 12 business areas in different parts of the world with each group focusing on a specific market sector.

The restructuring for the new business will begin Jan. 1, 1991.

Officials said ICI Specialties will employ 12,000 people in more than 100 countries, including 3,000 in the United States. The new business is expected to have worldwide sales of about $2.5 billion.

Executives say some of the goals of the reorganization are to generate higher growth and improve profitability for ICI, as well as providing an even stronger research and technology core.

''The essence of success in the specialty chemicals business is to provide products tailored to customers' needs,'' said Denys Henderson, chairman of ICI. ''They require the best technology with the highest quality service, increasingly provided on a global basis.''

ICI Specialties will be headquartered in Manchester, England.

#90198u2521 07/17/1990 ~United Press International

BUENOS AIRES, Argentina (JULY 17) UPI - President Carlos Menem said Tuesday that a consortium of companies lead by Spain's Iberia airlines may be awarded an 85 percent stake in Argentina's Aerolineas Argentinas within the next 48 hours.

''We can't go back,'' Menem said in a radio interview, calling the impending sale ''good for Argentina and good for the government.''

Iberia leads the consortium, which includes the First Boston bank and Cielos del Sur, an Argentine company the owns the domestic Austral Airlines. The consortium was the only bidder in the sale, offering $230 million in cash, $1.61 billion in debt certificates and $400 million in debt interest.

''It is possible that the award of the bid (to Iberia) may be made today or tomorrow,'' Menem said.

Air France, American Airlines, Varig and Alitalia had also expressed interest in bidding for Aerolineas Argentinas, but they failed to make an offer by the July 6 deadline set after three previous postponements in the bidding process.

Menem has publicly rebuked the other airlines for requesting delays in the bidding and subsequently failing to make an offer.

Of the remaining 15 percent of Aerolineas, 5 percent is to remain in the hands of the Argentine government and 10 percent is to be sold to employees.

Argentine officials say they decided to sell Aerolineas, Argentina's main domestic carrier that also flies routes in Latin America, North America, Europe and the Pacific, because it had neither the resources to replentish its jet fleet of 25 planes nor the money to service its foreign-held debt of $800 million.

The sale of Aerolineas would be the second-largest privatization by the Menem government since it took power.

On June 25, two consortiums, one led by Bell Atlantic Corp. and the other by Telefonica de Espana, were awarded bids for the purchase of 60 percent of Entel, the state telephone company. The two groups offered to pay a total of approximately $600 million in cash and $5 billion in debt.

#90198u2539 07/17/1990 ~United Press International
WASHINGTON (JULY 17) UPI - Broad Inc. classified as nonperforming $92 million worth of bonds in its investment portfolio in the second quarter of 1990, a quarterly report filed with the Securities and Exchange Commission showed Tuesday.

This marked the first time the Los Angeles financial services company has had to make such a classification. Jana Greer, a company spokeswoman, said Broad had set aside $22 million to cover permanent losses.

Greer said the company expected the bonds to recover the $70 million in value not covered by the reserve fund and that the temporary loss would not have a material impact on Broad's $7.1 billion investment portfolio.

''Most of these companies (that issued the bonds) will restructure,'' she said.

Broad, which has avoided junk bond losses through conservative investment, holds about $635 million worth of high-yield bonds, which comprise about 10.6 percent of the company's overall investment portfolio.

The company markets its financial products under the name SunAmerica, and owns a mutual fund management firm, a trust company, three life insurance companies and three brokerages.

#90198u2593 07/17/1990 ~United Press International
ATLANTA (JULY 17) UPI - Backers of Andrew Young's bid to become Georgia's first black governor packed into the former Atlanta mayor's campaign headquarters Tuesday to await the results of the historic Democratic gubernatorial primary.

Barring an upset, Young appeared certain to win at least a spot in an Aug. 7 runoff against his top rival, Lt. Gov. Zell Miller, who leads Young in opinion polls.

Democratic state Sen. Roy Barnes, state Rep. Lauren McDonald and Lester Maddox, the former segregationist governor, trailed in polls going into primary balloting. Polls closed at 7 p.m. EDT.

''We are feeling very good,'' said Young's press secretary, Lee Echols. ''We feel confident that we have to put together a good operation. We are very confident we will make a runoff.''

The winner of the Democratic nomination is likely to meet state Rep. Johnny Isakson in November to determine the successor to Gov. Joe Frank Harris, who is barred by state law from serving a third term.

Isakson, the Republican front-runner, may be able to win a majority of the vote in Tuesday's GOP primary and avoid a runoff.

Two other GOP contenders, former Gwinnett County School Board Chairman Bob Wood and former Superior Court Judge Greeley Ellis, traded off in the polls as the runner-up in the race.

Bill Crane, a spokesman for the secretary of state's office, estimated voter turnout at 30 to 35 percent.

After a flurry of last-minute campaigning Monday, candidates rested Tuesday and cast their ballots.

Young criss-crossed the state on a flying tour Monday after addressing a predominantly black crowd in the heart of his Atlanta stronghold. Emphasizing his mayoral administration's achievements of bolstering Atlanta's economy and educational opportunities, Young told a group of ministers that he wants the chance to do the same for the rest of Georgia.

''People ... look with envy on Atlanta at what economic development has done for the city, what education has done for its young people,'' Young said. ''They look at the opportunities in Atlanta and say, 'Why hasn't the state done anything like that for us?'''

A judge, ruling on a lawsuit claiming the state's runoff system is discriminatory, decided Tuesday the August runoff can be held. The suit, filed by several black leaders, asked for a change to a plurality system in which the top vote-getter in a primary would win the party's nomination.

The real test for Young would the runoff.

Miller, powered by name recognition resulting from his 16 years in the lieutenant governor's office and his backing of a state lottery to benefit educational improvements, appeared to have has a significant lead over Young.

The polls showed Miller as the top vote-getter in Tuesday's primary by some 6 percent over Young and a 10-point winner in a runoff.

Miller, who billed himself as the ''candidate of change,'' also traveled across the state Monday to urge people to vote and remind them of his support of a state lottery. Polls have shown the lottery to be the single most important issue on the minds of Democratic voters, hence Miller's secret to success.

#90198u2615 07/17/1990 ~United Press International
(JULY 17) UPI - President Bush says his administration set up a task force to help NASA, NOT to investigate it. Bush told a Washington meeting of magazine publishers that he has ''great confidence'' in NASA Administrator Dick Truly. The president said he's ''NOT tying to assign blame'' for recent glitches in the space program.

The Senate today approved a bill that would allow only a one percent annual increase in textile imports. It also would freeze the level of imported leather and vinyl shoes. The measure is designed to protect jobs of American workers competing with low-paid foreign competitors subsidized by their governments. The bill has far to go before it could become law. President Bush opposes it, and the House version is bogged down in subcommittee.

Police in Chestnut Hill, Pennsylvania, say cancer doctor Anthony Paul connected himself, his wife and two children to syringes and I-V tubes in a group suicide at their home. Authorities found a note at Paul's office today, indicating that he was overwhelmed by illness striking his family. The wife of the Ceylon-born doctor had a muscle disease and his daughter was autistic. It's NOT clear yet what fluid was used in the intravenous device.

Diplomats meeting in Paris have reached agreement on handling the thorny issue regarding the Polish border. They agreed today to put off until after German unification a treaty guaranteeing Warsaw's border with Germany. The proposal was approved by the two Germanys, the United States, Soviet Union, Britain and France.

A Polish government commission has lowered the number of people believed to have perished in the Nazi death camp at Auschwitz during World War Two. It reduced the figure from four-Million to one-point-five-Million. The decision to revise the total marked a formal rejection of original figures released after the war by the Soviet Union, which still holds the records kept at the camps.

#90198u2793 07/17/1990 ~United Press International
(JULY 17) UPI - The Polish foreign minister joined the so-called ''two-plus-four'' talks on German re-unification in Paris for the first time today. The talks produced an agreement that a treaty guaranteeing the border between between Poland and Germany would be signed as soon as possible after German re-unification is complete. Poland had originally demanded that the treaty be in place before re-unification.

Philippine rescue workers are racing against time to save hundreds of people crying for help beneath the rubble of buildings destroyed by Monday's earthquake. Some 750 people are believed to be trapped in a half-dozen toppled hotels and factories in and around Cabanatuan , where the tremor was centered. Officials say the death toll stands at 302 and is expected to climb. The Pentagon says there has been NO word of casualties among the 15-thousand U-S troops stationed in the country.

The Senate averted a filibuster and set up a vote on the Civil Rights Act of 1990 today... angering Republicans, who fear charges of racism if they fight the bill. Eight G-O-P senators who crossed the aisle to vote to limit debate were lambasted afterward by Republican leader Robert Dole. President Bush threatens to veto the bill if it includes quotas.

New York Governor Mario Cuomo says Republicans might goad him into running for president if they persist in their attacks on him. The eloquent Democratic leader has maintained that he has NO presidential aspirations. But with G-O-P leaders stumping in New York and criticizing Cuomo's policies, he says ''They might just change my mind.''

#90198u2807 07/17/1990 ~United Press International

NEW YORK (JULY 17) UPI - The New York Rangers Tuesday released 16-year veteran Ron Greschner, their career leading scorer among defensemen.

The decision to release the 35-year old defenseman was announced by Neil Smith, the club's vice president and general manager.

Smith cited the need to strengthen the Rangers' defense with younger players.

''For 16 years, Ron was a loyal member of this organization which makes this a very difficult decision for me,'' Smith said. ''But at this time I feel that we have to give a chance to some of our younger defenseman.''

Greschner, the Rangers' second-round draft pick in the 1974 amatuer draft, compiled 179 goals and 431 assists for 610 points.

He is also the team's all-time leader in penalty minutes with 1,226 and participated in the playoffs a club-record 12 times.

#90198u2810 07/17/1990 ~United Press International

(JULY 17) UPI - Pro- and anti-nuclear forces are at war over new reactor designs. A group of anti-nuclear scientists issued a report today saying

that the nuclear industry has NOT issued enough information on the designs. The industry says the new reactors would be ''inherently safe,'' and it is criticizing the Nuclear Regulatory Commission for NOT reviewing the designs more rapidly.

California officials say they will NOT file charges against two environmentalists injured when a bomb exploded in their car six weeks ago. Alameda County Assistant District Attorney Chris Carpenter says there is insufficient evidence to prove that Judi Bari and Darryl Cherney were transporting the bomb when it accidentally exploded. Both Bari and Cherney have said the device was planted by environmental opponents.

Mexico has gotten a boost in its drug war efforts. Britain today donated 30-thousand dollars worth of state-of-the-art equipment capable of detecting marijuana, heroin and cocaine in everything from hollowed-out watermelons to gas tanks. British Deputy Foreign Minister Timothy Sainsbury announced the donation at the start of three days of bilateral trade talks in Mexico City.

A prominent European ambassador to Liberia says there's NO chance that President Samuel Doe will manage to hold off advancing rebel forces. The diplomat... who spoke on the condition that his name NOT be used... says rebel leader Charles Taylor and his troops seem to be holding back from staging an all-out attack on Monrovia until the cordoned-off capital collapses. The city has virtually NO food or water.

-30- 1776

#90198u3062 07/17/1990 ~United Press International

(JULY 17) UPI - The House bucked White House pressure today by rejecting a proposal to amend the Constitution to require the federal budget be balanced each year. Representatives voted 279 to 150 in favor of the plan, but did NOT rally the two-thirds vote needed to push through a Constitutional amendment. Supporters had said an amendment was the only way to discipline the spendthrift habit of Congress.

The Polish foreign minister joined the so-called ''two-plus-four'' talks today in Paris, carrying a major concession from his government. The talks produced an agreement that the Polish-German border will be guaranteed by a new treaty immediately AFTER German re-unification is complete. Poland had previously demanded that a new treaty be in place before re-unification.

Diplomatic sources in Czechoslovakia report that a hostage situation has ended at the Czechoslovak Embassy in Havana, Cuba... but the story surrounding the events remains cloudy. Five Cuban dissidents took refuge at the embassy last week. They were followed by seven other Cubans suspected of being government agents... who took the original refugees

hostage along with several Czechoslovak diplomats. Czechoslovakia reports today only that all the Cubans surrendered to police.

25-hundred residents of Piqua, Ohio, are returning to their homes after two bottles of nitroglycerin were detonated by a bomb squad today. The explosive was discovered during a domestic quarrel yesterday at the home of Dana Taylor. The 26-year-old man was arraigned today on charges from the incident, in which he allegedly threatened to blow up his estranged wife. The bomb squad decided the nitro was too dangerous to be moved and evacuated the neighborhood before detonating it.

#90198u3186 07/17/1990 ~United Press International

(JULY 17) UPI - Poland gets some satisfaction at the German re-unification talks... the House rejects a Constitutional amendment for a balanced budget... space agency officials try to be optimistic... and Disneyland turns 35. Those stories and more, next from U-P-I.

There was a significant breakthrough today in the so-called ''two-plus-four'' talks on German re-unification. The Polish foreign minister joined the discussions in Paris for the first time and agreed on a new timetable for guaranteeing the German-Polish border.

The talks today determined that a treaty guaranteeing the border would be signed as soon as German re-unification is complete. Poland had originally sought the treaty before re-unification.

The Polish foreign minister called today's agreement ''entirely satisfactory.''

The Poles were amenable to change in policy, but the change was dictated for the most part by yesterday's major concession by Soviet President Gorbachev, allowing a re-united Germany to join NATO.

The Poles had hoped that the four World War Two allies would impose a border treaty on Germany. But the Gorbachev concession did away with restraints on German sovereignty.

The House today rejected a proposed constitutional amendment that would have required the federal budget be balanced each year.

Representatives voted 279 to 150 in favor the plan, but failed to obtain a two-thirds majority approval needed for a constitutional change.

Supporters of the plan argued during debate today that a constitutional balanced budget amendment seemed the only way to curtail out-of-control spending habits of Congress and the executive branch.

The proposed amendment would have required that starting with fiscal year 1995, the president would have to submit a balanced budget plan to Congress, and would bar the government from spending money it does NOT have.

The plan would have allowed deficit spending only in time or war or in the case of a three-fifths vote by both the House and Senate.

President Bush rallied for the amendment, sending a message to the House this morning that said the plan- in his words- ''would restore fiscal integrity'' to the government.

Critics scoffed at the words, arguing that neither Bush NOR Ronald Reagan ever submitted a balanced budget.

#90198u3222 07/17/1990 ~United Press International

(JULY 17) UPI - More than three-thousand firefighters are battling scores of wildfires in five Northwest states today, but there's little hope that the biggest blaze will be contained any time soon.

Fire officials say rough terrain is slowing efforts to control a lightning-caused 17-hundred acre fire in Montana's steep and rocky Bitteroot National Forest.

About 400 firefighters are on the scene of the fire, which started Friday, but officials planned to bring in an additional 600 re-inforcements by the end of today.

A spokeswoman for the fire information office says the terrain prevents crews from using bulldozers and makes fighting the fire much more dangerous.

Crews in Oregon, Idaho, Washington and Wyoming are also battling mostly-lightning caused wildfires.

Officials in Oregon say they have NO idea when 800 firefighters manning the lines would contain the more than one-thousand acre Corral Basin fire, which is 22 miles southeast of John Day.

A spokeswoman says the fire has the potential to double in size because it's being whipped around by high winds.

NASA engineers say they hope that a fuel leak on the grounded shuttle Atlantis can be repaired at the launch pad, paving the way for a launch as early as August 10th. But NASA managers do NOT share their optimism.

Engineers say they'll pump supercold hydrogen rocket fuel through the shuttle next week in a crucial test to pinpoint and repair the leak.

They suspect the problem may be as simple to fix as tightening or replacing 48 bolts around a critical seal in a fuel line joint.

But associate administrator William Lenoir says he's NOT so sure it's that easy.

He says a review of paperwork documenting the shuttle's assembly shows the screws were tightened properly the first time around.

He suspects that the shuttle will have to be taken off the launch pad and hauled back to the vehicle assembly building for lengthier repairs.

But engineers speculate that Lenoir is taking a more guarded approach to avoid raising false hopes and exposing NASA to more negative publicity

should the plan fail.

-30- 2297
#90198u3253 07/17/1990 ~United Press International
(JULY 17) UPI - The 77-member Southern Baptist Executive Committee ignored the protests of hundreds of moderate Baptists today in Nashville, Tennessee, and fired two editors of the Baptist Press, which distributes news to church papers around the country.

The protesters were moderate, but the protest was NOT. One demonstrator told the Executive Committee... ''You have NO class, and NO Christian integrity either.''

The Executive Committee gave NO comment on the firings, but there have been accusations made that the editors harbored what's described as a moderate bias.

The lawyer for the two editors responded that today was- in his words- ''truly a day of heartache for Southern Baptists.''

Fundamentalists have been trying to tighten their control over the Southern Baptist Convention, the ruling body of the nation's largest Protestant denomination- estimated at 15-Million.

Mickey Mouse and his pals joined tens of thousands of Disney fans who celebrated today's 35th birthday of ''The Happiest Place on Earth.''

Roy Disney stood on the same spot in Anaheim, California, that his uncle Walt stood on and repeated the words his uncle used 35 years ago when he unveiled the magical world of Disneyland.

In the words of both Disneys- ''To all who come to this happy place, welcome. Here, age relives fond memories of the past ... and here youth may savor the challenge and promise of the future.''

Roy Disney re-dedicated the park with a framed plaque to re-affirm the Disney pledge to reach for the stars.

As he put it, ''times have changed, but Disneyland hasN'T. Children's faces still light up when they meet Mickey Mouse ... and that would please Walt most.''

Celebrations included a fireworks display and a 30-foot birthday cake topped with 35 flaming red candles.

And the Disney family of characters including Mickey, Pluto, Goofy and Peter Pan sang familar tunes in honor of the man who brought them to life.

#90199b0003 07/18/1990 ~Business Wire

BEAVERTON, OR (JULY 18) BUSINESS WIRE - Sequent Computer Systems Inc. Wednesday reported revenues of $58.2 million for the second quarter, which ended June 30, 1990.

This represents an 87-percent increase over the $31.2 million in revenues for the second quarter of 1989. Net income for the quarter was $5.7 million ($0.24 per share), compared to $3.5 million ($0.18 per share) for the corresponding 1989 quarter.

Net income for the second quarter of 1989 included an extraordinary credit of $664,000 ($0.03 per share) from the utilization of net operating loss carryforwards. Excluding this credit, second-quarter 1990 income increased 104 percent and earnings per share increased 60 percent on a year-to-year basis.

''Our success during the quarter in all of our geographic areas and markets demonstrates the broad base of worldwide support for standards-based, open systems solutions such as those offered by Sequent '' said Scott Gibson, Sequent's president and chief operating officer. ''Large commercial customers who purchase Sequent systems for online transaction processing are finding they can increase their competitiveness through the implementation of more efficient open automation strategies.''

According to Gibson, the company's second quarter was highlighted by sales to large commercial accounts such as Millipore Corp., The National Grid Co. (U.K.), Texaco U.S.A. and U.S. Sprint.

Sequent Computer Systems Inc. (NASDAQ:SQNT) is a leading provider of open-systems computing solutions for the commercial OLTP market. The company, which employs more than 1,400 people, reported 1989 revenues of $145.6 million and first quarter 1990 revenues of $50.7 million.

#90199b0010 07/18/1990 ~Business Wire

VIENNA, VA (JULY 18) BUSINESS WIRE - LEGENT Corp. (NASDAQ: LGNT) Wednesday reported net income for the third quarter ended June 30, 1990 of $8,559,000, or 40 cents per share on revenues of $42,255,000 as compared with earnings of $7,601,000, or 35 cents per share in the like period a year ago when revenues were $34,658,000.

For fiscal 1990s first nine months, LEGENT's net income amounted to $24,014,000, or $1.11 per share after deducting charges in the first quarter of $975,000, or 4 cents per share related to the company's acquisition of Business Software Technology Inc.

Revenues for the nine months totalled $123,005,000, a 23 percent gain over corresponding fiscal 1989 revenues of $100,093,000, and net income of $17,321,000, or 80 cents per share.

Noting that initial license sales increased 23 percent in the latest quarter to $23.3 million, LEGENT said new sales of its IS Management products, while still below 1989 levels, were approximately 35 percent higher than in the second quarter.

Systems productivity product sales and sales of the Software Management division's ENDEVOR products, meanwhile, both rose approximately 40 percent from last year's third quarter, to about $14.4 million and $5.7 million respectively.

Together with improving its operating profit margins from fiscal 1990s second quarter, to slightly over 27 percent, the company said that its cash collections totalled nearly $43 million, while days sales outstanding remained constant with the prior quarter at 95 days.

LEGENT added that its operating cash flow for the quarter was approximately $14 million, saying it also spent more than $12 million on new mainframe computers and in open market purchases of its securities.

According to Chairman Joe M. Henson: ''We are only now beginning to see the benefits of restructuring our domestic sales organization along product lines.'' He said: ''Our third quarter results reflect primarily a company that is making progress, on a number of fronts, toward becoming a more efficient and productive business.''

The chief executive explained that LEGENT plans to manage costs in the coming months, allocating investments to those businesses capable of producing higher returns and anticipating that recent additions made in sales and marketing will contribute to increased revenue growth.

LEGENT Corp. is a leading independent systems software company, whose more than 40 products and related services for IBM's MVS, VM and workstation computing environments are in use by over 3,500 customers.

The company, with principal locations in Vienna, Pittsburgh, Pa. Westborough, Ma., as well as London and Tokyo, employs approximately 1,000 people in offices throughout the world.

MUNCIE, IN (JULY 18) BUSINESS WIRE - Ball Corporation (NYSE:BLL), building on the improvement established in its first period, reported record second quarter sales, net income and earnings per share.

Second quarter income from consolidated operations before taxes rose 36.6 percent to $25 million, compared with $18.3 million a year ago. Net income of $18.8 million was 25.3 percent above the year ago's $15 million and net earnings available to common shareholders, after preferred dividends, rose 16.7 percent to $17.5 million against the $15 million 1989 second quarter results that were unaffected by the preferred stock issued at the quarter end. Earnings per common share were 80 cents, 25 percent higher than last year's 64 cents, while sales rose 13.3 percent to $381.9 million, compared with $337.2 million a year ago.

For the first six months of 1990, income from consolidated operations before taxes was up 34.5 percent to $37.4 million, compared with $27.8 million; net income rose 23.3 percent to $28 million from $22.7 million last year; net earnings available to common shareholders of $25.4 million was 11.9 percent higher than last year's $22.7 million and earnings per common share of $1.16 were 19.6 percent greater than last year's 97 cents.

The aerospace systems segment operating earnings rose by approximately one-third, reflecting excellent performance on contracts, while backlog continued strong.

Ringoen said there was no material change in the status of the fixed price development subcontract for the U.S. Air Force AC-130U gunship program for which a provision for loss was recorded in 1989. He said Ball's role in

the Hubble Space Telescope program appears to be little affected by problems with the system's primary optics.

Operating earnings for the company's diversified products segment were under those of a year ago. The segment's metal decorating and service division results were flat, while the other principal operation in the segment, zinc products, reported a decrease in earnings, due largely to reduced requirements for penny blanks for the U.S. Mint.

Earnings from Ball-InCon Glass Packaging Corp., a 50 percent joint venture were substantially higher than a year ago, while those from Ball Packaging Products Canada, Inc., also 50 percent owned by Ball, were lower. A 20-week single-plant work stoppage, which has been settled, had a serious negative impact on the Canadian company.

GREAT FALLS, MONT., AND KALISPELL, MONT. (JULY 18) BUSINESS WIRE - The boards of directors of First Federal Savings Bank of Montana (NASDAQ: FFSM) and United Savings Bank, F.A. (NASDAQ: UBMT) announced Wednesday the execution of a letter of intent pursuant to which the two banks would combine and concurrently reorganize into the holding company form of organization.

The combination would be structured as neither an acquisition of First Federal by United nor an acquisition of United by First Federal, but rather as a merger of equals.

Consummation of the transaction will be dependent upon the parties' execution of a definitive agreement containing customary terms and

conditions, the approval of the shareholders of United and First Federal and the receipt of all required regulatory approvals.

Upon completion of the transaction, the new bank would conduct business from 15 full-service banking offices located throughout Montana and would have total assets of approximately $260 million. The corporate headquarters of the holding company would be located in Great Falls, Mont. and the corporate headquarters of the bank would be located in Kalispell, Mont.

The capital of the new bank is anticipated to exceed $38 million, which would make it the largest financial institution domiciled in the state of Montana on this basis. With anticipated capital exceeding 14.5 percent of total assets, the bank would be one of the most strongly capitalized financial institutions in the country.

In a joint statement, F. Charles Mercord and Bruce K. Weldele, chairman and chief executive officer of First Federal and United, respectively, said: ''At a time when there is a growing emphasis on the financial condition of banks and thrifts, it is significant that this combination would create one of the most strongly capitalized financial institutions in the nation. We believe the combination would result in an impressive financial organization in all respects. In addition, with substantial equity capital, superior asset quality, a considerable earnings stream and a talented management team, the new organization should be well positioned to actively pursue attractive expansion opportunities.''

The transaction would involve a tax free exchange of stock for stockholders of both companies and would be accounted for as a pooling of interests. When effective, United stockholders would receive approximately 1.34 shares of new holding company stock for each share of United stock and First Federal stockholders would receive approximately 1.16 shares of new holding company stock for each share of First Federal stock. The ratios were determined in consideration of recent median trading prices of United and First Federal stock at $10.75 and $9.25 per share, respectively. The respective ratios would be applied against 1,223,312 shares of outstanding United stock and 1,968,079 shares of First Federal stock.

The board of directors of the holding company and the resulting bank would be comprised of 13 members, six of whom would be selected by United, six of whom would be selected by First Federal and one of whom would be approved by the other directors. F. Charles Mercord would serve as chairman of the holding company and the bank, Bruce K. Weldele would serve as vice chairman and chief executive officer of the holding company and president and chief executive officer of the bank and president and chief operating officer of the holding company. The names of the holding company and the bank would be jointly determined by the parties.

RESTON, Va.- (JULY 18) BUSINESS WIRE - Fastcomm Communications Corp. (NASDAQ: FSCX) reported net operating earnings of $423,030, or 10 cents per share for the fiscal year ending April 30, 1990 vs. a loss of ($596,046), or (14 cents) per share for fiscal 1989.

Revenues for the year were $3,362,124 vs. $1,767,292, an increase of 90 percent.

Robert Dennis, president, said ''We are pleased with the company's performance for fiscal 1990 and are very optimistic for the coming year. While it will be difficult to sustain the rate of growth achieved in fiscal 1990, we feel that the company is well on its way to substantial growth in 1991.''

Fastcomm Communications Corp. stated that based on current trends the revenues for the first fiscal quarter of 1991 will exceed $1.2 million compared with $486,120 for the like period in fiscal 1990.

''With continuing commmitment to quality products and services, we feel that our market share should continue to increase,'' said Dennis.

Fastcomm Communications Corp. is a designer, manufacturer and marketer of data communcations equipment.

#90199b0030 07/18/1990 ~Business Wire

EL SEGUNDO, CA (JULY 18) BUSINESS WIRE - International Rectifier Corp. (IR) has achieved a decisive technology advance in Insulated-Gate Bipolar Transistors that projects dramatic improvements in the performance of these power semiconductors.

The technology development is a new way to process, or manufacture, IGBTs that feature switching speeds above 50 kHz and 50 percent greater efficiencies (measured as reduction in switching losses).

Most significantly, both these key specifications are attainable without increasing conduction losses, a necessary tradeoff that limits existing IGBTs. The result is a new standard for IGBT performance that sets the stage for rapid replacement of bipolar power transistors (products not sold by International Rectifier).

The IGBT combines the best features of the power MOSFET and bipolar transistor. It employs the fast-switching, voltage-control feature of a MOSFET, along with its simplifying drive circuitry, while exhibiting the high current density and low-saturation voltage output characteristics of a bipolar device.

With its speed and current-density advantages, the IGBT challenges the approximate 75 percent bipolar share of the $2 billion power transistor worldwide market.

Numerous applications now filled by bipolar transistors can benefit from the efficiencies of the new International Rectifier IGBT. Foremost among these are motor drive controls and uninterruptible power supplies (UPS). Advanced tasks requiring higher performance not presently available with existing power devices include upper ranges of switching power supplies operating at frequencies from 20 to 50 kHz.

The new IGBT process builds on International Rectifier's HEXFET(R) power MOSFET technology, incorporating proprietary techniques similar to those employed in the HEXFET.

International Rectifier is a major worldwide supplier of power semiconductors and is the leader in MOSFETs through its HEXFET line.

The company is also a leading manufacturer of BCDMOS power integrated circuits, standard and custom power hybrids, Schottky diodes, rectifiers, thyristors and microelectronic IC-based solid-state relays. IR products are sold through a worldwide network of sales offices and distributors.

#90199b0033 07/18/1990 ~Business Wire

ALAMEDA, CA (JULY 18) BUSINESS WIRE - Aquanautics Corp. (NASDAQ:AQNT) Wednesday announced that it has received firm commitments from two European corporate investors for a private placement of unregistered shares of Aquanautics common stock

IRITECH S.p.A., the Italian venture capital company who participated in an Aquanautics private placement in November 1989, has introduced Aquanautics to an important participant in the European brewery industry and together they have committed to participate in a new private placement.

The brewery participant in the offering is Compagnia Padana per Investimenti (Padana). Padana is the 50 percent owner of the Italian company named Industria Poretti Co. (Industria Poretti).

Industria Poretti is a major beer producer in Italy and produces such brands as Tuborg and Carlsberg. Padana is owned by Aldo Basetti, a highly regarded expert in the brewery industry.

Bassetti has been president of the Italian Brewers Association for the last 11 years and was recently elected as president of the Confederation of Common Market Brewers (CBMC), the leading European brewers association. Bassetti has taken a personal interest in the Aquanautics and ZapatA Industries Inc. Smartcap crown recently developed.

''We are very pleased to have these two investors participate in our private placement,'' stated N. Ross Buckenham, Aquanautics' president and chief executive officer.

''IRITECH S.p.A. has been very supportive of the company since their initial investment last year. IRITECH introduced us to Mr. Bassetti who is a well regarded European brewer with many contacts and much influence on the European brewery industry, especially with his recent election as president of CBMC.

''Their decisions to participate in a private placement is a vote of confidence in the company's technology. Mr. Bassetti's expertise and many years of experience in the European brewing industry will accelerate our introduction of the Smartcap beer crown closures in the European markets later this year.''

IRITECH S.p.A. and Padana have each committed to purchase 300,000 unregistered shares for total proceeds of $1,020,000.

Aquanautics has jointly developed its Smartcap crown closure for beer with ZapatA Industries Inc., a privately owned leading manufacturer of bottle caps and closures. Brewery sponsored taste tests are currently in progress with several U.S. brewers. These tests will continue over the next several months.

Aquanautics Corp. is a development-stage separations and specialty chemical company producing new oxygen technologies. Aquanautics' proprietary synthetic oxygen-binding molecules can be structured into a variety of systems for extracting, concentrating and/or eliminating oxygen. The company is currently developing applications for food, industrial and defense markets.

ZapatA Industries Inc. is a major supplier of crowns to leading U.S. brewers. The company also maintains a strong and growing presence in Europe and Latin America.

SHERMAN OAKS, CA (JULY 18) BUSINESS WIRE - First Citizens Bank achieved net income of $79,018, equal to 14 cents per share, for the second quarter ending June 30, 1990, it was announced Wednesday by Mark de Gorter, president and chief executive officer.

In the corresponding period for the prior year, net income of $129,392, or 22 cents a share, did not include any tax provision due to the tax carry-forward benefits. Reserves set aside for income taxes as of June 30 1990, totalled $94,425, compared with $8,811 a year ago.

The per-share figure for the June 30, 1989, quarter was adjusted to reflect a 20 percent stock dividend and exercise of warrants.

Total deposits increased 13 percent to $29,629,000 at June 30, 1990, while loans increased 18 percent to $22,412,000. Total assets were up 13 percent to $34,299,000 compared with $29,685,000 at the end of the second quarter last year.

First Citizens Bank, an independent bank located in Sherman Oaks, serves business and professional customers throughout the San Fernando Valley and the greater Los Angeles area.

NEWBURY PARK, CA (JULY 18) BUSINESS WIRE - Computer Peripherals Inc. (CPI) Wednesday announced that it is shipping SuperSet+, a new JetWare super cartridge for Hewlett Packard's LaserJet II, IID, IIP, and III laserprinters.

This latest JetWare font cartridge, provides 425 fonts in a single cartridge solution.

SuperSet+ supports the new Windows 3.0 and a variety of word processing and desktop publishing software including WordPerfect, PageMaker, Ventura Publisher, Microsoft Word, Lotus and more.

The Linotype Helvetica and Times fonts come in 6 to 18 point sizes. In addition, SuperSet+ delivers HP A through Z cartridge typefaces such as Courier, Prestige Elite, Letter Gothic, Presentation and a full complement of seven symbol sets for each.

SuperSet+ fonts print in fixed and proportional-spaced characters. Portrait and landscape fonts are available in Helvetica, Times, Letter Gothic, Prestige Elite, Presentation, Lotica, Line Printer and PC Linedraw.

Courier comes in both 10 and 12 pitch and a full set of seven European symbol sets; French, German, Italian, Danish, Spanish, Swedish and United Kingdom for international correspondence.

CPI's four proprietary Lotica spreadsheet fonts, Dingbats, Headline Fonts

and symbols sets for Microsoft Windows, give the SuperSet+ unique fonts not found in any other cartridge. At 3.3 points, the smallest Lotica font prints a 40,000 character spread sheet on a standard 8-1/2 x 11-inch sheet of paper.

The 425 in one SuperSet+ has a total complement of 25 symbol sets, including Math 7, 8, 8A, 8B, Pi Font, Pi Font A and PC and Tax Line Draw.

SuperSet+ printer drivers can easily be installed using the installation disks supplied with the package. Simply select the application from the install menu and type the directory where the program files are located and SuperSet+ does the rest.

JetWare products are designed and manufactured by Computer Peripherals and sold through its worldwide network of distributors and dealers. All CPI products come with a five-year limited warranty. The Newbury Park-based company has manufactured enhancement cartridges and memory products since 1984.

#90199b0043 07/18/1990 ~Business Wire

PHOENIX (JULY 18) BUSINESS WIRE - First Interstate Bank of Arizona reported a $3,497,000 loss for the second quarter of 1990 and a $3,433,000 loss for the first half of the year as the bank continued to feel the effects of a slump in the real estate market, William S. Randall, president and chief executive officer, announced Wednesday.

In 1989, First Interstate reported net income of $1,600,000 for the second quarter and $18,223,000 for the first half.

''Our performance the first half of this year was in line with our expectations as we continued to work our way through a troubled real estate market,'' Randall said. ''Nevertheless, we remain a safe, strong bank.''

First Interstate's capital and reserve levels are strong, and customers demonstrated confidence in the bank as deposits continued to grow, Randall said.

''We are a highly liquid bank with nearly $700 million available to lend, and we received a $30 million capital infusion from our parent company,'' Randall said. ''The underlying earnings capacity of the bank allowed us to shoulder the burden of losses as we made steady, step-by-step progress in reducing non-performing loans.''

During the second quarter, First Interstate continued to move forward to serve its customers and Arizona's communities, Randall said.

Two new branch offices were opened in Chandler and northwest Phoenix, bringing the bank's statewide network of offices to 193. Day & Night Teller automatic teller machines increased to a total of 163.

Private banking was introduced in Phoenix and Tucson. Preparations continued for the fall opening of Tempe and Tucson business loan centers that will market services directly to small businesses. First Interstate contined a pilot project that gives customers access to their account information by phone.

The bank announced the creation of an economic development department that will work closely with various economic development organizations throughout Arizona.

Loan losses totaled $36,306,000 for the second quarter and $60,976,000 for the first half as compared to $35,679,000 and $46,451,000, respectively, for the second quarter and first half of 1989. Total non-performing assets were $468,642,000 at the end of June and $363,811,000 a year ago. Total non-performing loans were $317,686,000 at June 30 as compared to $303,477,000 on the same date last year.

Real estate owned totaled $150,956,000 at the end of the second quarter as compared to $60,334,000 a year ago.

First Interstate set aside a total of $29,600,000 during the second quarter and $58,100,000 for the first half to cover problem loans. The loan loss reserve totaled $252,836,000 on June 30. The reserve totaled $104,831,000 on June 30, 1989. The bank's reserve was 79.6 percent of non-performing loans and 54 percent of non-performing assets at June 30.

First Interstate's total capital was $369,404,000 as of June 30 as compared to $454,165,000 a year ago. Primary capital was $354,802,000 on June 30 and $418,223,000 on the same date last year.

The total capital and primary capital ratios both increased to 8.97 percent, respectively, as of June 30.

Total assets were $6,658,377,000 at quarter's end, compared to $6,799,145,000 a year ago. Total deposits as of June 30 were $6,132,453,000 compared to $5,881,460,000 on June 30, 1989. Net loans were $4,057,763,000 on June 30, 1990, compared to $4,616,188,000 on the same date a year ago.

First Interestate Bank of Arizona, founded in Prescott in 1877, is the

state's oldest bank and provides a full range of bank services. First Interstate of Arizona is an affiliate of First Interstate Bancorp, which has 27 wholly owned banks and 39 franchise banks serving 21 states. First Interstate Bancorp is among the nation's 10 largest banking companies and the largest retail banking organization in the country.

BEVERLY HILLS, CA (JULY 18) BUSINESS WIRE - Great Western Financial Securities Corp., a subsidiary of Great Western Financial Corp. (NYSE:GWF) announced Wednesday that it is adding four new proprietary mutual funds to its GW Sierra Trust Funds family.

The introduction of the new funds follows the company's highly successful launch a year ago of the original GW Sierra Trust family of six mutual funds, which today have assets of more than $420 million. With the addition of the four new funds, including two bond funds, an international fund and a growth fund, Great Western now offers a full complement of mutual funds covering all principal asset classes.

He noted that the funds are managed by five highly experienced portfolio management firms under the guidance and supervision of Great Western Financial Advisors, a subsidiary of Great Western Financial Securities.

Cerini said the portfolio managers were selected from among the nation's leading firms with the best performance records.

They include Alliance Capital Management L.P., with $45 billion under management; Capital Guardian Trust Co., which, with its affiliates, has more than $50 billion under management; J.P. Morgan Investment Management, Inc., which, with an affiliate, has $62 billion under management; TCW Funds Management, Inc., with $17 billion under management; and Van Kampen Merritt Investment Advisory Corp., with $24 billion under management.

The four new mutual funds are specifically designed for the long-term investor, Cerini stated. The GW Strategic International Growth Fund, with a goal of long-term capital growth, invests primarily in the stocks of established foreign companies.

One of the most unusual funds of its kind, this fund employs a system of active currency management to enhance results. The GW Equity Opportunity Fund seeks greater than average capital appreciation for investors, investing in equity securities of small- and medium-sized U.S. companies.

Great Western Financial, with assets of nearly $40 billion, is one of the nation's leading residential mortgage lenders. The company operates more than 1,000 mortgage lending, retail banking and consumer finance offices nationwide.

VANCOUVER, BRITISH COLUMBIA (JULY 18) BUSINESS WIRE - West Pride Industries (VSE:WPI) has commenced diamond drilling on its 300-claim Middlemarch Cu-Zn, Au-Ag Property near Tombstone and Bisbee, Ariz.

The primary target of this early phase drilling program will be higher grade copper (average 4 percent Cu) zones in breccia pipes. These breccia zones are known to be at least 60 feet wide. Adjacent to these breccia zones are higher grade zinc (average 5 percent Zn + 1.5 percent Cu) mineralization in replacement zones which are also known to be at least 50 feet wide.

These mineralized breccia and replacement zones are common to ''porphyry copper'' deposits in Arizona and are centrally located within and form part of the ''porphyry'' system.

Recent geological studies and IP geophysical surveys have confirmed a ''porphyry'' system in the Middlemarch Property. The IP survey outlined a classic anomoly 3,700 feet long (across the total grid surveyed) and 250 to 600 feet wide.

Coincident with the drilling program, West Pride will conduct extensive geochemical soil sampling, prospecting and geology over the anomolous area. The grid will also be extended in both directions to close off the IP anomoly.

The Vancouver Stock Exchange has neither approved nor disapproved of the contents herein.

TUSTIN, CA (JULY 18) BUSINESS WIRE - Eldorado Bancorp (ASE:ELB) Wednesday reported second quarter income of $912,000, or 33 cents per share, for the three months ended June 30, 1990.

This represents a 10 percent increase over net income of $826,000, or 30 cents per share, reported for the second quarter of 1989.

For the first six months of 1990, net income increased 9 percent to $1,916,000, or 69 cents per share, over net income of $1,759,000, or 64 cents per share for the six months ended June 30, 1989.

Per share earnings for the 1989 reporting periods have been adjusted to reflect the 10 percent stock dividend paid Feb. 23, 1990.

On June 30, 1990, total assets had increased to $291.3 million and shareholders' equity to $25.1 million. The company's strong equity-to-asset ratio continued at 8.6 percent. For the first half of 1990, the return on beginning equity totaled 16.3 percent and the return on average assets was 1.36 percent.

J.B. Crowell, president and chief executive officer of Eldorado Bancorp

and Eldorado Bank, said: ''Higher levels of earnings and an increase in non-interest income sources contributed to the higher earnings. Environmental conditions, however, continued to put pressure on interest margins in the second quarter. The bank is accelerating its efforts to attract lower-cost funding sources to better meet current loan demand.

''With the current uncertainty surrounding the economy, the bank significantly increased its provision to the reserve for credit losses in the second quarter. With the bank's superior loan quality and excellent capital position, it is well positioned to continue serving the growing financial needs of our customers.

''The third and fourth quarters have historically been strong and management believes that 1990 will be another successful year.''

Eldorado Bancorp, through its principal subsidiary, Eldorado Bank, operates through nine locations in Orange, Riverside and San Bernardino counties.

SAN DIEGO (JULY 18) BUSINESS WIRE - Gensia Pharmaceuticals Inc. (NASDAQ:GNSA) Wednesday announced that it has received clearance from the Food and Drug Administration in the United States and the Medicines Control Agency in the United Kingdom to initiate Phase 2 clinical trials

of its ESA System.

The Phase 2 clinical trial program, which commenced in West Germany in February of this year, will expand to the United States and the United Kingdom during the third quarter of 1990, said David F. Hale, Gensia president and chief executive officer.

''This represents an important step for Gensia in the clinical development of the ESA System,'' Hale said. ''The expansion of the development program to medical centers in the United States and the United Kingdom is expected to provide a basis for regulatory submissions for marketing approvals in these countries.

''A significant opportunity exists for use of the ESA System to enhance the diagnosis and evaluation of coronary artery disease for patients who cannot exercise, or who have indeterminate results with current diagnostic methods,'' Hale said. ''The testing of this patient group is frequently not practical with existing cardiac testing procedures.''

The ESA System consists of a novel drug (arbutamine) and a computer-controlled drug delivery device designed to aid in the diagnosis and evaluation of patients with coronary artery disease. Similar to an exercise stress test, arbutamine increases cardiovascular activity, but without requiring physical exercise.

Under the direction of a medical professional, the ESA System will administer arbutamine to the patient, monitor the patient's heart rate and blood pressure, and control the rate of drug delivery to increase the heart rate to a desired level. The ESA System is intended to be used with electrocardiography (ECG), echocardiography, radionuclide imaging and other imaging techniques to enhance the diagnosis of cardiovascular disease.

Gensia is a San Diego-based biopharmaceutical company formed to discover, develop, manufacture and market novel drugs for the diagnosis and treatment of human diseases.

#90199b0079 07/18/1990 ~Business Wire

HONOLULU (JULY 18) BUSINESS WIRE - Hawaiian Electric Industries Inc. (NYSE/PSE:HE) (HEI) announced Wednesday that net income for the second quarter ended June 30 was $13.8 million, compared to $15.0 million reported for the second quarter of 1989.

The decline was due primarily to a non-recurring loss at HEI's insurance company from the recent lava flow at Kalapana. Continuing pressure on regulated utility earnings was partially offset by actions of the Hawaii Public Utilities Commission allowing conditional increases in rates, stringent costs controls and healthy kilowatthour sales increases resulting from Hawaii's continuing economic expansion.

Strong profitability was also reported from American Savings Bank. These positive factors resulted in an improvement in earnings of $2.5 million over first quarter 1990 earnings of $11.3 million.

Earnings per share were 64 cents for the current quarter, down compared to 72 cents for the second quarter in 1989, but up over this year's first quarter's EPS of 53 cents.

HEI also announced that Tuesday its Board of directors declared a quarterly dividend of 54 cents per share, payable on Sept. 10 to stockholders of record of HEI's common stock as of the close of business on Aug. 10. HEI's third quarter dividend is 6 percent higher than its dividend of 51 cents per share for the prior year third quarter.

Year-to-date earnings of $25.1 million were below last year's first half earnings of $32.4 million. Non-recurring gains in the first quarter of 1989 for the diversified companies contributed to this year's unfavorable comparison. Earnings per share for the first six months of 1990 were $1.17, compared to $1.55 for the first half of 1989.

Operating income of $30.8 million for the quarter was 2.5 percent below 1989's operating income of $31.5 million for the comparable period.

Operating income for the electric utility companies in the second quarter increased by 10.4 percent to $26.6 million from $24.1 million for the second quarter in 1989. ''Positive results for the utilities in the second quarter were achieved through stringent cost controls and short-term prioritization of projects which were implemented to offset the decrease in regulated utility earnings while we wait for rate relief,'' said C. Dudley Pratt Jr., president and chief executive officer of HEI.

Some rate relief did occur during the quarter through timely action by the Hawaii PUC in the rate applications for Hawaiian Electric Co. and Hawaii Electric Light Co.

Kilowatthour sales for the quarter were 5.8 percent higher than the comparable period in 1989. ''Despite healthy kilowatthour sales growth during the quarter, we still expect full year's sales growth of 2.5 to 3 percent due to the anticipated loss later this year of a major customer,'' Pratt said. Electric utility operating income for the first six months was $46.7 million, down slightly from 1989.

Operating income for the diversified companies of $4.8 million in the second quarter was down from $7.5 million for the 1989 comparable period. Good results for the diversified companies during the quarter were hurt by $2.6 million in losses at Hawaiian Insurance Group (HIG) from the recent Kalapana lava flow on the island of Hawaii.

HECO's subsidiary, Hawaii Electric Light Company Inc. (HELCO), filed in July 1989 to raise rates on the island of Hawaii by an average (as amended) of 11 percent which would result in additional annual revenue of approximately $9.5 million and a return on common equity of 14 percent. Evidentiary hearings were completed in March and interim relief of approximately $3.5 million in annual revenues was granted effective May 23 1990, subject to refund (with interest), pending the final outcome of the case. A final decision is expected by the end of the third quarter.

LOS GATOS, CA (JULY 18) BUSINESS WIRE - Hytek Microsystems Inc. (NASDAQ:HTEK) announced Wednesday that it had consummated the sale of certain of its assets, including equipment, inventory and the rights to

manufacture products presently being produced at Hytek's Los Gatos facility, to Interpoint Corp. (NASDAQ:INTP) of Redmond, Wash.

The sale to Interpoint yielded immediate gross cash proceeds of approximately $165,000 for equipment and inventory, and Hytek is entitled to future royalty payments on sales of product.

Hytek also recently sold its other assets located in its Los Gatos facility and not purchased by Interpoint, to other parties through an auction. Net of expenses, such auction yielded approximately $700,000 in cash to Hytek.

Hytek intends to consolidate its remaining operations at its Carson City, Nev. military-certified facility.

The balance, if any of the cash proceeds of the Los Gatos asset sales, after expenses and certain funding being provided to the Carson City operations, are intended to be distributed to shareholders along with the right to certain assets of Hytek's wholly owned subsidiary, Topaz Semiconductor Inc., subject to compliance with federal and California laws regulating such distributions.

Founded in 1974, Hytek specializes in custom hybrid microelectronics circuits that are used in computer, automotive, communications, medical and military applications.

Founded in 1969, Interpoint designs, manufactures and markets a broad range of proprietary power converters and custom hybrid microcircuits for aerospace and industrial applications with headquarters in Redmond.

SAN FRANCISCO (JULY 18) BUSINESS WIRE - IBM and GO Corp. Wednesday announced a software licensing agreement under which GO will provide IBM with software technology for the development of future computers that are operated by a pen.

The two companies will cooperate on pilot projects with selected corporate customers who are seeking pen-based solutions for their mobile professionals.

IBM and Go believe these customer pilot projects will enable the two companies to better determine customer requirements for these new

computers and to move the technology to the marketplace more quickly. Following successful completion of the pilot projects, IBM intends to develop and market new computer products based on GO and IBM technology that will be capable of easily exchanging information with existing personal computers.

Several independent software vendors -- both established and startup companies -- are doing software development for the GO system. These companies include Borland International, Lotus Development Corp., WordPerfect Corp., Slate Corp., and PenSoft Corp. Commenting on their participation, Cannavino added: ''We are pleased about the number of significant software vendors announcing their support today. We hope that today's announcement will encourage other hardware and software companies to join us in developing products for this exciting new growth market for the 1990s.''

GO technology is available for licensing to other parties. Terms of the agreement with IBM were not disclosed.

A privately held company headquartered in Foster City, Calif., GO Corp. was founded in 1987 to develop pen-based computing technology.

#90199b0092 07/18/1990 ~Business Wire
MOUNTAIN VIEW, CA (JULY 18) BUSINESS WIRE - Sun Microsystems Inc., announced Wednesday that it has won a multi-million dollar office automation contract from New Zealand's Inland Revenue Department, which is that nation's equivalent to the U.S. Internal Revenue Service.

Sun will supply its SPARC-based systems and networking products to Inland Revenue as part of the most significant upgrade in the department's history. The contract also includes OFFICEPOWER office automation software from ICL (International Computers Ltd.) Inc.

The choice of Sun hardware illustrates the company's growing strength in business applications. One reason Sun won over competitors is because of its superior price/performance; 90 percent of project funds had to come from savings made due to automation. Inland Revenue is presently revamping New Zealand's entire tax system, upgrading to computer systems

that will improve reporting and overall efficiency.

Inland Revenue will use OFFICEPOWER software for a wide variety of office automation tasks, including electronic mail and word processing. In addition, OFFICEPOWER will be used to integrate PCs into an OFFICEPOWER local area network using ICL's PowerWindows and PCPower options, which connect DOS-based PCs to UNIX applications.

When complete, 36 district offices will be equipped with Sun servers connected to IBM and Unisys mainframe computers. The servers run general office automation and terminal access applications, while the mainframes run human resource, financial and tax applications.

Since the new system is UNIX-based, all inter-office data is easily exchanged among various systems using LAN and OFFICEPOWER software. These locations will be connected to each other and to the IBM and Unisys mainframes via an X.25 wide area network (WAN).

An important element in Inland Revenue's comprehensive computer network is Sun's network management and administration tool, called SunNet Manager, which allows centralized control of network resources through the easy-to-use OPEN LOOK graphical interface.

According to the New Zealand Inland Revenue, Sun's open computing approach - which enables the operation to maintain existing computer investments and connect a variety of systems from many different vendors - was the most cost-effective method to meet its goal of making the new system advanced yet affordable.

An initial pilot study was begun in November 1989. As a result, Inland Revenue chose Sun's RISC (reduced instruction set computer) servers, including the high performance SPARCserver 390 and 490 systems and entry-level SPARCserver 1+s. At each of the district offices, an Ethernet local area network (LAN) will connect existing PCs, terminals and printers to the Sun servers and several Sun workstations.

According to Inland Revenue, one of the key selection criteria was that the final system must give a single desktop device access to office productivity and automation tools, and access to mainframe-resident data.

The Sun server-based solution not only provides a platform for OFFICEPOWER software, but also allows any device on the network - workstation, PC or terminal - so access OFFICEPOWER, IBM and Unisys mainframe information. At the same time, the servers improve security and control authorization.

Sun's 3270 terminal emulator, Sun Unisys/Connect and X.25 communications software are used to link district offices with the mainframe sites. These software tools work with SunNet Manager for centralized system and

network administration across the wide area network.

By using SunNet Manager, Inland Revenue has eliminated the need for local system administration in each district office. Instead, it will now come from a centrally managed headquarters resource.

Inland Revenue expects to have the initial system and internetworking installed by November 1990. When complete,the system will connect up to 4,000 users in an open, multi-vendor environment.

ICL Inc. is the North American arm of International Computers Ltd., the largest U.K.-based computer company. ICL has operations in 70 countries and is a subsidiary of STC PLC (U.K., 1989 revenues $4.4 billion). ICL develops and markets a broad range of UNIX-based computer hardware, software, networking and integration solutions for the commercial office automation market.

Sun Microsystems Inc., headquartered in Mountain View, Calif., is a leading worldwide supplier of network-based distributed computing systems, including professional workstations, servers and UNIX operating system and productivity software.

#90199b0100 07/18/1990 ~Business Wire

LOS ANGELES (JULY 18) BUSINESS WIRE - First Interstate Bancorp (NYSE:I) Wednesday reported second quarter net income of $95.1 million. Net income for the same 1989 quarter was $103.1 million. Net income per share was $1.42 and $2.02 in the 1990 and 1989 second quarters, respectively. The lower per share amount primarily reflects the February 1990 public offering of approximately 8.6 million shares of common stock and the issuance of 5.4 million shares of common stock through the dividend reinvestment plan since July 1989. Net income for the second quarter of 1989 included an extraordinary item of $8.1 million (16 cents per share) for utilization of previously unrecognized tax benefits.

For the first six months of 1990, net income was $222.3 million ($3.60 per share) and included a $30.1 million (53 cents per share) benefit due to the cumulative effect of an accounting change resulting from the adoption of Statement of Financial Accounting Standards (FAS No. 96) ''Accounting for Income Taxes.'' For the similar period last year, net income was $235.3 million ($4.83 per share) and included an extraordinary item of $29.9 million (64 cents per share) for utilization of previously unrecognized tax benefits and a positive cumulative effect of an accounting change of $16.1 million (35 cents per share) due to the

adoption of mark-to-market accounting for swap transactions.

First Interstate provides the largest geographical coverage of any retail and business banking system in the United States. Including licensees, First Interstate Banks operate more than 1,100 full-service offices in 20 states. These offices serve five million households in more than 650 communities, including seven of the 10 fastest growing metropolitan markets in the United States. Other offices serve United States and international customers in 19 countries.

PHOENIX (JULY 18) BUSINESS WIRE - Southwest Gas customers in the metro Phoenix area can now say ''charge it'' when they receive their monthly gas bill.

Beginning next Monday, Southwest will offer customers the option of using a MasterCard or Visa credit or debit card to pay for natural gas and related services. Southwest Gas is the first valley utility to offer a Visa/MasterCard payment option.

''We feel this new service will offer our customers both convenience and added flexibility,'' said Jim Kane, Southwest's manager of customer relations in Phoenix. ''For example, a customer can pay a gas bill or establish an account with us by phone from anywhere in the country.'' Southwest offers a national toll-free number for use by seasonal residents and frequent travelers.

Customers might also use the credit card option to ease the strain of an unexpected bill or simply to avoid writing a check. Credit card payments may be authorized by phone or at any Southwest Gas business office in the valley.

Kane said the company will monitor the credit card program to gauge customer acceptance before offering it statewide.

#90199b0118 07/18/1990 ~Business Wire

TEMPE, Ariz. (JULY 18) BUSINESS WIRE) - Arizona Instrument Corp. (NASDAQ:AZIC) Wednesday reported that it returned to profitability in the second quarter ending June 29, 1990.

Revenue for the period increased 15 percent over the same period one year ago to $2,629,358, from $2,293,783 in 1989. Total revenue reflected a 39 percent increase over the first quarter of 1990. The company reported net earnings of $10,973 for the quarter, compared to a loss of $285,912 for the same period a year ago.

John Hudnall, president and chief executive officer of Arizona Instrument, reported that all segments of the company's business were up in the second quarter, particularly the underground storage tank leak detection market and international markets.

He noted that the company's cash position remained strong, with cash increasing 32 percent, from $899,459 to $1,186,033. In addition, he said the company finished the quarter with an increase in net accounts receivable of $319,364 over the first quarter, for a total of $1,483,541, and had no short-term borrowings.

''Early last year we began investing heavily in product development and marketing programs for our Soil Sentry UST leak detection products,'' Hudnall said. ''We have now made the transition from the investment-intensive, market-entry mode, to a more conservative sales and growth mode.''

Hudnall said the investment is beginning to pay off, as the company is realizing an increase in sales of leak detection equipment.

''The sales cycle for a new market created by federal regulation can often

be quite long,'' he said, ''Which has certainly been the case with this market. But we have momentum now, which is beginning to materialize in firm orders. We remain optimistic that this is a viable market for us, and that it will soon be a major portion of our business.''

Arizona Instrument designs, manufactures, and markets microprocessor controlled analytical instruments for environmental and process control applications.

#90199b0119 07/18/1990 ~Business Wire

LOS ANGELES (JULY 18) BUSINESS WIRE - With 653 Japan-based companies operating in Southern California, the current corporate membership of the Japan Business Association of Southern California (JBA) indicates a 100 percent increase of Japanese operations since 1980, when membership totaled 326 corporations.

Understandably, Japan Business Association of Southern California is the largest Japanese business-related organization outside of Japan.

Within JBA's membership, there has been a significant change over the past decade relating to the industry line of Japanese operations. The fastest-growing industries among JBA corporate members since 1980 have been ''service'' and ''construction/real estate.'' The service industry includes advertising, employment agencies, security, computer software services and cram schools for Japanese children.

Another significant change occurred this year when the focus of membership totaled 77 companies within the ''electronics'' industry. Since the establishment of JBA in 1967, ''trade'' (import/export) was the most dominant industry line of JBA corporate members.

The following data shows the distribution of the top 10 industries within the corporate membership of the Japan Business Association of Southern California in both 1980 and 1990.

	Number of Companies in 1980		Number of Companies in 1990
1. Trade	44	2. Electronics	36
3. Machinery	26	4. Banks	23
5. Automobile related	20	6. Steel	20
7. Construction/real estate	13	8. Service	12
9. Travel	12	10. N/A	N/A

Companies in 1990			
1. Electronics	77		
2. Trade	70	3. Service	69
4. Construction/real estate	59	5. Machinery	47
6. Automobile related	37	7. Transportation	33
8. Banks	32	9. Other manufacturer	28
10. Foods	21		

Because of the diversification of industry lines, Japan Business Association reviewed its organizational structure and last year amended its system of electing the president. Since its inception, JBA had previously elected the association president from the Japanese Shogo Shosha, General Trade Group. However, the JBA president is now elected from other business lines as well as trading firms.

JBA was established in 1961 with 48 charter corporate members; the majority of these initial members were trading firms. Celebrating its 30th anniversay this year, Japan Business Association of Southern California is a non-profit organization that promotes business, mutual understanding and goodwill between people of Southern California and Japan.

#90199b0122 07/18/1990 ~Business Wire

LOS ANGELES (JULY 18) BUSINESS WIRE - Health Care Property Investors Inc. (NYSE:HCP) Wednesday reported record net income for the three months ended June 30, 1990, of $6,089,000, or 53 cents per share of common stock, on revenues of $17.56 million.

This result compares with net income of $3,612,000, or 40 cents per share of common stock, on revenues of $14.98 million for the corresponding quarter of 1989. The per-share amount represents a year-to-year increase of 32 percent.

Commenting on the results for the quarter, Kenneth B. Roath, chairman and chief executive officer of the company, stated that cash flows from operating activities totaled $9,881,000, or 86 cents per share of common stock, equalling the record cash flow achieved in the previous quarter.

Cash flows from operating activities for the comparable quarter in 1989 amounted to $6,817,000, or 75 cents per share of common stock. Roath noted that the year-to-year increase in per-share cash flows was 15 percent, or about twice the rate of increase in dividends paid by the company in the same period.

He noted the importance of this favorable trend with respect to the

company's ability to pay increasing quarterly dividends.

The improvements in income and cash flows result from significantly higher additional rental income, rents from recent acquisitions and completed construction projects, lower interest costs resulting from receipts of proceeds from the common stock offering in February 1990, offset by higher administrative costs.

Cash flows were also positively impacted by higher working capital balances generated at the two long-term care facilities which are operated by the company. Income continues to be impacted by the start-up expenses of recently completed congregate care facilities.

Health Care Property Investors is a self-administered equity-oriented real estate investment trust which invests in health care-related facilities throughout the United States, including long-term care facilities, acute care, rehabilitation and psychiatric hospitals, congregate care centers and assisted-living facilities.

HILLIARD, OH (JULY 18) BUSINESS WIRE - With continuously increasing demand for its lines of medical equipment products, Medex Inc. Wednesday announced a $3 million expansion of its plastics molding and component sub-assembly plant in Dublin.

''Since fiscal 1985, when we opened the Dublin plant, our worldwide sales have increased an average of 25 percent a year,'' said Craig Waldbillig, chairman and chief executive officer. ''At that time we had 280 employees and sales of $15 million. By the end of our last fiscal year, June 30, 1989, we had 650 employees and sales of $36.7 million.''

Waldbillig said the 46,000-square-foot addition will be financed through

retained earnings with no increase in company debt.

The existing plant at Shier-Rings and Avery Roads is approximately 54,000 square feet, located on a 22.59-acre lot. The 46,000-square-foot addition will include environmentally controlled ''clean room'' facilities and 6,000 square feet of office space, Waldbillig said.

The contractor for the expansion is Contrak Corp. of Dublin. Smith Associates is the architect.

Earlier this year, Medex expanded its Hilliard facilities with the purchase of a 9,900-square-foot warehouse on a 1.1-acre site adjacent to its corporate headquarters.

Medex Inc. designs, manufactures, assembles and markets a broad range of disposable hospital products for life-support systems, including intravenous fluid administration and invasive pressure monitoring, as well as products for neonatal intensive care, oncology and pain management. The company has three operating subsidiaries: Medex Medical Inc. in England; Cardionova GMBH in West Germany; and MedFusion Inc. in Georgia.

SAN FRANCISCO (JULY 18) BUSINESS WIRE - Sumitomo Bank of California (OTC:SUMI) reported Wednesday second quarter net income of $11.03 million, an increase of 38 percent over last year's second quarter results of $7.97 million.

Earnings per common share, on 8,222,845 average shares outstanding in the quarter, equalled $1.34 vs. $1.04 on 7,599,655 average shares in the 1989 comparison period.

For the first six months of this year, the San Francisco-based bank realized net income of $20.87 million compared to $15.69 million in the first half of 1989. This performance translated to $2.54 per common share vs. $2.14 a share.

At June 30, the statewide bank's total assets were $4.43 billion, a gain of $456 million over last year at the same time. Total deposits were $3.79 billion, an increase of $435 million.

SAN JOSE, CA (JULY 18) BUSINESS WIRE - California Water Service Co. Wednesday announced second quarter earnings of 66 cents per common share, down three cents from the prior year.

Net income for the quarter was $3,783,000 on revenue of $31,743,000.

C. H. Stump, president and chief executive officer, said the fourth year of California's drought has brought a decline in customer water use through conservation, a primary factor in the quarter's 4 percent decrease in net income. Five company districts on the San Francisco peninsula are presently under mandatory water rationing.

Directors meeting Wednesday in San Jose declared the regular quarterly dividend of 43-1/2 cents per common share for shareholders of record Aug. 1, 1990, payable Aug. 15, 1990, in addition to the declaration of the regular dividend on preferred shares.

TORONTO (JULY 18) BUSINESS WIRE - As part of its previously announced reorganization to concentrate on its core business of making and marketing major motion pictures, NHI Nelson Holdings International Ltd. (ASE/ToSE/VSE:NNH) announced Wednesday that Nelson has decided to consolidate and streamline its international sales and marketing operations in its London office.

Massimo Graziosi has been appointed the new president and chief operating officer of Nelson Entertainment International. Graziosi replaces Ian Jessel who, following the company's decision to consolidate its operations in London, has resigned as president and chief operating officer of Nelson Entertainment International and executive vice president of NHI Nelson Holdings International Ltd.

Ian Scorer, executive vice president of Nelson Entertainment International has also resigned.

''Nelson has seven major motion pictures in its distribution pipeline for our international customers, representing the strongest line-up the company has ever had. This, coinciding with the explosive growth in Europe, seemed an ideal opportunity to have Nelson International consolidate in an area where the most sales activity is taking place,'' commented Richard Northcott, chairman, and Barry Spikings, president.

''We are delighted to have Massimo Graziosi to spearhead this aggressive new phase of our international sales efforts. We are also grateful for the enormous effort on the part of Ian Jessel, Ian Scorer and their team to build Nelson Entertainment International into its current strong position in the international marketplace.''

Graziosi, commenting from his new position as president, said: ''It was a wonderful experience working with Ian Jessel, Ian Scorer and their colleagues and I look forward to continuing to build Nelson International on the successful foundation we have all played a part in establishing.

NHI Nelson Holdings International Ltd. is the holding company for the Nelson Entertainment Group and for 69 percent-owned Nelson Vending Technology Ltd.

MONETT, MO. (JULY 18) BUSINESS WIRE - Jack Henry & Associates Inc. (NASDAQ:JKHY) announced Wednesday that its board of directors, at a special meeting of the board on July 17, 1990, declared a special cash dividend of 20 cents per share on its common stock, par value 1 cent per share, payable on Aug. 30, 1990, to stockholders of record of its common stock as of July 31, 1990.

At June 30, 1990, 3,528,553 shares of company common stock were outstanding.

In a related matter, the company's board of directors also authorized management to study the possibility of establishing regular dividends and directed that management deliver its report on this matter to the board of directors at its annual meeting to be held in October 1990.

Jack Henry & Associates markets, installs and supports integrated data processing software systems for banks and financial institutions. The company's software systems have been installed at approximately 600 banks throughout the United States.

CAMARILLO, CA (JULY 18) BUSINESS WIRE - Everest & Jennings International Ltd. (ASE:EJ.A;EJ.B) Wednesday announced that Michael J. Erbstoesser has been named to the new position of vice president, marketing and sales, for the company's U.S. operations.

In this capacity, Erbstoesser will oversee the company's domestic marketing, sales administration, sales rehab and sales homecare operations.

Erbstoesser brings to E & J 18 years experience in the healthcare industry most recently as president of Canyon Products, an Invacare company. Prior to that, he was for two years president of Abec Mobility, a division of Sunrise Medical, and from 1977 to 1987 he was manager of Sunrise's Western region. Earlier, he held marketing positions with Crippen Medical Supply and Goodhew Medical Supply.

Barre L. Rorabaugh, president and chief executive officer, said, ''The addition of Mike Erbstoesser to our management team is an important step in strengthening E & J's position in the marketplace, and he will by playing a major role in returning the company to profitability.''

Erbstoesser received an associate of arts degree from Bakersfield Community College in 1970 and a bachelor of arts degree in history/business from San Diego State University in 1973.

Everest & Jennings International is engaged in the design, manufacture and distribution of wheelchairs and other durable medical equipment to worldwide markets, primarily in North America and Western Europe.

LAGUNA HILLS, CALIF. (JULY 18) BUSINESS WIRE - Hart Industries Inc. (NASDAQ:HRTI) Wednesday reported results for the second quarter of 1990.

Hart posted profits of $210,000 on revenues of $290,000 for the quarter ending June 30, 1990. In addition, Hart's acquisition of Magnolia Environmental Services has resulted in an additional $350,000 in capital equipment assets for the company.

A Hart spokesman said revenues from its Magnolia Environmental division exceeded the company's expectations, resulting in over $200,000 of revenues in the last 30 days of the quarter.

Hart's Magnolia Environmental division is a leading provider of mobile toxic solids control and de-watering services. Magnolia processes a wide variety of industrial wastestreams that include hazardous-waste fuels, refinery bottoms, industrial sludge, metals sludge and a variety of off-specification industrial wastes.

Patrick J. Elliott, Hart Environmental Vice President, stated, ''We are pleased with the outstanding performance of our environmental-services division and look forward to continued expansion in this field.

''The acquisition of Magnolia has strengthened our position in the environmental-remediation-services industry, allowing us to better address the pollution problems encountered in our Underground Storage Tank (UST) programs.''

National studies indicate that over 20 percent of all USTs are currently leaking and 70 percent of all sites require some form of remediation (clean-up).

Hart Industries is the first company to offer a full-service approach to current EPA regulations concerning USTs and the company provides all equipment, services and financial responsibility required by the EPA on a variable-term lease program. Hart's first tank installation is scheduled for completion in late July.

CORAL GABLES, FLA. (JULY 18) BUSINESS WIRE - BLOC Development Corp. (NASDAQ:BDEV) Wednesday announced preliminary results for the three months ended June 30, 1990.

For such period, BLOC anticipates reporting record quarterly revenues (estimated 35 percent increase over first quarter 1990 and 230 percent over second quarter 1989), and near-record quarterly earnings. BLOC anticipates releasing final operating results for the quarter on or about Aug. 10, 1990.

Further, the company also stated that it has become aware of rumors circulating in the investment community with respect to possible litigation involving the company and Microsoft Corp.; however, the company has no knowledge of any such potential litigation.

Based in Coral Gables, BLOC develops, publishes and markets business and personal productivity software for the IBM PC, PS/2 and IBM compatible market. In addition, the company also provides business automation services to small and mid-sized companies.

VANCOUVER, BC (JULY 18) BUSINESS WIRE - Clearly Canadian Beverage Corp. (NASDAQ Symbol:CLCDF; VSE Symbol:CLV), the registered holder of the trademark ''Clearly CanadianTM'', Wednesday announced that it expects to report record sales for fiscal year ended June 30.

The company anticipates that sales for the fiscal year ended June 30 will be approximately US $17,000,000 (Cdn. $20,000,000) as compared to US $7,231,115 (Cdn. $8,315,782) for the year ended June 30, 1989.

The increase is primarily attributable to the expansion of ''Clearly CanadianTM Sparkling Mineral Water'' into 17 additional U.S. States as well as in Japan during fiscal 1990.

Despite an anticipated net loss for the fiscal year, the company expects to report an operating profit for the fourth quarter and believes that this trend will continue into fiscal 1991. During 1990, the company changed its accounting policy to expense costs as incurred, rather than amortizing these costs over thirty-six (36) months.

These expenditures were principally related to the costs of acquiring additional bottlers and distributors. In addition, during the fourth quarter the company will incur a charge relating to the write-down of certain assets associated with abandoned projects.

The company stated that the preliminary results are subject to audit and year end adjustments and that final audited results may vary from the preliminary report.

Commenting on the company's business, Douglas L. Mason, president of Clearly Canadian Beverage Corporation, stated, ''We are very excited about the company's strong growth over the past year. During fiscal 1990, we successfully increased brand awareness and our network of bottlers and distributors. As we enter fiscal 1991, our corporate strategy is to continue to expand market penetration of our product, domestically and internationally, thereby resulting in increased revenues and profitability for Clearly CanadianTM.''

Clearly Canadian Beverage Corporation produces and markets ''Clearly CanadianTM'', a line of natural and flavored sparkling mineral waters. Through distribution agreements, ''Clearly CanadianTM'' is sold in 30 states, all of Canada Japan and England.

MIDVALE, UT (JULY 18) BUSINESS WIRE - Ballard Medical Products (NASDAQ/NMS:BMED), makers of hospital disposable products, reports for the nine months ended June 30, 1990.

Net sales for the first nine months of fiscal 1990 were $21,113,179 compared to $14,597,973 for the first nine months of last year. This represents an increase of 44.6 percent. Net sales for the third quarter of fiscal 1990 were $7,735,432 compared with $5,463,820 for the third

quarter 1989.

The company had a nine month net income of $4,346,604 compared to $2,834,972 for the same period last year. Net income for the third quarter 1990 was $1,538,417 compared to $1,056,557 for the third quarter fiscal 1989. The fiscal year ends Sept. 30.

Earnings per share for the nine months were 79.4 cents compared with 53.5 cents a year ago. Earnings per share for the third quarter 1990 were 28.1 cents compared with 19.9 cents for the third quarter 1989.

Year to date net income of $4,346,604 (79.4 cents per share) includes the net income after taxes from two non-recurring items of $448,018 (8.2 cents per share). This did not have any effect on third quarter earnings.

Construction of the company's new 120,000 square foot manufacturing facility is well under way and should be completed late this fall.

Ballard Medical has 5,301,506 shares of common stock outstanding.

#90199b0618 07/18/1990 ~Business Wire

LAS VEGAS, NV (JULY 18) BUSINESS WIRE - MarCor Resorts, Inc. (MAAR/NASDAQ) today announced that it had received an overwhelmingly favorable response to its offer to exchange equity in MarCor for limited partnership interests in MarCor Resorts, L.P. V, the limited partnership which owns and operates the Rio Suite Hotel & Casino in Las Vegas, and owns 125 acres in nearby Henderson.

Tenders of units accepted from limited partners are valued at over $36 million and would increase MarCor's ownership in the partnership from the present 34.9 percent to more than 95 percent.

MarCor's net stockholder equity, adjusted for this exchange, would have been $48.6 million compared to $12.6 million as of March 31, 1990, assuming that all of the shares issuable in the transaction are converted into MarCor common stock. Based on present shares outstanding, MarCor common stock outstanding will increase from 7.5 million shares to 14 million shares after all shares issuable in the transaction are converted into MarCor shares.

The transaction is subject to approval by the Nevada Gaming authorities and MarCor stockholders. MarCor is completing proxy materials so that the

exchange can be considered at the Company's annual meeting of stockholders scheduled for August 16, 1990.

MarCor President James A. Barrett, Jr. stated, ''We are pleased with the extremely favorable response to the exchange proposal and feel confident both the limited partners and stockholders will benefit from the efficiencies to be gained from the restructuring. The Company's flagship gaming property, the Rio Suite Hotel & Casino, continues to meet expectations and management remains committed to expanding the facility.''

MarCor Resorts, Inc., through a wholly-owned subsidiary, is the principal owner and operator of the first all-suite hotel/casino in the country, the Rio Suite Hotel & Casino located in Las Vegas. MarCor and controlled entities own 165 acres in the greater Las Vegas area targeted for the development of future gaming resorts and ancillary uses.

#90199b0619 07/18/1990 ~Business Wire

SAN JOSE, CA (JULY 18) BUSINESS WIRE - Laserscope (NASDAQ:LSCP) Wednesday announced financial results for the second quarter ended June 30, 1990.

The company reported revenues of $10.67 million for the quarter, an increase of 135 percent over revenues of $4.54 million for the second quarter of 1989. Net income for the quarter was $1.50 million, an increase of 224 percent from $0.46 million in 1989.

Net income per share for the second quarter was 22 cents, up by 120 percent from 10 cents from last year's second quarter and up from 16 cents in this year's first quarter.

Revenue for the six months ended June 30, 1990 was $18.49 million, an increase of 120 percent over the first half of 1989. Net income for the six months was $2.54 million, an increase of 224 percent from 1989. Net income per share for the first half was 38 cents, up by 138 percent from 1989.

Reflected in the growth of the reported net income was a further improvement in profit margins. For the quarter, gross margin was 57.1 percent and operating margin was 13.1 percent.

Both these key performance indicators reached record levels in the second quarter. This was Laserscope's eighth successive quarter of increased profits and 14th successive quarter of increased revenues.

Announcing the results, Herbert Taus, Laserscope president and chief executive officer, said: ''We continue to see exceptional growth in the general surgery market driven by the laser laparoscopic cholecystectomy procedure.

''This growth has been incremental to continued good growth in our base business in gynecology and ear, nose and throat surgery. These base businesses still account for well over half of our revenues.''

Laserscope also announced that its first international revenue had been recorded in the second quarter. Commenting on the development of international sales, Taus stated, ''We are pleased with our international progress and now have systems installed in Japan, Australia, Germany, Switzerland and the UK.''

The company announced that it had increased its laser production capacity to position itself for future growth and manufacturing efficiencies.

Taus stated: ''The demand for our products has been very strong this quarter and we have increased our production capacity to enable us to better respond to this dynamic market trend. An important element of these expansion programs will be the further improvement of our already high level of product quality.''

Recurring revenue from Laserscope's disposable, accessory and service businesses continued to show strong growth. These recurring revenues accounted for approximately 25 percent of net revenues in the second quarter compared to 22 percent in the first quarter. The company has expanded its facilities to provide additional capacity for these growing businesses.

Laserscope designs, manufactures and markets an advanced line of KTP/532 and KTP/YAG surgical laser systems and related accessories and disposables. These systems employ the company's proprietary laser technology based on KTP crystalline material and enable the surgeon to cut coagulate and vaporize tissue in a wide variety of applications and procedures.

#90199b0621 07/18/1990 ~Business Wire

SAN JOSE, CA (JULY 18) BUSINESS WIRE - Xilinx Inc. (NASDAQ:XLNX) announced increased revenue and net income for the quarter ended June 30, 1990, its first quarter as a public company.

Revenue for the company's first fiscal quarter rose 78 percent to $18.5 million from the comparable quarter in 1989. First quarter net income increased 78 percent to $2.8 million from the prior year. Earnings per share were 14 cents, versus 9 cents for the like period in 1989.

Compared to the immediately preceding quarter, revenue increased 18 percent and operating income was up 32 percent. While income before taxes was up 34 percent, net income was down 8 percent as the company's effective tax rate increased from approximately 10 percent to 38 percent, following full utilization of loss carryforward benefits. Xilinx has reported increased revenue and operating income for 11 consecutive quarters.

Xilinx President Bernard V. Vonderschmitt, stated, ''As a new public company, we are very pleased by the response we have seen from the financial community. We are continuing to achieve results consistent with our market leadership position. Our growth rate illustrates the demand for high levels of logic integration in a technology that helps system manufacturers get to market quickly.''

Xilinx' cash position was strengthened following the successful completion of its initial public offering on June 12, l990. The $41 million in net proceeds from the sale of 4.5 million share provides the company with added flexibility to support future growth.

Xilinx invented the field programmable gate array (FPGA) in 1985 and continues to be the leading supplier. The company has shipped more than 4 million integrated circuits and 7,600 of its associated design software tools to more that 3,000 companies worldwide.

Field programmable gate arrays are standard integrated circuits programmed by system designers to meet the unique logic requirements of electronic systems. The Company's FPGAs are well suited to a wide variety of applications which require high levels of logic integration and where time to market is critical, production volumes unpredictable, or frequent design modifications necessary to adapt a product to new markets.

NEW YORK (JULY 18) BUSINESS WIRE - New Line Cinema Corp. (AMEX:NLN) and Carolco Pictures Inc. (NYSE:CRC), through a controlled subsidiary, the Vista Organization Ltd., announced the formation of a joint venture for the theatrical distribution of certain motion pictures produced or acquired by affiliates of Carolco Pictures Inc., including International

Video Entertainment, Carolco's home video subsidiary.

The venture will operate under the name Seven Arts. The Venture (Seven Arts) films will be distributed through New Line Distribution.

The announcement was made Wednesday by New Line Cinema President and Chief Executive Officer Robert Shaye and Carolco Pictures Chairman Mario Kassar and President Peter Hoffman.

A number of films have already been identified for release by Seven Arts, including ''Repossessed,'' which stars Leslie Nielsen, Linda Blair and Ned Beatty in a hilarious spoof of the ''Exorcist'' films. ''Repossessed'' is scheduled for a late August theatrical release.

''King of New York,'' starring Christopher Walken and directed by Abel Ferrara, is an inner-city action drama scheduled for a November release.

''Dark Wind'' and ''A River Runs Through It,'' both produced by Robert Redford's North Fork Productions, will also be released under the Seven Arts banner.

''Dark Wind,'' which begins principal photography in August, will be directed by Earl Morris and produced by Robert Redford.

''Dark Wind'' is the first in a series of films based on the popular and award winning novels by Tony Hillerman. Redford will direct ''A River Runs Through It.'' Additional titles to be distributed by Seven Arts are expected to be announced shortly.

Under the terms of the agreement, Vista, which is to be renamed shortly, will be partnered with New Line in all aspects of theatrical distribution of the pictures to be handled by the venture through New Line.

#90199b0626 07/18/1990 ~Business Wire

RAHWAY, N.J. (JULY 18) BUSINESS WIRE - Merck & Co., Inc. Wednesday announced that earnings per share for the second quarter of 1990 were $1.20, an increase of 20 percent over the second quarter of 1989. Second quarter net income increased 19 percent to $470.2 million. Sales for the quarter were $1.9 billion, up 20 percent from the same period last year.

For the first six months, earnings per share of $2.23 increased 20 percent from the 1989 first half. Net income increased 19 percent to $874.0 million. Sales rose 16 percent to $3.7 billion.

''Sales growth for the first half was led by newer products,'' said P. Roy Vagelos, M.D., chairman and chief executive officer of the health products firm. ''Both our domestic and international operations reported solid unit volume gains. Exchange had essentially no effect on sales for the first half.

''Sales outside the United States accounted for 45 percent of first half sales compared with 47 percent for the same period last year,'' he said.

''Income growth for the first half resulted from strong unit volume gains, better product mix, and the continuation of cost controls and productivity improvements,'' Dr. Vagelos said.

In the human and animal health products segment of Merck's business, results for the six months reflected strong sales gains by 'Vasotec', 'Mevacor', 'Zocor', 'Pepcid', 'Losec', 'Prinivil' and ivermectin. Pediatric vaccines, led by 'M-M-R' II (Merck's combination vaccine for measles, mumps and rubella), also contributed to the six month sales gain, reflecting the implementation of revised guidelines for vaccinations against measles in response to the increased incidence of the virus in the U.S.

Merck & Co., Inc., is a worldwide research-intensive health products company that discovers, develops, produces and markets human and animal health products and specialty chemicals. The Company has over 34,000 employees, 17 research centers, and manufacturing facilities in 18 countries.

#90199b0627 07/18/1990 ~Business Wire

SEATTLE, WA (JULY 18) BUSINESS WIRE - Metropolitan Federal Savings & Loan Association (NASDAQ:MSEA) Wednesday announced that it took writedowns and added reserves of $10.0 million (before federal income tax benefits) in the first quarter of fiscal 1991 as part of a new restructuring plan which was recently adopted.

Metropolitan reported a net loss of $9.8 million or $5.21 per share for the quarter ended June 30, 1990, compared to a loss of $1.2 million in the like quarter of fiscal 1989. Per share calculations for 1989 are not

meaningful since the association had no stock outstanding prior to its conversion to stock form in January 1990.

''A complete review of the association's operations has been undertaken during the past eight weeks resulting in a dramatically revised business plan. The steps we have taken produced a significantly strengthened balance sheet with corresponding earnings opportunities,'' said Patrick F. Patrick, president and chief executive officer since May 22, 1990.

''It is now our intention to return Metropolitan to its original strength of serving the savings depositors and residential borrowers with timely products and superior service. The emphasis at Metropolitan will be on acquiring high quality assets that will yield significant net interest income -- the basic measure of thrift profitability,'' Patrick added.

The association's new restructuring plan included: a $4.5 million adjustment to reduce Metropolitan's $85.7 million mortgage-backed securities portfolio to the lower of cost or market in anticipation of its sale; additional writedowns totalling $342,000 for holdings of high yield non-rated and below investment grade corporate bonds; a $2.1 million provision for general commercial loan loss reserves; accrual of $567,000 for penalties related to the planned prepayment of high rate Federal Home Loan Bank borrowings; and $2.4 million of miscellaneous writedowns for leasehold improvements and various other assets and accruals for occupancy severance and other related expenses.

Subsequent to June 30, 1990, the association liquidated its mortgage-backed securities portfolio which yielded approximately 8.5% and $1.5 million of high yield corporate bonds at no additional loss. The high yield bond portfolio has been reduced to $1.5 million as a result of these sales.

Upon completion of an operational review of Metropolitan and particularly its non-interest expenses, a plan was developed for the purpose of improving operating efficiencies.

The plan includes a reduction in staff totalling more than 20% of all employees, the closing of the company's Bellevue sales office and the possibility of relocating the corporate headquarters to Westlake Center in downtown Seattle, into an office owned by Metropolitan.

As a result of its restructuring efforts, the association's net interest income, before provision for loan losses, increased to $1,985,000 in the first quarter of fiscal 1991 compared to $858,000 a year ago. Since March 31, 1989, Metropolitan has sold approximately $220 million of low-yielding assets which were adversely affecting the association's ability to operate profitably. For the first quarter of fiscal 1991, Metropolitan's net interest margin was 1.61% compared to .49% in the same quarter last year.

Stockholder's equity totalled $17.5 million at June 30, 1990, and book value per share was $9.36. The association's capital exceeds the tangible core and risk-based capital requirements established by the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA). However, as a result of the restructuring described above, the association is temporarily out of compliance with the individual minimum capital requirement (IMCR) which was imposed effective Sept. 30, 1989, by the Office of Thrift Supervision (OTS). The IMCR was imposed as a result of the association's high level of interest rate risk and decline in net interest margin.

The goals of the restructuring are to enhance net interest income and reduce interest rate risk and as a result of the actions taken recently, interest rate risk and credit risk will be materially reduced. The OTS has reviewed the business plan and had no objection to Metropolitan pursuing such activities.

Metropolitan reported that in the first quarter non-accruing loans and loans 90 days or more past due were $14.5 million at June 30, 1990, compared to $13.3 million at March 31, 1990. Real estate acquired through foreclosure has been reduced to $8.2 million at June 30, 1990, from $8.4 million at March 31, 1990.

Metropolitan's loan portfolio totaled $336.4 million at the end of the first quarter compared to $338.6 million at March 31, 1990. Deposits were $389.6 million at June 30, 1990, compared to $407.2 million at March 31, 1990.

The association's total assets at June 30, 1990, were $488.4 million compared to $499.5 million at March 31, 1990. Metropolitan's portfolio of loans serviced for others was $78.0 million at the end of the first quarter compared to $79.0 million at March 31, 1990.

Metropolitan is an FDIC-insured, federally chartered savings and loan association organized in 1935, with seven branches located in the greater Seattle area. Metropolitan converted from mutual ownership to stock form of ownership on Jan. 9, 1990.

EMERYVILLE, CA (JULY 18) BUSINESS WIRE - ViewStar Corp., the leader in network-based software solutions for document image processing, Wednesday announced the release of an affordable Entry Level System (ELS) running on Novell-based networks.

ViewStar's functionally rich Entry Level System includes:

o ViewStar software modules enabling the capture, storage, retrieval, management, annotation, processing and output of document images.

o Selected imaging peripherals, to augment the customer's existing LAN, including two 19-inch high-resolution monitors, a document scanner, laser printer, optical disk storage unit and tape backup system.

o A variety of pre- and post-installation services designed to ensure the successful implementation of the ELS.

ViewStar is offering the ELS during 1990 at a price of $130,000. Excluding hardware, the system can be purchased for only $97,500. The five-user entry system can handle a database of up to 100,000 documents. The ELS program includes ViewStar's Installation Success Kit service package,

which combines elements of ViewStar planning, installation and training services.

The major benefit for a potential user of the ELS is the flexibility to test an imaging application without making a large financial commitment. When the user wishes to expand the system, it is easy to upgrade on a modular basis to a system more than 10 times its original size.

With headquarters in Emeryville, ViewStar Corp. was founded and incorporated in February 1986 to develop network-based document image processing software for standard computing environments. Its products are sold directly into banking, financial services, insurance, oil and gas, engineering/manufacturing, pharmaceuticals and utilities markets both domestically and internationally.

Over the past four years, ViewStar has emerged as the leading supplier of network-based software solutions for the document image processing market.

ViewStar has a development agreement with Novell under which ViewStar will develop an optical server Netware Loadable Module (NLM) for the ViewStar system. In addition, ViewStar and Novell are undertaking a variety of joint marketing opportunities.

SCOTTSDALE, ARIZ. (JULY 18) BUSINESS WIRE - The common shares of Pantheon Industries Inc., a record and production company, have been accepted for listing on the NASDAQ system under the symbol PNTH, it was announced Wednesday by Pantheon President & Chief Executive Officer Dennis Alexander.

Formerly Star Video Productions Inc., Pantheon Industries acquired Pantheon Studios Inc., a private Arizona corporation, in July, 1987. The company's shares were approved for listing on the Philadelphia Stock Exchange under the symbol PII-X in July 1989.

Pantheon records under the Krisma label, producing demo tapes and near master recordings. Under the name Network 30, it records, produces and markets custom music themes or ''jingles'' for media advertising and other uses.

It produced a five-part video tape ''License To Skate,'' now in

distrbution, and provides complete production services for customers.

#90199b0632 07/18/1990 ~Business Wire
SAUSALITO, CALIF. (JULY 18) BUSINESS WIRE - SBT Corp. has just published the fourth edition of the SBT Vertical Industry Partners Catalog.

The catalog contains detailed descriptions of over 180 vertical applications and more than 190 modifications of the SBT Database Accounting Library.

Business applications developed for more than 70 vertical industries are listed and indexed. The catalog offers information on the benefits of vertical industry marketing, the SBT Developer's Platform, questions to ask before buying vertical packages, and Standard Industrial Classification codes and explanations. The SBT Vertical Applications Catalog is available now. Suggested retail price is $9.95.

Vertical applications are listed according to eight major S.I.C. code groups: Agriculture, Construction, Manufacturing, Transportation/Warehouses/Refuse Services, Wholesale, Retail Management, Finance/Insurance/Real Estate, and Services. Information is indexed by application name, operating environment, company name, and major and intermediate S.I.C. codes.

Other sections include a checklist for choosing a vertical software publisher and locating vertical applications to meet specific needs.

SBT Corp. manufactures the SBT Database Accounting Library and the SBT Database Executive Library. The SBT Database Accounting Library, a complete modular accounting system, is the most widely used accounting software, with 100,000 business users in more than 70 countries. The new SBT Database Executive Library features modules which facilitate business communications and other operational activities.

SBT markets products for MS-DOS, Macintosh, UNIX/XENIX, VMS and other popular operating environments.

SBT set an industry standard for modifiable accounting software with modules available in both source code and compiled versions. In November of 1989, SBT was awarded the Data Based Advisor Reader's Choice Award for Best Accounting System as well as the DBMS Reader's Choice Award for Favorite Source Code Package.

CAMBRIDGE, MA (JULY 18) BUSINESS WIRE - Lotus Development Corp. Wednesday reported that in its second quarter ended June 30 revenue increased 33 percent and net income 128 percent from the year-ago period.

Net sales rose to $175.2 million from $132.2 million in the comparable 1989 quarter. Net income increased to $23.5 million, or 54 cents per share, from $10.3 million, or 25 cents per share, in the previous year's corresponding quarter.

For 1990's first six months, Lotus' revenue advanced 35 percent to $340.8 million from $252.2 million in the similar 1989 period. Net income rose 197 percent to $46.3 million, or $1.06 per share, from $15.6 million, or 37 cents per share, in the first half of 1989.

''The first half of this year has been the busiest one in the company's history from a product development and introduction perspective,'' said Jim Manzi, Lotus' president and chief executive officer.

''We are encouraged by initial customer reaction to our broadened line of 1-2-3 products, and look forward to delivering Release 3.1, the graphical version of our product that runs under Windows, in the third quarter. At the same time, products like Symphony and Freelance Plus continued to sell well and worldwide interest in Lotus Notes is extremely high.''

In the second quarter, Lotus shipped several versions of 1-2-3, including five for the IBM mainframe environment, two for the Digital Equipment Corp. VAX family of computers, two for UNIX System V Release 3.2, an enhanced version of Release 2.2 for the government market and Lotus FACTORY, an add-in product that allows users to access real-time factory-floor data with a Release 2.01 or 2.2 spreadsheet.

In the quarter, the company announced that it will ship 1-2-3 Release 3.1 in the third quarter and said it is developing a version of 1-2-3 specifically for the Windows graphical operating environment. The company also acquired AlphaWorks, an integrated software program for entry-level users, and now sells the product as LotusWorks.

The company also shipped DataLens developer toolkits for Sun workstations and for Digital Equipment Corp.'s VAX/VMS environment, and network and government editions of Freelance Plus.

In addition to Release 3.1, the company announced that a new version of Lotus Agenda, a personal information management product, will ship this summer and that a new sales prospecting tool that runs on Apple Macintosh personal computers, Lotus MarketPlace, will be available in the second half of 1990.

Lotus Development Corp. (NASDAQ:LOTS) is the leading provider of applications software for personal computers and information services delivered on CD-ROM, and a worldwide supplier of applications software for workstation, minicomputer and mainframe computing environments.

#90199b0645 07/18/1990 ~Business Wire

WOODLAND HILLS, CALIF. (JULY 18) BUSINESS WIRE - Amwest Insurance Group Inc. (AMEX, PSE:AMW) Wednesday reported results for the quarter ended June 30, 1990.

Written premiums were $14,802,000 as compared to $11,486,000 for 1989.

Earned premiums were $11,417,000 as compared to $8,297,000 for 1989.

Net income was $944,000 (40 cents per share) as compared to $586,000 (23 cents per share) for 1989.

Weighted average shares outstanding were 2,366,000 as compared to 2,511,000 for 1989.

The company also reported results for the six months ended June 30, 1990.

Written premiums were $27,094,000 as compared to $21,536,000 for 1989.

Earned premiums were $22,438,000 as compared to $17,091,000 for 1989.

Net income was $1,657,000 (70 cents per share) as compared to $1,581,000 (63 cents per share) or 1989. Weighted average shares outstanding were 2,382,000 as compared to 2,514,000 for 1989.

These results reflect adjustments due to potential rebates pursuant to the provisions of Proposition 103.

No reserves for potential rebates have been established on bonds effective after November 8, 1989. Adjustments on bonds effective before that date and recorded during 1990, and reserves established in prior periods continue to affect the company's results.

Excluding the reserves for potential rebates under Proposition 103, premiums written for the three and six months ended June 30, 1990 would have been $14,806,000 and $27,109,000, respectively, as compared to

$12,009,000 and $22,059,000 for 1989.

Premiums earned, net would have been $11,502,000 and $22,594,000, respectively, as compared to $8,464,000 and $17,258,000 for 1989.

Net income would have been $1,048,000 (44 cents per share) and $1,896,000 (80 cents per share), respectively, as compared to $879,000 (35 cents per share) and $1,874,000 (75 cents per share) for 1989.

Amwest is a Woodland Hills, based insurance holding company, specializing in surety bonds, including contract performance, court, contractors license and sales tax bonds.

SAN JOSE, CA (JULY 18) BUSINESS WIRE - CAD Solutions Inc. Wednesday announced the acquisition of Focus, the leading computer-aided design/manufacturing reseller in San Diego County and one of the largest in Southern California.

As part of CSI's national expansion program, today's announcement reinforces the company's position as the industry's leading international supplier of CAD hardware and software.

''Southern California is one of 22 key markets CAD Solutions is targeting for expansion as part of our effort to build a large national network of CAD resellers,'' said Steve Steele, chairman of CAD Solutions. ''Joining forces with Focus will allow us to better serve the growing needs of our Southern California clients and participate in new segments of the market.''

CAD Solutions also announced the formation of a new division dedicated to the Southern California market. ''Becoming a part of CSI will allow us to expand our expertise and knowledge into new areas and will preserve our entrepreneurial environment,'' said Dennis Bertken, president of Focus.

''I believe in CSI's business philosophy and am excited about being part of their expansion program.'' Upon joining CSI, Bertken becomes CSI's vice president, Southern California division, with complete responsibility for sales, marketing and operations.

Focus, one of the top 25 AutoCAD resellers nationwide, brings to CAD Solutions expertise in the area of mechanical, architectural, civil and structural engineering CAD environments, and is CSI's seventh fully

staffed branch sales, service and support office. The office is located at 4320 Viewridge Ave., San Diego, Calif., 92123. The telephone number is 619/277-0112.

Bertken said the acquisition not only provides added resources for expansion, but also brings additional technical expertise, broader product lines, and better overall services for existing clients such as General Dynamics, G A Technology and San Diego Gas & Electric.

CAD Solutions, based in San Jose, is the computer-aided design industry's leading ''SuperVAR'' providing extensive consultation, specially configured hardware and software, complete installation including networking, training and on-going customer support to national and international design firms and Fortune 1000 companies.

#90199b0647 07/18/1990 ~Business Wire

SAN JOSE, CA (JULY 18) BUSINESS WIRE - Conner Peripherals Inc. (NASDAQ:CNNR) Wednesday reported record sales and net income for the second quarter ended June 30.

Sales were $303.8 million, an increase of more than 85 percent from the second quarter of 1989 and 29 percent from the previous quarter. Net income for the quarter rose to a record $26.6 million, an increase of more than 182 percent from the like period a year ago, and 73 percent from the first quarter of 1990.

Sales to Compaq Computer were approximately 21 percent of total revenue for the quarter.

Earnings per share in the second quarter on a fully diluted basis were 52 cents compared to 24 cents for the like period last year and 33 cents in the first quarter of 1990. There were approximately 52 million common shares and equivalents outstanding in the quarter, up approximately 15 percent from the second quarter last year.

For the six months ended June 30, sales were $538.9 million, compared to $294.8 million in the first six months of 1989. Net income for the like period totaled $42 million, or 84 cents per share, on a fully diluted basis, compared with $15 million, or 40 cents per share, in the previous year.

''Our business continues to grow based on strong demand worldwide across a broad range of products,'' said Finis Conner, chairman and chief executive officer. ''International sales remain very strong, representing approximately 46 percent of our business during the quarter.

''The financial condition of the company also improved during the quarter '' Conner said. ''Gross margins increased to 23.1 percent from 22.2 percent in the first quarter. This is particularly meaningful given the start up costs associated with our new disk drive manufacturing operations in Scotland and Malaysia.

''In addition, our net margin increased to 8.8 percent during the quarter from 6.6 percent in the first quarter.

''Our balance sheet also remains very strong,'' Conner said. ''Despite our rapid growth, we were cash flow positive for the third consecutive quarter. The redemption of our convertible subordinated debentures to common stock further strengthened our balance sheet.

''The company also substantially improved its long term financial position in early July with the successful offering of 6.96 million shares of common stock, generating net proceeds in excess of $178 million,'' Conner added. ''In addition to providing working capital to support our growth, these funds will allow us to expand our worldwide manufacturing capacity to take advantage of demand for our current products.''

Founded in 1986, Conner Peripherals manufactures and markets worldwide, high performance 2.5- and 3.5-inch Winchester disk drives for workstations and the new generation of notebook, laptop, portable and desktop computers.

These systems are based on 16-bit, 32-bit and RISC-based microprocessors and require greater storage capacity, faster access time, lower power consumption and smaller size than previous disk drive products.

In 1989, the San Jose-based company reported revenues of $704.9 million, making it one of the fastest growing manufacturing startups in American business history and enabling it to become only the second company ever to reach the FORTUNE 500 after only three years of operations.

#90199b0648 07/18/1990 ~Business Wire

TACOMA, WA (JULY 18) BUSINESS WIRE - Puget Sound Bancorp (NASDAQ:PSNB)

Wednesday reported second quarter 1990 earnings of $11.5 million, or 70 cents per share, up 6.2 percent from $10.8 million, or 66 cents per share, for the same period last year.

Earnings for the first six months were $23.0 million, or $1.39 per share, an 8.5 percent increase from $21.2 million, or $1.29 per share, for the first six months of 1989.

The company's board of directors voted to increase the regular quarterly cash dividend from 24 cents per share to 26 cents, payable Sept. 17, 1990, to shareholders of record Sept. 5, 1990.

Second quarter 1990 earnings were reduced by a provision for loan losses of $6.9 million, compared to $2.2 million for second quarter 1989. For the first six months of 1990, $11.4 million has been added to the reserve from earnings, compared to $5.0 million for the same period of 1989. At quarter-end, the reserve for loan losses was $43.5 million, or 1.3 percent of total loans.

''We are continuing to review closely our reserve for possible loan losses '' explained W.W. Philip, chairman and chief executive officer. ''As in the past several quarters, we are making substantial provisions to both replenish an add to the reserve in order to assure adequate coverage. Quarterly provisions planned for the remainder of 1990 will be at about the same level as the second quarter.''

Total assets at the end of the quarter were $4.4 billion, up 7.1 percent from $4.1 billion on June 30, 1989. Total deposits were $3.3 billion, up 11.9 percent from $2.9 billion one year ago. Total loans were up 5.7 percent to $3.3 billion, compared to $3.2 billion for 1989.

''Overall, Bancorp's financial performance for the first half of 1990 has been good,'' concluded Philip. ''Loan demand has been steady and our net interest margins and capital position are strong. We are in line with our expectations, despite the increased provision. The challenge for the next six months will be to continue at this pace while we also continue to strengthen our loan loss reserves and pursue our efforts to decrease our exposure to commercial real estate lending.''

#90199b0652 07/18/1990 ~Business Wire

LOS ANGELES (JULY 18) BUSINESS WIRE - H.F. Ahmanson & Company (AHM-NYSE) parent company of Home Savings of America, the nation's largest savings

and loan institution, today reported that second quarter net earnings increased to $60.1 million, or $.61 per share, compared with $39.7 million or $.40 per share in the same 1989 period.

This 51.3 percent gain in quarterly net earnings reflects continued growth in core operating earnings, principally net interest income, which increased 24.3 percent.

For the first six months of the year, net earnings increased to $121.8 million, or $1.23 per share, compared to $78.9 million, or $.80 per share earned in the first six months of 1989. The 54.4 percent increase in first half net earnings was also attributable to continued growth in core operating earnings. Core earnings comprised 93.6 percent of the Company's first half net earnings.

Net interest income totaled $275.9 million for the quarter, compared to $222.0 million in the second quarter of 1989. This 24.3 percent improvement is attributable to a $3.6 billion increase in interest earning assets, mainly monthly Adjustable Rate Mortgages, and increased effective net spread. The effective net spread was 2.56 percent in the second quarter of 1990, compared to 2.22 percent in the second quarter of 1989.

Deposits at Home Savings of America increased by a record $1.7 billion during the quarter and brought the deposit gain for the first half of 1990 to $2.4 billion - another record. In addition, mortgage loan originations during the second quarter were $4.2 billion, a record volume for the quarter. Mortgage loan originations exceeded $7.5 billion for the first six months of 1990 - also a record. Of these loans, 92 percent were single family mortgages, and 79 percent were loans on properties located in California.

Only 10 percent of the loans originated in 1990 had loan to value ratios in excess of 80 percent, all of which were loans on single family residences. All of the loans originated in 1990 were on residential real estate properties. The Company ceased making new commercial and industrial real estate loan commitments in December, 1988. C&I real estate loans now comprise less that 6 percent of the loan portfolio.

H.F. Ahmanson & Company, with $47.6 billion in assets, is the parent company of Home Savings of America. Home's $35.5 billion deposit base is the largest of any U.S. savings institution. It operates 358 savings branches in 9 states and 102 mortgage lending offices in 17 states.

#90199b0657 07/18/1990 ~Business Wire

HUNTSVILLE, AL (JULY 18) BUSINESS WIRE - Intergraph Corp. (NASDAQ:INGR) Tuesday reported operating results for the second quarter ended June 30, 1990.

Revenue was a record $254 million, compared with $219 million for the same period of the prior year, an increase of 16 percent. Net income for the quarter was $16.5 million, a decrease of $3.9 million vs. 1989 due primarily to increases in sales and marketing expenses. Net income per share was 33 cents, compared with 37 cents last year.

Jim Meadlock, Intergraph chairman and chief executive officer, said that the higher expenses are the result of increases in marketing efforts and expansion of the sales force over the past year. ''An increasingly competitive market and the reduction in average system prices required the addition of salespeople,'' said Meadlock.

''I believe that we are now well positioned for the second half of this year, and we expect expense growth to be lower than revenue growth for the remainder of the year.''

Orders for new systems were $190 million, an increase of 18 percent over the second quarter of last year. Strong orders in the Mapping/GIS, AEC, Mechanical, and Microstation application areas accounted for the increase.

Intergraph Corp. offers a product line ranging from microprocessors to workstations and complete application-specific systems for computer-aided engineering, design, manufacturing, and publishing, plus numerous earth science applications. A ''Fortune 500'' company, Intergraph is the world's largest company dedicated to developing and manufacturing interactive computer graphics systems.

#90199b0659 07/18/1990 ~Business Wire

VIENNA, VA (JULY 18) BUSINESS WIRE - LEGENT Corp. (NASDAQ: LGNT) Wednesday announced a series of changes principally intended to simplify the company's senior management structure in which Chairman and Chief Executive Joe M. Henson has assumed the chief operating officer's responsibilities previously held by Peter J. Barris, president, who has resigned from the company.

Additionally, the company said Mario M. Morino has been appointed executive vice president and general manager of the company's IS Management division, whose primary products Morino was instrumental in developing and in establishing as among the industry's most successful systems software lines.

Noting that it has no plans to replace Barris, the company said that its three product divisions, international operations, sales and corporate marketing functions will now report directly to the chief executive. Barris, 38, joined Morino Associates Inc., one of LEGENT's predecessor companies, as president and chief operating officer in April 1988.

Morino, 46, served as chairman of LEGENT from its formation in early 1989 until last November when Joe Henson, 57, assumed the management responsibilities previously shared by the company's two senior executives. He has since been engaged in special marketing projects for the IS Management division.

As division general manager, Morino assumed responsibility for technology applications and development, marketing and strategic planning for the company's IS line of products and services. He replaces Joseph M. Loughry III, 44, who has been appointed divisional vice president for federal government sales and major account programs, a new post.

According to Henson: ''Peter Barris leaves with our best wishes, agreeing fully with the decision to restructure the company and remove two levels of management between the chief executive and the operating divisions.'' The chairman added: ''We're also extremely enthusiastic that Mario Morino has accepted a job for which there is clearly nobody better qualified.''

LEGENT Corp. is a leading independent systems software company, whose more than 40 products and related services for IBM's MVS, VM and workstation computing environments are in use by over 3,500 customers.

#90199b0665 07/18/1990 ~Business Wire

PORTLAND, OR (JULY 18) BUSINESS WIRE - Portland General Electric Co. (PGE) today reached an out-of-court agreement with the Oregon Public Utility Commission (PUC) at the PUC's regular public meeting regarding the settlement of two of three outstanding rate decisions the utility has had on appeal.

Upon finalization of the agreement with the PUC, PGE, the principal subsidiary of Portland General Corp. (NYSE:PGN), will restore to income $16 million, net of income tax, or 35 cents per common share, according to CD Hobbs, senior vice president and chief financial officer of Portland General and PGE.

''We're extremely pleased to have reached this agreement with the commission,'' Hobbs said. ''It's good for us, for our customers, and for our investors.''

In 1989, Portland General established a reserve of $89 million, or $1.92 per common share, for the three rate decisions.

The agreement reached today resolved these two elements:

-- PGE will dismiss its appeal of the PUC's 1989 order that required a full refund of interim revenues received in 1986 and 1987. PGE will retain approximately $22 million in interim revenues collected in 1986. PGE will refund to customers approximately $16 million in interim revenues collected in 1987.

-- PGE will dismiss its appeal of the PUC's 1987 decision not to allow PGE to take accelerated amortization of pre-1981 investment tax credits (ITC).

Regarding a third rate issue, PGE will continue to pursue its litigation of the PUC's treatment of its gain on a sale of a portion of the Boardman Coal Plant and the Pacific Northwest Intertie.

ELKIN, NC (JULY 18) BUSINESS WIRE - Mutual Federal Savings and Loan Association (NASDAQ/NMS:MUTU) Wednesday announced results for its third

quarter and nine months ended June 30, 1990.

Net income for the third quarter increased 26.2 percent to $405,000, or 32 cents per share, compared with $321,000, or 25 cents per share, earned in the same quarter last year. For the nine months ended June 30, 1990, net income increased 15.2 percent to $1,094,000, or 86 cents per share, compared with $950,000, or 75 cents per share, in the same period a year ago.

A special meeting of stockholders will be held on Aug. 9, 1990, to consider and act upon a Plan and Agreement of Merger by and between Southern National Corp. and Mutual Federal.

Mutual Federal Savings and Loan Association, with offices in Elkin, Yadkinville and Dobson, N.C., primarily serves customers in Surry, Yadkin, and Wilkes counties.

#90199b0670 07/18/1990 ~Business Wire

BOSTON (JULY 18) BUSINESS WIRE - Digital Equipment Corp. has unveiled a new approach to logistics systems integration, called the Logistics Information Network (LIN).

It is being demonstrated at DECWORLD '90 as the backbone of the ''Logistics Cockpit,'' in the Consumer Goods and Services Discovery Center.

At the computerized ''controls'' of the ''Logistics Cockpit,'' DECWORLD '90 visitors see how a Logistics Information Network can give logistics professionals information about inventory, carrier performance, network optimization and product tracking -- all with a few keystrokes at a Digital workstation.

The Logistics Information Network differs from traditional approaches to integrating logistics management by combining three advanced technologies.

o Relational Database Technology, enabling LIN to automatically accept standard transactions, whether the transaction comes in by page number, order number, manifest number, bill of lading number, airway bill number, or other method. Managers can easily trace shipments, despite the differences in nomenclature that may exist among suppliers, manufacturing

sites, warehouses, and shippers.

o Client-Server and Transaction Processing Technology, enabling the operational systems (such as order fulfillment and warehousing) to continue processing transactions, even as managers generate real-time reports. Managers can make inquiries any time they want, without disturbing the operational systems. They can look at shipments by weight, dollar or part volume; day, week or month; sites shipped from or shipped to; carrier, warehouse or dock. They can get a worldwide view or a detailed examination of one shipment or order.

o Networking and Communications Technology, enabling LIN to bring advance shipment information to each part of the logistics pipeline ahead of the product itself, expediting order fulfillment. It reduces the time it takes to move products through the entire delivery cycle and enables cross-docking, which allows inventory reduction.

Digital Equipment Corp., headquartered in Maynard, Mass., is the leading worldwide supplier of networked computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desktop to the data center.

#90199b0674 07/18/1990 ~Business Wire

CLEVELAND (JULY 18) BUSINESS WIRE - Picker International Inc., a major manufacturer of diagnostic imaging equipment, announced record sales and profits for the past fiscal year, ending March 1990.

The company exceeded both sales and profit goals for the year, according to president and CEO Cary J. Nolan.

Worldwide revenues last year were $730 million, compared to $711 million the previous year. Profits increased by 5 percent over the previous year.

Picker International is one of the largest subsidiaries of the General Electric Co. (GEC), p.l.c., of the Untied Kingdom. GEC has annual sales of $11 billion and is traded on the London Stock Exchange.

Nolan attributed the record year to several factors, including strong product advances in Picker's Nuclear Magnetic Resonance (NMR) and Computed Tomography (CT) divisions.

In NMR, the introduction of the VISTA(TM) HPQ line of scanners increased

Picker's U.S. order market share by 50 percent. NMR scanners detect radio signals emitted by atoms inside a patient's body and convert those signals into an image.

In CT, record sales of I.Q.(TM) CT scanners increased Picker's CT market share worldwide. CT scanners use X-rays, electronic detectors and computers to generate cross-sectional images of a patient's body.

''Significant research and development investments produced many successful products last year. Several of these set new performance standards in the diagnostic imaging industry,'' Nolan said. Picker brought more than 20 new products to the diagnostic imaging market last year.

Picker's Health Care Products Division also contributed significantly to sales and profits by signing large compliance contracts with hospitals and by introducing an electronic ordering system.

Picker International, based in Cleveland, is a global innovator in the design and manufacture of diagnostic imaging systems including computed tomography, magnetic resonance, X-ray, vascular, and nuclear medicine, and is North America's leading supplier of radiologic health care products.

ARMONK, NY (JULY 18) BUSINESS WIRE - Regarding media speculation Wednesday that IBM is considering the sale of portions of its information products business, the company issued the following statement:

IBM is in the process of considering many options as it moves to sharpen its strategic focus and remain on the leading edge of the information processing business. IBM has not concluded any transaction like the one speculated on in today's WALL STREET JOURNAL, and we have no plans to modify our full-employment practice.

Any action taken by IBM would ensure that our employees are treated fairly that service to our customers is uninterrupted and that the transaction is in the best economic interest of our company.

#90199b0677 07/18/1990 ~Business Wire

RACINE, WI (JULY 18) BUSINESS WIRE - Modine Manufacturing Company has signed an agreement in principle to purchase the Heat Transfer operations of Sundstrand Corporation, said Earl E. Richter, Modine chairman and chief executive officer.

The sale is subject to the approval of a definitive agreement, approval of the Boards of Directors of the companies, and other customary conditions.

''This acquisition will increase our sales by 15 to 20 percent on an annualized basis and will propel Modine into additional segments of the heat-transfer business,'' Richter said. ''It's part of the strategic expansion of markets that we serve, undertaken to maximize the utilization of our proprietary heat-transfer skills.''

The cash purchase of the business and assets of this organization is expected to be completed in 60 to 90 days, said Richard T. Savage, Modine president and chief operating officer. About 800 employees are located at three plants, in: Dowagiac, Mich.; Camdenton, Mo.; and Nuevo Laredo, Mexico.

Savage said that the operations make fin-and-tube heat exchangers, secondary heat exchangers for high-efficiency residential furnaces, extruded copper tubing, and complex copper and aluminum tubular components. These products are sold to original equipment manufacturers of residential and commercial air-conditioners, commercial refrigeration equipment, and residential heating systems, along with auto, truck, bus, and off-highway equipment.

'Through this acquisition,'' Savage said, ''Modine will get an entree into markets we do not now serve. We will have an opportunity to apply some of our proprietary technologies to these new product lines and to increase our market share by offering improved products with better value. Also, Modine will get access to production facilities and technology that can be used in some of our current markets.

''The synergies of this business combination are excellent,'' Savage concluded, ''there's practically no duplication of products or markets with our existing businesses.''

Modine is a leading, worldwide developer, manufacturer, and marketer of vehicular heat-transfer products and of various heating and ventilating products for commercial and industrial buildings. In the fiscal year ended March 31, 1990, Modine earned $25.2 million, or $1.68 per share, on sales of $436.3 million, with about 4,300 employees.

#90199b0679 07/18/1990 ~Business Wire

NEW YORK (JULY 18) BUSINESS WIRE - Philip Morris reports revenues and earnings for 1990 second quarter and first half:

Hamish Maxwell, Chairman of the Board and Chief Executive Officer of Philip Morris Companies Inc., Wednesday announced that consolidated operating revenues, operating companies income, earnings before income taxes, net earnings, and net earnings per share increased both for the second quarter and first half of 1990.

Operating revenues for the second quarter of this year were $12.7 billion, an increase of 11.6 percent over the $11.4 billion reported in the same period last year. Operating companies income for the second quarter was $2.3 billion, an increase of 19.4 percent over the $1.9 billion in last year's second quarter.

Earnings before income taxes were up 28.4 percent to $1.7 billion from $1.3 billion reported in the second quarter of 1989. Net earnings increased 27.2 percent to $948 million from $745 million for last year's period; net earnings per share for the quarter rose 28.8 pecent to $1.03 from $.80 for the comparable quarter of 1989.

For the first six months of 1990, operating revenues were $24.1 billion, an increase of 9.5 percent over $22.0 billion in the similar period of last year. Operating companies income of $4.2 billion was 18.7 percent higher than the $3.5 billion reported for the first half of 1989. Earnings before income taxes were up 29.8 percent to $3.0 billion from $2.3 billion in the comparable period last year.

Net earnings advanced 29.1 percent to $1.7 billion from $1.3 billion for the first half of 1989. Net earnings per share for the current six months were $1.86, up 29.2 percent from $1.44 in 1989.

On June 22, 1990, the company announced its intention to create a global coffee and confectionery business by acquiring Jacobs Suchard AG at a net cost estimated to be $3.8 billion.

Referring to the company's cigarette operations, Maxwell said: ''Operating revenues for Philip Morris U.S.A. increased in this year's second quarter and first six months. We achieved slightly higher unit volume in the second quarter and first six months of 1990.'' Maxwell continued, ''Philip Morris International Inc.'s operating revenues in 1990 increased over the second quarter and first half of last year.

''Cigarette unit volume, including exports, increased strongly for the second quarter and first half of 1990.'' ''Kraft General Foods Inc. reported increased operating revenues and volume for the second quarter and the first six months of 1990,'' noted Maxwell. As for the operating units of Kraft General Foods, Inc.:

General Foods USA reported increased operating revenues in the second quarter and first half of 1990 on higher volume, led by Entenmann's new fat free and cholesterol free bakery line, and powdered beverages, dinners and enhancers.

Kraft USA reported higher operating revenues and volume in the second quarter and first six months compared to the same periods a year ago. Volume gains in the grocery and specialty products businesses more than offset volume shortfalls in the retail cheese business.

Kraft General Foods International operating revenues were up in the second quarter and first half of 1990. Volumes were up for the second quarter and first six months, after excluding the effects of the deconsolidation of certain subsidiaries.

Kraft General Foods Canada reported higher operating revenues and volume when compared to the same periods a year ago. Cheese, desserts, coffee, and foodservice all contributed to the volume gains.

Operating revenues and volume at Oscar Mayer Foods were up for the second quarter and first six months of 1990. Improvements at Louis Rich and in our new Lunchables lunch combinations more than offset volume declines of other Oscar Mayer branded products.

Kraft General Foods Frozen Products had increased operating revenues and slight volume gains for the second quarter and first half of 1990.

Kraft General Foods Commercial Products operating revenues and volume were up in the second quarter and first half of 1990.

''At Miller Brewing Company, higher beer volume for the second quarter and first half of 1990 led to increased operating revenues for the quarter and year-to-date. Miller Genuine Draft beer and new Sharp's non-alcoholic brew contributed to the overall volume gain,'' Maxwell said.

''Philip Morris Capital Corporation's operating revenues, excluding real estate operations, increased in the second quarter and first half of 1990 '' he added.

Philip Morris Companies Inc. has five principal operating companies: Philip Morris Incorporated (Philip Morris U.S.A.), Philip Morris International Inc., Kraft General Foods, Inc., Miller Brewing Company, and Philip Morris Capital Corporation.

Kraft General Foods Inc. has seven operating units: General Foods USA, Kraft USA, Kraft General Foods International, Kraft General Foods Canada, Oscar Mayer Foods, Kraft General Foods Frozen Products, and Kraft General Foods Commercial Products.

Philip Morris Capital Corporation is engaged in financial service activities. Its subsidiary, Mission Viejo Company is engaged principally in land planning, development, and sales in southern California and Colorado.

#90199b0687 07/18/1990 ~Business Wire

ALBANY (JULY 18) BUSINESS WIRE - National Savings Bank of Albany's third fiscal quarter net income totalled $714,000 or 60 cents per share as opposed to $752,000 or 64 cents per share in the like quarter of fiscal 1989.

During the quarter the bank expensed $550,000 of charges related to the aborted merger effort with Home & City Savings Bank, which equated to 29 cents per share on an after-tax basis. Had it not been for this special expense, net income would have exceeded $1 million for the second quarter in a row.

Year-to-date net income totalled $2,586,000 or $2.17 per share as opposed to $2,464,000 or $2.09 per share in the like period of fiscal 1989.

Compared to the quarter ended June 30, 1989 a year ago,

--Net interest income was up $425,000 from the prior year quarter. Income was up due to growth $300,000 and improved margin $125,000. Margin improvement was caused by declining deposit costs.

--Provision for loan loss was down $99,000 from the prior year quarter due to the reduced level of non-performing assets

--Other income was down $90,000 due to lower prepayment penalties on commercial mortgage loans.

--Other expenses were down $28,000 with increases in personnel costs $70,000 and other operating costs $31,000 being offset by a one time charge last year of $129,000 for replacement of the bank's computer.

Compared to the March, 1990 quarter, asset growth continued to be strong, with net loans increasing $5,254,000. Other assets were down $2,954,000 reflecting primarily the sale of the investment in real estate through the settlement of a four year lawsuit. Deposits were up $9,796,000. This was encouraging since time deposits maturities were high and were rolling into lower rate certificates. Borrowings were down $6,030,000 reflecting repayment of short term borrowings. Total liquidity increased 1.3 percent to 11.84 percent from the prior quarter.

The ratio of assets to liabilities repricing in one year remained constant from the prior quarter at 94 percent, while the ratio of assets to liabilities repricing in five years improved to 94 percent, up from the prior quarter 5 percent. Net interest spread with fees increased to 2.91

percent from 2.74 percent due primarily to lower deposit costs.

As noted above, lawsuits related to the bank's largest non-performing asset were settled, along with the transfer of the property, for consideration of $1.9 million. With this settlement, the $9.1 million of non-performing commercial mortgage loans, real estate owned and investment in real estate reported to the shareholders a year ago has been reduced to $2.8 million and the high level of expenses related to these assets has been signficantly reduced. With loan and deposit growth continuing on plan, the impact of these changes will continue to provide very favorable comparisons over any prior period of National's performance.

The board of directors and management of National were disappointed that the Home & City shareholders did not approve the previously announced merger. However, the bank has continued to pursue its 1990 business plan with very favorable results. Without the special charges related to the merger, fiscal year-to-date earnings would have been ahead of the prior year level by 19 percent and rising. With the positive results mentioned above, we are confident that 1990 will produce record results and set the stage for an excellent 1991.

National Savings Bank of Albany is an FDIC insured regional savings bank with eight offices serving northeastern New York from the Capital District to the Canadian border. The stock is traded on the NASDAQ National Market System under the symbol NSBA. In addition to releasing this financial data, management provided the following statement describing the quarterly results.

#90199b0690 07/18/1990 ~Business Wire

SAN DIEGO (JULY 18) BUSINESS WIRE - Datatronix Financial Services (OTC) Wednesday announced second-quarter 1990 earnings of $76,000, or 21 cents per share, compared with earnings of $81,000, or 23 cents per share, in the second quarter of last year.

Total revenue for the quarter was $1.98 million compared with $1.62 million reported in the second quarter of 1989.

Earnings for the first half of 1990 were $180,000, or 50 cents a share, an increase of 7.8 percent over first-half 1989 earnings of $167,000, or 46 cents a share.

Six-month revenues were $3.86 million, a 24 percent increase over revenues

of $3.12 million in the first six months of 1989.

James S. Brown, chairman of the board, said: ''Expenses were incurred in the second quarter that were necessary to set the stage for strong future growth.

''These included the relocation of the company's San Diego processing facility and administrative offices to new, larger quarters, and personnel and training costs that were required to allow employees to handle a larger volume of business at all three of Datatronix's processing centers.''

Brown said the company's three centers in San Diego, Costa Mesa and Glendale are now processing 10 million items per month.

''Despite these costs, we were able to report nearly an 8 percent increase in net earnings for the first half,'' Brown said. ''Now that these one-time expenses are behind us, we will be able to grow the company to a higher level of earnings and revenues during the remainder of the year.''

Datatronix Financial Services is an item processing company serving financial institutions throughout Southern California. With headquarters in San Diego, Datatronix operates check processing facilities in San Diego Costa Mesa and Glendale.

The company operates one subsidiary, Datatronix Marketing Services, which is responsible for all marketing, sales, customer service and business development activities for Datatronix Financial Services.

#90199b0691 07/18/1990 ~Business Wire
WALTHAM, MA (JULY 18) BUSINESS WIRE - Parametric Technology Corp. announces an agreement to port its industry-leading Pro/ENGINEER family of mechanical design automation tools to Data General Corp.'s AViiON line of workstations.

The announcement was made by Louis J. Volpe, vice president, Marketing and Operatings.

The Pro/ENGINEER product family provides a new generation of mechanical design automation tools based on a unique parametric, feature-driven solid modeling technology. These advanced tools naturally and intuitively assist the engineering team in productively completing a full range of design through manufacturing tasks.

Volpe stated that ''Parametric Technology is pleased to have Pro/ENGINEER available as the leading CAD/CAM/CAE product on Data General's AViiON workstations. The AViiON is recognized as an outstanding line of workstations, and, when combined with Pro/ENGINEER, now provides Data General's customers with an industry-leading solution to address their mechanical design and automation requirements. This agreement provides Parametric Technology with an opportunity to market Pro/ENGINEER to a large number of new customers to whom we wouldn't otherwise have access.''

Pro/ENGINEER will be available on the AViiON workstation for customer shipment in August, 1990.

Data General's AViiON systems have enjoyed a great deal of success both domestically and internationally with a particular strong presence in Europe. AViiON is a broad family of workstations based on the Motorola 88000 RISC processors designed to handle the broadest industrial, scientific, and technical applications.

Parametric Technology Corp. (NASDAQ:PMTC) is the leader in the mechanical design automation industry. Its new generation of CAD/CAM/CAE technology is revolutionizing the mechanical design automation process with a strategy that emphasizes technological leadership, aggressive price/performance, hardware independence, worldwide distribution, and extensive customer support.

AViiON is trademark of Data General Corp.

SAN FRANCISCO (JULY 18) BUSINESS WIRE - Ironstone Group Inc. (NASDAQ/NMS:IRON) Wednesday announced that its subsidiary, Iron-Oak Supply Corp., had entered into agreements with its senior and subordinated lenders extending the maturities of its revolving credit facility to Aug. 16, and of its subordinated debt to Aug. 17.

The extension is subject to compliance by Iron-Oak with certain financial and other covenants during the extension period.

Donald B. Bibeault, who was named chairman, president and chief executive officer of Ironstone on June 14, said of the extension: ''These agreements will provide the new management team with the time necessary to complete an assessment of Ironstone's situation and development of a suitable action plan. Our approach to strategic and financial alternatives will

depend on the results of that assessment.''

Ironstone Group Inc., through its majority owned subsidiaries, Iron-Oak Supply Corp. and American National Petroleum Co. (NASDAQ:ANPC), is engaged in wholesale distribution of plumbing and mechanical supplies and equipment and in oil and gas exploration and production and energy related services.

IRVING, TX (JULY 18) BUSINESS WIRE - ShowBiz Pizza Time Inc. (NASDAQ:SHBZ) Wednesday announced that continued improvement in same store sales of company-owned restaurants led to strong increases in operating income and earnings for the second quarter and six months ended June 29.

For the three months ended June 29, 1990, revenues increased to $43.1 million from $41.7 million in the second quarter of 1989. Operating income for the quarter increased by 68 percent to $3.4 million in the second quarter of 1990 from $2.0 million in the comparable period of 1989.

For the quarter ended June 29 the company reported net income of $2.5 million, or, on a fully diluted basis, $.40 per share, a 99 percent increase over the $1.2 million in earnings for the comparable period of 1989.

For the six months ended June 29 the company reported that revenues increased to $90.5 million from $86.1 million in the first six months of 1989. Operating income for the six months ended June 29 improved by 85 percent to $9.6 million from $5.2 million in the first six months of last year. Earnings in the first half of 1990 almost doubled to $7.3 million, or $1.21 per share, from $3.8 million in the first half of last year.

''Continued improvement of our Monterey's Tex-Mex Cafe restaurants and the 18th consecutive quarter of same store sales increases of ShowBiz/Chuck E. Cheese restaurants are responsible for the company's improved performance '' said Richard M. Frank, chairman and chief executive officer of the company.

''Same store sales of our ShowBiz/Chuck E. Cheese's restaurants rebounded in the last two weeks of the quarter and are up 2.3 percent for the quarter and 5.8 percent year to date. We also continue to see same store sales increases of 30 percent from Monterey's which has generated over $500,000 in cash flow year to date,'' he added.

''We've dramatically improved our balance sheet by prepaying $10.2 million in long-term debt year to date and we plan to meet our capital expenditure plan without the need for additional financing,'' said Frank. ''We'll open another six new company owned ShowBiz/Chuck E. Cheese's restaurants by year end and are on track to open 12 to 15 more next year,'' Frank stated.

ShowBiz operates a system of 259 ShowBiz Pizza Place and Chuck E. Cheese's restaurants, of which 134 are company operated in 22 states, and 27 Monterey's Tex-Mex Cafe restaurants in Texas and Oklahoma.

WARREN, NJ (JULY 18) BUSINESS WIRE - Optical Data Corp. and Jostens Learning Corp. Wednesday announced a joint business agreement to co-develop and distribute multimedia education products.

Under terms of the agreement, sales representatives of both companies will sell ''Windows on Science,'' Optical Data's videodisc-based elementary science program. In-service training also will be available from both Optical Data and Jostens Learning curriculum and instruction specialists.

''This agreement will significantly accelerate the adoption and implementation of multimedia products into elementary and middle school classrooms,'' said William Clark, president and chief executive officer of Optical Data.

''By working with Jostens Learning, we can offer school districts nationwide more flexible purchasing options, great training support and interesting new products.''

''Jostens Learning has taken a leadership role in providing curriculum-based software for students,'' said John Kernan, chairman and chief executive officer of Jostens Learning. ''With this agreement, we will begin to offer classroom teachers curriculum programs which are complimentary to their mission in the instructional process.''

Optical Data is the leading publisher, producer and distributor of educational videodiscs. More than 5,000 schools nationwide practice videodisc instruction with Optical Data materials. The company has sold more than 150,000 of its educational and consumer titles in the United States and Japan.

Optical Data also distributes videodiscs for ABC New InterActive and the

National Geographic Society.

Jostens Learning is the industry leader in education technology and sales. The company provides integrated learning systems that include software, computers, consulting and maintenance to more than 5,000 schools with grades K-12.

BINGHAMTON, NY (JULY 18) BUSINESS WIRE - BSB Bancorp Inc. (NASD: BSBN), holding company for Binghamton Savings Bank, announced that net income for the quarter ended June 30, was $2,323,000, or 74 cents per share, compared to net income of $2,745,000, or 88 cents per share, for the quarter ended June 30, 1989.

Included in 1989 second quarter income was $707,000 (after tax), or 23 cents per share, resulting from loan recoveries related to settlements of Boardwalk Marketplace litigation initiated in 1986. Second quarter income for 1990 was augmented by additional loan recoveries of $253,000 (after tax), or 8 cents per share, also resulting from the Boardwalk Marketplace litigation.

Net income for the first six months of 1990 totalled $4,144,000, or $1.32 per share, compared to net income of $4,547,000, or $1.45 per share, for the first six months of 1989.

Shareholders' equity increased to $81,156,000, or 8.84 percent of total assets at June 30, compared to $76,786,000, or 8.59 percent of total assets at June 30, 1989.

Total assets increased from $893,942,000 at June 30, 1989, to $918,053,000 at June 30. Book value per share increased to $25.93 at June 30, compared to $24.54 at June 30, 1989.

BIRMINGHAM, AL (JULY 18) BUSINESS WIRE - Matthew L. Gold, chairman and chief executive officer of Precision Standard Inc. (NASDAQ:PCSN) announced Wednesday that its Pemco Aeroplex subsidiary intended to open a field service office at the Miami International Airport.

The new office, which will be headed by Jack Ashby, vice president-field service, will provide field service and technical assistance to commercial and military operators of large transport aircraft on a worldwide basis. Ashby, who has over 20 years of industry experience, had been vice president-quality assurance for the Aeroplex Group.

Gold said, ''The new office will draw on the considerable resources and technical expertise of the Aeroplex Group which operates from over three million square feet of hanger space at its facilities in Birmingham and Dothan, Ala., and Clearwater, Fla.'' Pemco has worked on over 15,000 commercial and military aircraft since it was founded 40-years ago, Gold added.

Precision Standard, with facilities in Alabama, California, Colorado and Florida and offices in Denver, Boston and London performs maintenance and modification of aircraft for the U.S. government and foreign and domestic commercial customers. The company also manufactures aircraft cargo systems, aerial targets for military customers, precision springs and

components, and rocket vehicles and control systems.

MONROE, LA (JULY 18) BUSINESS WIRE - Clarke M. Williams Jr., vice chairman of the board, president and chief executive officer of Century Telephone Enterprises Inc. (NYSE:CTL) announced Wednesday that he is taking disability retirement from his positions with the company effective immediately.

Williams' retirement was the result of the continuing effects of a stroke suffered in September 1989.

Century's board of directors has appointed Clarke M. Williams, its chairman and the founder of the company, as chief executive officer. Williams' new title will be chairman and chief executive officer.

Glen F. Post III, formerly executive vice president and chief operating officer, has been named president. Post's new title will be president and chief operating officer.

Harvey P. Perry, senior vice president, general counsel and secretary, has been appointed by the board to fill Williams' vacant board seat.

''Clarke Williams Jr. guided the company as its president through five years of rapid growth in which shareholder value dramatically increased and he has positioned our company for growth in the future,'' Post said. ''We sincerely regret but understand his decision to retire and all of us at Century Telephone hope for his ultimate full recovery.''

''In line with the course we have charted in recent years, the company expects to continue to enhance its core business by taking advantage of growth opportunities,'' Chairman and Chief Executive Officer Williams said.

Century Telephone, headquartered in Monroe, is a diversified telecommunications company with operations in 15 states.

ANAHEIM, CA (JULY 18) BUSINESS WIRE - July 18, The Clothestime, Inc. (CTME/NASDAQ), today announced that quarterly earnings could be below previous expectations.

As a result of July sales shortfall, earnings for the quarter could be approximately $0.11 per share versus $0.16 in the comparable 1989 period.

Sales in the month of July are running down approximately 9% compared with a strong 34% comparable store sales gain a year ago. Television advertising expenditures for the second quarter have decreased dramatically from last year.

As a result of the Company's new marketing strategy, inventories remain on plan. A stronger competitive pricing policy with reduced initial prices, will result in slightly lower gross margins in the quarter.

Norman Abramson, President and Chief Operating Officer, noted, RGiven some softness in our markets in July, we are pleased that we took a more conservative buying stance. Inventories remain on plan and markdowns are at anticipated levels.

The Clothestime, Inc. operates 365 women's apparel stores in fifteen states, offering primarily in-season, moderately priced sportswear, dresses and accessories, emphasizing brand names at a substantial discount from the more upscale department and specialty stores.

#90199b0711 07/18/1990 ~Business Wire

DARIEN, CT (JULY 18) BUSINESS WIRE - ActMedia, the leading in-store marketing company, has signed a joint operating agreement with Market Metrics, the national leader in assembling computer profiles of thousands

of supermarkets and the millions who shop there.

''This agreement will tremendously enhance our in-store marketing capabilities by enabling us to target and customize programs with great sophistication,'' said ActMedia CEO and President Wayne W. LoCurto. The agreement gives ActMedia exclusive use of Market Metrics' data among in-store marketing companies.

Market Metrics, based in Lancaster, Pa., has unique capabilities to define the supermarket universe and the stores in it. Its information covers individual data on over 30,000 stores nationally, including their location size, trading area, volume ranges, departments, shelf space, and display capabilities. Extensive demographic data and instore research identify the features of the store and the people who shop there. Modeling of consumer panel data provides product and category user profiles for more than 1,300 categories.

ActMedia Senior Vice President for New Product Development David Diamond said that, armed with Market Metrics data, ActMedia can add immediate impetus to its already successful Impact and ActNow programs, which involve in-store product promotion, sampling and couponing.

Diamond further explained that marketers trying to launch new products will also benefit. ''If For example, you're launching a product aimed at elderly people on special diets, we'll be able to set up programs not only in the markets in which they live but in the specific stores where they shop. This enhances our ability to test product interest and promotional receptivity within a target group.'' He added that retailers will benefit in that such highly targeted programs will have greater impact on store sales.

While excited about the joint venture, both Morgan and Diamond emphasized that they will continue to build their respective businesses with retailer and manufacturing clients.

Market Metrics is a privately held company. ActMedia, based in Darien is a wholly owned subsidiary of Dallas-based Heritage Media Corp., a publicly held company that trades on the American Stock Exchange.

#90199b0713 07/18/1990 ~Business Wire

CHATTANOOGA, TN (JULY 18) BUSINESS WIRE - Chattem, Inc. (NASDAQ: CHTT), a manufacturer of consumer products and specialty chemicals, announced results for the quarter and six months ended May 31, 1990. For the six month period, net sales rose by 9 percent to $44,408,000 from $40,563,000 in the year earlier period.

The increase in sales was driven by a strong performance from Chattem Consumer Products in general and the successful national launch of Flex-All 454 in particular.

While sales increased, net income from continuing operations for the six months ended May 31, 1990 declined to $2,307,000 or $1.82 per share from $3,305,000 or $2.27 per share in the comparable period last year.

The decline was due principally to heavy advertising and promotion expenses associated with the launch of Flex-All 454. Also contributing to the decline was a shift in the timing of revenue and expenses related to the change in fiscal year end from May 31 to November 30.

For the quarter ended May 31, 1990, sales increased by 4 percent to $26,516,000, while net income from continuing operations declined to $1,793,000 or $1.41 per share from $2,485,000 or $1.98 per share for the same period a year ago, reflecting in large part the same factors mentioned above.

For the year ending November 30, 1990 sales and earnings per share are expected to increase by 20 percent to 25 percent over the year ended May 31, 1989, Chattem's last audited full year period, according to Zan Guerry Chairman, President and Chief Executive Officer of the Company.

The increase in earnings per share will be achieved in spite of the incurrence of a loss on Flex-All 454. While there is a negative short term impact on earnings per share, Flex-All 4454 is expected to contribute significantly to future growth in sales and earnings, Mr. Guerry noted.

DALLAS (JULY 18) BUSINESS WIRE - EDS has signed a five-year contract with the Federal Home Loan Bank of Seattle to provide item processing services for the bank's 12 member institutions.

Under terms of the agreement, EDS will operate the bank's processing centers in Seattle and Salt Lake City and will support the current members with item processing services now provided by the bank. EDS will also provide extensive disaster recovery capabilities through its network of item processing facilities located in San Diego, Los Angeles and Oakland, Calif.

According to Jeffrey Bell, senior vice president and chief operations officer of the FHLB of Seattle, the bank conducted a thorough review of available item processing service providers and placed a high priority on a solution that would allow continued FHLB involvement in the delivery of item processing services to its members.

Of the options considered, EDS was rated highest in the overall value provided to customers for financial services. EDS was also noted for its ability to bring new technologies to its customers and for its vast

resources of industry and technical professionals.

''We entered into this agreement with EDS to assure our members of high quality, competitively priced services and to allow them access to advanced technology,'' Bell said. ''EDS is a customer-driven organization that is committed to high standards of service quality, professionalism and value. We are confident this relationship with EDS will best serve the interests of our item processing customers and shareholders alike.''

''This agreement further endorses EDS' commitment to the West Coast financial services market in general and the greater Northwest market specifically,'' said Joe Cothran, western division vice president of EDS' Financial Industry Group. ''With established item processing centers in Seattle and Salt Lake City, EDS will be able to extend its service offering to both current and future customers and will be able to provide a much broader range of capabilities than exists in the market today.''

The contract marks EDS' second such agreement with a federal home loan bank in recent months. EDS currently provides data processing services to more than 5,000 banks, savings institutions and credit unions worldwide.

The Federal Home Loan Bank of Seattle has assets of $10 billion and is part of a system of 12 regional banks established to promote the availability of funds for home loans and mortgages.

EDS, which is based in Dallas and has operations in 27 countries, is the leader in providing information technology services to customers around the world. Stock reflecting EDS' performance is traded on the New York Stock Exchange under the symbol GME. EDS reported revenues of $5.5 billion in 1989.

CONCORD, NH (JULY 18) BUSINESS WIRE - New Hampshire Savings Bank Corp. (NASDAQ:NHSB) announced Wednesday that John J. O'Brien Jr., president and chief executive officer of Randolph Savings Bank of Randolph, Mass., has been elected president and chief executive officer of New Hampshire Savings Bank, the company's major affiliate bank.

O'Brien has also been elected to the board of directors of the bank. He will assume his responsibilities in August. Prior to O'Brien's election, Frank J. Murray served as acting chief executive officer of the bank.

Between 1985 and 1988 O'Brien served as president and chief executive

officer of First Federal Bank FSB of Nashua, N.H. Under his leadership the bank became a competitive and profitable consumer and commercial mortgage lender. In 1988 O'Brien negotiated the sale of First Federal Bank to New Hampshire Savings Bank Corp. then quided New Hampshire Savings Bank South, as the bank was renamed, through a consolidation process which reduced annual operating expenses significantly.

O'Brien began his banking career with Consumer Savings Bank of Westboro, Mass. in 1970, rising from controller to senior vice president before joining First Federal Bank. A graduate of the College of the Holy Cross and a certified public accountant, he served as senior accountant with Deloitte and Touche in New York and as an accountant with two manufacturing firms in Massachusetts before entering banking.

O'Brien, who is 50, lives in Nashua with his wife and two children.

New Hampshire Savings Bank Corp., headquartered in Concord, the capital of New Hampshire, is the fourth largest bank holding company in the state with assets of $1.4 billion divided among four banking affiliates, all insured by the FDIC to the maximum extent permitted by law, and three nonbanking subsidiaries which together serve individuals, corporations and municipalities throughout central and southern New Hampshire.

#90199b0720 07/18/1990 ~Business Wire

CINCINNATI (JULY 18) BUSINESS WIRE - Second quarter earnings for Cincinnati Bell Inc. (NYSE:CSN) reflect the company's plan to use 1990 as a year of ''laying the foundations for future growth,'' said Chairman and Chief Executive Officer D.H. Hibbard.

Second quarter earnings of 38 cents per common share were better than the first quarter's and equal to the per share earnings for the second quarter of last year. Net income was $23.9 million, compared to 1989's $24 million. Revenues rose 7.8 percent to $245.3 million from $227.4 million for the same period last year.

In the first half of 1990, net income decreased 13.2 percent to $42.2 million from $48.6 million a year ago. Earnings per common share decreased 13.0 percent to 67 cents from 77 cents. Revenues rose 3.7 percent to $466.6 million compared to $449.9 million for the same period in 1989.

In long distance resale, LDN Communications is rapidly becoming a strong regional company. The reseller's niche is to supply customized long

distance services to consumers and to small and medium-sized businesses.

Cincinnati Bell Telephone continues to move forward with its strategy of keeping its network at the forefront of the industry and improving the profitability of unregulated lines of business.

Two more digital switches are scheduled for installation during the second half of the year. A third came on line in the suburb of St. Bernard in June. This will give the telephone company an all-electronic, software driven network by the end of 1990.

On June l, a new subsidiary -- CBD Inc. -- was created to focus on opportunities in the Yellow Pages directory and the Talking Yellow Pages areas. CBD Inc. will also move into markets for new, directory-related information services.

In the first half of 1990, the telephone company added 13,932 new access lines, bringing the total number of lines in service to 794,996, a strong start for the year.

In business operations during the second quarter, CBIS Federal received two contracts from the General Services Administration. The GSA estimated the contracts could generate about $130 million over the four and a half year life of the contracts.

CBIS is supplying management and sales systems to AT&E. MATRIXX is supplying telemarketing services, including order entry and fulfillment services for customers.

The number of Cincinnati Bell Inc. common shares outstanding on June 30 was 60,254,411.

#90199b0721 07/18/1990 ~Business Wire

SAN ANTONIO, TX (JULY 18) BUSINESS WIRE - Diamond Shamrock Inc. today reported second quarter net earnings of $12.2 million, compared to $26.9 million for the same period last year.

Primary earnings per share were $0.45, versus last year's record second quarter $1.02 per share.

Year-to-date earnings were $16.5 million or $0.56 per common share, compared to last year's six month total of $41.8 million or $1.59 per

share.

Revenues for the second quarter increased to $566.6 million, up from $549.7 million for the second quarter of 1989. For the first six months, revenues stood at $1.15 billion, compared to $1.02 billion for the same period last year.

Chairman and Chief Executive Officer Roger Hemminghaus explained that earnings from operations for the year have been good, although net income lags behind last year's second quarter.

''Our net income is lower than last year's record quarter due primarily to inventory devaluations, which resulted from falling crude oil prices during the quarter. The impact from this inventory devaluation was approximately 40 cents per share.

''Adjusting for this devaluation and a corresponding 19 cents per share revaluation which positively impacted earnings last year, 1990's second quarter results were comparable to that of the prior year,'' Hemminghaus explained.

''Our operations were strong in the second quarter as we brought on-stream three major processing units and continued our retail construction program.''

In addition to the completion and start-up of the new propane/propylene splitter at Mont Belvieu near Houston during the second quarter, Diamond Shamrock also completed construction of a reformer with continuous catalyst regeneration at the McKee refinery and a crude oil fractionator at its Three Rivers refinery.

Hemminghaus commented, ''The new facilities allow us an entry into the petrochemicals industry, increase our refining efficiency and the value of the product streams, and increase our refining capacity to 165,000 barrels per day.

Diamond Shamrock, with annual sales of approximately $2.2 billion, is primarily a regional refiner and marketer of petroleum products.

#90199b0724 07/18/1990 ~Business Wire
DALLAS (JULY 18) BUSINESS WIRE - International Broadcast Systems Ltd. announced Wednesday that for the quarter ended June 30, 1990 it had revenues of $2,703,000, pre-tax net income of $281,000, and net income

after tax of $253,000 or $.08 per share.

This compares to $1,929,000 in revenues and a net income after tax of $67,000 or $.02 per share during the same quarter in 1989.

The company's revenues increased 40 percent from $1,929,000 for the quarter ended June 30, 1989 to $2,703,000 for the quarter ended June 30, 1990. Revenues from program distribution increased 26 percent during the second quarter in 1990 to $2,362,000 compared to $1,879,000 during the same quarter in 1989.

During the second quarter in 1990, consulting revenues increased to $341,000 from $50,000 for the same period in 1989. Consulting revenues represented approximtely 13 percent of total revenues for the second quarter.

For the six months ended June 30, 1990, IBS had revenues of $4,952,000, pre-tax net income of $548,000, and net income after tax of $478,000 or $.15 per share compared to revenues of $3,496,000, pre-tax net income of $174,000, and net income after tax of $139,000 or $.06 per share, for the same six-month period in 1989. For the 12 months ended Dec. 31, 1989, the company recorded revenues of $4,834,000.

Costs and expenses rose 29 percent to $2,535,000 for the three months ended June 30, 1990 from $1,962,000 for the same period in 1989. Program licensing costs as a percentage of program distribution revenues decreased from 64 percent during the second quarter of 1989 to 54 percent during the first quarter of 1990.

The decrease in program licensing costs is primarily attributable to the growth of the company's library of programs now licensed on a long-term basis. Costs and expenses during the second quarter of 1990 reflect higher advertising and promotion costs for trade shows, salaries and operating expenses associated with sales offices in Los Angeles, California, Paris, France, and Santiago, Chile, which were opened during the third and fourth quarters of 1989.

In addition to revenues from operations of $2,703,000, the company received interest income of $88,000 relating to cash and cash equivalent investments.

With offices in Dallas, Los Angeles, Paris, Santiago, and Washington, D.C. IBS distributes television programming in more than 125 countries. Additionally the firm secures airtime and sponsorships internationally as well as providing broadcast management and consulting services for television stations and program producers domestically and abroad. The company's class A common stock trades under the NASDAQ symbol ''IBTVA.''

MECHANICSBURG, PA (JULY 18) BUSINESS WIRE - An $8.7 million state-of-the-art hospital, specializing in the treatment of patients who need comprehensive medical rehabilitation, is under construction in Kokomo Ind.

The 60-bed, one-story freestanding medical rehabilitation hospital will be located at 829 North Dixon Road. The Kokomo Rehabilitation Hospital is being developed by Continental Medical Systems Inc. (CMS) and is expected to open in the summer of 1991.

The 56,400-square-foot rehabilitation hospital will provide care for a wide range of rehabilitative diagnoses. Specialized programs will include head trauma, orthopedic disorders and general rehabilitation. Physical, speech recreational and occupational therapy, as well as psychological and neuropsychological services will be offered also.

The primary service area for the new hospital will encompass Howard, Tipton, Miami, Cass, Carroll, Clinton, Wabash and Grant Counties.

Over the next five years, total annual salaries will average about $4.3 million. The hospital will have an annual operating budget of approximately $7.3 million and is expected to purchase $639,000 in supplies during the first year of operation.

A 14-member medical advisory committee representing various specialties has been established to guide the selection of programs and services to meet the local medical needs.

Continental Medical Systems Inc. is one of the nation's leading providers of comprehensive medical rehabilitation. CMS operates 12 rehabilitation hospitals and one speciality facility for a system total of 942 beds in Arkansas, California, Colorado, Florida, Kansas, Kentucky, Louisiana, Massachusetts and Texas.

CMS has 10 community-based rehabilitation hospitals under construction in Arkansas, California, Colorado, Indiana and Texas.

In addition, CMS supplies physical, occupational and speech therapy services nationwide through its California Physical Therapy Inc. in Southern California; VTA Management Services Inc. of New York City; Pro Therapy of America in Birmingham, Mich.; and RehabWorks Inc., headquartered in Clearwater, Fla.

#90199b0729 07/18/1990 ~Business Wire

LOUISVILLE, KY (JULY 18) BUSINESS WIRE - H. David Hale, chairman and president of The Cumberland Federal Bancorporation (NASDAQ/NMS:CMBK) Wednesday reported second quarter earnings for the Bancorporation.

Due to $8 million in pre-tax charges to earnings announced in June, the bank experienced a net loss of $3.4 million, or $1.37 per share, compared with net income of $1.7 million, or 70 cents per share for the three months ended June 30, 1989.

Net loss for the first six months of 1990 was $1.8 million, or 71 cents per share, compared to net income of $3.2 million, or $1.30 per share for the same period in 1989. On a more positive note, net interest income, an indicator of the strength of the bank's core business, was $8.2 million for the second quarter, a 20 percent increase over the $6.8 million reported in the second quarter of 1989.

The Cumberland took a $7.0 million charge to earnings to recognize a further decline in value of the assets of its real estate project in Nashville, Tenn. The carrying amount of the Nashville project had been supported by an appraisal which considered both market conditions and estimated future sales.

The anticipated future sales portion of this appraisal included a pending contract for a large portion of the project's undeveloped lots. During the second quarter, it was determined that the purchaser could not meet the conditions of this contract.

Due to this termination, and the continuing deterioration of the real estate market in the Nashville area, the additional provision of $7.0 million was deemed necessary.

During the second quarter, the bank also added a $1.6 million provision to the loan loss allowance, resulting in total charges to earnings of $8.6 million during the period. Said Hale: ''These actions reflect the bank's intent to continue to maintain an adequate reserve position consistent with our philosophy to aggressively review and deal with non-performing assets.

Founded in 1886, The Cumberland has assets of $1.4 billion and is the largest federal savings bank and third largest financial institution headquartered in Kentucky. Corporate offices are located in Louisville

with 42 offices located in 11 cities throughout the state. The Cumberland offers a full line of banking services with special emphasis on real estate and consumer lending.

#90199b0730 07/18/1990 ~Business Wire

MARLBORO, MA (JULY 18) BUSINESS WIRE - Data Translation announces that on April 10, 1990, it was assigned United States Patent Number 4,916,531 for Color Video Processing Circuitry that converts and processes, in real time inputs from the standard red, green and blue (RGB) values of color video into hue, saturation and intensity (HSI) color values.

Hue represents the pure color; saturation is the degree to which the color is diluted with white; intensity is the relative brightness or darkness component of the image. Although there are many color models useful for color matching and enhancement, HSI most closely approximates human color perception, and as such is optimized for real-world image processing and analysis applications.

The patent specifically covers ''circuitry for converting digital red, green, blue (RGB) inputs into digital saturation and hue outputs comprising hardwired digital components...and to perform arithmetic manipulations of them.'' Circuitry for coverting from hue, saturation, and intensity values back into digital red, green and blue outputs is also covered.

This technology lets real-life color images captured from a standard RGB color video source be converted, on-the-fly, into values representing hue, saturation, and intensity. These highly non-linear conversions would take minutes to execute if the frame grabber board had to pass the data to the PC AT bus for conversion. On-the-fly processing is possible using the patented circuitry because HSI are color values, not colors.

Processing occurs in real time (1/30 second), which is not possible using RGB values. The attributes of HSI also require far less computation; the patent covers specific hardware techniques that enable onboard processing for speedier analysis.

The patented circuitry is implemented in a pair of CMOS ASICs, consisting of the DT7910 RGB/HSI converter chip, and the DT7911 HSI/RGB converter chip. Both chips operate at 15 MHz, which allows conversion of images at real-time video rates (30/frames/second).

Data Translation is a world leader in the design, manufacture and

marketing of high performance image processing, data acquisition and array processing computer boards and software.

TOTOWA, NJ (JULY 18) BUSINESS WIRE - John L. Soldoveri, chairman of Great Falls Bancorp announced profits for the first six months of 1990.

He stated, ''We are pleased with the continued profitability of our sole subsidiary Great Falls Bank, particularly during this period of a depressed real estate market.

''Profitability has been impacted by loan losses and prudent additions to loan loss reserves. During the first six months of 1990 we charged off loans totaling $123,000 and provided $177,000 for loan losses.

''In the first half of 1989, $55,000 was provided for loan losses. As of June 30, 1990 the allowance for possible loan losses was equal to 1.58 percent of gross loans outstanding. Notwithstanding those adverse factors, we are optimistic that we can continue to grow profitably.''

George E. Irwin, president reported net income for the three months ended June 30, 1990 was $160,000 or 27 cents per share. In the second quarter of 1989 net income was $174,000 or 30 cents per share.

For the first half of 1990 net income was $315,000 or 53 cents per share compared with $334,000 or 57 cents per share in the first six months of 1989.

This represents decreases of 8.05 percent and 5.37 percent respectively. All per share amounts have been adjusted for the 10 percent stock dividend to be paid on Aug. 1, 1990.

Total assets of the company at June 30, 1990 were $55,336,000 compared with $48,493,000 on June 30, 1989 an increase of 14.11 percent.

Deposits grew 14.54 percent to $49,010,000 in 1990 from $42,789,000 in 1989.

AKRON, OH (JULY 18) BUSINESS WIRE - American Business Computers Corp. (NASDAQ:ABCC) reported an audited fiscal year 1990 net loss of $1,589,498 on revenues of $3,680,235.

This is a loss of $.12 per share compared to a profit of $.02 for fiscal 1989.

The loss is attributed to a decline in soft drink revenues, which totalled $347,000, from the previous year's $1,621,000. The Company is anticipating an increase in soft drink revenue for fiscal 1991 and a profitable first quarter.

#90199b0768 07/18/1990 ~Business Wire

PHOENIX (JULY 18) BUSINESS WIRE - Motorola Inc. has sold Spectrum CVD Inc., Phoenix, to Balzers Ltd., Balzers, Liechtenstein, both companies announced.

Spectrum was founded in 1984 by Motorola New Enterprises in order to develop CVD (chemical vapor deposition) processes and equipment for tungsten, tungsten silicide and titanium nitride as contact or interconnection layers in semiconductors.

During the last years, the main effort was devoted to the development of selective tungsten deposition, which is crucial for future generations of high density devices with submicron geometries.

As a result, Spectrum has developed viable processes and the Vision (TM) Series system which allows the use of these processes in semiconductor production. This most advanced two-chamber machine was shown successfully at this year's Semicon West trade show in San Francisco.

Balzers Ltd., founded in 1946, employs 4,000 people worldwide and is active in the field of high vacuum components, coating equipment and thin film coating services. It has manufacturing facilities in Liechtenstein, Switzerland, Germany, U.S.A. and Japan.

Last year Balzers introduced the Clusterline CLC9000, an integrated processing system (IPS) which can accommodate up to nine process chambers. At present, the system is equipped with sources for PVD processes. It is the top priority of Spectrum to incorporate CVD processes into this cluster tool. Spectrum's CVD technology and proven chamber design make a good fit with Balzers' present and future products, according to Dr. Wolfgang Heinke, executive vice president of the Liechtenstein-based manufacturer.

''We are delighted to bring the Spectrum operation into our sphere of activities and feel that Spectrum's excellent CVD technology and reputation will serve our customers well,'' Dr. Heinke said.

''Acquisition of the company underscores our commitment to the U.S. market by providing us a domestic base to provide IC manufacturers with the latest in front-end semiconductor equipment.''

#90199b0769 07/18/1990 ~Business Wire

CHICAGO (JULY 18) BUSINESS WIRE - Ameritech Wednesday reported record net income for the quarter ended June 30 of $352.3 million, an 11.3 percent increase from the same period a year ago. Earnings per share were $1.33, up 11.8 percent, on 265 million average shares outstanding.

Revenues for the quarter increased 5.0 percent, to $2.7 billion, primarily due to continued volume growth in Ameritech's Bell and Enterprise companies.

Customer telephone lines increased by 449,000, or 2.9 percent, to 16 102,000; and mobile lines rose by 79,000, or 42 percent, to 266,000, over the same period a year ago.

Expenses for the quarter rose 3.6 percent, generally tracking volume growth but partially offset by work force reductions in the previous two quarters. The company plans to continue its strategic investments in the core telecommunications business, including previously announced data center consolidations.

Return to equity was 18.5 percent, compared with 16.0 percent for the second quarter of 1989, and return on total capital was 13.1 percent, compared with 12.3 percent.

For the first half of the year, net income increased by 6.2 percent to $655.8 million, and earnings per share rose by 6.5 percent to $2.46. Revenues for the first half rose 4.9 percent to $5.3 billion, and expenses increased 4.7 percent.

During the quarter, a consortium including Ameritech and Bell Atlantic won the competitive bid to purchase Telecom Corporation of New Zealand, that country's state-owned telephone company. The consortium also includes two New Zealand companies, Fay Richwhite Holdings Ltd. and Freightways Holdings Ltd.

''The investment offers Ameritech the strategic opportunity of gaining expertise in businesses we are currently restricted from entering in the United States and represents a significant step in our efforts to become a global telecommunications company,'' said William L. Weiss, Ameritech chairman and chief executive officer.

After completion of the US$2.4 billion transaction, Ameritech and Bell Atlantic will reduce their 100 percent ownership to 49.9 percent -- as the New Zealand government requires -- by selling shares to their two New Zealand partners and the general public.

''Although the investment will have no material impact on the company's 1990 earnings, we believe it will be of long-term benefit to Ameritech shareowners,'' Weiss said.

''We are committed to being a premier service provider in the telecommunications industry, both domestically and internation- ally,'' he said, ''and we will continue our aggressive search worldwide for opportunities to maximize shareowner value.''

Ameritech is the Chicago-based parent of five Bell companies serving the Great Lakes region, and other information-related companies providing cellular communications, directories, lease financing, voice messaging and audiotex services.

#90199b0770 07/18/1990 ~Business Wire

OWENSBORO, KY (JULY 18) BUSINESS WIRE - Cardinal Financial Group Inc. (NASDAQ/NMS:CAFS), the thrift holding company for Cardinal Federal Savings Bank, Wednesday announced net income for the three months ended June 30, 1990, of $396,601, or 33 cents per share.

This compares to net income of $30,667, or 3 cents per share for the same three-month period last year. ''The bank's primary income source, net interest income, has increased for four consecutive quarters,'' said William R. Spurrier, president and chief executive officer.

At June 30, 1990, the company's stockholders' equity totaled $23.6 million or 7.6 percent of total assets. The company's thrift subsidiary, Cardinal Federal Savings Bank, had regulatory capital of $23.2 million at June 30, which was in excess of risk-based, leverage and tangible capital requirements under revised Federal regulations which became effective in December, 1989.

It should also be noted that the bank does not have any goodwill or other intangible assets on its books. The book value of the company's common stock was $19.58 per share at June 30.

Market makers in the company's common stock are J.J.B. Hilliard, W.L. Lyons Inc., Ryan, Beck & Co. Inc. and Herzog, Heine & Geduld Inc.

Cardinal Federal operates eight offices in Daviess, Hancock, McLean and Barren counties with its home office located in Owensboro.

#90199b0778 07/18/1990 ~Business Wire

BIRMINGHAM, Ala. (JULY 18) BUSINESS WIRE - Central Bancshares of the South Inc. (NASDAQ/NMS:CBSS) Wednesday reported record earnings for the second quarter and first half of 1990.

Net income per share was $1.12 for the six months ended June 30, 1990, compared to 99 cents for the same period in 1989, a 13 percent increase. Net income rose from $21.4 million in 1989 to $23.6 million in 1990 for an 11 percent increase.

Net income per share was 61 cents for the second quarter of 1990 compared to 51 cents for the same period in 1989, a 20 percent increase. Second quarter net income was up 16 percent to $12.8 million in 1990 compared to $11.1 million in 1989.

Harry B. Brock Jr., chairman and chief executive officer, said, ''We are pleased to again report record earnings, expecially at a time when many regional banks are having disappointing performances.'' Brock said that growth in earning assets, continued control of expenses and improved margins were the major contributors to the favorable earnings results.

Total assets increased 8 percent to $4.8 billion at June 30, 1990, from $4.5 billion at June 30, 1989. The increase resulted primarily from an 8 percent increase in loans outstanding to $2.9 billion at June 30, 1990 from $2.7 billion a year earlier. Also contributing to the increase was a 10 percent growth in the investment portfolio, from $1.1 billion to $1.2 billion.

Deposits also increased 8 percent to $3.3 billion from $3.0 billion and shareholders' equity increased 6 percent to $314.6 million at June 30, 1990. Annualized return on equity for the first six months of 1990 was 15.3 percent and return on assets was 1.04 percent.

#90199b0784 07/18/1990 ~Business Wire

CHARLESTON, S.C. (JULY 18) BUSINESS WIRE - John M. Settle, president of Home Federal Savings Bank (NASDAQ:HFSB), Wednesday reported record results for the Savings Bank's third quarter and nine months ended June 30, 1990.

''Home Federal's net income and net interest margin continued to rise in the third quarter, resulting in a 39 percent increase in net income over

the third quarter of fiscal 1989,'' stated Settle.

''Our improved results reflect our sound lending policies, our on-going strategy of originating adjustable-rate loans to more closely manage our net interest margins, and our strict monitoring of general and administrative expenses.

''Since last year, our net interest spread has increased to approximately 2.80 percent, up from 1.27 percent in the third quarter of fiscal 1989. We expect to report record earnings for the year as our fourth quarter benefits from this trend.''

Net interest income after the provision for loan losses rose 89 percent in the third quarter to $1,201,035, compared with $635,864 in the same quarter of fiscal 1989. Net income increased 39 percent to $333,102, or 41 cents per share, compared with net income of $239,982, or 29 cents per share, in the third quarter of last year.

Included in 1989 results were a gain of $373,639 on the sale of Federal Home Loan Mortgage Corp.'s (FHLMC) preferred stock and an extraordinary credit of $10,000 relating to the tax benefit of a net operating loss carryforward. Third quarter earnings for 1990 were primarily from operating activities and did not include any comparable one time items.

For the first nine months of fiscal 1990, net interest income after the provision for loan losses increased 50 percent to $3,403,611 vs. $2,264,964 in the comparable period of fiscal 1989. Net income nearly doubled to $912,747, or $1.13 per share, compared with $464,846, or 57 cents per share, in the first nine months of fiscal 1989.

Results for 1989 included the gain from the sale of the FHLMC preferred stock and an extraordinary credit of $19,000. This compares with an extraordinary credit of $11,000 during the first nine months of fiscal 1990.

''In the third quarter, we declared and paid the first cash dividend in our 38 years of operation. We believe establishing a cash dividend policy by our Board of Directors underscores their confidence about the future of Home Federal,'' concluded Settle.

Home Federal is a federally chartered and insured savings bank operating three full-service offices in Charleston.

#90199b0791 07/18/1990 ~Business Wire

NASHVILLE, TN (JULY 18) BUSINESS WIRE - Fidelity Bancshares Inc. (NASDAQ/NMS:FFTN) Wednesday announced that its board of directors has approved a stock repurchase program to acquire up to 5 percent of the outstanding shares of the company's common stock.

The company currently has 3,540,582 common shares outstanding. The timing of the repurchases and the exact number of shares to be repurchased will be dependent upon future market conditions.

The Board also announced an increase in the quarterly cash dividend to 25 cents per share from 15 cents per share. The dividend is payable Aug. 17, 1990, to stockholders of record on Aug. 7, 1990.

Commenting on the announcements, Stanley D. Overton, chairman, president and chief executive officer, said, ''We are pleased that the Board has authorized the stock repurchase program and increased the quarterly cash dividend. It is the Board's opinion that the current price of the company's common stock does not adequately reflect the true value of the company.

''With the stock currently trading at a substantial discount to book value per share, the repurchase program can enhance both the book value per share and the earnings per share of the remaining outstanding shares. The decision of the Board to increase our quarterly cash dividend by 67 percent to 25 cents per share reflects the solid earnings performance of the company and our continued strong capital position.''

Fidelity Bancshares Inc. also announced results for its first quarter ended June 30, 1990. For the three months ended June 30, 1990, net income increased 12 percent to $1,558,000, or 44 cents per share, compared with net income of $1,390,000, or 39 cents per share, earned in the first quarter a year ago.

Net interest income for the quarter ended June 30, 1990, increased 13 percent to $6,984,000 compared with $6,177,000 for the same quarter last year. The bank's net yield on interest- earning assets increased to 2.93 percent for the 1990 quarter compared with 2.54 percent in the year-earlier period.

Overton went on to say, ''The improved results achieved in the first quarter primarily reflect a lower cost of funds compared with the year-earlier period. During the quarter, Fidelity originated $37.3 million in new loans compared with $43.6 million in the first quarter last year. The majority of these new loans continue to be for single-family home mortgages.

''Fidelity's balance sheet remains strong. At June 30, 1990, total assets

were $1.017 billion and stockholders' equity was over $110.6 million, or 10.9 percent of total assets. With the stock repurchase program, the increase in the quarterly cash dividend and a strong first quarter, we believe Fidelity is well positioned for another successful year,'' Overton concluded.

The common stock of Fidelity Bancshares is traded on the NASDAQ National Market System under the symbol FFTN.

MINNEAPOLIS (JULY 18) BUSINESS WIRE - MOCON (Modern Controls Inc.) Wednesday announced record second quarter sales and earnings for the period ending June 30.

Sales rose 19 percent to a record $2,788,000 compared to $2,336,000 for the second quarter of 1989, and were ahead of first quarter 1990 sales of $2,763,000. Net income increased to an all-time high of $594,000, compared to $523,000 for the second quarter of 1989, and $568,000 during the first quarter of 1990.

Earnings per share increased 17 percent for the second quarter to an all-time high of 28 cents per share, compared to 24 cents a share during the second quarter in 1989, and 26 cents during the first quarter of 1990.

MOCON is a leading developer, manufacturer and marketer of high technology instrumentation designed to test packages and packaging materials for permeation of gases and water vapor. The company also has a new line of thickness gauging systems used to measure plastics and coatings on and off the production line.

MOCON testing instrumentation is used in quality control and research laboratories in the food and pharmaceutical industries, to test plastic packaging materials for cost effective protection against loss of color, flavor, fragrance, texture, potency and freshness.

The company also manufactures weighing and sorting instrumentation that helps the pharmaceutical industry maintain the rigid weight tolerances needed in producing drugs in capsule and tablet form.

MOCON's shares are traded over-the-counter and are listed in the NASDAQ National Market System. The company's electronic NASDAQ trading symbol is MOCO.

STOUGHTON, MA (JULY 18) BUSINESS WIRE - Reebok International Ltd. (NYSE:RBK) Wednesday reported a 22% increase in sales and a 6% increase in net income for its second quarter ended June 30, 1990.

Net income for the three months ended June 30, 1990 was $43,386,000, or $.38 per share, compared with $40,752,000, or $.36 per share, for the second quarter of 1989. Net sales increased during the quarter to $527,229,000, from $431,481,000 for the same period last year.

Net income for the first half of 1990 was $96,105,000, or $.84 per share, on sales of $1,081,633,000, compared to $90,161,000, or $.79 per share, on sales of $919,968,000 for the first half of 1989. ''During the second quarter, sales of Reebok footwear in the U.S. increased 10.9% to $310 million, due in part to initial shipments of new products featuring our PUMP technology beginning in late May,'' said Paul Fireman, Reebok's chairman and chief executive officer. ''At the same time, international sales for the Reebok brand grew by 112% to $105 million. We are especially pleased with the rapid growth in sales and profitability of the Reebok international business.''

''Reebok's breakthrough PUMP technology is doing very well in the market place,'' said Mr. Fireman. ''Introduced late last year in a $170 basketball shoe, the PUMP technology is now available at retail in a number of additional styles, ranging from $95 to $130 in the basketball (adult and children), tennis, and cross- training categories. The retail sell-through for these high performance shoes has been much stronger than other non-PUMP product introductions in the past.''

''The Rockport division had another strong quarter, with sales up more than 20% to nearly $55 million, and sales at our Ellesse division, while presently small, more than doubled to $7.3 million during the quarter,'' Mr. Fireman reported. ''Sales at our AVIA and Boston Whaler divisions continued to be negatively affected by the operational adjustments being made in their businesses, but we believe that progress is being made at both divisions.''

Reebok International Ltd., headquartered in Stoughton, is the leading designer and marketer of active lifestyle and performance products, including footwear and apparel. The Company's operating units include Reebok's Footwear and Apparel Products divisions, and AVIA, Ellesse North America, Rockport,m and Boston Whaler Boats.

#90199b0799 07/18/1990 ~Business Wire

FORT WORTH, Texas (JULY 18) BUSINESS WIRE - Cash America Investments Inc. (AMEX:PWN) announced Wednesday second quarter earnings.

Daniel R. Feehan, president, reported Wednesday that second quarter earnings for 1990 were $1,921,000, an increase of $403,000 or 27 percent from the $1,518,000 reported for the same quarter last year. Net earnings per share for the quarter were 16 cents, an increase of 3 cents or 23 percent over the 13 cents per share reported for the second quarter of last year.

Revenues for the quarter were $26.6 million as compared to $20.2 million for last year's second quarter, an increase of $6.4 million or 32 percent.

Net earnings for the current six-month period were $3,761,000, an increase of 839,000, or 29 percent, from the $2,922,000 reported for the six months ended June 30, 1989. Earnings per share for the six months ended June 30, 1990 were 31 cents per share, an increase of 29 percent from the 24 cents per share reported for the 1989 six-month period.

Revenues for the first half of 1990 were $53.1 million as compared to $39.1 million last year, an increase of $14 million or 36 percent.

Feehan explained that the company's continued improvement in earnings and revenues is due to internal growth in earning assets (loans and inventory) since year-end and expansion of new locations through acquisitions and new start-ups. Earning assets since Dec. 31, 1989, have grown $6 million or 13 percent, including $1.3 million in earning assets acquired.

Feehan also reported that the company added four locations during the current quarter. This brings the net locations added since year-end to fifteen, with 10 acquisitions, six new start-ups and one combination of two existing locations.

The company closed out the current quarter with 138 locations operating in the states of Texas, Louisiana, Tennessee, Oklahoma, Georgia and Florida.

#90199b0814 07/18/1990 ~Business Wire

HUNTSVILLE, AL (JULY 18) BUSINESS WIRE - First AmFed Corp. (NASDAQ: FAMF), Wednesday reported an increase in net income for the third quarter ended June 30, 1990.

Morris Anderson, chairman of the board and chief executive officer, announced an increase in net income of 9 percent for the third quarter ended June 30, 1990 as compared to the same quarter last year. Net income reported was $808 or 44 cents per share versus $744 for the third quarters ended June 30, 1990 and 1989, respectively.

The financial statements presented for the prior year have been restated to include the merger with Fayetteville First Federal Savings and Loan Association (''Fayetteville''), as a result, no earnings per share or average share data for the prior year are referenced because they would not be comparable to the current periods.

Net income included gain on sale of investments of $114 and $220 ($75 and $145 after taxes, respectively) for the three months ended June 30, 1990 and 1989, respectively. The gains reported were from the sale of the Company's FHLMC stock.

Net interest income increased 16 percent to $2,960 versus $2,551 for the quarter ended June 30, 1990 and 1989, respectively. The reduction in the Company's weighted average cost of funds, primarily on deposits, to 7.81 percent from 8.31 percent for the comparable quarters, respectively, contributed largely to the improvement.

First AmFed had income before income taxes of $3,490 and $3,413 for the nine months ended June 30, 1990 and 1989, respectively. Net income reported for the same periods was $2,225 or $1.21 per share and $2,236, respectively.

The current nine month period reflects $533 ($352 or 19 cents per share after tax benefits) of merger related expenses from the Fayetteville merger and the denied First Federal Savings Bank acquisition.

#90199b0821 07/18/1990 ~Business Wire

WEST NEWTON, MA (JULY 18) BUSINESS WIRE - West Newton Savings Bank (NASDAQ:WNSB) announced Wednesday net income of $217,000 for its second quarter ended June 30, 1990, compared to net income of $182,000 for the second quarter of 1989.

Earnings per share were 13 cents for the 1990 quarter compared to 10 cents per share for the second quarter of 1989.

Net interest income for the second quarter of 1990 was $1,769,000 compared with $1,771,000 in 1989. Other income for the quarter was $58,000 compared to $76,000 for the comparable period in 1989.

Operating expenses decreased to $1,297,000 in the second quarter of 1990 from $1,303,000 in the comparable period in 1989. The provision for loan losses was $100,000 for the second quarter of 1990 compared to $250,000 for the second quarter of 1989.

At end of the quarter the bank had a total of $3.2 million in non

performing loans and the related allowance for loan losses was $2.9 million. Outstanding joint venture advances, all of which were non performing, totaled $3.7 million and the related allowance for joint venture losses was $2.7 million at the end of the second quarter.

The bank's assets totaled $233 million at June 30, 1990, down from $236 million a year ago.

For the six months ended June 30, 1990, net income totaled $371,000, down from the $502,000 earned in the same 1989 period. Earnings per share for the six month period ended June 30, 1990, were 22 cents compared to 29 cents for the first six months of 1989. Net interest income for the six months ended June 30, 1990 was $3,531,000 compared with $3,646,000 in 1989. Other income was $272,000 for the 1990 six month period compared to $136,000 a year ago.

Other income in the six months ended June 30, 1990 included securities gains of $71,000 while no income was recorded for securities transactions in the first half of 1989. Operating expenses increased to $2,600,000 for the first six months of 1990 from $2,597,000 for the first six months of the preceding year. The provision for possible loan losses was $350,000 for the first six months of 1990 compared to $325,000 in the first half of 1989.

In commenting on the results of the second quarter, Richard H. Dionne, chairman and chief executive officer, said ''Although non performing assets did not increase during the quarter, we remain concerned about the New England economy and the potential for additional loan problems.''

West Newton Savings Bank is a Massachusetts savings bank founded in 1887. The bank has branch offices in Wayland, Sudbury, Lincoln and Sherborn. The bank converted to stock form on Oct. 23, 1986.

NEW YORK (JULY 18) BUSINESS WIRE - Republic New York Corp., holding company of Republic National Bank of New York and The Manhattan Savings Bank, announced Wednesday that net income for the second quarter ended June 30, 1990 increased to $52.6 million, compared to $43.8 million earned in the second quarter of 1989.

Net income per common share was $1.43 for the second quarter of 1990, a 14.4 percent increase over the $1.25 per share earned in the second quarter last year.

For the six months ended June 30, net income was $97.1 million, compared to $85.5 million earned in the first six months of 1989.

Net income per common share for the first six months of 1990 was $2.74, or 11.8 percent above the $2.45 per share earned in the comparable period of 1989.

On May 2, the corporation completed the previously announced merger of The Manhattan Savings Bank into Republic's wholly owned subsidiary, The Williamsburgh Savings Bank.

The combined banks operate under The Manhattan Savings Bank name. The transaction included the sale of 4.1 million shares of Republic common stock at $43.50 per share to qualified Manhattan depositors and other investors in a public offering.

This offering resulted in a 13.7 percent increase in the number of the corporation's shares outstanding. The net proceeds of $174.4 million were invested in equity of The Manhattan Savings Bank.

The transaction was accounted for as purchase and the operating results of Manhattan are included in the corporation's consolidated financial statements from the date of acquisition.

Net interest income was $112.8 million and $203.9 million for the second quarter and first six months of 1990, respectively, compared to $88.8 million and $178.5 million in the comparable periods of 1989.

Average interest-earning assets in 1990 increased to $26.3 billion in the second quarter primarily as a result of the Manhattan merger during the quarter, compared to $23.6 billion in the comparable quarter of last year.

ANAHEIM, CA (JULY 18) BUSINESS WIRE - Company executives, including President and Chief Operating Officer Donald Karcher, are crew members of Carl's Jr. Restaurants Wednesday as part of the company's Back-to-Basics Day.

Back-to-Basics Day, held annually, was initiated four years ago when the company launched a program that concentrated on operations improvements, a new restaurant look, new products and the company's growth in the western United States.

Executives work a full workday in one restaurant dressed in regular restaurant uniforms and have assigned tasks to perform. An executive may work as a cashier, cook, dining room host or hostess or work in other established positions that a restaurant employee would normally work.

President Donald Karcher is working in a Fullerton Carl's Jr. at 4010 North Harbor Boulevard at Imperial Highway. Other executives are working today in restaurants in Anaheim, Brea, Buena Park, Costa Mesa, Fountain Valley, Fullerton, Industry, Lakewood, Orange, Pomona, Rancho Santa Margarita, Santa Ana, Santa Fe Springs and Stockton.

More than 540 Carl's Jr. Restaurants -- owned, operated, licensed or franchised by Carl Karcher Enterprises -- are located in California, Arizona, Nevada, Oregon and Japan.

AUBURN, ME (JULY 18) BUSINESS WIRE - Mid Maine Savings Bank announced Wednesday that the board of directors declared a 10 cent dividend to be paid on Aug. 15, 1990 to stockholders of record as of July 31, 1990.

So far in 1990, the bank has declared dividends totalling 30 cents per share, a 30 percent increase over the same period last year. Ralph L. Hodgkins Jr., president, stated: ''In light of the current conditions within our industry, it is indeed very satisfying to be in a position of maintaining current dividend levels while also making prudent additions to loan loss reserves.''

Mid Maine has 1,380,000 shares of common stock outstanding. Its stock is traded on the NASDAQ National Market System under the symbol ''MMSB.''

WASHINGTON (JULY 18) COMTEX - The 8-K report filed at the SEC shows on July 2, 1990, pursuant to a merger agreement dated May 30, 1990, Kinetic Concepts Inc.(TICKER: KNIC) acquired Medirec, of Salt Lake City, Utah. That acquisition was effected through the merger of the wholly-owned subsidiary of Kinetic, KCI Acquisition Corp., with Medirec. KCI thereby became the owner of all issued and outstanding shares of Medirec.

Security holders of Medirec received an aggregate consideration of $19.75 million in cash, 351,220 shares of KCI common stock (valued at $1.8 million based on the average of bid and ask prices on May 7, 1990), and 835,244 shares of series A 1990 convertible preferred stock of KCI with a redemption value of $8.35 million. Further, KCI repaid bank indebtedness as assumed by certain Medirec shareholders on behalf of Medirec in the amount of $4.00 million. Last, KCI repaid a subordinate debenture of Medirec in the amount of $2.00 million.

The agreements were reached at arms-length negotiation between KCI and Medirec. KCI funded the cash portion of the consideration through borrowings from an existing line of credit with First National Bank of Boston.

Medirec is engaged in the business of renting medical equipment to hospitals.

WASHINGTON (JULY 18) COMTEX - The 8-K report filed at the SEC shows on July 2, 1990, Arrow Financial Corporation acquired United Vermont Bancorporation pursuant to a merger of United into a wholly-owned, newly-formed subsidiary of Arrow, Arrow Acquisition Corp. The merger followed a definitive affiliation agreement between Arrow Financial and United dated of Aug. 17, 1989, as reported in an 8-K filing of Sept. 1, 1989.

Under the meger, each share of United common stock outstanding on July 2, 1990, was to be converted to 1.13 shares of Arrow Financial common stock. Further, the board of directors of Arrow Financial was expanded from 14 to 23 members, and all nine directors of United were added to that board.

Prior to the merger, United was a multi-bank holding company organized under the laws of the State of Vermont. Effective upon the consumation of the merger, the name of Arrow Financial Corp. (formerly Arrow Bank Corp.) was changed to Arrow Vermont Corp., with all assets and properties of Arrow Finnancial becoming those of Arrow Vermont.

By MICHAEL STRAUSS - Comtex Washington Correspondent

WASHINGTON (JULY 18) COMTEX - A top Securities and Exchange Commission official said today the SEC would not support a proposal put forth by the commission last year to set up a self-regulatory organization for financial planners if it can obtain more funds to regulate advisers.

"The SEC's decision on this issue last year was based very simply on a dollars and cents issue," SEC Commissioner Mary Schapiro said.

Schapiro noted direct SEC regulation of investment advisers is preferable to a system of self-regulation for investment advisers but said the SEC needs "significant additional resources" to augment its budget directed toward the regulation of investment advisers. Investment advisors presently are required to pay a lifetime registration fee of $150.

"The best and fairest means of accomplishing this goal is to authorize legislation to permit the commission to increase the fees paid by investment advisers," Schapiro said. "This approach of meaningful fees and direct commission oversight would provide increased investor protection at private rather than public cost.

"Creation of an SRO remains, however, an alternative that should be considered if Congress is not willing to impose realistic registration fees and standards on advisers," Schapiro added.

Schapiro made her remarks before the House telecommunications and finance subcommittee, which convened to hear testimony from industry and regulatory officals on a bill introduced last spring by Rep. Rick Boucher (D-Va.) which requires all financial planners to register with the SEC, permits individuals to sue for damages, mandates full written disclosure to clients of compensation and allows the SEC to impose civil penalties.

"The commission strongly supports the objectives of the bill and believes that such legislation should enhance the rights of consumers of financial planning services," Schapiro said.

The SEC says the number of investment advisors registered with it increased from 4,580 in 1981 to about 16,500 today and the assets they assist in managing have grown approximately 900 percent to over $4.4 trillion.

According to an SEC study, the principal risk to clients of financial planners derives from the conflicts of interest arising when planners sell products to clients. The specific risks posed to consumers are that conflicts of interest will not be adequately disclosed and that investments may be recommended with a view to the planner's self-interest rather than what is most suitable to the client.

The North American Securities Administrators Association reports a survey it conducted indicates from mid-1986 through mid-1988, consumers lost $396 million in financial planning frauds.

The General Accounting Office, the congressional watchdog agency, released a report Monday which criticized the SEC's oversight of investment advisors. Schapiro countered the SEC is "doing an exemplary job of

maintaining an effective regulatory program within existing budgetary constraints."

Schapiro acknowledged the SEC does not inspect investment advisors as often as it wishes due to budgetary constraints. The GAO urges the SEC inspect all newly registered advisors within the first year of registering and periodically afterwards.

"We need to increase the number of our inspectors by roughly 200 percent to comply (with the GAO goal)," Schapiro said.

The SEC says it presently spends $5.7 million on regulating investment advisors and would need an additional $17 million to meet all of the GAO's recommendations.

WELLINGTON, (JULY 19) - A bill setting up a commission of inquiry into the Vietnam War defoliant Agent Orange was introduced into the New Zealand Parliament late Wednesday.

The bill is supported by both the government and the opposition.

If passed before the elections in October, the resulting inquiry would look at health problems claimed by some of the 3,400 New Zealand soldiers who served in the Vietnam War.

Bill sponsor Geoff Braybrooke claims at least 2,400 soldiers were exposed to the chemical and many have health problems.

A number of New Zealand veterans were party to a class suit filed in the United States against manufacturers of Agent Orange.

WASHINGTON, (JULY 18) - Design and testing problems make deploying the first phase of the Strategic Defense Initiative (SDI) -- the space-based anti-missile defense program -- by 1993 highly risky, congressional investigators said Wednesday.

"The lack of effective agency oversight has contributed to the failure of other automated weapons systems, none of which matches the scale and technological complexity of Phase 1," the General Accounting Office (GAO) said in a report released here.

"Consequently, any executive decision in 1993 to deploy Phase 1 would be premature and fraught with high risk," the report said.

The GAO -- the investigative branch of Congress -- said the development of the so-called "Brilliant Pebbles" plan had drastically altered the design of the SDI program, which is popularly known as Star Wars.

The Brilliant Pebbles plan calls for several thousand interceptors to orbit the Earth, ready to seek and destroy enemy ballistic missiles by crashing into them.

Phase 1 initially called for two space-based sensors, a space-based weapon,

two ground-based sensors, and a ground-based weapon -- all managed by a command and control system.

But the addition of Brilliant Pebbles to that configuration substantially altered the integrated approach of that system and created some uncertainty about whether the entire system would work, the GAO said.

The GAO report noted that the Defense Acquisition Board did not conduct its scheduled 1989 review of the program, nor has it assessed the effect of Brilliant Pebbles on the program's design and tests.

The GAO also explained that tests planned by the Strategic Defense Initiative Organization, a Defense Department agency overseeing the SDI program, will not be completed in time for an executive decision to be made on deployment.

The Pentagon's lack of scrutiny of the program coupled with the design and testing problems would prevent the SDI group from providing the president with enough information upon which to base a decision on whether to implement the first SDI phase, the GAO said.

The Pentagon had no immediate comment on the GAO report.

The first phase of the SDI system is expected to cost the Pentagon between 69 billion and 87 billion dollars to develop and deploy.

BEIJING, (JULY 19) - Chinese Foreign Minister Qian Qichen left here Thursday for a visit to Saudi Arabia that was not previously announced.

China and Saudi Arabia have no official ties, but a visit here last week by top Saudi envoy Prince Bandar bin Sultan touched off speculation that Riyadh would switch diplomatic recognition from Taipei to Beijing.

Mr. Qian was to make an "official goodwill visit" to the kingdom, as well as to Cyprus, Morocco and Algeria, the New China News Agency said in announcing his departure.

#90199d0660 07/18/1990 ~French/German News Agency

MIAMI, FLORIDA, (JULY 18) - A federal judge criticized U.S. immigration officials for "underhanded tactics" to deny asylum to Haitians, and ordered a hearing for a Haitian who was appealing a deportation order.

U.S. District Judge Eugene Spellman issued the opinion Tuesday in the case of Noel Molaire, who had filed a lawsuit alleging he had been deprived of his rights during an immigration appeals hearing.

Mr. Spellman found the Immigration and Naturalization Service (INS) had not advised Mr. Molaire of the free legal services available to him and that the immigration judge had not explained the purpose of his asylum hearing.

Mr. Spellman wrote: "INS has routinely engaged in underhanded tactics in dealing with Haitians seeking asylum in this country, and has singled them out for special discriminatory treatment.

"Repeatedly this court and other federal courts have found that INS has engaged in illegal practices and policies with respect to Haitians."

In 1981, Mr. Spellman issued a decision that resulted in the release of 2,000 Haitians pending their immigration status hearings.

Haitian activists have complained that the United States has welcomed Cubans and Nicaraguans while intercepting Haitians at sea and either repatriating them or holding them in detention centers.

In Washington, INS spokesman Duke Austin noted that the judge's decision applied to immigration judges, who are employed by the Justice Department, not to the INS.

"The question of discrimination against Haitians has been litigated ... to the Supreme Court of the United States, and in no forum was it found that there was discrimination against Haitians," Mr. Austin said.

JAKARTA, (JULY 19) - Indonesia and France have agreed to renew efforts to find a peaceful solution to the 11-year old Cambodian conflict, Indonesian Foreign Minister Ali Alatas said here.

But he added that the two countries would not hastily call for an international conference.

Indonesia and France, co-chairmen of an international conference on Cambodia in Paris last year, believed efforts had slackened and this should be reversed as the peace process was adrift, Mr. Alatas told parliament late Wednesday.

"But we will continue to be realistic. We must not hastily convene a formal and open international conference," he said, adding that concrete steps would be taken after meetings in Paris and here among various interested parties this month.

The five permanent members of the U.N. Security Council gathered in Paris this week to discuss the Cambodian issue in a meeting which Cambodia's

warring factions were invited to but failed to attend.

The issue is also expected to feature prominently here next week during the annual ministerial meeting of the Association of Southeast Asian Nations (ASEAN) and at a follow-up dialogue with their counterparts from the United States, Australia, Japan, Europe, Canada and New Zealand.

TOKYO (JULY 19) - Japanese Prime Minister Toshiki Kaifu's government is the second most popular in Japan since World War II, according to a poll made public here Thursday.

Support for Mr. Kaifu rose by 3.6 percent since June, said the poll, organised by the Japanese daily Yomiuri.

Of 3,000 people questioned, 60 percent now support Mr. Kaifu, a figure surpassed only by Kakuei Tanaka's government which had a popularity rating of 60.5 per cent in October 1972.

Mr. Kaifu, for whom few observers had predicted a long prime ministerial career, has had a tremendous impact on Japanese politics.

His popularity rating climbed from 38 percent last summer, to pass the 50 percent mark in March this year.

The latest rise is attributed to his strong showing at the recent summit of major industrialised democracies in Houston.

JOHANNESBURG (JULY 18) - Johannesburg Consolidated Investment's Western Areas gold mine, which this week reported a 17.3 million rand (6.5 million dollar) loss for the June quarter, has asked the government for aid, JCI said.

In a statement, gold division chairman Kennedy Maxwell said the mine, which employs 8,500 people, was meanwhile taking advantage of a Reserve (central) Bank hedging scheme to maximise revenue.

Western Areas was also considering all options - including closing or "mothballing" the mine, Mr. Maxwell said.

He said JCI had held initial talks with the government about state assistance but admitted that conditions on aid for marginal mines were tough.

The Chamber of Mines has warned that 20 of the 33 gold mines in its stable are at risk with the gold price at its current low levels.

Last week the government, following the recommendations of the Melamet commission of inquiry, agreed to back a rescue plan for the country's key marginal mine, East Rand Propriety Mines (ERPM).

#90199d5060 07/18/1990 ~French/German News Agency

JOHANNESBURG (JULY 18) - Italians are ready to invest billions of rands in South African industry and mines, South African Trade Minister Kent Durr said in an interview published Wednesday.

He confirmed on his return from a visit to Italy that Italian attitudes to South Africa had changed dramatically in the wake of President Frederik de Klerk's recent reforms and his visit to Italy in May.

"We are now talking investment, no longer disinvestment," he said.

Afrikaans-language Beeld newspaper said Wednesday that the Italian government was planning two giant coal-fired power stations and was looking to South Africa to supply the coal over the next 20 years.

Mr. Durr told the newspaper that plans had been made for "a large group" of influential Italian business leaders and industrialists to visit South Africa later in the year to discuss possible joint ItalianSouth African projects.

He said the possibility had been discussed of investments worth billions of rands in the chemical and allied industries and in mining, but would not elaborate.

Beeld said Italy, a large importer of South African goods, had quietly lifted its ban on foreign investment in South Africa, following the example of Britain's Margaret Thatcher.

#90199d5100 07/18/1990 ~French/German News Agency

SINGAPORE (JULY 18) - Far East Levingston Shipbuilding Ltd, the rig-building arm of Singapore's state-controlled Keppel Corporation Ltd, said Wednesday it had clinched a multi-million dollar contract to build an automobile factory in China's Guangdong province.

FELS said it secured the contract amidst stiff competition from contractors in Hong Kong and China.

The amount involved was not disclosed but industry sources estimated it to be worth 30 million Singapore dollars (16.6 million U.S.).

An FELS bulletin said the deal was secured through its wholly owned subsidiary, FELS China, and its associate, NORMS Engineering.

It said the two companies would build an automobile factory for the U.S.-owned Panda Motor Corporation. Located in Dan Sui, a rural but strategic location in Huizhou county, the project is expected to be completed by November.

The latest project will bring total FELS commitments in China to some 800 million dollars (442 million U.S.) this year.

Its other deals there included a 500-million dollar (276 million U.S.) contract to build two jack-up rigs for Denmark's AP Moller group, a 150-million dollar (83 million U.S.) rig-building project for U.S.-based Santa Fe International Corporation and a 120 million dollar (66.3 million U.S.) contract to build a cable-laying and repair ship for Teleglobe Marine.

Wiesbaden, West Germany (JULY 18) - West German wholesale prices in June were up 1.6 percent from the year before, but unchanged from May, the Federal Statistics Office said here Wednesday.

While prices rose from May to June for products such as paint and pork, heavy heating oil was down 7.9 percent, liquefied gas was down 5.2 percent and fertiliser down 15 percent.

-30- 539

#90199d5320 07/18/1990 ~French/German News Agency

STOCKHOLM (JULY 18) - Swedish pilots employed by the SAS airline have ended an industrial dispute following an agreement Wednesday which will raise pay by seven per cent in return for increased working hours, air industry sources said.

The pilots, who had sought a 10 percent pay hike, had disrupted SAS flights in the Nordic and European regions on July 12 and on Monday.

The SAS airline, which groups airlines in Denmark, Sweden and Norway, had rejected a mediation proposal to increase pay by seven per cent, arguing that any increase in pay would have to be accompanied by an increase in productivity in order to maintain the company's competitive position.

The agreement Wednesday was also accepted by Norwegian pilots who had objected to being excluded from the initial negotiations and had threatened to strike next week.

KUWAIT (JULY 18) - Kuwait on Wednesday denied reports that it was planning to acquire 11 new tankers to renew its fleet.

Abdel Fattah al-Badr, director of Kuwait Oil Tanker Company, told the newspaper Al-Siyassah that such reports were "false."

A recent issue of a review published by British shipping specialists Gray Mackenzie said Kuwait was to purchase 11 new tankers from several countries.

The publication also said Saudi Arabia had ordered nine new tankers from the Norwegian Ship Building Industry in a deal worth 808 million rials (216 million dollars).

#90199d5750 07/18/1990 ~French/German News Agency

TOKYO (JULY 18) - Japanese shipbuilders last month signed contracts to export 13 ships, all tankers, totaling 1,001,350 tons, up 31.1 percent from a year earlier, the Japan Ship Exporters Association said on Wednesday.

The June orders included five very large crude oil carriers (VLCC's), five medium-size oil tankers and five liquefied petroleum gas (LPG) tankers, association officials said.

This brings the total order book of the Japanese shipbuilding industry to 314 vessels, amounting to a record 13,166,172 tons, they said.

The figure surpassed the previous record order book of 12.99 million tons in 1983 and was the highest level reached since the first oil crisis in 1973.

The officials said Japanese shipbuilders, which have already signed export contracts for 17 VLCC's in the first half of this year, recently received inquiries about the construction of 10 more from Saudi Arabia, which is planning to build fifteen 280,000 deadweight-ton tankers in five to seven years.

Meanwhile, Ishikawajima-Harima Heavy Industries, Ltd. (IHI) said Wednesday that within 10 days it would sign contracts for two LNG carriers, ordered

jointly by Phillips 66 Natural Gas and Marathon Oil of the United States, four 3,800-TEU container ships from P and O containers, and a 3,600-TEU container ship from Nedlloyd Lines of the Netherlands.

These vessels will be delivered by 1993 under the contracts estimated to be worth a combined total of about 100 billion yen (667 million dollars), IHI officials said.

#90199d6340 07/18/1990 ~French/German News Agency

VIENNA (JULY 18) - The drive by post-Communist governments in eastern Europe to develop market economies has begun to introduce mass unemployment which is seen by social experts as a potential threat to newly-found democracy.

Many new factors are complicating the problems faced in these countries, but unemployment, which did not exist as such under the socialist definition of society, is particularly worrying.

For the young East European democracies, the incalculable social and political implications of massive unemployment are a new challenge.

"Massive unemployment in the East risks provoking a cataclysm with incalculable political consequences for the European continent," said former Czechoslovak Vice Prime Minister Vatr Komarek who has argued for a gentle transition to the market economy.

In Poland the use of shock therapy has pushed unemployment up rapidly. At the end of June, 568,161 people were recorded as unemployed, representing an increase of 28 percent compared with the May figure.

The daily Gazeta newspaper, which is close to the Solidarity union movement, has reported that unemployment is affecting 4.23 percent of the

population and that in many areas the level is as high as 20 percent.

World Bank experts have said that in the medium term unemployment could affect 1.5 million Poles out of a workforce of 18 million.

Finance Minister Leszek Balcerowicz, who is the main architect of the adjustment to a market economy, is counting on the rapid privatisation of the 7,600 state-owned companies accounting for 80 percent of Polish economic potential to help remedy the situation.

The situation is similar in Czechoslovakia where Finance Minister Vaclav Klaus has opted clearly in favour of privatising the economy as fast as possible.

A wave of redundancies will result from cuts in the bureaucracy and from the closure of unprofitable companies and mines, with the labour ministry estimating that 1.4 million Czechoslovakians will lose their jobs by the end of the year.

TOKYO (JULY 18) - Japan's Nissan Motor Co. said Wednesday it planned to set up automobile repair and maintenance service centers in the Soviet Union from August this year.

It will be the first Japanese carmaker to gain such a foothold in the Soviet Union. Nissan officials said the carmaker planned to open two centers in Moscow and the other two in Siberia.

Nissan, which began its car sales to the communist country in 1983, has exported a total of 2,898 units in spot orders via trading houses. Sales in 1988 were 672 units and expanded to 1,482 units in 1989.

#90199d7570 07/18/1990 ~French/German News Agency

DAMASCUS (JULY 18) - The Syrian minister of foreign trade and economy, Mohammad al-Imady, said Wednesday the country's gross domestic product (Gdp) increased from 181 billion Syrian pounds in 1988 to 201 billion pounds in 1989.

''The capital formation increased from 29 billion pounds in 1988 to 33.3 billion pounds in 1989. At the same time, the contribution of the goods' production sectors to the global Gdp rose from 42.9 percent in 1985 to 49.8 percent in 1989, which reflects the importance and the position of oil, industrial and agricultural production in our economy, as the figures of the surplus in the balance of trade reveal, estimated at 10.4 billion

Syrian pounds in 1989, after recording a deficit of 12.7 billion Syrian pounds in 1987,'' Imady said.

He pointed out that a variety of factors had contributed to this surplus, such as regulating imports, the rise in oil production, and the increase in industrial production after securing raw materials for factories.

#90199d7650 07/18/1990 ~French/German News Agency

KHARTOUM (JULY 18) - Sudan Wednesday announced plans to lay off 50,000 government employees within a month to save money.

Minister of Finance and Economic Planning Abdel Rahim Hamdi said the move to chop off 10 percent of the Sudanese public work force would save the state 130 million dollars a year.

He said the layoff would exclude officials in the ministries of health, education and security organs.

The move coincided with the current meetings of the International Monetary Fund (Imf) in Washington to decide on Sudan's future dealings with the fund following its failure to come up with overdue arrears.

Sudan, one of the poorest countries in the world, has an external debt of about 13 billion dollars.

PESHAWAR, PAKISTAN (JULY 18) - A teacher and member of the Afghan resistance group Jamiat-i-Islami was found hanged here, police said Wednesday, in the second assassination of a Jamiat member in a week.

Fazal Rab, 37, was found dead late Tuesday hanging by an electric cord in his home in University Town, an Afghan area of Peshawar.

Police called the death a "criminal act".

The resistance faction to which Mr. Rab belonged is one of seven Sunni Moslem groups fighting the pro-Soviet government in Kabul and based in this city near the Afghan border.

The assassination was the second of a Jamiat member in less than a week after Jamiat commander Sayed Jaafer was killed in an ambush in a refugee camp last Wednesday.

Security has deteriorated in recent months in Peshawar, which hosts dozens of Western humanitarian organizations along with the Sunni parties.

The Jamiat appears to be a special target of assassins, and at least five of its cadres have been killed this year.

Several guerrilla leaders have said that some murders may be motivated by conflicts within the resistance.

#90199d7690 07/18/1990 ~French/German News Agency

LONDON (JULY 18) - British Steel and Spanish industrial group La Corporacion Banesto (LCB) are planning to take a 40 percent stake each in Spanish steel maker Aristrain, the British group said in a statement here Wednesday.

Details and a price on the deal, which would leave the present Aristrain shareholders with the remaining 20 percent, have yet to be finalised, but on an estimated net asset value of 40 billion pesetas (400 million dollars), it would cost each company about 160 million dollars.

Aristrain, which turns over an estimated annual 70 billion pesetas (700 million dollars), specialises in the production of steel sections for the construction industry.

British Steel's aim is to expand into Europe the success it has had in Britain promoting the use of steel frames in high-rise buildings, a spokesman said here.

The planned acquisition comes after the purchase of Kloeckner-Werke's Mannstaedt in West Germany for 300 million Deutsche marks (180 million dollars) and follows the recent revelation of plans to close a plant in Scotland, continuing a policy aimed at reducing the company's dependence on the performance of the British economy and increasing its influence in

Europe.

British Steel has also been reportedly looking to make acquisitions in North America.

Analysts here estimate that the two acquisitions in Spain and Germany could give British Steel a 20 percent European market share for certain products.

British Steel was privatised in 1988 and at present derives some 65 percent of its turnover from domestic sales.

The company turned over in excess of five billion pounds (nine billion dollars) in the year to March and made 733 million pounds (1.32 billion dollars) profit.

La Corporacion Banesto is an industrial conglomerate belonging to Banesto, the third biggest banking group in Spain.

TEHERAN (JULY 18) - The speaker of the Iranian parliament Wednesday denounced a letter drafted Tuesday by 162 members of the U.S. Congress expressing support for the Iranian opposition group, the Peoples Mujahedeen.

"Frankly, I do not know why the members of Congress are so foolish and estranged from truth and reality," Mehdi Karoubi told parliament.

"The U.S. threat means nothing to Iran, since we have the support of the people," he said. "We are proud to see that the United States supports an organization that commits crimes while at the same time it attacks the Islamic Republic."

The Congressmen, 100 Democrats and 62 Republicans, wrote to the Iraq-based opposition leader Massoud Rajavi and asked him to "assure (his) countrymen that we support their peaceful and democratic aims."

"One year after the death of (Iranian spiritual leader Ayatollah Ruhollah) Khomeini, the Iranian President, Hashemi Rafsanjani, has proven that he is as immoderate as Khomeini by continuing the repressive and terrorist policies of his mentor," the letter said.

ISLAMABAD (JULY 18) - Foreign secretaries of India and Pakistan opened two days of talks here Wednesday on defusing a crisis created by a Moslem

uprising against India in the divided and disputed state of Kashmir.

There was no fixed agenda for the talks but an Indian offer to ''thrash out everything'' set a discussion on the 43-year-old Kashmir problem in motion, conference sources said.

Official comment on the talks was reserved until the discussions between Muchkund Dubey of India and Tanveer Ahmad Khan of Pakistan were completed Thursday.

Major powers fearing that the flare-up in Indian Kashmir might force the two rival nations into a fourth - possibly nuclear - war nudged them into negotiations.

Pakistani President Ghulam Ishaq Khan told Dubey when the latter called on him Wednesday that neither of their two poor countries could afford a war.

Pakistan neither wanted nor would provoke a conflict but would resist resolutely if war was imposed on it, Khan said.

Dubey was quoted by Pakistani officials as replying that India gave importance to its relations with Pakistan and assuring of a positive approach by his side in the current talks.

India, without mentioning Kashmir, had proposed a set of confidence-building measures, primarily dealing with military contacts, to Pakistan for discussion at the talks, which are due to be continued in New Delhi later.

Pakistan however insisted that forces massed on the common border should first be pulled back to their peace-time positions and a dialogue be started on Kashmir in accordance with their bilateral Simla Agreement and the 1949 United Nations resolutions on the exercise of right of self determination by the people of Kashmir.

ATHENS (JULY 18) - Hundreds of firefighters, backed by soldiers and aircraft, Wednesday managed to contain a forest fire sweeping the Greek tourist island of Samos, officials said.

The blaze on the island in the Aegean near the Turkish coast ravaged more than 2,000 hectares of forest, shrubs and fields. The fire was started Monday when a 70-year-old farmer discarded a cigarette. The blaze spread quickly, fanned by strong winds.

Officials said there were no reports of injuries.

The flames at one point threatened several mountain villages near the port town of Pythagorion. Residents of one village were evacuated. But tourists at seaside resorts were spared by the fire.

Firefighters managed to bring the blaze under control after winds died down Tuesday night, officials said.

#90199d7910 07/18/1990 ~French/German News Agency
LONDON (JULY 18) - A British historian claims she has found the grave of Britain's legendary King Arthur in the north of England close to the Scottish border.

According to expert Norma Goodrich, the fabled Celtic warrior of Camelot was buried some 10 kilometres (six miles) from Gretna Green, in the village of Arthuret, confounding earlier theories that he was laid to rest in Wales or Cornwall.

Burke's Peerage, a directory of Britain's nobles which has published the historian's findings, says the spot close to Camboglana where Arthur fought his last battle once belonged to Scotland.

Mrs. Goodrich had followed up the discovery by University of Wales' Professor Chadwick that Arthuret meant "Arthur's head".

Legend has it that the hero's head was buried facing the enemy. Arthuret is situated just to the north of Hadrian's wall, built to keep out Northern invaders.

#90199d7980 07/18/1990 ~French/German News Agency

PARIS (JULY 18) - The Prime Minister of the Cambodian opposition coalition, Son Sann, said here on Wednesday that he would seek approval from Prince Sihanouk to call an emergency opposition meeting in Bangkok or Paris.

Mr. Son Sann was reacting to a decision by the United States to cease recognition at the United Nations for the coalition because it included the Khmer Rouge.

The coalition comprises supporters of Prince Sihanouk, Mr. Son Sann's right-wing nationalist Khmer People's National Liberation Front (KPNLF) movement, and the pro-Chinese Khmer Rouge held responsible for the murder of tens of thousands of Cambodians when they were in power a decade ago.

The coalition is fighting the forces of the Cambodian government left in place when Vietnamese troops withdrew from Cambodia.

The United States announced on Wednesday that its move was intended to prevent a return to power of the Khmer Rouge and was not intended to undermine Prince Sihanouk. Washington also said that it envisaged contacts with Hanoi.

Mr. Son Sann said that the U.S. decision "could play into the hands of Hanoi and Phnom Penh", but described as "positive" a decision by U.S. Secretary of State James Baker to continue aid to the non-Communist resistance.

Mr. Son Sann said that the Supreme National Council planned under a U.N. process of diplomacy should obtain the seat allocated to Cambodia at the United Nations, or otherwise the "status quo" should continue.

#90199d8010 07/18/1990 ~French/German News Agency

ATHENS (JULY 18) - The Athens city hall was closed for the rest of the week Wednesday after office workers complained that fleas were fleeing basement renovation work and had suddenly infested the 116-year-old neo-classical structure's upper storeys.

''Closed on account of fleas until Monday'' read the cardboard sign that was posted out front as itchy workers left for home with tales of fleas leaping at them from desk drawers and filing cabinets.

Chief city administrator Kostas Kitsios told reporters five pest exterminator firms had been contracted to fumigate the building in coming days.

He attributed the infestation to the fact that the building's subterranean chambers are linked to subway tunnels which breed vermin, and that renovation work had exacerbated an already bad situation.

ACCRA (JULY 18) - Ghana has put three of its navy ships on "regular patrol" in Ghana and Ivory Coast territorial waters to help its nationals fleeing war-torn Liberia in small boats, Foreign Secretary Obed Asamoah said here Wednesday.

He told the Ghana News Agency (GNA) that the ships have already lifted some Ghanaians fleeing the seven-month Liberian war by sea.

Mr. Asamoah said the ruling Provisional National Defence Council (PNDC) was "deeply concerned" about events in Liberia and the safety of Ghanaians there and would do all within its power to ensure their safety.

He said the government was still awaiting clearance from Monrovia before sending a ship to evacuate Ghanaians from Liberia. The ship, which can carry up to 1,500 passengers, was expected to set sail at the weekend.

Mr. Asamoah said the clearance was necessary because of the war and in order "not to infringe upon the sovereignty of Liberia." A naval vessel would also be sent to evacuate other nationals prepared to leave, he added.

On a possible African peace-keeping force for Liberia, Mr. Asamoah said no concrete decision had yet been taken, but that "Ghana will consider joining such a mission when it takes shape and if it is invited."

He also said Ghana's ambassador in Liberia had been asked to provide detailed information following a BBC report alleging that he turned away those who went to his residence to seek refuge.

JEDDAH (JULY 18) - King Hussein of Jordan arrived here Wednesday from

Yemen for talks with Saudi Arabia's King Fahd on the situation in the Middle East and bilateral cooperation.

Hussein, accompanied by Premier Mudar Badran and other senior officials, is also expected to review with Fahd the latest development in the peace process to settle the Arab-Israeli conflict.

While in Sanaa Hussein, who is expected to continue from here to Oman, held similiar talks with Yemeni President Ali Abdullah Saleh.

BRUSSELS (JULY 18) - The European Community has agreed to finance a new aid programme for Palestinians in the Israeli-occupied territories, it was announced here Wednesday.

The E.C. Commission said the programme foresaw spending six million Ecus (around seven million dollars), aimed at creating jobs in industry, agriculture and services.

There would also be help for health, education, the environment and a number of infrastructure and smaller projects including setting up women's cooperatives.

MADRID (JULY 18) - Spanish commercial banks Wednesday agreed on on volontary measures to help crack down on the laundering of funds from national and international drugs trafficking, Association of Spanish Commercial Banks President Jose Luis Leal, announced.

Leal told reporters that under the new measures any client wishing to open a new bank account of more than one million pesetas (10,000 dollars) will have to consent to controls, which could include checks to verify the customer's stated place of residence.

He said specical attention would be given to money transfers that appeared in any way unusual, especially if they came via well-known tax havens in the Caribbean, in Lichtenstein, Monaco or Andorra.

He said the association had decided that banks should be more cooperative in responding to queries from authorities and each financial institution would appoint a special representative in charge of new security measures to prevent money laundering.

However, no penalties are envisioned for banks that fail to abide by the

new measures.

FREETOWN (JULY 18) - Liberian peace talks will resume here at the earliest Thursday, two days late, when a rebel negotiator is expected to arrive, Sierra Leone foreign affairs sources said Wednesday.

They had been "officially informed" that National Patriotic Front of Liberia (NPFL) rebel spokesman Tom Woewiyu will return here for the resumption.

The talks, under the aegis of the Economic Community of West African States (ECOWAS), were adjourned Friday to enable Mr. Woewiyu to consult rebel leader Charles Taylor in Liberia.

They were originally scheduled to resume Tuesday.

The sources said Mr. Woewiyu left the NPFL headquarters in the port of Buchanan Wednesday "for an undisclosed destination by special flight before coming to Freetown."

The NPFL rebels launched their bid to unseat President Samuel Doe last December in northeastern Liberia.

Rebels said Tuesday they were engaged in fierce fighting with government troops at the suburb of Paynesville at the gates of the capital Monrovia.

TOKYO (JULY 18) - Three leading Japanese firms and General Electric Co. of the United States hope to export a new type of nuclear power plant to Indonesia, Kyodo News Service reported Wednesday.

The Japanese news agency, citing industry sources here, said that they are considering exporting several boiling water reactors (BWR), called S-BWR, now under development by GE.

The deal is expected to be worth more than one trillion yen (6.75 billion dollars), according to Kyodo.

If carried out, it would be the first time that Japanese companies have made such exports.

The three Japanese firms are Mitsui and Co, a leading trading house, as well as Toshiba Corp. and Hitachi Ltd, both major electric machinery

makers.

Kyodo quoted the sources as saying that the export plan came against the backdrop of a shrinking market for nuclear power plants in Japan amid growing concerns over the danger posed by nuclear power generation.

HAVANA (JULY 18) - A Cuban court sentenced 11 human rights activists to jail terms of up to 15 years on charges of terrorism, illegal arms possession and other threats to state security, official sources said Wednesday.

In a 15-hour trial Tuesday, authorities accused the 11, who last year formed the Youth Association for Human Rights, of conspiracy to sabotage the national library and the Institute of Radio and Television (ICRT).

The defendants "admitted that they tried to topple the Cuban socialist system and re-establish a capitalist society in Cuba dependant on Washington," the official daily Granma said.

They "had a very aggressive terrorist plan," the newspaper said.

The court also said the group stole material from military units, including explosives and detonators.

Authorities are also investigating the alleged role of the outlawed Cuban Party for Human Rights, which has been linked to the youth group, in threats to state security, Granma said.

The newspaper accused unidentified workers from the U.S. Interests Section in Havana of urging members of the human rights group to "carry out violent actions ... in an attempt to spawn an underground rebellion in the country."

The youth group was "the armed wing" of the suspected rebellion, Granma said.

Defendants Luis Enrique Linacero, Ivelise Camejo, Jose Luis Martinez, Juan Carlos Sierra and Miguel Angel Fernandez were sentenced to 15 years in prison.

Francisco Rosado received a 10-year term, Guillermo Campos and Ares Nacso eight years and Moises Vialart, Maria Garcia and Guillermo Santos were sentenced to three years house arrest, Granma reported.

NAIROBI (JULY 18) - President Mohamed Siad Barre of Somalia has met 45 opposition figures freed from jail Sunday, the government announced in a statement sent to Somali embassies abroad on Wednesday.

The 45, arrested in June and charged with sedition for signing an manifesto urging the government to step down in favour of a caretaker coalition, were acquitted by a Mogadishu court Sunday. The next day the government announced that Somalia's first multi-party elections would be held on February 1.

Mr. Siad Barre told the opposition figures that "it is not the right time to interfere with the steps being taken by the government to introduce political pluralism," the statement said.

He acknowledged that Somalia faced "serious economic, political and social difficulties," and urged the opposition to work with the government "in the national interest."

The opposition figures included Somalia's first police chief Major General Mohamed Abshir Mussa, former Somali ambassador to China Ahmed Mohamed Darman, Prof. Ebrahim Mohamoud Abyan, playwright Abdi Muhumed Amin and leading businessmen Hashi Weheliye Maalin.

Among those reportedly arrested in June for signing the "Mogadishu Manifesto Number One" was Somalia's first post-independence president, Aden Abdulle Osman, who ruled for seven years until 1967, though the government later denied he had been held.

Most of the other signatories were former members of the civilian government overthrown by Mr. Siad Barre in a 1969 coup.

On Sunday police fired warning shots to disperse a crowd that had gathered near the court where the 45 were on trial. No casualties were reported. The same day a bomb exploded in the grounds of the Chinese embassy in Mogadishu.

At least 62 people were killed and 200 seriously injured nine days ago when presidential guards fired into a crowd of football fans at a Mogadishu stadium after they hurled stones and jeered and whistled during a speech by Mr. Siad Barre.

LYONS, FRANCE (JULY 18) - A French university professor was suspended from teaching at the University of Lyons for one year Wednesday for having

published an article questioning whether Nazi gas chambers really existed, a university spokesman said.

Bernard Notin, who teaches economics at the university, also had his salary cut in half for one year by a university disciplinary commission.

The disciplinary body, composed of seven professors, met all day Tuesday after hearing about 30 witnesses for and against Mr. Notin.

Mr. Notin published an article in the periodical Economies and Societies in which he used the example of Nazi gas chambers during World War II to argue that the media put forward as "truth" concepts which were not necessarily proven facts.

In April, Lyons mayor Michel Noir, a member of the conservative opposition in France, threatened to cut off funds for a new University of Lyons building so long as "falsifiers of history" continued to teach at the university.

In June, Mr. Notin admitted that using the Nazi gas chambers as an example for his arguments was a "blunder."

Mr. Notin has appealed the university displinary commission's decision.

#90199d9000 07/18/1990 ~French/German News Agency

WASHINGTON (JULY 18) - The United States expressed mild displeasure Wednesday over suggestions that the United Nations Security Council might get more involved in finding a solution to the Israeli-Palestinian conflict.

U.N. Secretary General Javier Perez de Cuellar asked the five permanent members of the Security Council last Monday to start jointly exploring peace options at its regular meetings.

State Department spokesman Richard Boucher, asked to comment on Perez de Cuellar's move, said the administration welcomed its decision to send an envoy to the area, but that the focus of the peace process ''should remain on the parties'' themselves.

In the past, the United States has sought to retain the leading role in Middle East peacemaking and has frowned upon U.N. involvement, in part because the international body might not be as advantageous to Israel.

BEIRUT (JULY 18) - Pro-Syrian Shiite Amal fighters Wednesday launched an attack to drive out Iranian-backed Hezbollah gunmen from a strategic village in southern Lebanon lost by Amal in earlier combat.

Amal soldiers, backed by heavy rocket and cannon, attempted to advance and regain the village of Jarjou, east of of the port city of Sidon and 38 kilometers south of Beirut.

Sources said Amal gunners shelled Hezbollah positions with mortars as Israeli warplanes passed overhead, apparently monitoring the fighting.

A hezbollah spokesman said Amal was turned back. ''The offensive was contained and the attackers were pushed back to their positions,'' he told the German Press Agency dpa.

The updated toll from three days of fighting listed 40 people killed and more than 150 wounded, police said.

#90199d9360 07/18/1990 ~French/German News Agency

NEW YORK, UNITED NATIONS (JULY 18) - Vietnam and the United States share

the same interest in preventing the Khmer Rouge from regaining power in Cambodia, Vietnamese Ambassador Trinh Xuan Lang said here Wednesday.

Reacting to U.S. Secretary of State James Baker's announcement earlier in Paris that Washington was prepared to open a dialogue with Hanoi on the Cambodian situation, Mr. Lang expressed hopes that such a move would "pave the way to normal relations between both countries."

"Vietnam has always been strongly opposed to the Khmer Rouge and their return to power" and so has "U.S. public opinion," Mr. Lang told Agence France-Presse.

This is why "both countries share the same interest" in Cambodia, he added.

Earlier Wednesday White House spokesman Marline Fitzwater said in Washington that the change in U.S. policy did not signal an impending normalization of relations between Washington and Hanoi.

"We are not considering normalization or any other moves (beyond) our interest in putting some more flexibility into our Cambodian policy," he said.

A Cambodian diplomat, meanwhile, complained Wednesday that Washington, in withdrawing support for continued U.N. recognition of the tripartite Cambodian resistance coalition led by Prince Norodom Sihanouk, was effectively recognizing the Vietnamese-installed government in Phnom Penh.

The diplomat, who spoke on condition of anonymity, was reacting to Mr. Baker's statement that Washington had decided not to vote for the Cambodian coalition in the United Nations because it included the Khmer Rouge.

The Khmer Rouge held the U.N. seat for Cambodia from 1975 to 1982, when recognition was given to the resistance made up of the Khmer Rouge and followers of Prince Sihanouk and of former prime minister Son Sann.

The Khmer Rouge, who were ousted from power by Vietnamese troops in January 1989, have been blamed for the deaths of hundreds of thousands of Cambodians during their regime.

But the Cambodian diplomat here said Wednesday: "Not to recognize the Cambodian coalition government led by Prince Sihanouk is to accept the Vietnamese fait accompli in Cambodia.

"It is a very bad precedent for the small countries."

Currently, the Sihanouk-led coalition, including the Khmer Rouge, is recognized by the United Nations as the sole legitimate government of Cambodia.

Following the ouster of the Khmer Rouge by the Vietnamese, Prince Sihanouk persuaded the United Nations to continue to recognize the Khmer Rouge while negotiations for the formation of a coalition progressed.

Since then, with the urging of the member states of the Association of Southeast Asian Nations (Brunei, Indonesia, Malaysia, the Philippines, Singapore and Thailand), the United Nations has consistently supported by an overwhelming majority the seating of the Sihanouk-led coalition as Cambodia's representative.

The last General Assembly vote on this question gave the coalition a 124-17 majority.

But when the issue is next raised, probably at the end of October or beginning of November, the 12 member states of the European Economic Community (EEC) are expected to vote against continued recognition of the coalition. Other countries are expected to follow suit, said observers here.

#90199d9420 07/18/1990 ~French/German News Agency

BOLOGNA, ITALY (JULY 18) - Four extreme-right wingers jailed for life for the bombing of Bologna's central railway station in August 1980, killing 85 and injuring more than 200 were acquitted by the Appeal Court here Wednesday.

The court said there was "insufficient evidence" against Valerio Fiovaranti, Francesca Mambro, Massimiliano Fachini and Sergio Picciafuoco, who were sentenced July 11, 1988.

The grand master of the P2 Masonic lodge Licio Gelli, and businessman Francesco Pazienza, were also acquitted of involvement.

Mr. Fioravanti and Ms. Mambro were however sentenced by the same court to 13 and 12 years respectively for "membership of an armed gang."

Mr. Pazienza, who last year returned to Italy from a long exile in South America, broke down in tears on hearing of his acquittal over the telephone.

Mr. Gelli, who is under house arrest in his Tuscany villa told the news agency ANSA: "These judges were serious and brave, they knew how to resist the Communist party pressure and let truth and justice prevail."

The Appeal Court convicted two former SISMI military secret service officers Pietro Musumeci and Guiseppe Belmonte to three years'

imprisonment for perjury in the case.

The P2 lodge was implicated in numerous financial and political scandals during the early 1980s and Mr. Gelli was known to have contacts both in extreme right wing circles and at the highest level of government.

#90199d9450 07/18/1990 ~French/German News Agency

BONN (JULY 18) - The West German government decided Wednesday to suspend a controversial tax on trucks using its motorways until the end of the year following pressure from the EEC, Transport Minister Friedrich Zimmermann said.

The tax, which took effect on July 1, was applied to all trucks of over 18 tonnes from West Germany and non-EEC countries using West German motorways but West German truckers were able to deduct the payment from their overall road tax.

West Germany had initially intended to apply the tax to all trucks, but decided to exclude European Economic Community trucks at the end of June because the European Commission had taken the affair to the European Court of Justice in Luxembourg on the grounds it was discriminatory.

The Court on June 28 had urged Bonn not to apply the tax pending an overall decision on the whole issue, which was likely to take two to three years, and said the tax distorted free competition in the European transport market.

Mr. Zimmermann said Wednesday that the tax, initially intended to run until 1993 when the single European market takes effect, was to be suspended to the end of the year, but said that the possibility of a tax reduction for West German truckers remained.

When it originally announced the tax, the West German government said it was justified as its truckers were at a disadvantage to European competitors because of high West German fuel taxes and the toll system on French and Italian motorways.

Mr. Zimmermann said Wednesday's decision was the "logical consequence" of the Luxembourg court's request, but said it was not a good move and that suspending the tax would undermine harmonisation of the European transport market and the establishment of fair transport costs.

Mr. Zimmermann also criticised what he said was "20 years of immobility" by Brussels over the whole road transport issue, and regretted that road traffic was being allowed to increase unhampered causing increasing overloading.

He urged the EEC to find serious solutions for the future.

#90199e0017 07/18/1990 ~Latin America New Agency

SEOUL (JULY 18) EFE - Soviet President Mikhail Gorbachev has accepted an offer by his South Korean counterpart, Roh Tae-Woo, to take concrete steps towards establishing diplomatic ties between the two countries, Roh's spokesman Lee Soo-Jung said Wednesday.

In a letter responding to Roh's offer, Gorbachev invited the South Korean president to send a delegation to Moscow to discuss the issue and expressed his satisfaction at the idea of +maintaining consistent relations between the two countries+.

Lee announced that a South Korean delegation would travel to Moscow in early August to initiate +concrete efforts to bring about the normalization of diplomatic relations+.

Despite the absence of formal ties, the two countries have stepped up contacts in the last year through increased trade, mutual visits by high-level officials, and the introduction of direct flights between the two capitals by their respective state-owned airlines.

Roh flew to the United States in early June to talk with Gorbachev after the Soviet president's summit with U.S. President George Bush.

The Soviet Union backed communist North Korea 40 years ago in the Korean War, which pitted north against capitalist south, and has maintained close relations with Pyongyang since then.

Trade between the Soviet Union and South Korea reached dlrs 600 million last year, a 100 per cent increase over the previous year, and is expected to reach one billion by the end of this year.

#90199e0041 07/18/1990 ~Latin America New Agency

ALGECIRAS, SPAIN (JULY 18) EFE - A Spanish judge has ordered legal proceedings to begin against six police officers and 10 civilians arrested in the southern province of Algeciras on drug trafficking charges, the judge told EFE Wednesday.

Judge Manuel Gutierrez said the police officers were accused of selling drugs they had confiscated from the home of a known drug trafficker in the area.

They were also accused of belonging to an organized gang of traffickers.

Their case is to be tried in provincial courts, but could be moved to federal courts since it involves two foreigners who have fled the country.

The judge has placed a gag order on the case and no further details were available.

#90199h0140 07/18/1990 ~Chinese News Agency

HARARE (JULY 18) XINHUA - ZIMBABWEAN PRESIDENT ROBERT MUGABE TODAY CALLED FOR HIGHER PRODUCTION OF BEEF IN HIS COUNTRY TO MEET BOTH NATIONAL AND EXPORT DEMAND.

INAUGURATING A COLD STORAGE COMPLEX HERE, PRESIDENT MUGABE SAID CONCERTED EFFORTS SHOULD BE MADE TO PRESERVE THE COUNTRY'S BEEF EXPORT MARKETS.

ZIMBABWE'S BEEF EXPORT TO THE EUROPEAN ECONOMIC COMMUNITY (EEC), EARNED THE COUNTRY ABOUT 40 MILLION U.S. DOLLARS IN 1988, BUT WAS SUSPENDED FOLLOWING A WIDESPREAD OUTBREAK OF FOOT AND MOUTH DISEASE IN ZIMBABWE IN APRIL LAST YEAR.

THE PRESIDENT SAID THE DISEASE SITUATION WAS REPORTED TO HAVE IMPROVED AND ZIMBABWE IS AWAITING EEC APPROVAL TO RESUME EXPORTS OF BEEF WITHIN THE NEXT FEW MONTHS.

MUGABE SAID IT IS ENCOURAGING THAT THE QUOTA OF ZIMBABWE'S EXPORT TO EEC HAS BEEN INCREASED AT THE RECENT NEGOTIATIONS BETWEEN THE AFRICAN, CARIBBEAN AND PACIFIC STATES (ACP) AND THE EUROPEAN COMMUNITY.

HE CALLED ON BEEF PRODUCERS IN THE COUNTRY TO MAKE EFFORTS TO ENSURE THAT THE EXPORT MARKETS ARE NOT LOST THROUGH NEGLI- GENCE.

THE 30 MILLION DOLLAR COMPLEX WITH TOTAL AREA OF 21 HECTARES, HAS COLD ROOMS THAT CAN HOLD 1,860 CARCASSES AND 540 TONS OF BOXED BEEF.

#90199m0001 07/18/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JULY 18) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2)MONEY & ECONOMY.

IN THE NEWS:

The LABOR DEPARTMENT reports this morning that the consumer price index for June rose 0.5%, slightly higher than expected. Analysts were

expecting a rise of 0.3%... The COMMERCE DEPARTMENT reports that housing starts are down 2.3% for June.

The DAX index rose 40 points in the first 15 minutes of trading, but has retreated marginally to 1967.62, up 38.68. ... The Nikkei fell 124.16 to 33,048.11. ... The FT 100 is up 7.8 to 2422.8 in heavy trading. ... US SPRINT, a division of UNITED TELECOMMUNICATIONS, will cut 1,000 jobs, or 5% of its workforce. United Telecom announced yesterday that second quarter earnings fell 58%. ... The FEDERAL RESERVE reported yesterday that a jump in auto manufacturing helped lift industrial production 0.4% in June. ... COCA-COLA reports second-quarter earnings up 19% over the same quarter last year. ... MERRILL LYNCH reports second-quarter earnings up 13% over last year. second-quarter earnings declines yesterday, but all three stocks gained slightly.

WHAT'S AHEAD:

FEDERAL RESERVE BOARD CHAIRMAN ALAN GREENSPAN gives his long-awaited Humphrey-Hawkins testimony to the Senate Banking Committee at 9:45 a.m. EDT. ... The NATIONAL ASSOCIATION OF HOME BUILDERS will release its analysis of the housing market at 9:30 a.m. EDT. ...

... FIELD PUBLICATIONS, owner of the "Weekly Reader" and "Funk & Wagnalls" encyclopedia is up for sale by parent firm FIELD CORP. ... GREAT AMERICAN BANK says it plans to sell its 130 California branches to WELLS FARGO & CO. for $492 million. ... UNITED AUTO WORKERS negotiators sit down today to open contract talks with FORD, CHRYSLER and GENERAL MOTORS.

FROM THE BULLS:

"Technically I think the market is in wonderful shape for the summer time " says ANDREW ADDISON of "The Addison Report". "Over the next couple of days I wouldn't be surprised if we had a little bit of a consolidation, a little bit of a dip, going into option expiration Friday, and then I would expect the market to move higher next week. But for the short-term, I think we'll be making a top below 3100 and then going into a longer consolidation ... I don't see the downside risk for the balance of this year as being anything lower than 2820, 1 and I still have unfulfilled upside projections for this time next year of 3500." (FNN "World Business Update", 7/18)

"3000 on the Dow was an obvious sell point," says MICHAEL METZ of OPPENHEIMER & CO., who thinks we are due for a natural correction, followed by a continuation of the rally. "My sense is that there are a lot of buyers waiting to come in, rather than huge amounts of stock looking for an exit point," says Metz. He says the correction will drop the Dow to around 2965 before the market skyrockets to 3100 "in the next two or three weeks." ("Investor's Daily", 7/18)

FROM THE BEARS:

"If the market goes down here and breaks 2990, we're probably going to go down 40 or 50 points very rapidly," says MICHAEL JENKINS, editor and publisher of "Stock Cycles Forecast." A drop of more than 150 points is possible if the market falls below 2970, according to Jenkins. (CNBC "Market Wrap-Up", 7/17)

STOCK MARKET:

"All day long people were asking me if the Dow was above 3000," says GAIL WINSLOW, vice chairman of FERRIS BAKER WATTS brokerage. "What the heck difference does it make?" ("USA Today", 7/18)

"There was a high degree of unnecessary trepidation and concern about how the second quarter [earnings] reports were coming in," says MONTE GORDON, director of research at DREYFUS CORP. "To my way of thinking, the economy has passed the nadir of its decline and is beginning to show signs of starting to come around." He says earnings have had a greater effect than would normally be the case because people are nervous about the approach to 3000. He sees the market trading in a range between 2800 and 3200. (CNBC "Market Wrap- Up", 7/17)

"At today's highs, the Dow was up over 100 points in just six and a half sessions and there's got to be some healthy profit-taking going on here," says THOMAS CALLAHAN of YAMAICHI INTERNATIONAL. "What's more, you've got a lot of people who have been buying the same stocks at Dow 3000 that they were buying at 2500, except they're buying them at 18 times earnings instead of 14 times earnings." ("The Washington Post", 7/18)

"It's been a very heady couple of days," says ANDREW RILEY, head of U.S. equity research at YAMAICHI INTERNATIONAL, "so it shouldn't be a surprise that the market" didn't continue advancing to new records. In effect, "we've made the 3000 mark," Riley adds. "It doesn't matter any more. It will waffle back and forth, stand back, then go higher. The interesting thing is that the volume came back as this move up started" late yesterday. (WSJ, 7/18)

"For the rest of the decade, the secondaries will reestablish their historic position," says LOUIS EHRENKRANTZ of EHRENKRANTZ & KING. "They will outperform the Dow by a wide margin and the Dow has already gone up 2000 points. That means I'm looking for some extraordinary bargain hunting in companies that are not exactly household names." (CNBC "Business View", 7/17)

PETER CANELO, chief strategist at BEAR STEARNS, says one key to a higher market is the dollar. "It has shown a bit of weakness, and that keeps the

international investor from coming in." (WSJ, 7/18)

STOCK TIPS:

COCA-COLA posted an 18.6% jump in second quarter profits, somewhat higher than had been expected. "The company's done a marvelous job of pouring lots of capital and marketing dollars into their overseas operations," says ROY BURRY of KIDDER, PEABODY. "It's paying off in terms of very rapid volume growth." Coca-Cola's shares hit a new 52 week high, up 2 to 47 1/4. (CNBC "Market Wrap-Up", 7/17)

OPPENHEIMER & CO. recommends stock in ROCKWELL INTERNATIONAL, saying its earnings should grow 10% to 13% annually as the company reduces its defense-related business and expands its commercial and international markets. ("USA Today", 7/18)

ADVANCED LOGIC RESEARCH told its shareholders to expect earnings below Street estimates, causing the issue to fall 2 1/4 to 11 3/4. "They had misjudged the mix of their business," explains RICK MARTIN of PRUDENTIAL-BACHE SECURITIES INC. "They underestimated demand of the 386SX and overestimated demand of the 286." The supplier of those chips, INTEL, has been unable to keep up with demand for the 386SX. "The impact is greater on the smaller companies than the larger ones," says Martin. He has lowered his earnings estimates for Advanced Logic by a dime, to $1.50 a share. ("Investor's Daily", 7/18)

TCBY ENTERPRISES, the frozen-yogurt franchisor, is featured in the "Company Spotlight" this morning in "USA Today." The story says "sales are souring and the firm's stock is melting." CAROLINE LEVY of SHEARSON LEHMAN HUTTON predicts the stock will sink to 12. It closed at 15 5/8 yesterday, compared to a peak of 29 last summer. ROBINSON HUMPHREY's BRYAN ELLIOTT says the company's spring advertising campaign was "an abysmal failure." ("USA Today", 7/18)

#90199m0002 07/18/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JULY 18) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"There is no doubt that interest rates are the dominant factor in the currency markets right now," says NICHOLAS SARGEN, director of research for SALOMON BROTHERS, as the currency market prepares itself or the testimony of FEDERAL RESERVE BOARD CHAIRMAN ALAN GREENSPAN today. Dealers hope that the head of the U.S. central bank will indicate whether easier

monetary policy is in store. (WSJ, 7/18)

"Who cares if the consumer price number is bad," says one government bond trader. "The Fed has already eased policy, and they aren't about to tighten again. I want to hear what Greenspan has to say. The Fed obviously knows something we don't, or else they wouldn't have done what they did last week. But I, for one, am going to be very anxious to hear what he has to say." (NYT, 7/18)

"We definitely prefer bonds over stocks," says ARTHUR MICHELETTI, vice president at BAILARD, BIEHL & KAISER. "It's a coin's toss whether the economy already is in a recession or merely heading for slow growth." Either scenario "would mean strong gains" for holders of U.S. Treasury bonds, while the stock market is "an accident waiting to happen." He adds "This isn't the time to reach for yield" by buying low-rated bonds. "This is a time to go for safety and liquidity." (WSJ, 7/18)

"A return of bullishness among the bond set may first require some reaffirmation of economic weakness," says JOHN LONSKI, senior economist at MOODY'S INVESTORS SERVICE. "Neither of these reports [Merchandise Trade or Industrial Production] came close to fulfilling that role." (NYT, 7/18)

Still waiting for today's Humphrey-Hawkins testimony, the bond market was relatively quiet yesterday. "People are waiting for Greenspan," says GARY SCHLOSSBERG, senior economist at WELLS FARGO BANK. "They want a better read on what the follow-up to the Fed's recent easing will be." ("Investor's Daily", 7/18)

THE ECONOMY:

"Export growth is keeping us out of a recession," says STEPHEN COONEY, director of international investment at the NATIONAL ASSOCIATION OF MANUFACTURERS. "As domestic growth continues, imports will also continue to grow, though slower than exports." (NYT, 7/18)

"Most of the deterioration [in the trade numbers] was widely expected," says WILLIAM SULLIVAN of DEAN WITTER REYNOLDS. He points to three areas that contributed to the growing gap: industrial supplies, automobiles and petroleum. Sullivan sees some silver lining in that our trade gap with Japan actually shrunk by about $1 billion. (FNN "Marketwrap", 7/17)

"Basically, we're still on the path to a lower trade deficit than last year," comments BRIAN WESBURY, vice president of STOTLER ECONOMICS INC. "Both imports and exports were up, and the low dollar continues to boost exports. Given the volatility of these numbers, I don't see this as a reversal of the trend." (WSJ, 7/18)

"Despite the slight worsening [in the trade deficit], I read it as a

positive report ... because exports are rising," says ALLEN SINAI, chief economist at BOSTON CO. ECONOMIC ADVISORS. ("USA Today", 7/18)

Even though May's export numbers were the second highest ever, the trade gap widened 5.8% to $7.7 billion. MICHAEL PENZER of BANK OF AMERICA sees this report as positive. "It does show that we are continuing" to slowly narrow the trade deficit. However, he is not overly optimistic. "It's a fairly boring report," says Penzer. ("Investor's Daily", 7/18)

"We've made tremendous progress in trade deficit reduction, and I expect, with a slowdown in the U.S. economy, imports will continue to trail exports by substantial margins," says JOHN LONSKI, senior economist for MOODY'S INVESTORS SERVICE. (CNBC "World Business", 7/18)

Commenting on yesterday's report of a 0.4% rise in industrial production, CYNTHIA LATTA of DRI/McGRAW HILL says, "Manufacturing is not booming; it's struggling. But since output does seem to be expanding slightly, it has to be viewed as a relatively good report." (NYT, 7/18)

"I'm encouraged" by the industrial production report, says STEPHEN ROACH, senior economist at MORGAN STANLEY in New York. "I think these data do reflect a gathering of momentum in the manufacturing sector. I think that could be an important swing factor to an improved tone in the U.S. economy." (WSJ, 7/18)

IN WASHINGTON:

"While month-to-month figures can swing significantly, the deficit for the first five months of 1990 is almost $6 billion less than last year," says COMMERCE SECRETARY ROBERT MOSBACHER. "We see strong improvements with all the non-oil-producing market economies." (NYT, 7/18)

The FEDERAL COMMUNICATIONS COMMISSION wants to cut the cost of overseas telephone calls by 50% over the next three years by cutting into what foreign telephone companies charge their U.S. counterparts. "We're underwriting these foreign [telephone] administrations to the tune of $1 billion in 1988 alone," says MICHAEL MANDIGO, an FCC attorney. ("USA Today", 7/18)

"I think the 68 to 32 vote on our textile/shoe measure, indicates, of course, the fall of all the so-called 'free trade,'" says SEN. ERNEST HOLLINGS (D. - S.C.). "We're moving ... to reciprocity." The 68 vote majority garnered by the protectionist measure was one more than the number needed to override a likely Presidential veto. (FNN "Marketwrap", 7/17)

House Democrats will propose a savings and loan enforcement package that will include a bipartisan commission to examine the roots of the savings

and loan crisis and new legal weapons to fight crime in the industry. "We are trying to find out in a serious and not partisan way what really happened, and if Government is doing all it can do to prevent it from happening again," says REP. CHARLES SCHUMER (D. - N.Y.) and chairman of a House Judiciary subcommittee that is preparing the savings and loan legislation. (NYT,)7/18

REP. LARRY CRAIG (R. - Idaho) thinks yesterday's defeat of a Constitutional balanced budget amendment is a victory because the U.S. can now "evaluate where we're going to go from here." But Craig argues that new taxes are not the way to deal with the problem. "Clearly, we have to deal with this deficit and I don't think you

deal with it simply by raising taxes unless you want to tailspin this economy," says Craig. (CNBC "World Business", 7/18)

#90199p5674 07/18/1990 ~PR Newswire

FREMONT, Calif. (JULY 18) PR NEWSWIRE - Donald J. Herman, recently appointed chairman and CEO of Vitalink Communications (NASDAQ: VITA), announced today that net sales for the third quarter ended June 30, 1990, were $15.8 million, compared to $15.7 million for the same quarter a year ago. Net income and income from continuing operations for the third quarter of fiscal 1990 were $2.4 million, or $0.17 per share, compared to $3.3 million, or $0.28 per share, from continuing operations for the same period in fiscal 1989. Per share data is based on weighted average of 14.1 million shares for the third quarter of fiscal 1990, compared to 12 million shares for the same quarter a year ago. Net income for the second quarter ended March 31, 1990, was $4.4 million, or $0.31 per share, on sales of $18.6 million.

For the nine months ended June 30, 1990, the company increased its sales 31 percent over the same period in 1989, from $40.1 million to $52.7 million. Net income from continuing operations increased 34 percent over the same period, from $8.3 million to $11.2 million.

Vitalink Communications Corporation designs, manufactures, markets and supports data communication products which interconnect local area networks (LANs) to form wide area communication networks. Current products include remote bridges and bridge/routers for Ethernet and token ring LANs, plus a comprehensive network management system.

#90199p5675 07/18/1990 ~PR Newswire

IRVINE, Calif. (JULY 18) PR NEWSWIRE - Looking a year ahead at customer demand for Local Area Network (LAN) workstations provided a sizeable backlog for Netcom Research which announced volume shipments today of its 1612AF and EF LAN workstations designed specifically for use on networks such as Novell, Banyan and Unix.

Netcom Research President C. Norman Campbell said, "We saw the need for a 'plug and play' LAN workstation that could be easily installed and serviced by resellers, who would be adding network capability to their product lines, so we developed a machine specifically designed to be a LAN workstation.

"This new workstation is small, fast, quiet and easy to install," he continued. It comes in Ethernet and ARCnet versions and is designed with a single, fully integrated motherboard incorporating the CPU, graphics controller, I/O controller and the LAN interface.

Netcom has already signed agreements with a number of resellers including a consortium of international distributors of computer networking products to distribute Netcom's local area network products over the next two years.

Commenting on Netcom's initial success and shipping status, Al Mattal, president of Netcom's parent company The Phoenix Group International said, "We are pleased the Netcom team has been able to respond so quickly to market demand with these uniquely designed and easy to install workstations." Netcom management expects demand to continue to rise over the next 12 months because of the high level of interest shown even before their product was ready for volume shipment.

Netcom's product line is sold internationally through value added resellers (VAR), distributors (VAD), manufacturers (VAM) and direct to original equipment manufacturers (OEM). Shipments are stock to 4 weeks after receipt of order and prices are $840 and $939 each in quantities of 100 for the 1612AF and 1612EF versions respectively.

#90199p5677 07/18/1990 ~PR Newswire

VALLEY, Neb. (JULY 18) PR NEWSWIRE - Valmont Industries Inc., (NASDAQ: VALM) today announced its financial results for the second quarter and first six months of 1990. The company had earlier announced that earnings for the quarter would be less than the unusually strong second quarter of 1989. This year's second quarter net earnings were $5,379,000 or 46 cents per share, compared with $6,077,000, or 53 cents per share, for the like period of 1989. Net sales for the quarter were $214,606,000 in 1990 versus $199,646,000 for the second quarter of 1989.

For the first six months, net earnings totaled $9,831,000, or 84 cents per share compared to $10,252,000 or 89 cents per share for the first half of 1989. First half sales were $429,088,000 up from the previous year's sales of $389,070,000.

Both the irrigation products and the industrial products segments reported lower earnings than the prior year's second quarter. Irrigation sales volumes and operating profit did not equal those of an excellent 1989 due to more normal climatic patterns versus the drought-influenced conditions that existed one year ago. Operating profit for the industrial products segment were below 1989 levels reflecting softness in the construction economy causing pricing pressures for the ballast and pole businesses.

ValCom Inc. (NASDAQ: VLCM), an 82 percent owned microcomputer reselling subsidiary reported increased earnings of 24 percent for the quarter and 21 percent for the six months and sales increases of 10 percent and 17 percent for the quarter and first half, respectively. This profitable growth is a result of ValCom's commitment to meeting its customers' needs through service and support of high-end, value-added products.

Valmont president and chief executive officer, William F. Welsh II, commented "While the second quarter results did not meet our objectives, we continue to be positive about the full year 1990. We have seen increased order activity resulting from new marketing programs and we have made reductions in certain controllable expenses. We expect that these steps will produce a favorable second half of the year, enabling us to achieve our objective of 20 percent return on beginning equity and to report total year earnings in excess of 1989 results."

Valmont Industries manufactures components for the electrical construction industry; is a leading producer of mechanized irrigation systems for worldwide agricultural markets; and owns 82 percent of ValCom, a major distributor of microcomputer products and services.

#90199p5694 07/18/1990 ~PR Newswire

TRUMBULL, CT (JULY 18) PR NEWSWIRE - Scientific Imaging Instruments, Inc. (NASDAQ: SIMIU) announced today that Fuji Medical Systems Co., a division of Fuji Photo Film Co. of Tokyo, has signed a letter of intent to purchase 12 units of the UroScope 4300 at an undisclosed price. The sale to Fuji Medical, a distributor of medical equipment, would represent the first sale of the UroScope by Scientific Imaging Instruments (SII), and also the first sale in the Japanese market.

The UroScope is a laboratory instrument developed by SII which automates and standardizes urinalysis procedures. It combines robotics, computer and video technology in one unit that replaces the traditional microscope and eliminates much of the time and labor associated with manual analysis techniques. The UroScope creates images on its video monitor that are highly magnified for maximum ease of viewing and analysis.

Commenting on the signing, Steven Griffin, president and CEO of SII, said, "We are very encouraged by the favorable response of Fuji Medical to the UroScope and its potential to influence microscopic urinalysis testing in Japan." He added, "We are pleased to be working with a company of Fuji's size and stature in a market as important as Japan and we believe that this marks the beginning of a strong relationship between our companies."

SII develops and markets various products for medical laboratories that improve safety and productivity. In April 1990, SII announced that it had signed a letter of intent to merge with XCEL Corporation, a privately held diversified electronics company with sales in excess of $20 million in its last fiscal year. XCEL has a wholly owned subsidiary in Tokyo which would facilitate the introduction of the UroScope by Fuji and assist Sutton Technologies, SII's local agent, in the sale of SII products in Japan.

The merger between SII and XCEL, which has been approved by the board of directors of both companies, has not been completed and is subject to the approval of XCEL stockholders and the satisfaction of certain conditions, including the restructuring of XCEL's debt.

#90199p5695 07/18/1990 ~PR Newswire

SAN DIEGO (JULY 18) PR NEWSWIRE - Infrasonics Inc. (NASDAQ: IFRA) announced today that sales for its fourth quarter ended June 30, 1990 increased 51 percent to $2,597,400, compared to $1,723,500 for the same quarter last year. The profit for the fourth quarter was $162,300 or $.01 per share compared to a profit of $81,700, or $.01 per share for the previous year.

For the fiscal year ending June 30, 1990, sales increased 40 percent to $7,407,100 from $5,287,100 during the same period in 1989. Profit for the year was $409,200, or $.03 per share vs. a loss of $154,400 or $.01 per share for the year ending June 30, 1989.

Jim Hitchin, Infrasonics' president, said, "Our rapidly increasing sales is primarily due to our growing market share for the Infant Star neonatal ventilator and the introduction of our new adult ventilator, the Adult Star. FDA approval this year of our high frequency infant ventilator also contributed in a major way to our sales growth.

"During fiscal year 1991, we believe our revenues and profits will continue to grow as our new products are fully accepted in the marketplace."

Infrasonics is a public company with its common shares traded over-the-counter under the NASDAQ symbol IFRA. The company manufactures ventilators (respirators) for infants, children and adults as well as other respiratory care products for use in hospitals and the home.

For further information, contact: Fred McGee, Infrasonics Inc., 9944 Barnes Canyon Rd., San Diego, CA 92121, 619-450-9898.

#90199p5698 07/18/1990 ~PR Newswire

WASHINGTON (JULY 18) PR NEWSWIRE - MCI Communications Corporation (NASDAQ-NMS: MCIC) today reported revenue of $1.9 billion and earnings of $170 million, or 67 cents per common share, for the quarter ended June 30, 1990. This compares with revenue of $1.6 billion and earnings of $142 million, or 56 cents per common share a year ago.

Earnings per common share were up 20 percent, despite a tax rate increase from 25 percent to 33 percent.

In residential accounts, the strong growth was fueled specifically by the success of MCI's domestic and international Premier Calling Plans which allow customers to purchase long distance by the hour, rather than the distance of the call.

During the quarter, MCI won the largest payphone contract awarded to date; a five-year, $375 million dollar contract with the Navy Resale and Services Support Office (NAVRESSO) to provide operator and payphone services for sites at U.S. Navy, Marine Corps and Coast Guard sites throughout the U.S., Hawaii and Puerto Rico.

Other multi-million dollar contracts awarded MCI included Banc One Corporation, CBS Inc., Comp-U-Check, Mobil Corporation and Household International Inc.

The June quarter also marked the introduction of MCI Vision, a product designed to help small to mid-size business customers more effectively manage, monitor and control long distance and calling card services.

Highlighting the company's effort to continue to increase stockholder value, MCI announced issuance of a regular 5 cent semiannual dividend on its common stock at its May 7 annual stockholders meeting. The first dividend was paid June 11.

The company's planned merger with Telecom USA, the nation's fourth largest

long distance carrier, was approved by Telecom's shareholders on June 29. Certain required state and federal regulatory approvals are still pending prior to closing the transaction.

#90199p5699 07/18/1990 ~PR Newswire

HOUSTON (JULY 18) PR NEWSWIRE - Compaq Computer Corporation (NYSE: CPQ) announced today that the General Services Administration awarded its 1990 GSA Schedule contract for the period June 29, 1990 through March 31, 1991.

The new GSA Schedule contract covers the full line of COMPAQ products and options. This includes the recently announced desktop COMPAQ DESKPRO 386s/20 and laptop COMPAQ SLT 386s/20, two high performance PCs featuring Intel's 20-MHz 386SX microprocessor.

Under the contract, approved government end-users can purchase COMPAQ personal computers without going through the time-consuming process of obtaining competitive bids every time they make a purchase. The new GSA Schedule contract number for Compaq Computer Corporation is GS-OOK-90AGS-5222. More than 1,700 Authorized COMPAQ Computer Dealers are available to assist government agencies with purchases of COMPAQ products.

In addition to the new desktop and laptop PCs, government end users can purchase a full line of COMPAQ products. For PC Systems and desktop PCs, this includes the COMPAQ SYSTEMPRO PC System, COMPAQ DESKPRO 486/25, COMPAQ DESKPRO 386/33, COMPAQ DESKPRO 386/25, COMPAQ DESKPRO 386/25e, COMPAQ DESKPRO 386/20e, COMPAQ DESKPRO 386s, COMPAQ DESKPRO 386n, COMPAQ DESKPRO 286e and COMPAQ DESKPRO 286n.

For portable and laptop PCs, this includes the COMPAQ PORTABLE 386, COMPAQ PORTABLE III, COMPAQ SLT/286, COMPAQ LTE/286 and COMPAQ LTE.

Compaq Computer Corporation is a world leader in the manufacture of PC systems, and desktop, portable and laptop personal computers. Founded in 1982, Compaq is a FORTUNE 200 company with 1989 worldwide sales exceeding $2.9 billion. COMPAQ products are sold in 64 countries through a network of more than 3,000 Authorized COMPAQ Computer Dealers. #90199p5701 07/18/1990 ~PR Newswire
SAN DIEGO (JULY 18) PR NEWSWIRE - DH Technology Inc. (NASDAQ: DHTK) announced today its ninth consecutive quarter of record earnings. The company reported net income of $1,765,000 or $.35 per share for the quarter ending June 30, 1990, an increase of 21 percent over last year's second quarter amount of $1,457,000, or $.29 per share. The company also announced that revenues increased to $10,968,000, up 5 percent from $10,471,000 for the same period last year.

The company's pre-tax income increased from 21 percent of revenue of the quarter ending June 30, 1989 to 25 percent for the same period in 1990. This increase is primarily the result of the continuation of cost reduction programs and the impact of recording increased license fees.

On July 6, 1990, the company completed the incorporation of its Mexico maquiladora operation. The company expects reduced manufacturing expenses for its printhead business as a result of this action.

DH Technology is a leading independent supplier of technologically-advanced high-performance printheads, printer mechanisms and specialty printers. DH Technology's products are utilized by the lottery, labelling ticketing, office automation, gasoline vending and specialty printing industries.

For additional information, contact M. Dean Gilliam, chief financial officer, DH Technology Inc., 15070 Avenue of Science, San Diego, CA 92128, 619-451-3485.

#90199p5702 07/18/1990 ~PR Newswire
PHOENIX, ARIZ. (JULY 18) PR NEWSWIRE - StatesWest Airlines Inc. (NASDAQ: SWAL) reported June 1990 passenger enplanements were up 16.1 percent to 11,694, compared to 10,067 for June 1989. The carrier's June 1990 traffic capacity was 5,997,236 available seat miles (ASM) producing a load factor of 40.1 percent. ASMs for June 1989 totaled 4,205,954, producing a load factor for that period of 50.1 percent. Traffic increased 14.2 percent to 2,406,396 revenue passenger miles compared to the June 1989 figure of 2,107,204.

W. James Lane, president, stated, "The results for the first three days as a USAir Express operator have broken all previous daily passenger

boardings. Advance bookings reflect that with the introduction of service on July 15 as a USAir Express operator, and our planned expansion with USAir, we can expect to see continued growth in our passenger enplanements and an increasing load factor."

Lane also announced the appointment of Randolph G. Palmer to the position of controller. Palmer has a successful 12-year finance and accounting background in the airline industry. His most recent financial management position was with USAir's (NYSE: U) wholly owned subsidiary express operator, Jetstream International Airlines. The addition of Palmer is part of StatesWest's major commitment to seek out the best possible management talent to assist the airline in implementing its planned expansion program in the 1990s.

StatesWest officially became USAir Express for the Western United States on Sunday, July 15. One of nine express operators for USAir, StatesWest's connecting traffic will strengthen USAir's position in the intra-state California markets, as well as adding the growing gaming and resort market of Laughlin, Nev./Bullhead City, Ariz., to USAir destinations.

The company operates one of the newest fleets of regional prop-jet aircraft in the United States. Present destinations include the Southern California locations of Burbank, Los Angeles, Orange County, San Diego and Santa Barbara, along with the Arizona cities of Phoenix, Tucson, Lake Havasu City, Sierra Vista/Ft. Huachuca and Laughlin, Nev./Bullhead City, Ariz. With the addition of four destinations in California, StatesWest will operate approximately 100 daily departures between these locations beginning Aug. 15.

#90199p5703 07/18/1990 ~PR Newswire

PITTSBURGH (JULY 18) PR NEWSWIRE - PNC Financial Corp (NYSE: PNC) reported second quarter consolidated net income of $108.9 million and fully diluted earnings per share of $1.14, it was announced today.

These results compare with $74.5 million and $.77, respectively, in the first quarter of 1990, and $125.5 million and $1.30, respectively, in the second quarter of 1989.

During the second quarter of 1990, PNC took $168.3 million in net charge-offs including $70.7 million related to LDC transactions and $40.1 million related to real estate.

In the second quarter, the provision for possible credit losses totaled $73.8 million compared with $108.9 million in the first quarter and $39.3 million in the second quarter of 1989.

Nonperforming asset levels were essentially flat when compared to the first quarter.

At June 30, 1990, total nonperforming assets, which include nonaccrual loans, restructured loans and OREO, totalled $837.9 million, compared with $831.6 million at March 31. The ratio of nonperforming assets to loans and other real estate was 2.98 percent at June 30, 1990, compared with 2.94 percent at March 31, 1990 and 2.06 percent at Dec. 31, 1989.

At June 30, 1990, the allowance for credit losses was $522.5 million, or 1.87 percent of total loans. This compares with 2.19 percent both at March 31, 1990, and year-end 1989. Excluding LDC loans and LDC reserves from the March and December ratios, the allowance for credit losses would have been 1.73 percent and 1.43 percent, respectively, of total loans.

Consolidated net income for the first six months of 1990 totalled $183.4 million or $1.91 per fully diluted share. These results compare with $249.1 million and $2.59, respectively, for the corresponding period of 1989.

On an annualized basis, return on average total assets was .81 percent for the first six months and return on average common shareholders equity was 13.44 percent. These results compare with 1.21 percent and 18.69 percent, respectively, for the first six months of 1989.

On a taxable-equivalent basis, net interest income for the first six months was $732.0 million, a 3.8 percent increase from a year ago. Average earning assets increased 11.7 percent to $42.6 billion in the first half of 1990. The net interest margin was 3.43 percent, compared with 3.70 percent a year earlier.

Total noninterest income increased 18.9 percent to $317.7 million in the first six months of 1990. This included trust revenues of $107.5 million, 11.4 percent higher than 1989, and service charges, fees and commissions of $169.4 million, a 16.8 percent increase over 1989. Net securities gains of $21.0 million were $12.5 million higher than the prior year.

Noninterest expenses of $582.2 million in the first six months increased 12.8 percent over the same period in 1989. The comparison was adversely impacted by higher expenses related to OREO, an increase in FDIC assessments and non-recurring expense reductions in the 1989 period. OREO expenses in the aggregate totalled $18.1 million which included $13.9 million of valuation adjustments. Staff expense increased 4.2 percent in the comparison.

PNC Financial Corp was formed in 1983 with the consolidation of Pittsburgh National Corp., Pittsburgh, and Provident National Corp., Philadelphia. Its principal banking affiliates include: Bank of Delaware Corporation, Wilmington, Del.; The Central Bancorporation, Inc., Cincinnati (includes banks in Ohio and Kentucky); Citizens Fidelity Corp., Louisville, Ky. (includes banks in Kentucky and Indiana); The First Bank and Trust Co., Mechanicsburg, Pa.; The Hershey Bank, Hershey, Pa.; Marine Bank, Erie, Pa.; Pittsburgh National Bank, Pittsburgh; Provident National Bank, Philadelphia; and PNC National Bank of New Jersey, Cherry Hill, N.J. PNC currently operates 530 community banking offices in Pennsylvania, Kentucky Indiana, Ohio, Delaware and New Jersey. It also conducts business through offices in 15 states and seven foreign countries.

#90199p5705 07/18/1990 ~PR Newswire

SAN DIEGO (JULY 18) PR NEWSWIRE - Supercomputing Solutions, Inc. (NASDAQ: SUPR), today announced its financial results of the second quarter and six months ended June 30, 1990, and measures to reduce costs.

For the second quarter ended June 30, 1990, the company reported revenues of $738,723 and a net loss of $1,113,756, or $.17 per share. This compares with revenues of $360,752 and a net loss of $743,836, or $.17 per share, recorded in the three months ended June 30, 1989.

For the six months ended June 30, 1990, the company incurred a net loss of $2,505,968, or $.38 per share, on increased revenues of $1,129,816. These results compare to a 1989 first half loss of $1,241,815, or $.29 per share on revenues of $817,363 recorded during the six months ended June 30, 1989.

"The second quarter of 1990 has been an eventful one for the company. During the quarter, we completed the first phase of the Direct Solution of Turbulence (DST) Program under the auspices of our prime contractor, the Titan Corporation and the U.S. Government; we made the formal introduction of the CAPPS-9064 supercomputer at the Supercomputing World Applications Conference; we sold our first CAPPS- 9064 to TRW Incorporated; we were awarded a contract from Textron Defense Systems to port (i.e. integrate) their DYNA-3D software code onto the CAPPS-9064 and we signed agreements with a unit of the Grumman Corporation to provide maintenance and support to our customers for the CAPPS-9064 and also to be a Value Added Reseller (VAR) for the CAPPS- 9064," said Allan D. Simon, chairman of the board.

"The second quarter increase in revenues reflected our completion of the subcontract for the initial phase of the DST Program and the completion

and sale to TRW, Incorporated. However, research and development costs associated with the CAPPS-9064 continued to negatively impact our bottom line. Further, the U.S. Government has not made a decision on the next phase of the DST Program and we have no indication when a decision will be forthcoming or whether the decision will be positive," said Simon.

"The two-year development program for the CAPPS-9064 resulted in substantial financial losses, leaving the company in an uncomfortable cash position. Accordingly, the company is accelerating its efforts to obtain orders for the three CAPPS-9064s being built and to raise additional funds through a private offering of securities. Although there are no orders yet, sales of these three CAPPS supercomputer units would result in a significant, positive cash flow impact as substantially all components and assemblies for those units have been previously purchased by the company." Simon went on to add that in addition to these efforts, the company has taken and will take several cost-saving actions to further alleviate the current cash flow pressures, including staff reductions of approximately 50 percent, cutbacks in travel and capital equipment expenditures, and non-continuance of the research grant to Princeton University, while retaining rights to the patented Navier-Stokes Computer.

Supercomputing Solutions, Inc., designs, manufactures, and sells supercomputers, minisupercomputers and software to the aerospace, defense and electronics industries and to agencies of the U.S. Government. The company also owns and markets the copyrighted STARDYNE software package for structural analysis.

#90199p5706 07/18/1990 ~PR Newswire

WORCESTER, Mass. (JULY 18) PR NEWSWIRE - Cambridge BioScience Corp. (NASDAQ: CBCX) today announced the signing of an interim Supply and Distribution Agreement with Ortho Diagnostics Systems Inc. (ODSI) for Cambridge BioScience's Recombigen(R) HIV-1 EIA test. Both companies will distribute the product. During the 120-day term of this agreement, the companies will attempt to negotiate an agreement for the long-term supply and distribution of Recombigen HIV-1 and additional retrovirus products on a worldwide basis.

ODSI currently distributes FDA-approved Western blot confirmatory tests for HIV-1, manufactured by Biotech Research Laboratories Inc. (NASDAQ: BTRL), as well as the BTRL HTLV-I Western blot, HTLV-1 EIA, and EBV products. A proposed merger between BTRL and CBCX is currently scheduled for shareholder approval during the last week of August. Should the broad-reaching agreement be completed, ODSI will be the exclusive distributor under a joint CBCX/ODSI label of all HIV and HTLV-I screening and confirmatory test manufactured by the newly merged BTRL/CBCX entity.

The CBC Recombigen HIV-1 EIA test covered by the Supply Agreement will be distributed by both companies. For the proposed longer term agreement, Ortho Diagnostic Systems will distribute large volume test kits to blood screening laboratories, commercial laboratories, public health laboratories, and hospitals worldwide. CBCX intends to distribute these diagnostic products in smaller volume test kits in addition to its existing non-HIV/HTLV products, such as Adenoclone, Rotaclone, Lyme, FeLV, and a range of products from BTRL via its direct sales force activity in the United States.

Internationally, CBCX will use a distributor network operated from its base in Dublin, Ireland, an supplied through Noctech Limited, a company in which CBCX holds equity.

ODSI, in conjunction with Chiron Corporation (NASDAQ: CHIR), is well positioned in the worldwide blood screening market. The recent introduction by Ortho/Chiron of the Ortho Anti-Hepatitis C Virus test has given Ortho a leading role in the sale of blood screening assays in the microplate format.

Cambridge BioScience Corp. is a leader in a recombinant technology, which it utilizes in the development and production of antigens, adjuvants, and monoclonal antibodies as the basis for its lines of diagnostics, vaccines, and therapeutics for human and veterinary use.

#90199p5714 07/18/1990 ~PR Newswire

MALVERN, PA (JULY 18) PR NEWSWIRE - Systems & Computer Technology Corp. (SCT) (NASDAQ: SCTC), a computing management and applications software company, today announced its unaudited results for the third quarter of fiscal 1990, which ended June 30, 1990.

Revenue for the quarter was $12,139,000, up 8.3 percent from $11,209,000 in the third quarter of fiscal 1989. Net income for the quarter was $468,000, compared with net income of $1,219,000 for the same period last year. Income before taxes and extraordinary item was $543,000 for the 1990 third quarter, versus income of $1,219,000 in 1989.

Income per share in the third quarter of 1990, before an adjustment for net operating loss carryforwards, was $.03, and the net income per share was $.04. For the 1989 third quarter, earnings per share before an adjustment for net operating loss carryforwards were $.06, and net income per share was $.11.

The company attributed the decrease in net income to higher costs for sales, marketing and product development, incurred in anticipation of increased business levels. However, the revenue mix in the quarter did not support those cost increases.

For the first nine months of fiscal 1990, SCT's revenue was $34,708,000, compared with $33,056,000 for the same period in fiscal 1989. Excluding a one-time net gain of $1.9 million in the first quarter of fiscal 1989 from

the settlement of litigation, revenue for the period increased 11.4 percent from 1989. Net income for the first nine months of fiscal 1990 was $574,000, or $.05 per share, compared with net income (excluding the settlement) of $2,240,000 -- $.19 per share -- for the first nine months of fiscal 1989.

During the quarter, SCT signed more than $13 million in new business and contract renewals. The Company's backlog of business under contract increased to $92 million at June 30, from $91 million at March 31.

SCT is a leading provider of computing management services and applications software for educational institutions and government jurisdictions nationwide. The company is headquartered at 4 Country View Road, Malvern, Pa., 19355.

NEW YORK (JULY 18) PR NEWSWIRE - Bristol-Myers Squibb Company (NYSE: BMY) reported record sales and earnings for the second quarter and six months ended June 30, 1990.

Second quarter sales increased 11 percent to $2.5 billion. Net earnings increased 21 percent to a record of $417 million or $.79 per share compared to $.66 per share last year.

For the six months, sales increased 10 percent to $4.9 billion. Net earnings increased 20 percent to $826 million or $1.57 per share compared to $1.32 per share last year.

Richard L. Gelb, chairman and chief executive officer, said that, for the quarter, domestic sales increased 7 percent while international sales increased 17 percent. He added that growth in the pharmaceutical business was particularly strong. Exchange rate fluctuations had a favorable effect on sales of approximately 1 percent for the quarter.

#90199p5716 07/18/1990 ~PR Newswire

CINCINNATI (JULY 18) PR NEWSWIRE - The Kroger Co. (NYSE: KR) said today that strong sales, a reduced LIFO charge and lower interest costs resulted in second quarter net earnings of $25.3 million, or 30 cents per share, compared to a net loss of $2.5 million, or 3 cents loss per share, after an extraordinary loss of 5 cents per share, in the same period last year.

Second quarter 1990 operating cash flow from continuing operations (pre-tax earnings before interest, depreciation and LIFO) totaled $241.5 million, versus $231.4 million in last year's second quarter.

Continuing unit sales in the 1990 second quarter, helped by a strong Easter holiday which fell in the second quarter this year and the first quarter in 1989, increased 8.0 percent to $4.742 billion from $4.389 billion. Supermarket sales were especially robust, with identical store sales rising 7.5 percent over the previous year, well ahead of the rate of food price inflation.

For the 1990 first half, operating cash flow from continuing operations totaled $433.1 million, compared to $423.8 million in last year's first half. Continuing unit sales in the first half increased 7.6 percent to $9.301 billion. Net earnings totaled $15.0 million, or 18 cents per share compared to a loss of $21.5 million, or a loss of 29 cents per share, after the extraordinary loss of 5 cents per share, in the first half of 1989.

Kroger President and Chief Executive Officer Joseph A. Pichler said the second quarter performance reflected the company's continuing ability to attract new customers despite an increasingly competitive retail environment.

Pichler added that contract settlements during the first half in several important markets will enable the company to continue rewarding performance through incentive plans linked to sales and cash flow improvements.

Kroger said that it reduced long-term debt, including current portion and capital leases, by approximately $300 million during the first half of the year, with much of the decrease attributable to reduced working capital borrowings. Total long-term debt now stands at $4.6 billion, the company said.

Kroger also said it has achieved the first interest rate reduction of 1/4 of 1 percent allowed under the restated credit agreement with its major lending banks. Kroger's anticipated interest expense for 1990 should be in the range of $560 million to $575 million, down from earlier estimates of $585 million to $590 million.

#90199p5721 07/18/1990 ~PR Newswire

BOCA RATON, FLA. (JULY 18) PR NEWSWIRE - Humagen, Inc. (NASDAQ: HUGE), and Medical Depot, Inc. (NASDAQ: MEDD), have finalized the terms of their definitive stock acquisition agreement for a more limited exchange of common stock.

Humagen, Inc. will acquire 100,000 shares (approximately 1 percent) of Medical Depot's issued and outstanding common stock in exchange for 100,000 shares (approximately 3.5 percent) of Humagen's common stock. There are currently issued and outstanding approximately 2,850,000 shares of Humagen, Inc. and approximately 13,200,000 shares of Medical Depot, Inc.

"This mutual stock exchange will allow Humagen and Medical Depot to have an interest in each other's activities without the loss of control or significant dilution of the ownership interests of shareholders previously envisioned. It will also allow both companies to continue to develop a close working relationship and to explore some exciting worldwide opportunities during the coming months," said Roberto Riva, president of Humagen, Inc.

Humagen intends to pay out the entire 100,000 restricted shares of Medical Depot, Inc., acquired in this exchange as a special return of capital "dividend" to Humagen shareholders who are shareholders as of Aug. 10, 1990, the record date.

Humagen is engaged in developing and marketing practical, high-tech medical diagnostic testing products. The company's current marketing thrust is directed principally to the practicing male infertility specialist for in-office use, and consists of the patented Penetrak (TM) and Tru-Trax (TM) infertility testing programs.

Medical Depot, Inc. is in the business of developing and franchising Medical Depot Superstores, selling quality durable, disposable and comfort medical equipment supplies and related products.

#90199p5725 07/18/1990 ~PR Newswire

SAN DIEGO (JULY 18) PR NEWSWIRE - Wavetek Corp. (NASDAQ: WVTK) reported sales of $22,924,000 and net income of $515,000 or 6 cents per share for the third quarter ended June 30, 1990. This compares to sales of $21,025,000 and net income of $234,000 or 3 cents per share for the third quarter of the prior year.

For the 39 weeks ended June 30, 1990, sales were $70,206,000 and net income was $2,304,000 or 26 cents per share. This compares to sales of $64,142,000 and net income of $686,000 or 8 cents per share for the comparable prior period.

New orders for the quarter totalled $17,444,000 compared to $23,735,000 for the same period last year. For the 39 weeks of this fiscal year, bookings totalled $69,351,000, compared to $66,505,000 for the same period a year ago. Backlog at the end of the quarter was $22,558,000 which was down from $29,300,000 at the end of the second quarter.

Fred Sehnert, president and chief executive officer, said, "We are

gratified by the improvement in the results of operations for the quarter and year-to-date. These results were achieved on increased growth in the company's communications markets which was offset by the continued erosion of demand in the signal generation component of the Company's business."

Sehnert also reported that the company is in the process of reducing its total work force in order to adjust the company to its current volume expectations.

It was also reported that the company has retained Peers & Co. as its financial advisor and investment banker to assist the company in its efforts to maximize shareholder value through arranging a strategic alliance or through the possible sale of the company.

Wavetek Corp., headquartered in San Diego with facilities and offices in California, Florida, Indiana, New York, West Germany, Honk Kong and the United Kingdom, produces a broad line of electronic test and measurement equipment and related products.

PHILADELPHIA (JULY 18) PR NEWSWIRE - SmithKline Beecham (NYSE: SBH) has signed an agreement with Polfa Tarchomin of Poland on the terms of a license under which Polfa Tarchomin will manufacture the broad spectrum antibiotic Augmentinu in Poland from intermediates supplied by SmithKline Beecham.

This agreement marks the first time that Augmentinu has been manufactured under license in any of the countries of Eastern Europe.

Tarchomin, based in Warsaw, is one of the largest pharmaceutical manufacturers in Eastern Europe and is involved in bulk processing through to distribution, specializing in the production of penicillins and other antibiotics.

Commenting at the signing, David McMullan, chairman of SmithKline Beecham Pharmaceuticals International, said:

"This agreement will make Augmentinu available on a secure basis in Poland and will significantly raise the scale of SmithKline Beecham's Pharmaceuticals business in that country. It also provides SmithKline Beecham with a base from which to sell Augmentinu to the Baltic States using Tarchomin's management expertise. Hopefully this will lead to further collaboration with Tarchomin."

Kazimierz Ryniewics, Director General of Tarchomin, said: "Poland, with a population of 39 million and over 75,000 registered doctors, represents a major market for antibiotics. Augmentinu is recognized throughout the world as a leading antibiotic. We believe that the benefits it will bring to our medical profession and their patients, coupled with our experience of the Polish market, will ensure that we achieve an early success to the benefit of both our companies."

Augmentinu has been registered in Poland for two years and has until now

been supplied direct from SmithKline Beecham in the United Kingdom.

SmithKline Beecham has well established businesses in Poland, supplying Engerix-Bu hepatitis vaccine and, in conjunction with its Polish licensee OBR, allergy vaccines. These and other activities designed to develop the business are coordinated by a Warsaw office which also was responsible for obtaining the registration of Augmentinu, coordinating Augmentinu medical education symposia and laying the foundation for today's agreement.

#90199p5730 07/18/1990 ~PR Newswire

SEATTLE (JULY 18) PR NEWSWIRE - Washington Mutual Savings Bank (NASDAQ: WAMU) today announced both second quarter 1990 earnings of $10.2 million, up 36 percent from second quarter 1989 earnings of $7.5 million, and a 10 percent increase in the cash dividend on common stock.

Fully diluted earnings per share were 58 cents, up from 50 cents one year ago. First-half 1990 earnings rose 52 percent to $18.7 million from $12.3 million a year ago.

The bank's board of directors today declared an increased cash dividend on common stock of 11 cents per share and a dividend on noncumulative convertible perpetual preferred stock of 93.75 cents per share, both payable Aug. 15 to shareholders of record on July 31.

"We made excellent progress in the second quarter. Core operating profits rose, lending volumes were strong, problem assets declined somewhat, operating efficiency improved, and we completed two attractive acquisitions," said Kerry Killinger, Washington Mutual president and chief executive officer.

After-tax core operating earnings increased 36 percent to $11.0 million in second quarter 1990 from $8.1 million a year ago. Net interest income increased to $41.6 million for the quarter from $32.3 million a year ago.

Total retail lending activity increased 76 percent from a year ago: Residential and residential construction loan originations rose to $477.5 million from $296.8 million, and consumer loans increased to $137.2 million, up from $51.9 million.

"We widened our No. 1 share of the Washington home loan market and have become a leading lender in Portland. The regional housing market is firm, with the apparent slowing of the Puget Sound market somewhat offset by strong Portland and Eastern Washington markets," said Killinger.

During the quarter, assets and liabilities of Frontier Federal Savings Association and the retail banking division of Old Stone Bank of Washington were acquired, adding $389.4 million in deposits. "Making in-market acquisitions of this type increases our core retail deposits and should add to our profitability because of operating efficiencies," said Killinger.

Total deposits grew from $4.0 billion to $4.3 billion during the quarter as a result of the acquisitions and total assets increased 8 percent from $6.7 billion to $7.3 billion during the quarter.

Solid subsidiary performance also helped to increase customer funds under management from last quarter end: Annuities rose to $269.4 million from $246.0 million and assets of the Composite Group of mutual funds increased to $733.1 million from $720.6 million.

Net operating expense (other income less other expense) rose modestly from $21.8 million for first quarter 1990 to $22.2 million for second quarter 1990, partly due to transition expenses of the two acquisitions. Second-quarter provision for loan losses and net gain (loss) on sale or revaluation of assets for the quarter improved from a loss of $3.9 million last quarter to a loss of $3.5 million.

Collectively, problem loans, real estate owned and restructured loans decreased to 2.13 percent of total assets at $154.7 million at quarter end from 2.38 percent of total assets at $159.9 million at March 31.

With $7.3 billion in assets, Washington Mutual Savings Bank is the largest independent financial institution in Washington.

#90199p5731 07/18/1990 ~PR Newswire

NEW YORK (JULY 18) PR NEWSWIRE - The New York Times Company today reported 1990 second-quarter income from continuing operations of $26.8 million, or $.35 per share, compared with $39.2 million, or $.50 per share for the second quarter of 1989. Consolidated revenues for the 1990 quarter were $468.9 million compared with $460.3 million for the second quarter of 1989.

For the first six months in 1990, income from continuing operations was $43.4 million, or $.57 per share, compared with $70.7 million, or $.90 per share, last year. Consolidated revenues for the 1990 six-month period were $900.1 million, up 2 percent from $883.4 million for the first six months of 1989.

Results for the 1989 second quarter and six-month periods exclude $.03 and $.05 per share, respectively, for the operations of NYT Cable TV, which was sold in August 1989. Cable is reported under discontinued operations in the attached financial exhibits.

The principal reasons for the decline in income from continuing operations were lower advertising linage at The New York Times due to continuing weakness in the New York region's economy and the following two factors:

-- a $.07 per share reduction in earnings for the quarter ($.12 per share for the six months), resulting from the July 1989 McCall's acquisition, which was structured to maximize cash flow.

-- an $.08 per share reduction in earnings for the quarter ($.16 per share for the six months), due to increased depreciation and interest expense related primarily to the completion of the building for The New York Times's new automated color production and distribution facility in Edison N.J., and a newly constructed facility for the Gwinnett (Ga.) Daily News. The interest on these projects was capitalized in 1989.

Exclusive of these two factors, 1990 second-quarter earnings from continuing operations would have equalled the $.50 per share for the 1989 quarter and earnings for the first six months of 1990 would have been $.85 per share compared with $.90 per share in 1989.

#90199p5734 07/18/1990 ~PR Newswire

PRINCETON, NJ (JULY 18) PR NEWSWIRE - The Liposome Company, Inc. (NASDAQ: LIPO) announced today that the company's Gentamicin Liposome Injection for the treatment of disseminated Mycobacterium Avium Intracellulare (MAI) infection has been designated an orphan drug by the Food & Drug Administration (FDA). Disseminated MAI is an opportunistic infection that afflicts 30-50 percent of AIDS patients in the United States.

The Liposome Company's TLC G-65, a proprietary formulation of Gentamicin Liposome Injection, has been shown to be highly effective in pre-clinical models of MAI. Phase I studies in normal volunteers are in progress. Phase II clinical studies in disseminated MAI in AIDS patients are expected to start later this year.

Clinical signs and symptoms of disseminated MAI in AIDS patients can include high fever, abdominal pain, diarrhea and weight loss. Severe anemia and significant blood transfusion requirements frequently accompany these symptoms. Now that AIDS patients have a longer life expectancy as a result of AZT and other new treatments, MAI is increasingly being recognized as a significant cause of morbidity and mortality among these patients. Currently, there are no drugs approved for the treatment of MAI.

Disseminated MAI is an intracellular infection. The mycobacteria reside inside the cells of certain organs, especially the liver and spleen. Traditional formulations of antibiotics are ineffective against MAI because they do not penetrate cell membranes sufficiently to kill intracellular organisms. Because liposomes are naturally taken up by phagocytic cells of the body's reticuloendothelial system (RES), the company said it believes they will be targeted to the very sites where MAI phathogens localize and persist. TLC G-65 has been shown in pre- clinical models to achieve sufficient tissue concentrations to kill MAI bacteria.

"By encapsulating an antibiotic in liposomes, it appears that one can deliver it specifically to the organ, cell, and, possibly, subcellular site of infection," Stephen Saletan, M.D., vice president, medical affairs of the Liposome Company, said. "We believe, therefore, that TLC G-65 should provide a targeted approach to treating this serious infection in AIDS patients."

The Liposome Company was officially notified of the action in a letter from the Office of Orphan Products Development, of the Food and Drug Administration.

"We are very pleased to receive the orphan drug designation for our product," said Charles A. Baker, chairman and chief executive officer of the Liposome Company. "We are looking forward to moving ahead rapidly in cooperation with the FDA to get TLC G-65 to the market as soon as possible. Since there is currently no reliable therapy available for MAI in AIDS patients, we will do our best to make TLC G-65 available as quickly as we can. We believe the orphan drug designation should help in this process."

The official designation of orphan drug status grants the Liposome Company seven years of marketing exclusivity for Gentamicin Liposome Injection. "The Liposome Company has been developing a significant patent portfolio for TLC G-65 and all our major products," said Baker. "Nonetheless, we welcome the additional exclusivity afforded by orphan drug status."

The largest company dedicated exclusively to the development of liposome-based pharmaceuticals, the Liposome Company is developing pharmaceutical products designed to enhance the therapeutic benefit of existing drugs. The company is primarily focused on developing advanced liposomal drugs for the treatment of cancer and serious infectious diseases.

CONTACT: Dr. Marc J. Ostro, vice chairman and chief science officer of the Liposome Company, 609-452-7060, or Claudia Mueller or Anthony J. Russo of Noonan/Russo Communications, 212-979-9180, for the Liposome Company.

#90199p5735 07/18/1990 ~PR Newswire

COLUMBUS, OH (JULY 18) PR NEWSWIRE - Cooker Restaurant Corporation (NASDAQ: COKR) today reported record sales and earnings for the second quarter. Net earnings for the quarter, propelled by record restaurant operating margins, were $520,000, up 52 percent from $342,000 in 1989. Sales in 1990's second quarter rose 11 percent to $8,134,000 from $7,355,000 a year earlier. Earnings per share increased 25 percent to $.05 per share compared with $.04 in 1989's second quarter. Pre-tax earnings were $787,000, up 130 percent from $342,000 in the prior year's

quarter.

For six months, net earnings increased 42 percent to $933,000, up from $656,000 in 1989. Sales for the six months rose 19 percent to $16,286,000 from $13,673,000 a year earlier. Earnings per share for the first half were $.09 compared with $.09 in 1989. Pre-tax earnings for the six months were $1,474,000, up 125 percent from $656,000 in 1989.

G. Arthur Seelbinder, chairman and chief executive officer, attributed Cooker's record performance for the quarter to a continued improvement in restaurant operating margins which increased to 19.0 percent of sales from 16.4 percent of sales a year earlier. This improvement created pre-tax margins for the quarter of 9.7 percent of sales versus 4.6 percent in 1989 and after-tax margins for the quarter of 6.4 percent of sales versus 4.6 percent of sales in 1989.

"We have focused our attention on the improvement of profitability in our existing restaurants, and will continue to open restaurants that meet our profitability standards," stated Seelbinder.

1990 earnings are on a fully taxed basis as compared with 1989 in which there was no tax liability. Weighted average shares outstanding for the first half of 1990 are 10,940,813 as compared with 7,700,482 in 1989.

Cooker owns and operates ten full service restaurants in Tennessee, Indiana, Ohio and Michigan. Its eleventh restaurant is under construction in Columbus, Ohio and will open in the third quarter of 1990.

The company's common shares are traded on the NASDAQ-National Market System under the symbol "COKR."

#90199p5737 07/18/1990 ~PR Newswire

MINNEAPOLIS (JULY 18) PR NEWSWIRE - TCF Financial Corporation (TCF) (NYSE: TCB) today reported a net loss of $32.3 million or $4.47 per share for the second quarter ended June 30, 1990, compared with net income of $5.5 million or 75 cents per share for the 1989 second quarter. For the first six months of 1990, TCF had a net loss of $29.1 million or $4.04 per share, compared with 1989 six-month earnings of $10.6 million or $1.46 per share.

According to TCF Chairman and Chief Executive Officer William A. Cooper, TCF's loss resulted from the balance sheet restructuring announced on July 2 that included the following actions: a $25 million second-quarter provision for loan and real estate losses; the closing of TCF's Texas thrift subsidiary, TCF Banc Savings, and related write-off of $13.1 million of goodwill; and the sales of mortgage-backed securities, collateralized mortgage obligation (CMO) residuals, and loan servicing rights for a combined net gain of $224,000. "The increase in reserves was primarily the result of our first examination by the Federal Deposit Insurance Corporation (FDIC). We believe that the FDIC is applying new and more rigorous standards in its examinations of financial institutions, particularly relating to commercial real estate," said Cooper. "Our additional reserves largely resulted from these more rigorous standards being applied to TCF's remaining out-of-state commercial real estate loans made by prior management and some deterioration in these assets."

Cooper also said that, in addition to the FDIC exam, the Office of Thrift Supervision is completing its examination of TCF's loans, real estate-owned and compliance procedures.

TCF's other restructuring actions were taken to strengthen the balance sheet, improve future profitability, and reduce interest rate risk, according to Cooper. TCF expects to return to profitability in the third and fourth quarters of 1990. TCF calculates that it continues to meet its current regulatory capital requirements, and a high priority for the

company will be its efforts to meet increasing regulatory capital requirements. The company declared its regular quarterly dividend on July 11 in keeping with plans to maintain the current dividend level.

TCF is the holding company for TCF Bank Savings fsb, the third largest banking institution headquartered in Minnesota. TCF Bank has 55 branches in Minnesota and 20 branches in northern Illinois. Deposits at TCF Bank are insured to $100,000 by the FDIC.

#90199p5739 07/18/1990 ~PR Newswire

CASS CITY, MI (JULY 18) PR NEWSWIRE - L.E. Althaver, chairman, president and chief executive officer, Walbro Corporation (NASDAQ-NMS: WALB), reported net sales of $39,761,000 for the second quarter ended June 30, 1990, compared with $32,147,000 for the same period in 1989. (Second-quarter 1990 sales include $3,026,000 from the recently acquired Sharon Manufacturing Company.)

The company reported income from continuing operations of $641,000 for the quarter compared with $822,000 for the second quarter of 1989.

Income per share from continuing operations was $.15 for the second quarter, based on an average of 4,289,161 shares outstanding. This compares with $.20 for the second quarter of 1989, based on 4,058,378 shares outstanding.

"Shipments of electric fuel pumps produced for original equipment applications by Walbro's Automotive Division were running at high levels in the second quarter," Althaver said in announcing the second-quarter results. "However, total fuel pump shipments for the year will be somewhat below earlier expectations, the result of weak passenger car sales."

"Shipments of diaphragm carburetors by Walbro's Small Engine Division were below last year's second-quarter levels. Float feed carburetor sales were also at low levels," Althaver said. "Carburetor sales are expected to remain at approximately the same levels for the balance of the year," he added.

Althaver noted that Walbro's revenues have benefited from the recent acquisition of Sharon Manufacturing Company, Lambertville, Mich.

"The contribution of this new addition to Walbro's Automotive Division will continue to grow in 1990, as new fuel rail applications come on line

in the second half of the year. In addition, fuel module production will increase this summer at the Automotive Division's Meriden, Conn., facility as new applications reach the production stage."

Walbro Corporation is a designer and manufacturer of automotive and small engine fuel system components. Walbro is headquartered in Cass City, and has subsidiaries and joint ventures throughout the world, including the United States, Japan, Singapore, West Germany, Mexico, Korea and Hong Kong. Walbro common stock is traded on the NASDAQ National Market System under the symbol WALB.

NEW YORK (JULY 18) PR NEWSWIRE - John R. Stafford, chairman and chief executive officer of American Home Products Corp. (NYSE: AHP), today reported sales and earnings for the second quarter and first half of 1990.

Net sales for the second quarter increased 1 percent to $1,605,064,000. Net income increased 13 percent to $270,350,000. Net income per share increased 12 percent from $.77 to $.86.

Net sales for the six months ended June 30 increased 3 percent to $3,418,499,000. Net income increased 13 percent to $584,838,000, while net income per share increased 11 percent from $1.67 to $1.86.

Effective June 29, the corporation sold its Boyle-Midway Household Products business for $1.25 billion. A pretax gain on the sale of approximately $1 billion is included in the second quarter. Also, during the second quarter, other expenses totaling $697 million were recorded,

primarily for the writedown of certain intangible assets, for reorganization and plant consolidation programs primarily in Europe, for the present value of future health care benefits for current retirees and for costs related to product liability and environmental cleanup programs. The net impact of the gain and the special charges was an increase in net income of approximately $73 million.

The effective tax rates for the quarter and the six months of 1990 reflect the benefit received from utilization of the net operating loss carryforward of A.H. Robins, taxes on the gain on the sale of Boyle-Midway and the non-deductibility of the expenses relating to the writedown of intangible assets.

#90199p5742 07/18/1990 ~PR Newswire

HARRISBURG, PA. (JULY 18) PR NEWSWIRE - Chrysler Credit Corp. has paid $6,000 to settle allegations that personnel at its Delaware Valley office violated the law while attempting to collect debts from Philadelphia area consumers.

Attorney General Ernie Preate Jr. said the allegations are contained in an "assurance of voluntary compliance" negotiated by the Philadelphia office of his Bureau of Consumer Protection and filed today in Commonwealth Court.

The assurance alleges that personnel at Chrysler Credit Corp.'s Horsham office harassed debtors through written communications and improperly reported disputed debts to a credit bureau.

Preate said one consumer complaint received by the bureau claimed that Chrysler Credit Corp. personnel had a telephone operator interrupt a debtor's telephone conversation to advise the debtor to make an emergency call to the debt collectors.

The assurance notes that the debt collectors' alleged actions violated the state Debt Collection Trade Practices Regulation and the federal Fair Credit Billing Act.

Under terms of the agreement, Chrysler Credit Corp. doesn't admit wrongdoing but agrees to pay the state $6,000 and to provide a copy of the debt regulations or a summary of the assurance to all of its employees who collect debts in Pennsylvania.

The corporation also promises that it won't harass debtors or convey information about an alleged debt without noting whether the debt is disputed by the debtor.

"I urge consumers to pay their debts promptly," Preate said. "But my office will take action against debt collectors who violate the law."

The assurance was negotiated by Deputy Attorney General John E. Kelly, attorney-in-charge of the Bureau of Consumer Protection's Philadelphia office. He said the bureau's investigation was prompted by consumer complaints.

Chrysler Credit Corp.'s headquarters are in Southfield, Mich.

#90199p5750 07/18/1990 ~PR Newswire

CLEVELAND (JULY 18) PR NEWSWIRE - M.A. Hanna Company (NYSE/MSE: MAH) today reported that net income in the second quarter of 1990 was $18.1 million ($.64 per share, fully diluted). Net income in the second quarter of 1989 was $35.9 million ($1.27 per share, fully diluted), which included $15.0 million ($.53 per share, fully diluted) from the sale of claims in a bankruptcy proceeding. Second quarter net sales and operating revenue was $289.4 million in 1990 compared to $291.5 million in 1989.

Net income in the first six months of 1990 was $21.7 million ($.76 per share, fully diluted), which included an $8.6 million charge ($.30 per share, fully diluted) taken in the first quarter to establish a reserve for unpaid receivables due from a bankrupt customer of Hanna's coal affiliate. In the first six months of 1989, Hanna had net income of $49.7 million ($1.77 per share, fully diluted), including the previously mentioned gain from the sale of bankruptcy claims. Net sales and operating revenue was $557.3 million in the first half of 1990, up 2 percent from $547.9 million in the first half of 1989.

"The principal causes of the decline in second-quarter net income from operations were a reduction in earnings from our iron ore and coal affiliates and the fact that Hanna's tax rate climbed to 25 percent in the 1990 period from 10 percent in 1989 due to the exhaustion of our tax)loss carryforwards," said Chairman and Chief Executive Officer Martin D. Walker.

Hanna benefitted in both years from the utilization of tax-loss carryforwards accumulated in the early and mid-1980s. Second-quarter results included tax credits of $2.8 million in 1990 and $8.4 million in 1989; six-month results included tax credits of $3.3 million in 1990 and $12.5 million in 1989. On a fully taxed basis, Hanna's second quarter net income from operations, excluding one-time gains and losses, was $.54 in

1990 and $.57 in 1989; for the six months fully taxed net income from operations, excluding one-time gains and losses, was $.91 in 1990 and $.92 in 1989.

M. A. Hanna Company is a leading international formulated polymers company and also has natural resources interests.

DENVER (JULY 18) PR NEWSWIRE - Stat-Tech International Corp. (OTC) announced today the delivery of its Static Buster(R) Static Discharge Wick production model for final testing in corporate and commercial aviation applications. The company anticipates the new product line could

generate $10 million in sales over the next 12 months.

The Static Buster(R) Static Discharge Wick dissipates static electricity on airplanes. Static buildup disrupts navigations and communications, and can even burn out equipment. Powerful static charges build and are retained by an aircraft during flight, causing dangerous interference.

"The Static Buster(R) Static Discharge Wick is undoubtedly the most advanced technology for avionic dissipation," said Raynard M. Fenster, Stat-Tech International's chief executive officer. "The Static-Buster(R) Wick has proven more conductive than its competing products in laboratory tests, will not break, has no sharp ends, will be guaranteed for one year, and will retail for roughly half the price of currently available products " Fenster said. Fenster pilots his own single-engine plane and is a member of the Experimental Aircraft Association.

AMR Combs, the services division of AMR Corp. (American Airlines' parent company), will conduct the Static-Buster(R) Wick's final testing on a variety of airplanes, from single-engine craft to commercial jets. The tests will determine the temperature threshold of the product and effectiveness in varying environments. Last month, AMR Combs and Stat-Tech agreed in principle to jointly develop and market the Static Buster(R) Wick. The agreement calls for AMR Combs to begin advertising the Wick this year.

"AMR Combs is a fantastic corporate partner," Fenster said. "They are supporting our efforts 100 percent. AMR Combs conducts all Static Buster(R) Wick testing, they provide a ready market, and provide a high profile as a distributor," Fenster said.

A single commercial carrier the size of American Airlines could use approximately 60,000 static wicks in one year. "But the market is much larger than that," Fenster said. "A single plane may use as many as 40 wicks. And we stand a significant chance of slicing a nice portion of the small-craft market simply because of the price differential."

#90199p5755 07/18/1990 ~PR Newswire

DENVER (JULY 18) PR NEWSWIRE - Stat-Tech International Corp. (OTC) announced today the delivery of its Static Buster(R) Static Discharge Wick production model for final testing in corporate and commercial aviation applications. The company anticipates the new product line could generate $10 million in sales over the next 12 months.

The Static Buster(R) Static Discharge Wick dissipates static electricity on airplanes. Static buildup disrupts navigations and communications, and can even burn out equipment. Powerful static charges build and are retained by an aircraft during flight, causing dangerous interference.

"The Static Buster(R) Static Discharge Wick is undoubtedly the most advanced technology for avionic dissipation," said Raynard M. Fenster, Stat-Tech International's chief executive officer. "The Static-Buster(R) Wick has proven more conductive than its competing products in laboratory tests, will not break, has no sharp ends, will be guaranteed for one year, and will retail for roughly half the price of currently available products " Fenster said. Fenster pilots his own single-engine plane and is a member of the Experimental Aircraft Association.

AMR Combs, the services division of AMR Corp. (American Airlines' parent company), will conduct the Static-Buster(R) Wick's final testing on a variety of airplanes, from single-engine craft to commercial jets. The tests will determine the temperature threshold of the product and effectiveness in varying environments. Last month, AMR Combs and Stat-Tech agreed in principle to jointly develop and market the Static Buster(R) Wick. The agreement calls for AMR Combs to begin advertising the Wick this year.

"AMR Combs is a fantastic corporate partner," Fenster said. "They are supporting our efforts 100 percent. AMR Combs conducts all Static Buster(R) Wick testing, they provide a ready market, and provide a high profile as a distributor," Fenster said.

A single commercial carrier the size of American Airlines could use approximately 60,000 static wicks in one year. "But the market is much larger than that," Fenster said. "A single plane may use as many as 40 wicks. And we stand a significant chance of slicing a nice portion of the small-craft market simply because of the price differential."

If the Static Buster(R) Wick's commercialization is successful, Stat-Tech believes it can capture 10 percent of the static wick market, increasing its sales by $10 million in the product's first 12 months. Last year, the company posted $880,000 in sales. The company expects to show its strongest quarter ever with its June 30 results, and for the first time, expects to break the $1 million sales mark for fiscal 1990, which ends Sept. 30.

Stat-Tech currently markets its Static-Buster(R) Static Potential Equalizer, Anti-Stat Cleaner, and Anti-Stat Wipes for use with computer equipment. The company is becoming recognized as a leader in electro-conductive plastic development.

WORCESTER, MA (JULY 18) PR NEWSWIRE - Transgenic Sciences, Inc. (NASDAQ: TSIN) today announced that it has been awarded contracts totaling $1.3 million by two federal agencies. The contracts, issued by the National Institute of Environmental Health Sciences (NIEHS) and the Biological Sciences Division of the Office of Naval Research, are for toxicology testing and for the development of advanced biosensors. The biosensor technology has potential application as an advanced screening method for new pharmaceuticals.

"These contracts are important additions to the company's revenue stream," said James P. Sherblom, TSI chairman and CEO. "We are very pleased that federal agencies recognize TSI as a leader both in sophisticated toxicology testing, and new, advanced testing devices. Research on the biosensor may provide a convenient, rapid and inexpensive screening method for drugs and anesthetics."

Under the NIEHS contract, TSI will provide toxicity data on urethane and also examine the effect of ethanol on the toxicity of urethane. Urethane is found naturally in fermented beverages and foods. The Office of Naval Research contract will support research on a bisensor device that uses electrical signals to detect biochemical activity.

TSI is a life sciences company developing advanced toxicology tests and disease models based on genetic engineering and transgenic techniques to improve the efficiency of the pharmaceutical/chemical development process. TSI is also developing animal strains capable of producing commercially valuable pharmaceutical proteins, as well as strains with desirable growth and genetic characteristics.

SEMINOLE, FL (JULY 18) PR NEWSWIRE - Superior Surgical Mfg. Co., Inc. (AMEX: SGC), manufacturer of uniforms, career apparel and accessories, today announced that for the second quarter ended June 30, 1990, sales increased 10 percent to $33,905,540 compared with 1989 second quarter sales of $30,962,281. Net income was up 31 percent to $2,739,253 or $1.26 per common share, compared with net income of $2,094,295 or $.92 per common share earned in the 1989 second quarter.

For the six months ended June 30, 1990, sales were up seven percent to $62,602,998 compared with sales of $58,525,111 in the six months ended June 30, 1989. Net income for the six month period was up 27 percent to $4,384,017 or $2.01 per common share, compared to net income of $3,456,704 or $1.52 per common share reported in the first six months of 1989.

Gerald M. Benstock, chairman and chief executive officer, commented: "The past quarter exceeded, in net earnings and sales, any other second quarter in our history. It is gratifying to note as well that our backlogs and incoming order rates are very strong; we continue to be favored with new customers and multi- year contracts, giving us further assurance of another record year for our company."

Superior Surgical manufactures and sells a wide range of uniforms, career apparel and accessories for the hospital and healthcare fields; hotels; fast food and other restaurants; and public safety, industrial, transportation and commercial markets.

PASADENA, CA (JULY 18) PR NEWSWIRE - Countrywide Mortgage Investments, Inc. (NYSE: CWM) today announced unaudited earnings of $2,263,000, or $.17

per share, for the second quarter ended June 30, 1990.

In addition, the company's board of directors declared a cash dividend of $.17 per share for the quarter, payable Aug. 17, 1990, to shareholders of record on July 27, 1990.

The comparable year-ago quarter produced net earnings of $1,886,000, or $.14 per share. A cash dividend of $.14 per share was declared for this comparable year-ago quarter.

For the immediately preceding quarter ended March 31, 1990, earnings were $2,354,000, or $.17 per share. A cash dividend of $.17 per share was paid for this preceding quarter.

For the first six months of 1990, Countrywide Mortgage reported net earnings of $4,617,000, or $.34 per share, compared to earnings for the first six months of 1989 of $4,561,000, or $.33 per share.

"Primarily due to lower financing costs, net interest income improved from the company's portfolios of mortgage-backed securities financed with reverse repurchase agreements," noted David S. Loeb, chairman of Countrywide Mortgage.

"However, due primarily to higher than expected prepayments, this improvement was offset by a decline in net interest income from our portfolio financed through collateralized mortgage obligations," Loeb added.

Countrywide Mortgage Investments, Inc., a real estate investment trust, invests in fixed- and adjustable-rate, single-family, first-lien residential mortgages, mortgage-backed securities and other related investments.

Countrywide Mortgage was sponsored by Countrywide Credit Industries, Inc. (NYSE: CCR), which, through its subsidiaries, Countrywide Asset Management and Countrywide Funding Corporation, provides management services and a source of mortgage investments.

#90199p5764 07/18/1990 ~PR Newswire

WALTHAM, MA (JULY 18) PR NEWSWIRE - Tecogen Inc. (NASDAQ: TCGN) today announced that it has received $1.13 million in funding from the Gas Research Institute for the development of a compressed natural gas-powered

engine and fuel system for medium-duty commercial vehicles manufactured by General Motors (GM).

Recent emissions tests of Tecogen's natural gas-fueled engine, called Tecodrive(tm), demonstrate that the technology can meet stringent new federal emission standards for vehicles. Under the program, the Tecodrive engine and fuel system will be designed and tested for optimum durability, power, and vehicle driveability as well.

Sponsored by several utilities in southern California, Tecogen has also been working with GM and the Blue Bird Body Company, the largest manufacturer of school buses in the U.S., to design compressed natural gas-fueled engines for California school buses.

Dr. Ravinder K. Sakhuja, president and chief executive officer of Tecogen Inc., said, "We have adapted Tecogen's natural gas-engine technology, employed in our cogeneration and gas-cooling products, to power medium-duty trucks and buses. Conversion of fleet vehicles to natural gas could make a significant and timely contribution to improving the nation's air quality."

Tecogen develops, manufactures, markets, and services a complete line of packaged cogeneration systems, as well as gas-fueled air conditioners, for sale to a wide range of commercial, institutional, industrial, and multi-unit residential users. Tecogen is a public subsidiary of Thermo Electron (NYSE: TMO).

JACKSON, MI (JULY 18) PR NEWSWIRE - Electricity sales, a key indicator of Michigan's economic strength, suggest that the state's economy is still growing. Consumers Power Company, the state's largest utility, has set an all-time record for first-half electric sales in 1990.

Despite a warmer winter and cooler spring, from January through June Consumers Power sold 14.461 billion kilowatt-hours, up from 14.451 billion kilowatt-hours sold during the first half of 1989.

Sales to commercial customers were particularly strong, showing a 3.3-percent increase, compared with the first half of 1989. Sales to residential customers increased 1.4 percent. Sales to industrial customers were down 4.2 percent for the period.

Helping to meet the record demand for power was the Midland Cogeneration Venture (MCV), from which Consumers Power began purchasing electric

capacity in March.

"We are heading for a seventh consecutive year of record electricity sales a trend that we expect to continue," said Consumers Power President and Chief Operating Officer Frederick W. Buckman. "Electric power from the MCV and other Michigan cogeneration projects will be timely in meeting this ongoing demand," Buckman said.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost six million of the state's nine million residents in 67 of the 68 Lower Peninsula counties.

PHILADELPHIA (JULY 18) PR NEWSWIRE - Rohm and Haas Co. (NYSE: ROH) today announced second quarter earnings of $70 million or $1.05 per share, a 1 percent increase over comparable 1989 results.

Sales of $768 million were 5 percent higher than second quarter 1989 revenues.

J. Lawrence Wilson, chairman of the board, said, "Strong sales growth in the Polymers, Resins and Monomers (PRM) and Plastics businesses, and stronger European currencies were the major contributors to the earnings improvement. Other Rohm and Haas businesses reported modest revenue growth. The impact of the slowing economy was isolated to those product lines supplying the construction and transportation industries. Earnings from the Latin American Region suffered from economic conditions in Brazil and Argentina, and the Pacific Region earnings were negatively affected by higher costs."

Net earnings for the first six months of 1990 were $124 million, or $1.86 per share, a 1 percent gain from the corresponding 1989 period. First half sales totaled $1,463 million, a 3 percent increase over the $1,415 million reported in 1989.

Wilson noted, "Rohm and Haas's first half financial performance was better than expected. Economic conditions were favorable, European currencies strengthened, and our plants operated very smoothly. Normally, 60 to 65 percent of our operating earnings are generated in the first half of the year. In the absence of any dramatic change in the economic climate, we believe that 1990 earnings will follow the historical pattern."

#90199p5776 07/18/1990 ~PR Newswire
MORRIS PLAINS, NJ (JULY 18) PR NEWSWIRE - Warner-Lambert Company (NYSE: WLA) today announced that sales, earnings per share (EPS) and net income

for the three months ended June 30, 1990, were records for any quarter. In the second quarter, Warner-Lambert's EPS increased 20 percent from a year earlier, to $1.00 -- adjusted to reflect a two-for-one split of outstanding common shares in May. Sales rose 13 percent to $1.15 billion from $1.02 billion a year earlier, and net income climbed 20 percent to $134 million, compared to $112 million during the second quarter of 1989.

During the quarter, worldwide sales of the company's prescription pharmaceuticals increased to $376 million, up 17 percent from the same period a year ago. Growth in the segment was led by the cholesterol-regulating drug Lopid, as recognition in the medical community of the drug's proven ability to reduce the risk of coronary heart disease continued to expand.

Other segment growth leaders were the anticonvulsant Dilantin and the cardiovascular drug Procan SR. The company's line of prescription pharmaceuticals also includes the cardiovascular drugs Dilzem and Accupril, the anti-infectives Doryx, ERYC and enoxacin and the analgesic Ponstan.

Led by the continuing strong performance of Listerine antiseptic mouthwash Benadryl antihistamine, Rolaids antacid and Halls cough tablets, worldwide sales of non-prescription health care products rose 14 percent to $360 million in the second quarter. Other products in the segment include, Lubriderm skin lotion, Benylin cough syrup, Sinutab sinus medication, Tucks medicated pads and Anusol hemorrhoidal preparations.

Worldwide sales of gums and mints during the quarter increased 7 percent to $278 million. Growth was led by Trident sugarless gum, Dentyne gum, Clorets gum and mints, and Bubblicious bubble gum. Among other products in the segment are Chiclets candy-covered gum, Certs mints and chocolate/caramel brands including Junior Mints, Sugar Daddy, Sugar Babies and Charleston Chew!.

Worldwide sales of the company's other products grew 11 percent to $141 million. Included in this segment are Schick razors and blades, Capsugel empty hard gelatin capsules and Tetra home aquarium products.

Warner-Lambert is a worldwide company devoted to developing, manufacturing and marketing quality health care and consumer products. It employs approximately 33,000 people at its operations in 130 countries. In 1989, Warner-Lambert's worldwide sales were $4.2 billion.

LOS ANGELES (JULY 18) PR NEWSWIRE - The Tokio Marine and Fire Insurance Co., Ltd. (NASDAQ-NMS: TKIOY), through a wholly owned subsidiary, has made a $100 million equity investment in WSGP Partners L.P. WSGP is the investment firm founded by William E. Simon and Gerald L. Parsky. The terms of the investment were not released.

"This is a long-term partnership that will operate with a global focus," said William E. Simon, co-chairman of WSGP. "It is a reflection of the benefits of the free flow of capital to meet worldwide investment opportunities."

Simon said that the choice of Tokio Marine as a partner was as much based on Tokio Marines' investment philosophy as it was on its position as one of the world's leading financial services companies. "Tokio Marine is by its very nature a long-term investor with an international presence. We are dedicated to making WSGP Partners into an investment firm that will leave its mark on the 1990s and, hopefully, beyond."

Shunji Kono, president of Tokio Marine, said that his company's investment in WSGP Partners demonstrates Tokio Marine's confidence in Simon and Parsky. "This is both a strategic and a financial investment. Strategic because we believe in Mr. Simon's and Mr. Parsky's view of the global marketplace; financial because we have confidence in their ability to identify excellent investment opportunities. But above all, it is a long-term commitment by all parties to build a high-quality investment firm."

WSGP Partners will pursue a variety of corporate investments. In connection with these investment activities, the firm plans to establish as equity fund with a limited number of international institutional investors. The emphasis of this fund will be middle market companies with significant long-term growth prospects.

As has been the policy of Simon and Parsky in the past, the firm will not engage in hostile transactions. In addition, real estate investment will be a significant activity of the firm. The emphasis will be on medium sized real estate ventures.

Tokio Marine, headquartered in Tokyo, is the oldest property and casualty insurance company in Japan and the largest in the world. The company was founded in 1879, specializing in cargo insurance, and first did business in the United States the following year. It now operates in 40 countries around the world. Simon and Parsky manage the firm as co-chairmen. Preston Martin is also a managing director of WSGP Partners.

WSGP Partners L.P. is the exclusive vehicle for all of the corporate and real estate investment activities of William E. Simon and Gerald L. Parsky and the other principals of WSGP.

CONTACT: Gerald Parsky of WSGP Partners, (213) 551-0101; Kunihiko Fujii of Tokio Marine, 011-813-211-7096; or Gregory Miller of Robinson, Lake Lerer & Montgomery, (212) 484-7790, for WSGP Partners.

MIDDLETOWN, PA (JULY 18) PR NEWSWIRE - Ronald H. Smith, chairman, president and chief executive officer of CCNB Corp. (NASDAQ-NMS: CCNC), and Gary L. Holman, president and chief executive officer of Homestead Holding Corp. (NASDAQ-NMS: HMSD), announced today that they intend to reopen negotiations on the dollar amount that CCNB will pay for each share of Homestead Holding stock pursuant to the proposed merger that was announced by them on June 27, 1990.

Based on preliminary due diligence review, CCNB has concluded that it is likely that the price to be paid for each share of Homestead Holding will be reduced from $15.48 previously announced. The continuing review will take into account the views of examiners of the Office of Thrift Supervision which recently began its regular examination of Homestead Savings and of representatives of CCNB. The parties will continue discussions as examinations and due diligence review proceed.

NEWTON, MASS. (JULY 18) PR NEWSWIRE - Evans & Sutherland (E&S), Salt Lake City, Utah, has signed an agreement to license and sell to its customers the leading visualization software environment, Stardent Computer's Application Visualization System, AVS(tm). The announcement makes E&S the third major vendor to license AVS from Stardent, following similar agreements reached with Digital Equipment Corporation (NYSE: DEC) and Convex Computer Corporation (NYSE: CNX).

Under the terms of the agreement, E&S will sell AVS directly to customers of its 3-D graphics workstations to be used primarily in molecular modeling and high-end CAD/CAM applications. In addition, E&S customers will use the visualization tool in general science, research and math applications.

"The long term strategy of E&S is to provide our customers with hardware and software tools that are accepted industry standards as well as the very best technology available for scientific problem solving," said Lynn Thorsen, graphics product manager of the Design Systems Division of E&S.

"AVS fits perfectly into that strategy. It is fast becoming a de facto standard for visualization and it is widely recognized as the premier visualization environment."

The agreement represents Stardent's continuing efforts to provide scientists and engineers with access to AVS, an interactive visualization environment which gives scientists, engineers and technical professionals the ability to use advanced graphics and imaging techniques without graphics programming.

AVS provides a unique visual programming interface that allows the end-user to construct visualization applications which incorporate their own computational code. This dramatically increases the users' ability to see and experiment with a simulation under a varying set of conditions.

Stardent Computer Inc. is the leading developer, manufacturer and marketer of visualization systems. These include graphics supercomputers, departmental supercomputers and interactive 3D visualization software.

Founded in 1968, Evans & Sutherland Computer Corporation is a leader in advanced visualization and simulation systems for science and industry. The Design Systems Division develops, builds and sells high-performance, 3-D graphics systems and application software for industrial design and molecular modeling.

#90199p5784 07/18/1990 ~PR Newswire

PRINCETON, NJ (JULY 18) PR NEWSWIRE - Cytogen Corp. (NASDAQ: CYTO) today reported revenues of $.8 million for the 13-week period ended June 30, 1990.

The revenues resulted from the sale of research services to Sterling Drug Inc. and Bracco Chimica Industria S.p.A., and from interest earned on cash and short-term investments.

As expected, second quarter revenues were significantly below the $1.9 million reported for the comparable period in 1989, due to a substantial one-time licensing fee recorded in 1989 which adversely affected 1990 in the comparison.

Operating expenses of $5.5 million for the 13-week period ended June 30, 1990, were 11 percent above the $4.9 million incurred during the comparable period in 1989. The increase in operating expenses was primarily attributable to ongoing product development activities in human

clinical trials for the OncoScint(R) and OncoTc(TM) cancer diagnostic imaging product lines and for the company's cancer therapy products.

The net loss of $4.7 million was 52 percent above the net loss of $3.1 million incurred during the 13-week period ended July 1, 1989. The loss per common share was $.41 per share and included preferred stock dividends which were equivalent to $.03 per common share in 1990. The loss per common share in the second quarter of 1989 was $.26 per share.

For the 26-week period ended June 30, 1990, revenues of $2.5 million were 30 percent below the $3.6 million recorded during the same period in 1989. Operating expenditures of $10.8 million were slightly above the $10.5 million recorded in the same period in 1989. For the 26-week period ended June 30, 1990, the net loss of $8.2 million was 19 percent above the $6.9 million loss recorded in the same period in 1989. The loss per common share was $.73 and included preferred stock dividends which were equivalent to $.06 per common share in comparison to a loss per common share of $.58 for the comparable period last year.

At June 30, 1990, the company held cash including short-term investments of $19.8 million, as compared to $29 million at Dec. 30, 1989. In July 1990, the company sold an aggregate of 3,450,000 shares of common stock in a public offering, realizing net proceeds of $29.6 million, and which upon closing resulted in the company holding cash including short-term investments of $49.1 million.

Cytogen Corp. is a biopharmaceutical company which has developed proprietary systems for linking drugs and diagnostic agents to monoclonal antibodies in order to optimize the function of the antibody as a delivery vehicle. With major emphasis on human cancer, current product development efforts at Cytogen are focused on improved cancer diagnostic imaging agents and the targeted delivery of cancer therapeutic agents directly to tumor sites.

#90199p5787 07/18/1990 ~PR Newswire

NEW YORK (JULY 18) PR NEWSWIRE - Accor S.A. announced today that IBL Acquistion, L.P., a limited partnership consisting of wholly owned subsidiaries of Accor S.A., has commenced a cash tender offer for all of the outstanding common limited partnership interests of Motel 6, L.P. (NYSE: SIX) at a purchase price of $22.50 per depositary unit, net to the seller in cash. The offer is being made pursuant to an acquisition agreement dated July 12, 1990 among Accor S.A., IBL Acquistion, L.P. and Motel 6, L.P. The offer is conditioned upon, among other things, the tender (and non-withdrawal) of more than 50 percent of the outstanding units on a fully diluted basis.

The board of directors of Motel 6 G.P., Inc., the managing general partner of Motel 6, L.P. has unanimously approved the acquisition agreement on

July 12, 1990 and determined that the acquisition is fair to and in the best interests of the partners of the partnership, and recommends that all of the limited partners of the partnership accept the offer and tender all of their units. Motel 6 Holdings L.P., which owns in excess of 50 percent of the units, has agreed to tender in the offer the units owned by it and has granted Accor an irrevocable option to purchase such units if Motel 6 Holdings fails to tender under certain circumstances.

As previously announced, any depositary units not acquired in the tender offer will be redeemed or acquired in a subsequent merger for $22.50 per unit in cash.

The regular quarterly distribution of $0.305 per unit will be paid on or prior to Aug. 15, 1990, to the unitholders of record on June 30, 1990, including tendering unitholders.

The offer and withdrawal rights will expire at midnight, New York City Time, on Tuesday, Aug. 14, 1990, unless extended.

Accor S.A. will provide approximately $1.3 billion of the funds required for the offer to IBL Acquisition, L.P. through the combination of a loan and an equity investment. Accor will obtain these funds through a short-term credit agreement, which it has entered into with Banque Indosuez and Societe Generale, and under its existing working capital and credit lines.

Morgan Stanley & Co. is serving as dealer manager for the offer, and Georgeson & Company Inc. is serving as information agent for the offer.

Accor is a worldwide leader in the hotel, catering, voucher and tourist industries, with almost 3,000 restaurants and and more than 850 hotels in 60 countries. With the proposed acquisition of Motel 6, Accor will be the largest international hotel company on the basis of owning and operating hotels with more than 160,000 rooms. In 1990, it will have estimated consolidated sales of more than $4 billion and estimated net profits after tax of nearly $150 million.

CONTACT: Michael Claes, 212-614-5236, or Jerry Seeman, 212-614- 5135, both of Burson-Marsteller for Accor.

MORRIS TOWNSHIP, NJ (JULY 17) PR NEWSWIRE - Allied-Signal Aerospace Company announced today that AVENSA Airlines of Venezuela has selected the company's Bendix/King traffic alert and collision avoidance system (TCAS) for its airliners that fly routes into U.S. airspace.

Paul E. L. Gralnick, president of the Bendix/King Air Transport Avionics Division in Ft. Lauderdale, Fla., said, "AVENSA is the first Latin American airline to select the company's TCAS and joins a list of 28 airlines worldwide who have chosen Bendix/King." The division has commitments for more than 3,100 shipsets, about 55 percent of the announced TCAS market.

TCAS is an airborne collision avoidance system that operates independently of ground-based radar stations. It informs pilots of the location of aircraft in the vicinity, alerts them to potential threats and issues vertical course correction advisories, if the situation warrants.

The U.S. government has ordered all aircraft carrying more than 30 passengers flying in U.S. airspace be equipped with collision avoidance systems by the end of 1993.

Allied-Signal Aerospace Company is a unit of Allied-Signal Inc. (NYSE: ALD), an advanced technology company with businesses in aerospace, automotive products and engineered materials.

HARRISBURG, PA (JULY 18) PR NEWSWIRE - Keystone Financial, Inc. (NASDAQ: KSTN), a Pennsylvania multi-bank holding company with branches from the New York-to-Maryland borders, today reported record results for the second quarter and six months ended June 30, 1990.

Second quarter net income rose 13 percent to $8,072,000, or 69 cents per share, from $7,148,000, or 61 cents per share, for the same period last year. For the six months, net income increased to $15,742,000, or $1.35 per share, from $14,420,000, or $1.21 per share, for the first half of 1989, a 12 percent increase in earnings per share.

"We are highly gratified by our continuing strong results," Carl L. Campbell, president and chief executive officer, said. "Strong asset quality remains the cornerstone of our performance. Prudent lending policies coupled with making loans within our own diversified market area have contributed to the high quality of Keystone's assets. We look forward to the challenge of continuing to improve in light of the uncertain economic environment that may lie ahead," he concluded.

Assets at June 30, 1990, totaled $2,614,308,000 vs. $2,530,848,000 at the same date last year. Deposits rose to $2,286,972,000 at mid-year from $2,214,021,000 at June 30, 1989. Loans increased to $1,789,570,000 from

$1,678,493,000 during the same period. At the close of the first half, return on average assets was 1.23 percent and return on average equity was 15.24 percent.

Keystone Financial has three member banks -- Pennsylvania National Bank, Pottsville; Northern Central Bank, Williamsport, and Mid-State Bank, Altoona -- which operate 92 community offices in 20 Pennsylvania counties.

#90199p5795 07/18/1990 ~PR Newswire

ST. LOUIS (JULY 18) PR NEWSWIRE - McDonnell Douglas (NYSE: MD) earned $57 million or $1.49 per share in the second quarter of 1990, including an after tax gain of $16 million or 42 cents per share from the sale of MDCUs North American Field Service business. This compares with a net loss of $48 million or $1.25 a share in the second quarter of 1989. Revenues were $4.119 billion in the second quarter of 1990 compared with $3.370 billion in the second quarter of 1989.

All three programs in the transport aircraft segment showed progress during the quarter. A total of 34 MD-80s were delivered- -the most ever for a second quarter, returning this program to profitability. The MD-11 continued to make good progress in its flight test program. Certification and first deliveries are still expected by the end of the year. The C-17 continues to make its revised assembly milestones leading to its scheduled first flight in the first half of next year.

There were no write-downs in any of the large fixed price development programs (the A-12, the T-45TS, and the C-17).

McDonnell Douglas has continued to book the A-12 development contract at break even, based on an updated estimate of costs to complete. This estimate includes actions underway both to reduce costs and to obtain reimbursement from the Navy for claims now being prepared by the company.

McDonnell Douglas is also making claims for reimbursement for improvements that are now being made to the T-45 trainer aircraft for the U.S. Navy.

These claims are expected to offset the loss that would otherwise occur due to higher estimates of costs to complete T-45 Training System contracts.

The transport aircraft segment reported an operating loss of $33 million in the second quarter due to the continuing high level of development costs on the MD-11. This compares with a loss of $152 million in the second quarter of 1989, which included $93 million in write-offs on the C-17 and DC/KC-10 programs and a $34 million operating loss of the MD-80 program.

Increased revenues and improved earnings in the missiles, space and electronic systems segment reflect increased work on Space Station Freedom the space shuttle, and two successful commercial launches of the Delta II rocket. Improvements in these programs outweighed lower earnings on several highly competitive missile programs.

Operating earnings in the combat aircraft segment were down because of continued high costs in the AH-64 Apache helicopter program and production delays in the AV-8B Harrier II, caused by a lengthy strike at British Aerospace, the principal subcontractor on the program.

Net earnings for the six months ended June 30, 1990 were $59 million or $1.54 per share on revenues of $7.944 billion, compared to net earnings of $121 million or $3.18 per share on revenues of $6.586 billion in the first half of 1989. However, earnings in 1989's first half included a positive adjustment of $179 million in the first quarter resulting from the adoption of a new accounting standard for income taxes. Excluding this adjustment, MDC lost $58 million or $1.50 per share for the first six months of 1989.

NORTHBROOK, ILL. (JULY 18) PR NEWSWIRE - George D. Kennedy, chairman and chief executive officer of IMCERA Group Inc. (NYSE: IMA), has announced his current intention to retire as CEO in October 1991, as chairman in October 1993 and as a director in 1997 under the mandatory board retirement policy.

These retirement dates are subject to any necessary approval from IMCERA's board of directors and/or shareholders.

Kennedy's comments came in a meeting with corporate staff employees where he formally introduced IMCERA's new president and chief operating officer,

Dr. M. Blakeman Ingle, 48, who was elected to the position effective July 2. Dr. Ingle, previously an IMCERA executive vice president, continues as president of the company's Pitman-Moore unit until a successor is named.

"Dr. Ingle's election is a major step in the orderly transition of the leadership of the corporation," said Kennedy. "Historically, the company has operated under this succession plan."

Kennedy, 64, was elected CEO in 1983 and chairman in 1986 and has been a member of the company's board of directors since 1975.

IMCERA, formerly International Minerals & Chemical Corporation, traditionally holds its annual meeting of shareholders in October. The company does not have a mandatory retirement age for its CEO.

IMCERA, with projected fiscal 1990 net sales of approximately $1.4 billion has three operating companies -- Mallinckrodt Medical, Mallinckrodt Specialty Chemicals and Pitman-Moore. IMCERA also owns approximately 38 percent of the common stock of IMC Fertilizer Group, Inc.

#90199p5800 07/18/1990 ~PR Newswire

PERKASIE, PA (JULY 18) PR NEWSWIRE - Independence Bancorp (OTC: INBC) today reported net income of $6.2 million for the three months ended June 30, 1990, compared with $1.4 million a year ago. Primary earnings per share were $0.56, compared with $0.13 a year ago, while fully diluted earnings per share were $0.55 versus $0.13 for the same periods. Second quarter 1989 earnings were affected by a one-time state tax expense and securities sales.

Net income for the six-month period ended June 30, 1990, was $12.4 million compared with $6.8 million a year ago. Primary and fully diluted earnings per share were $1.12 and $1.09 compared with $0.64 a year ago.

Total loans were $1.64 billion at June 30, 1990, compared with $1.68 billion a year ago. Total deposits were $2.22 billion compared with $2.24 billion. Deposit and loan totals reflect the May 1, 1990 sale of Freedom Valley Bank. Freedom Valley Bank had loans of $66 million and deposits of $71 million at March 31, 1990.

Independence reported net interest income of $25.3 million for the second quarter of 1990 compared with $24.7 million a year ago. The net interest margin improved to 4.27 percent for the second quarter from 4.08 percent a year ago. Return on average assets was 0.95 percent for the quarter

compared with 0.21 percent in 1989, and return on average equity for the second quarter of 1990 was 12.73 percent compared with 3.06 percent a year ago.

Non-performing loans were $12.2 million at June 30, 1990, or 0.74 percent of loans and other real estate owned, compared with $11.8 million or 0.70 percent in the second quarter of 1989. Net charge-offs were $1.79 million for the quarter, or 0.43 percent of average total loans, compared with $1.19 million or 0.28 percent a year ago. The allowance for possible loan losses was $22.3 million at June 30, 1990, representing 1.35 percent of total loans, compared with 1.34 percent a year ago.

John D. Harding, President and Chief Executive Officer, commented, "While economic conditions have moderated loan demand, our basic banking operations continue to show good results, and the quality of our loan portfolio continues to be sound."

Non-interest income was $5.4 million for the June 30 quarter, compared with $2.0 million a year ago. This increase reflects securities losses of $3.7 million in the second quarter of 1989. There were no securities gains or losses in the second quarter of 1990.

Non-interest expense was $21.2 million for the 1990 quarter, compared with $24.1 million a year ago. Second quarter, 1989 expense includes a one-time state tax expense of $4.4 million for the Pennsylvania Bank Shares Tax.

The company's primary capital ratio was 8.32 percent and the total capital ratio was 10.84 percent at June 30, 1990.

The board of directors of Independence Bancorp on July 17, 1990 declared a quarterly cash dividend of 29 cents per share, payable on August 10 to shareholders of record on July 31. The dividend, unchanged from the previous quarter, pays an annual rate of $1.16. Independence has approximately 11 million shares outstanding.

Indepedence Bancorp is a $2.6 billion bank holding company for four community banks in eastern Pennsylvania: Bucks County Bank and Trust Company, Cheltenham Bank, Lehigh Valley Bank and Third National Bank and Trust Company of Scranton.

BRIDGEPORT, CT (JULY 18) PR NEWSWIRE - Citytrust Bancorp, Inc. (NYSE: CYT), reported today a net loss of $21,261,000, or $5.09 per share, for the quarter ended June 30, 1990. These results compared to a net loss of $34,760,000, or $8.37 per share, for the second quarter of 1989.

"The second quarter loss was attributable to a provision of $17.8 million to the company's allowance for possible credit losses, writedowns of other real estate owned properties of $3.5 million, and lost interest income and collection expenses related to a high level of non-performing assets resulting from the continued deterioration of the Northeast real estate market," said George F. Taylor, chairman of the board and chief executive officer.

As of June 30, non-performing assets stood at $297 million while the allowance for possible credit losses was $85 million. "Our non-performing assets rose $12 million during the quarter - the smallest increase in the past 15 months," Taylor commented. "Our workout task force continues to make progress, with resolutions totaling approximately $100 million in the first half of 1990 following $120 million in resolutions during all of 1989," he said.

For the first half of 1990, the company had a net loss of $28,656,000, or $6.88 per share, compared to a net loss of $28,285,000, or $6.81 per share, in the first half of last year.

The second quarter loss was partially reduced by a one-time gain of $3.4 million from the sale of the company's credit card portfolio. This sale was part of Citytrust's previously announced plan to increase capital and reduce assets. Also, the company augmented its cost containment efforts through further staff reductions.

Assets as of June 30 were $2.2 billion, a decline of $186 million from March 31. "This is part of a conscious program of asset reduction to strengthen our capital position, improve credit quality and eliminate any dependence on short-term volatile liabilities," Taylor explained.

As a result, total deposits were $2.1 billion as of June 30, $188 million below the level as of March 31. "The lower level of deposits was attributable to declines in both brokered deposits and large denomination time certificates," he said.

Shareholders' equity was $38 million as of June 30, compared to $59 million as of March 31. Book value per share was $9.13, compared to $14.24 as of March 31.

Citytrust Bancorp, Inc., is an independent Connecticut bank holding company. Its subsidiary, Citytrust, serves major markets throughout Connecticut and high-potential growth areas in New York through 46 retail branches and ten commercial lending offices.

#90199p5804 07/18/1990 ~PR Newswire

SOUTH BEND, IN (JULY 18) PR NEWSWIRE - 1st Source Corporation (NASDAQ: SRCE) today reported net income of $2.9 million for the second quarter of 1990, an increase of 14.2 percent over the $2.5 million reported for the second quarter of 1989. It was the eleventh consecutive quarter in which 1st Source's net income exceeded that of the comparable quarter a year earlier.

For the first six months of 1990, net income of 1st Source Corporation, parent company of 1st Source Bank, was $5.7 million, up 14.7 percent from the almost $5 million of the first six months a year ago.

Net income per share of common stock was $.78 for the second quarter of 1990, an increase of 21.9 percent over the $.64 of the second quarter of 1989.

Net income per share of common stock for the first six months of 1990 was $1.53, up 22.4 percent from the $1.25 of the comparable period of 1989. These results take into account a 10 percent stock dividend declared in January 1990.

Ernestine M. Raclin, chairman of the board, said, "We're especially pleased that the favorable results are based on solid, across-the-board achievements. 1st Source's focus as a locally owned and managed bank responsive to the needs of the Michiana area has continued to strengthen its leadership in the strong regional market."

Christopher J. Murphy, president, said, "The strong performance is a direct result of the overall success of 1st Source people in implementing long-term strategies that emphasize superior customer service, strong credit quality and rigorous cost control."

According to Raclin, the 1st Source board of directors has approved a cash dividend for the second quarter of $.12 per share payable August 15, 1990, to shareholders of record August 6, 1990.

As of June 30, 1990, common shareholders' equity was $81.9 million, an increase of 13 percent from the $72.4 million of a year earlier. Total assets grew from $1.15 billion at the end of 1989's second quarter to $1.19 billion at the end of the second quarter of 1990.

Deposits, totaled $978.5 million on June 30, 1990, up from $959.9 million a year earlier. During the same period, total loans increased to $764 million from $762.7 million.

The 1st Source reserve for loan losses as of June 30, 1990, was $12.6 million, or 1.65 percent of total loans, compared to $12 million, or 1.59 percent, as of Dec. 31, 1989. The ratio of nonperforming assets to net loans was 1.06 percent at the end of 1990's first half compared to 1.19 percent at the end of 1989.

1st Source Corporation has five subsidiaries: 1st Source Bank, 1st Source Bank of Starke County; 1st Source Capital Corporation; 1st Source Leasing and 1st Source Insurance. In addition to its NASDAQ listing, 1st Source stock appears in the national market system tables in many daily newspapers under the code name "1stSource."

Marketmakers in 1st Source shares are William Blair & Company, The Chicago Corporation, City Securities Corporation, Edward D. Jones & Company, Raffensperger Hughes & Co., Inc. and Roney and Company.

#90199p5807 07/18/1990 ~PR Newswire

SOMERVILLE, N.J. (JULY 18) PR NEWSWIRE - Unimed, Inc. (NASDAQ: UMED) reports that treatment with Marinol(R) (dronabinol) resulted in weight gain in patients with HIV infections (AIDS and AIDS- related complex, or ARC). Marinol is currently marketed in the U.S. by Roxane Laboratories, Inc., a member of the worldwide Boehringer Ingelheim group of companies, for the treatment of nausea and vomiting associated with cancer chemotherapy. Marinol is also approved for marketing in Canada and Israel.

Marinol produced a positive response in 9 out of 10 AIDS or ARC patients studied by Dr. Robert Gorter of San Francisco General Hospital. While using Marinol, 70 percent of patients gained weight and 20 percent had a reduced rate of weight loss. Prior to treatment with Marinol, patients were losing an average of two pounds per month. During treatment, patients weight gain averaged 1.2 pounds per month.

Results were presented by Terry F. Plasse, M.D., Unimed's director of oncology research, in Greece on July 9 at the International Conference on Cannabis and Cannabinoids. Commenting on the results of this study, Dr. Plasse said, "Weight gain or maintenance of weight should allow AIDS patients to better tolerate other treatments and theoretically, should help survival," Unimed and Roxane Laboratories have recently initiated additional studies for this indication.

Dr. Plasse also reported that a separate study showed that the optimal dose of Marinol increased the appetite of cancer patients by almost 50 percent. Over 70 percent of these patients had an increase in appetite and reported feeling better. During treatment with Marinol, the rate of weight loss in these patients was reduced by almost one pound per month. Marinol was well tolerated and produced very few side effects.

Harold J. Tenoso, Ph.D., president and chief executive officer of Unimed, said, "We are encouraged by these early results and plan to carry through with our development program as rapidly as possible. Appetite stimulation in cancer and AIDS patients would be an important new indication for Marinol and would significantly expand its market."

Unimed, Inc. is a pharmaceutical company specializing in the early acquisition, development and marketing of new cancer therapeutic compounds. With its unique "technology management" strategy, the company bridges the gap between university research centers and pharmaceutical manufacturers to bring promising new therapeutics to market.

#90199p5812 07/18/1990 ~PR Newswire

PHILADELPHIA (JULY 18) PR NEWSWIRE - Philadelphia Electric Co. (NYSE: PE) said today that more than two-thirds of the electricity the company produced in the first six months of 1990 -- 73 percent -- was generated by nuclear power.

The company's target is 67 percent for the year. Joseph F. Paquette Jr., PE chairman and chief executive officer, said the fuel cost to generate the 12.7 billion kilowatt-hours (kwh) of electricity produced by nuclear power during the first half of the year was approximately $350 million less than the cost to produce the same amount of electricity with oil-fired generation.

Through June, just 4 percent of PE's power was produced by oil. Paquette said that with two-thirds of PE's generation coming from nuclear power, the company is less dependent on burning fossil fuels, such as coal, which emits pollutants that contribute to the environmental problems of global warming and acid rain and require expensive air pollution control systems.

He said the high nuclear output was due to the continued good performance of the company's six nuclear reactors.

The four units operated by PE, two at the Peach Bottom Atomic Power Station in York County and two at the Limerick Generating Station in Montgomery County, combined to operate at 79.5 percent of full capacity for the first half of the year.

In 1989, the average capacity factor for all the boiling water reactors in the United States was 57.6 percent.

All six units, including two partially owned by PE and operated by Public Service Electric and Gas Co. at the Salem Generating Station in New Jersey combined to operate at 69.9 percent of full capacity.

PE's generation projections for the year are 67 percent nuclear, 19 percent coal, 5 percent oil, 4 percent hydro-electric and 5 percent

purchased power from the region's power pool.

Through June, actual generation was 73 percent nuclear, 18 percent coal, 6 percent hydro, 4 percent oil, with PE selling 1 percent of its output to the power pool.

#90199p5819 07/18/1990 ~PR Newswire

NEWTON, IOWA (JULY 18) PR NEWSWIRE - Maytag Corporation's (NYSE: MYG) net income in the three months ended June 30 rose 7.7 percent from last year's second quarter due principally to a lower effective tax rate plus significant improvements in operating margins for the firm's North American major appliance business. The latter was partly offset by decreased margins for other business components. As reported today, Maytag's net income for the quarter was $30.4 million, or 29 cents a share compared to last year's second quarter net of $28.2 million, or 27 cents a share. The effective tax rate in this year's second quarter was 37 percent, down from 40 percent in the second quarter of 1989.

Maytag's consolidated sales in the quarter totaled $788.5 million, off from $813.5 million in last year's second period, but operating income for the period increased to $67.6 million, versus $67.4 million a year ago.

Commenting on the quarter, Maytag's Chairman and CEO Daniel J. Krumm said, "Overall, we performed very well in a relatively soft business climate. Our higher operating income for major appliances in North America is directly attributable to improvements in production efficiencies, cost control programs and the price increases we have successfully implemented on a number of products."

He further explained, "The majority of our business is cyclical in nature, and after several very strong years, the industries in which we compete are currently experiencing slower sales. This will eventually pass, and in the meantime we continue to seek out ways to maintain and improve operating margins."

Krumm said April was a particularly slow month, but the corporation's major appliance business in this country rebounded in June. For the year as a whole, Krumm said, "Industry-wide sales of major appliances will probably be down about 2 percent from 1989 and floor care sales should be approximately the same as last year's record level. In both cases, we expect our companies to out-perform the industry."

Maytag Corporation consists of nine companies with 26 manufacturing operations in eight countries and approximately 25,000 employees. Its

appliance brands include Maytag, Magic Chef, Hoover, Jenn-Air, Admiral, Hardwick and Norge. The vending equipment brand is Dixie-Narco.

#90199p5820 07/18/1990 ~PR Newswire

GOLDEN, CO (JULY 18) PR NEWSWIRE - Coors Brewing Co. today announced changes in several key management positions in the brewing operations area.

Norman Kuhl, vice president and plant manager of Coors' Shenandoah Brewery will assume responsibility for the company's newly acquired Memphis brewery. He will be replaced at Shenandoah by Rex Lester, vice president of Logistics in Golden. Taking on much of Lester's current responsibilities will be Don Brown, who is promoted to vice president of operations planning and warehouse. The transition into their new assignments will begin immediately.

"All three gentlemen have experiences that uniquely qualify them for their new positions," said Al Babb, executive vice president, plant operations. "The Shenandoah plant is a jewel and Norm has done an excellent job from overseeing the start-up to handling the ongoing operations. That experience along with his varied assignments in Golden make him the best choice for Memphis."

Kuhl, 50, joined Coors in 1963 and has held several positions including plant traffic coordinator, warehouse director, vice president brewing, vice president packaging and warehouse, and finally the Shenandoah position in 1985.

"Rex Lester's experience in planning and scheduling support for the brewing operations coupled with his effective communications skills make him well suited for the multifaceted role of running Shenandoah," Babb said.

During Lester's 20 years with Coors, he has been manager of warehouse maintenance and vice president of operations services. He was appointed to his present position in 1983.

"Don Brown has strong engineering and project management experience and wonderful customer-oriented skills that will be invaluable for his new position," said Babb.

Brown, 46, joined Coors in 1982 as director of corporate project management and last year assumed responsibility of project controls as well. He has managed the engineering, procurement and construction services of projects outside of Golden such as Shenandoah and the current aluminum rolling mill project in San Antonio, Texas.

GOLDEN, CO (JULY 18) PR NEWSWIRE - Coors Brewery Co. today announced the appointment of Rex Lester as vice president and plant manager for the Shenandoah Brewery near Elkton, Va. Lester will replace Norman Kuhl, the current Shenandoah plant manager, who will assume responsibility for Coors' newly acquired Memphis brewery.

Lester, a 20 year Coors veteran, has most recently been vice president of Logistics at the company's Golden headquarters.

"Rex has been outstanding in planning, scheduling and transportation support for the brewing operations and integrating that perspective with the company's operating goals," said Al Babb, executive vice president, plant operations. "His experience in that arena coupled with his effective communication skills make him well suited for the multifaceted role of running our Shenandoah facility."

Lester, 44, has served as Coors' manager of warehouse maintenance, director and vice president of operations services, and his current position as vice president of logistics, which he's held since 1984. He has a bachelor's degree in mechanical engineering from Oklahoma State University, and graduated from the Executive MBA Program at the University of Denver.

Lester will relocate to the Shenandoah Valley area with his wife, Janet. The transition into his new assignment will begin immediately.

Coors Brewing, the nation's third-largest brewer, opened its Shenandoah facility in 1987. The plant employs approximately 350 people and packages 2.5 million barrels of Coors products annually.

PARK RIDGE, IL (JULY 18) PR NEWSWIRE - The Brand Companies Inc. (NASDAQ: BRAN) today reported record second quarter net income of $3.6 million, up 50 percent from $2.4 million in the same quarter of 1989. Earnings per share increased to $.18 per share, compared with $.13 per share in the year-ago period. Revenue increased 47 percent to $94.8 million, compared

with $64.7 million in last year's March-June quarter.

For the six months ended June 30, 1990, Brand earned $6.8 million, an increase of 84 percent over the $3.7 million earned in the first six months of last year. Earnings per share totaled $.33, up from $.20 in the six-month period one year earlier. Revenue increased to $183.9 million, a 69 percent increase over $109.1 million achieved in the first six months of 1989.

Earnings per-share figures for all periods have been restated to reflect a 2-for-1 split in the form in a stock dividend distributed on July 9, 1990.

Brand's backlog at June 30, 1990, amounted to $162 million, of which $59 million is related to fixed price asbestos abatement projects. Included in the above backlog is Brand management's estimate of approximately $84 million of on-hand time and material work encompassing all of Brand's businesses.

Brand and its subsidiaries are specialty contractors concentrating in such areas as asbestos abatement, technical services, manufacturing of high performance materials and new construction.

ST. PAUL, MN (JULY 18) PR NEWSWIRE - Empi, Inc. (NASDAQ: EMPI), a major medical device manufacturer, today reported record revenues and a 62 percent increase in net income for the three months ended June 30. In addition, the company also reported record revenues and higher net income for the 1990 first half.

For the second quarter, net sales increased 28 percent to $4.0 million from $3.1 million in the comparable 1989 period. Net income totaled $208,000, or $.11 per share, up 62 percent from $128,000, or $.07 cents per share, last year.

For the six months ended June 30, net sales rose 27 percent to $7.6 million from $6.0 million in the comparable period last year. Net income for the first half of the year totaled $416,000, or $.22 per share, up from $221,000, or $.12 per share, in 1989.

Empi President Mike Connoy said, "Our third consecutive quarter of record revenues can be attributed to continued strength in our core pain control business and outstanding performance by our sales force, which continues to grow as we add new sales territories."

Sales of Empi's TENS and NMS devices for pain control and rehabilitation were up 12 percent and 48 percent, respectively, over the second quarter of 1989. Sales of accessories for those products increased 35 percent from the same period last year.

Connoy said, "The percentage of our sales coming from new products continues to grow and rose significantly from the first quarter of 1990. Expenses incurred in marketing those products, coupled with geographic expansion of our sales coverage, contributed to higher operating expenses for the period. We expect these investments to help Empi maintain the sales momentum we've developed over the past year."

In the new products arena, Empi currently is marketing the MicroFET(TM), a hand-held muscle impairment testing system, and EVAL(TM), the first computerized hand evaluation system.

Empi develops, manufactures and distributes biomedical devices, computer-based diagnostic systems and accessories for the physical medicine, orthopedic, rehabilitation and neurology markets. The company's shares are traded on the NASDAQ national market system under the symbol EMPI.

MONTREAL (JULY 18) PR NEWSWIRE - Air Canada will introduce an entirely smoke-free environment on all its flights between North America and Europe beginning Oct. 1, 1990.

The airline will thus become the first international airline to offer only nonsmoking seats on all its flights to both European and North American destinations.

"Air Canada remains a pioneer among international airlines in the establishment of smoke-free flights," said Leo Desrochers, the airline's executive vice president, marketing, sales and service.

In April 1986, Air Canada became the first major airline to introduce totally nonsmoking flights in North America. In September 1988, the airline implemented a total smoking ban on all its flights within North America.

The airline's decision to offer only nonsmoking flights on its flights to Europe as well as its North American routes comes almost three years in advance of a Canadian Department of Transport regulation that will require all flights on Canadian-based carriers to be completely smoke-free.

"Some 99.8 percent of Air Canada's seats will be entirely nonsmoking as of Oct. 1," said Desrochers. He added that the airline is broadening its nonsmoking policy in response to customer demand and the changing preference of travelers.

The only exception to Air Canada's smoking ban will be its flights from London to Bombay and Singapore, where a higher proportion of smokers are found. However, the number of seats reserved for smokers on these flights has already been reduced by 25 percent.

MANDALUYONG, METRO MANILA, PHILIPPINES (JULY 18,) PR NEWSWIRE - Dennis R. Belmonte, president and chief executive officer of Benguet Corporation, reported today that the earthquake which hit the northern and central Luzon regions of the Philippines on July 16, 1990, did not cause significant damage to the company's mining operations in Camarines Norte and Zambales except for unverified reports that a portion of the shipping pier at its Masinloc Chromite operation is under water.

Thus, all operations at the Dizon Copper/Gold Mine, the Masinloc Chrome Mine and the Paracale Gold Mine continue without interruption.

However, the company's Benguet gold operations in Itogon, near Baguio in Benguet Province, where the highest intensity was recorded, were suspended due to lack of power as a transformer at the substation was damaged and all surface power lines from Balatoc to Acupan, Antamok and Baco Kelly were grounded. The power shortage caused water inflow in underground tunnels in its Acupan mines. An assessment and recovery team was dispatched to inspect the extent of damage. Although no major infrastructures were affected, there was substantial damage to houses, bunk houses and structures.

There were also reports of major land slides at all the access roads to the camp sites, shortage of water supply in Balatoc due to damage to the major tanks, and 18 cases of injuries. Dependents, employees and non-employees residing in the campsites have been moved out of affected

areas and those injured are being treated at Balatoc's camp hospital. No fatalities were reported.

Belmonte gave assurance that restoration of power supply and repairs on grounded surface power lines and road clearing at the Benguet gold operations are currently underway.

MELBOURNE, FLA. (JULY 18) PR NEWSWIRE - Harris Corporation (NYSE: HRS) today announced the formation of a subsidiary to expand its role in the growing video teleconferencing market.

The subsidiary, Harris Video Communication Systems, Inc., is headquartered in Melbourne and will develop, market, and service current and future video teleconferencing equipment for commercial and government customers.

"Video teleconferencing is becoming a valuable tool in business, education and government. Forming a subsidiary allows us to increase our focus on a market that is expanding rapidly," said Jack McKay, director of operations for the subsidiary.

The subsidiary is being formed from Harris' Electronic Systems Sector, which recently introduced a unique video teleconferencing system called Anamix Personal Communications.

Anamix is the first personal computer-based video teleconferencing system that links up to eight people at different locations. The system allows users to view full-motion images, listen to conversations, and share text or graphics all at the same time.

Ranging from $85,000 for a three-unit system to $200,000 for a full eight-unit system, Anamix enables users to view from one to four people at a time, produce text-spreadsheets or graphics in any of all of the four split-screen grids, or let a voice activation command make it so only the person currently speaking appears on the screen.

"Desktop video teleconferencing helps make teleconferencing practical for many people for the first time. We believe this is where the future of video teleconferencing is going to be," said McKay.

The video teleconferencing industry is expected to grow nearly 100 percent annually during the next few years, with industrywide sales exceeding $1 billion by 1995.

Harris Corporation, with worldwide sales of more than $3 billion, is focused on four major businesses: advanced electronic systems, communications, semiconductors, and an office-equipment distribution network.

RICHMOND, VA (JULY 18) PR NEWSWIRE - American Filtrona Corporation (NASDAQ-NMS: AFIL) reported today that results for the first half of 1990 compared to the same 1989 period were: net sales of $73.0 million, down 3 percent from $75.0 million; pretax income of $5.8 million, down 10 percent from $6.5 million; net income of $3.6 million, down 10 percent from $4.1 million; and earnings per share of $.98, down 11 percent from $1.10.

For the second quarter this year compared with the corresponding 1989 period, net sales of $36.2 million were down 5 percent from $38.1 million; pretax income of $2.9 million was down 9 percent from $3.1 million; net income of $1.8 million was down 9 percent from $2.0 million; and earnings per share of 48 cents were down 9 percent from 53 cents.

Operating results for the second quarter were similar to those experienced in the first quarter. The bonded fibers segment continued to have lower than expected sales of cigarette filters compared to last year's record performance. Results in the industrial plastics extrusion operations again were good and the industrial filtration segment made further progress.

The Board of Directors increased the quarterly dividend by 5 percent to 22.5 cents per share payable on August 25, 1990 to shareholders of record as of August 10, 1990.

Unaudited amounts (in thousands) for the three months and six months ended June 30 follow:

#90199p5836 07/18/1990 ~PR Newswire

BETHLEHEM, PA. (JULY 18) PR NEWSWIRE - Union Pacific Corp. (NYSE: UNP) today reported second quarter earnings per share of $1.53, compared with $1.41 in the second quarter of 1989.

Net income of $153 million was up $1 million over last year. Operating income improved 13 percent to $338 million. The stronger earnings per share primarily reflects the shareholder benefits of the corporation's stock repurchase program.

Union Pacific Railroad increased operating earnings 16 percent and net income 4 percent to $141 million, despite a softer economy and the non-recurrence of 1989's favorable retroactive tax claims. This was the railroad's 19th consecutive record quarter. Carloadings were up 2 percent, with the major gains in intermodal traffic (up 9 percent), chemicals (up 3 percent), and autos (up 1 percent). Coal was down 3 percent as a result of flooding which restricted shipments. The railroad reduced its second quarter operating ratio over two-and-a-half points to 79.4 percent as a result of its continuing emphasis on cost cutting and productivity improvements.

Union Pacific Resources had earnings of $43 million, compared with $55 million in the second quarter of 1989. Volumes of all products were up, averaging a 25 percent increase. Natural gas production was up by 40 percent, with new discoveries coming on stream in the Gulf of Mexico and from infill drilling programs in Texas. These gains overcame price declines in crude oil and natural gas of 15 percent and 13 percent, respectively. In addition to lower prices and fewer gas settlements, Resources' income was impacted by higher volume-related operating costs and a substantially expanded exploration program. Minerals operating income was up 10 percent to $23 million.

Overnite Transportation increased its second quarter earnings before goodwill from $16 million to $18 million. Total volume was up 9 percent, with less-than-truckload traffic increasing 11 percent. Average prices were up 4 percent. A June rate increase authorized by the Interstate Commerce Commission should improve the industry's price structure. Overnite reduced its operating ratio from the first quarter by 7 points to 87.4 percent.

USPCI increased second quarter earnings before goodwill from $2 million to a record $5 million. This improvement is primarily due to strong gains in the disposal and remediation businesses.

Union Pacific Realty raised its second quarter earnings substantially -- from $1 million to $13 million -- as part of a program to liquidate its holdings by the end of 1991.

CARSON, CA (JULY 18) PR NEWSWIRE - All Infiniti dealers scored "in the money" when the luxury car division recently awarded its second round of Infiniti Customer Satisfaction Fund checks, it was announced today by William R. Bruce, vice president and general manager of Infiniti.

Infiniti's Customer Satisfaction Fund distributes quarterly awards based on customers' ratings of a dealership sales and service, in addition to evaluations made by mystery shoppers.

To qualify for the fund, dealers must score an 85 or higher. During the second quarter (April - June), all 63 operational dealers received checks; 62 dealers scored over 90, with the top dealer scoring 98. Thirty dealers qualified for the top cash award of $25,000, a 10 percent increase over the first quarter.

"We believe that if we treat our customers with respect, create a comfortable atmosphere, pay attention to detail, and, above all, take care of their needs, Infiniti will be number one in customer satisfaction," said Bruce.

CONCORD, NC (JULY 18) PR NEWSWIRE - First Charter Corporation (NASDAQ-NMS: FCTR), Concord, North Carolina, the holding company for First Charter National Bank, has announced unaudited results for the three and six month periods ended June 30, 1990.

Net income for the three month period ended June 30, 1990 was $697,551 versus $546,704 for the comparable period in 1989, which represents a 27.6 percent increase. Primary and fully diluted earnings per share for the period were $.24, compared to $.18 for the same period in 1989. The increase in net income is attributable to a nonrecurring loss in 1989. Net income from continuing operations decreased 5.7 percent from 1989. Primary and fully diluted earnings per share from continuing operations decreased from $.25 in 1989 to $.24 for 1990.

Net income for the six months ended June 30, 1990 ws $1,470,933 versus $1,277,156 for the comparable period in 1989, for a 15.2 percent increase. Primary and fully diluted earnings per share for the period were $.50 compared to $.43 for the same period in 1989. Net income from continuing operations remained relatively unchanged from 1989. Primary and fully

diluted earnings per share from continuing operations were $.50 at June 30 1990 and June 30, 1989.

On an annualized basis, these results represent a return on average assets of 1.23 percent versus 1.13 percent and a return on average equity of 10.60 percent versus 9.40 percent.

Total assets at June 30, 1990 were $235,035,480, down 9.6 percent from June 30, 1989. Total loans increased 6.8 percent to $150,351,944, while total deposits were up 10.7 percent to $194,171,763 over June 30, 1989. Total shareholders' equity was $28,172,696 at June 30, 1990 which represents a book value per share of $9.65.

The Board of Directors declared today a dividend of $.09 per share to be paid on October 15, 1990, to shareholders of record on September 21, 1990.

First Charter National Bank, the principal subsidiary of First Charter Corporation with headquarters in Concord, N.C., provides a full range of retail and commerical banking services. The Trust Department also offers a broad range of personal and employee benefit services. Markets served by the bank include Cabarrus, northern Mecklenburg and southern Rowan Counties.

The Common Stock for First Charter Corporation is traded on the NASDAQ National Market System under the symbol FCTR. NASD market makers include Dean Witter Reynolds, Inc., Interstate/Johnson Lane Corporation, Koonce Securities, Inc. and The Robinson-Humphrey Company, Inc.

FORT WORTH, TX (JULY 18) PR NEWSWIRE - The Western Company of North America (NYSE: WSN) today reported net income for the 1990 second quarter of $.9 million, or $.07 per share, on revenues of $76.4 million. For the six months ended June 30, 1990, the company reported a net loss of $.6 million, or $.05 per share, on revenues of $149.0 million. The 1990 results compare favorably to the three and six months ended June 30, 1989, in which the company reported net losses of $3.9 million and $7.2 million on revenues of $51.4 million and $98.1 million, respectively. In the 1990 second quarter the company recognized an $.8 million extraordinary gain from retirement of indebtedness; as previously reported, the company recognized a similar $.8 million gain in the 1990 first quarter.

Utilization of the company's offshore drilling rigs improved to 91 percent in the second quarter, compared to 71 percent in the corresponding 1989

quarter and 85 percent in the 1990 first quarter. Additionally, average day-rates for the company's rig fleet improved modestly from the prior periods. All of the company's rigs are currently contracted, including seven in the Gulf of Mexico and six in international waters.

The Western Company of North America provides pressure pumping services which include cementing, fracturing and acidizing, and offshore drilling.

#90199p5849 07/18/1990 ~PR Newswire

ST. LOUIS (JULY 18) PR NEWSWIRE - General Dynamics Corporation (NYSE: GD) today reported a special charge against earnings for the second quarter of 1990 resulting in a loss for the quarter of $240.0 million, or $5.75 per share. Without the special charge, net earnings were $90.0 million, or $2.16 per share, on sales of $2.6 billion. Net earnings in 1989's second quarter were $58.4 million or $1.39 per share, on sales of $2.5 billion, reflecting a special after-tax charge in that quarter of $50.0 million or $1.20 per share.

The charge in this year's second quarter was a pre-tax sum of $500.0 million, representing $450 million of estimated cost overruns on the A-12 aircraft program for the U.S. Navy and $50 million of estimated cost overruns on the Sincgars radio contract with the U.S. Army. in after-tax dollars, the write-off is $330.0 million, or $7.91 per share.

The company's A-12 aircraft program is a full-scale development and initial production contract for the navy's new carrier-based advanced tactical aircraft. Both the company and McDonnell Douglas Corporation are parties to the contract with the navy and each has full responsibility to the navy for performance under the contract. Also, the company and McDonnell Douglas are parties to a teaming agreement in which profits and losses under the navy contract are shared equally.

The A-12 full scale development (FSD) portion of the contract was awarded in December 1987 with a ceiling price of $4.8 billion. As of this date, the two companies are less than halfway through the planned time period, while somewhat more than half of the ceiling price has been spent or committed. The charge to earnings includes reversal of the earnings previously recorded on this program of $24.0 million and 50 percent of

General Dynamics' present estimate of the team's anticipated cost in excess of (1) the $4.8 billion ceiling of the FSD contract and (2) the fixed price of the first initial production lot (lot 1). These costs will be incurred during the next several years.

The company and McDonnell Douglas are pursuing the preparation of claims. However, General Dynamics' charge to earnings does not include any estimated recoveries from such claims.

The A-12 contract provides for certain initial production options beyond lot 1, with contractual "not to exceed" prices. As General Dynamics does not recognize cost overruns until it is probable that they will occur, no losses on the initial production options beyond lot 1 are included in the charge to earnings.

"Despite these charges, I would like to emphasize that there are no 'technical showstoppers' in the A-12 program," said Stanley C. Pace, chairman and chief executive officer. "The industry team has designed an outstanding aircraft, which is significantly superior to the aircraft it replaces and which will meet the navy's operating requirements and needs."

#90199p5851 07/18/1990 ~PR Newswire

OAK BROOK, ILL. (JULY 18) PR NEWSWIRE - Chemical Waste Management, Inc. (NYSE: CHW) today reported record results for its second quarter, with net income of $43,081,000, up 24.9 percent from $34,479,000 in the second quarter of 1989; earnings per share rose 23.5 percent to $.21 per share, compared with $.17 in the year-ago quarter; revenue increased 21.9 percent to $270,446,000, compared with $221,802,000 in the April- June 1989 period. For the six months ended June 30, 1990, Chemical Waste Management earned $77,786,000, compared with $63,452,000 in the year-earlier period; $.38 per share, compared with $.31 per share in the first six months of 1989; and achieved revenue of $503,197,000, up from the $411,630,000 in the first half of 1989.

Dean L. Buntrock, chairman of the board, said the company's performance reflected "across-the-board strength in its operations, with both base business operations and site cleanup projects contributing to gains in the quarter."

Jerry E. Dempsey, president and chief executive officer of the company, said "the performance of Chem Waste during the first six months of 1990 has continued the company's leadership position in the hazardous waste management industry. We see further business opportunities for the

balance of this year as a result of stricter federal environmental regulations which ban land disposal of untreated hazardous waste," Dempsey stated.

#90199p5852 07/18/1990 ~PR Newswire

NEW YORK (JULY 18) PR NEWSWIRE - Crane Co. (NYSE: CR) reported earnings per share of 50 cents for the second quarter ended June 30, 1990, compared to 49 cents in 1989. First-half results were 92 cents, vs. 82 cents per share in 1989, a 12 percent increase.

As previously reported, due to the more than 50 percent increase in the company's stock price over the last 13 months, 108,300 shares of restricted stock issued under the company's restricted stock award plan vested on an accelerated basis, resulting in a second-quarter non-cash charge to earnings of 6 cents per share.

Sales for the second quarter of 1990 were $380.4 million compared to $383.9 million for the same period in 1989. Net income was essentially equal to last year's second-quarter level of $16.1 million.

First-half sales of $732 million equalled last year's level for the same period, and net income was $29.6 million vs. $26.8 million, a 10 percent increase.

Engineered industrial products, Crane's largest business segment, had sales of $198.3 million for the second quarter of 1990 compared to $197.7 million last year. Operating profit for the same period improved by 14 percent to $29.4 million. Sales and profits at National Rejectors, GmbH were up significantly due in part to the upgrading of coin-changing mechanisms for the vending market in Germany. The company's domestic valve business, after several years of losses, had a profitable second quarter resulting from cost reduction and consolidation programs implemented over the last year. Results of the engineered industrial products segment were further benefited by the acquisition of Lear Romec on Feb. 28, 1990. As forecast, Hydro-Aire sales and profits for the second quarter were down slightly compared to last year due to the impact on scheduled deliveries of a strike at one of its major customers. Results at Crane Canada's valve and plumbing businesses were lower than last year's second quarter, due to weak economic conditions in Canada and a building trades strike in Ontario.

Wholesale distribution, the company's second-quarter business segment, had sales of $186.9 million for the quarter ending June 30, 1990, compared to $192 million in 1989. Operating profit of $7 million was 17 percent below

last year's second quarter.

Operating profit was lower because of the negative impact of the Canadian economy, primarily the building trades strike in Ontario, on the Canada supply business and weak housing markets in the Northeast, Southern California and the mid-Atlantic regions affected Huttig's sales. However, higher margins continued to be realized during the second quarter at Palmer G. Lewis branches, as it continues its program of further integrating Huttig lines into its distribution system. Valve systems and controls continues to show increased sales and profits.

Crane Co. is a diversified manufacturer of engineered industrial products, serving niche markets in aerospace, fluid handling, automatic merchandising and the construction industry. Crane's wholesale distribution business serves the building products markets and industrial customers.

#90199p5856 07/18/1990 ~PR Newswire

SEATTLE (JULY 18) PR NEWSWIRE - NeoRx Corporation (NASDAQ: NERX) today

reported revenues for the third quarter ended June 30, 1990 of $268,000 vs. $1,771,000 recorded during the third quarter of fiscal 1989. Revenues for the nine months ended June 30, 1990 were $2,005,000, vs. $4,949,000 recorded in the comparable period of fiscal 1989.

Revenues in both the quarter and year to date periods consisted primarily of amounts received from Sterling Drug Inc. under a development and license agreement.

The fiscal 1990 third quarter loss of $3,752,000 ($.28 per share) increased modestly from a loss of $3,476,000 ($.24 per share) recorded in the comparable 1989 quarter.

The fiscal 1990 nine month loss of $13,794,000 ($.96 per share) increased from $11,046,000 ($.76 per share) reported for the same period in 1989. The 1990 nine month results include a previously reported restructuring charge of $1,410,000.

Total operating expenses for the quarter decreased 23 percent to $4,150,000 compared to $5,423,000 recorded in the prior year's third quarter. Operating expenses of $15,690,000 for the first nine months of fiscal 1990 decreased 6.1 percent from $16,779,000 for the comparable period in 1989.

"The lower revenues for the quarter were due entirely to our revised agreement with Sterling Drug under which Sterling covers only the expenses for clinical trials," said Paul Abrams, M.D., J.D., president and CEO of NeoRx.

"During this quarter, two studies required changes reflecting further progress but which delayed patient accrual. We are pleased that the studies are now progressing. The decreased revenues were almost exactly matched by decreased expenses compared to a year ago, the result of a previously reported restructuring. As a result, losses this quarter were only slightly larger than last year's third quarter," said Abrams.

NeoRx Corporation is developing monclonal antibody-based pharmaceutical products for in vivo detection and treatment of certain types of cancer. The company has five cancer clinical trials in progress and has filed for marketing approval with the FDA for two OncoTrac(R) imaging products to detect metastatic melanoma and small cell lung cancer.

#90199p5859 07/18/1990 ~PR Newswire

BOULDER, CO (JULY 18) PR NEWSWIRE - Cell Technology, Inc. (NASDAQ: CELL), the Colorado-based biotechnology firm specializing in the development of biologic response modifier (BRM) technology, today announced the results of an important study completed in collaboration with Verlyn M. Peterson, M.D., at the University of Colorado involving Pyrexol(TM), the company's general immunomodulator BRM application. The company also disclosed today the filing of a United States patent application to seek protection for the uses demonstrated in the Pyrexol study.

In collaboration with Dr. Peterson, the company today disclosed the results of a study indicating the ability of Pyrexol to boost the immune system subsequent to thermal injury. Utilizing a thermal stress mouse model to mimic the human physiological response to injury, the Pyrexol study demonstrated that several immune system cell populations, critical to the elimination of opportunistic infections in humans, are significantly boosted following treatment with Pyrexol.

Following severe burn injuries, certain elements of the human immune system are suppressed, resulting in an impaired ability of the body to combat opportunistic infections. The results of these studies suggest that Pyrexol can therapeutically boost the immune system to better enable the body to ward off these opportunistic infections.

The company's filing of this new U.S. patent application, also announced today, claims that Pyrexol increases the total number of circulating white cells in human blood due to an expansion of the granulocyte and monocyte populations in the body. The patent suggests that Pyrexol may significantly enhance the recovery of patients who experience intense trauma (due to either surgery or severe burns) through the stimulation of the patient's immune system.

Commenting on the importance of these scientific findings and the company's patent application filing, Dr. Frederick C. Pearson, the company's vice president-scientific operations, stated, "These developments confirm our belief that Pyrexol has a definite place in general immune modulatory activities. The excellent work performed by Dr. Peterson suggests that the immune system can be enhanced through this use of our BRM technology."

Cell Technology, Inc. is a biotechnology company specializing in the field of immunotherapy. The company's innovative BRM products are being developed to activate the body's own immune response to fight cancer, viral infections, and to act as a general immunomodulating agent.

#90199p5861 07/18/1990 ~PR Newswire

CHICAGO (JULY 18) PR NEWSWIRE - Continental Bank Corp. (NYSE: CBK) today reported a second-quarter net loss of $57 million, compared with net income of $64 million in the second quarter of 1989. The net loss was $1.35 per common share, compared with net income of $1.01 per common share for the same period last year.

The loss from continuing operations for the 1990 second quarter was $46 million, or $1.14 per common share, compared with income of $78 million, or $1.27 per common share, in the 1989 second quarter.

The establishment of a previously announced special pretax reserve of $48 million to cover the cost of eliminating certain product lines was the largest single factor affecting operating results. In addition, Continental incurred a loss of $21 million from the sale of long-held investment securities and recognized a gain of $15 million on the sale of real estate. In the second quarter of 1989, Continental recognized a real estate gain of $7 million.

In addition to the factors previously mentioned, the 1990 second quarter was adversely affected by lower net interest and other revenues, a higher provision for credit losses, and an increase in operating expenses excluding the special reserve.

"The entire financial services business is being hit by overcapacity and a general slowdown in demand," Chairman Thomas C. Theobald said. "We've already taken steps to adjust our product line to reflect customers' changing needs. We remain convinced that our business banking focus gives Continental a unique position for the long term."

For the first six months of 1990, Continental reported a net loss of $49,000, compared with net income of $140 million a year ago. Income from continuing operations totaled $16 million for the first six months of 1990, down from $171 million a year ago.

Continental Bank Corp. is a market-driven bank holding company devoted to serving corporations, institutional investors and individuals with complex financial requirements. Through its subsidiaries, the corporation arranges financing, makes markets, manages financial risk and processes cash and securities on behalf of its customers in key capital markets worldwide.

#90199p5862 07/18/1990 ~PR Newswire

ROCHESTER, NY (JULY 18) PR NEWSWIRE - Bausch & Lomb Incorporated (NYSE: BOL) reported today that revenues for the second quarter ended June 30, 1990 increased 11 percent to $352.5 million compared to $318.1 million a year ago. Net earnings for the quarter rose 15 percent to $31.5 million compared to $27.4 million, while earnings per share also advanced 15 percent to $1.05 from the prior year's $.91. For the first six months of 1990 revenues totaled $667.1 million, 12 percent above the prior year's $594.4 million. Net earnings of $54.0 million for the first half of 1990 increased 16 percent over the $46.6 million earned in 1989, and earnings per share rose 15 percent to $1.79 compared to $1.55.

In the company's healthcare segment, second quarter revenues totaled $204.6 million, a gain of 7 percent over the year-ago amount of $191.3 million. Healthcare segment sales for the 1990 first half rose 8 percent to $401.3 million compared to $370.6 million.

-- In Bausch & Lomb's personal health sector, revenue gains over the year-ago second quarter were led by higher sales of contact lens care and oral care products in foreign markets. Domestic sales in the personal health sector were hampered by inventory reduction in mass merchandise and department store channels of trade and slow market growth.

-- In the company's medical sector, worldwide sales of contact lenses rose 9 percent, as revenues outside the U.S. increased more than 15 percent for the quarter. Although sales in the domestic contact lens business were approximately even with a year ago, this was a major improvement from comparisons in the 1990 first quarter, and was indicative of a further stabilization in market pricing and excellent growth in shipments of SeeQuence(R) disposable contact lenses.

-- Revenues in the biomedical sector were modestly above the year- ago quarter.

The company's optics segment achieved a 17 percent increase in sales for the 1990 second quarter, as revenues amounted to $147.9 million compared to $126.8 million in 1989. Bausch & Lomb continued to experience excellent demand for sunglasses, with worldwide sales of those products rising more than 25 percent over the prior year's quarter. These gains more than offset a reduction in sales of sports optics and thin film coating services which resulted from weak market conditions. For the first six months of 1990 optics segment revenues amounted to $265.9 million, an increase of 19 percent over the 1989 amount of $223.8 million.

Consolidated operating earnings for the 1990 second quarter increased 11 percent to $64.1 million, a gain that was in line with the growth in consolidated sales. Operating earnings for the first six months of 1990

increased 12 percent to $115.8 million.

#90199p5864 07/18/1990 ~PR Newswire

ATLANTA (JULY 18) PR NEWSWIRE - Crawford & Co. (NYSE: CFD), a diversified service firm providing claims services, risk management services, health care management and risk control services to insurance companies, corporations and self-insured entities, today reported financial results for the second quarter 1990, ended June 30.

F.L. Minix, chairman and chief executive officer, stated that revenue from services provided totaled $109.8 million, an increase of nearly 20 percent over the second quarter 1989 revenue of $91.6 million. Pretax income was $13.1 million, an improvement of 11.4 percent over the comparable period of 1989, and net income was $8.2 million, a gain of 12 percent. Earnings per share were $0.46 for 1990 compared with $0.41 for 1989.

Revenue for the first half of 1990 was $220.4 million, up 28 percent over first half 1989 revenue of $172 million. Pretax income totaled $25 million, an improvement of 17 percent over the comparable period of 1989, and net income was $15.7 million, also a gain of 17 percent. Earnings per share were $0.89 for the first half of 1990, compared with $0.76 for 1989.

Minix stated that revenue from Healthcare Management Services during the second quarter 1990 increased by more than 30 percent over the second quarter of 1989. This resulted from continued strong demand for the company's vocational rehabilitation services and the increased contribution from newer utilization review and Sentinel provider bill audit services. Revenue derived from claims administration during the second quarter of 1990 gained 16 percent over the year-earlier period in spite of lower catastrophe-related revenue during the 1990 period.

Minix said that revenue from catastrophe-related services approximated $5.8 million during the second quarter 1990 as compared to $8.2 million during the second quarter of 1989. This reflected the substantial completion of Hurricane Hugo claim assignments and a lower level of activity on the Valdez, Alaska, oil spill. For the first half of 1990, however, catastrophe-related revenue approximated $18 million as compared to $10.5 million during the first half of 1989.

#90199p5865 07/18/1990 ~PR Newswire

CHICAGO (JULY 18) PR NEWSWIRE - In the second quarter of 1990, Whitman Corp. (NYSE: WH) had income from continuing operations of $35.3 million (25 cents a share) compared to $47.6 million (37 cents a share) last year, the company announced today. Net income was $32.9 million (23 cents a share) compared to $27.6 million (17 cents a share) one year ago.

Hussmann Corp.'s results are included in continuing operations for the quarter and the first six months. As previously announced, Whitman is considering the sale of Hussmann, and while negotiations continue, no decision has been reached.

For the quarter, operating income of Midas was up 13.1 percent over last year, and Pepsi General was up 5.5 percent. Even though Pet's sales were strong, it reported a decline of 2.2 percent in operating income from last year because of higher promotional expenditures.

Hussmann was off 35.5 percent because of a weak order condition in the second quarter. However, Hussmann's backlog of orders has improved substantially in recent weeks, and its second half should be considerably improved.

PALATINE, IL (JULY 18) PR NEWSWIRE - Square D Co. (NYSE: SQD), today reported second quarter net earnings were $34.2 million, up 6.3 percent over $32.2 million in 1989 and net earnings per common share were $1.40, up 9.4 percent over $1.28 a year ago. Sales were $406.5 million or 2.4 percent less than the $416.3 million a year ago.

For the six months ended June 30, 1990, Square D net earnings were $61.3 million, up 2.6 percent over the $59.8 million in 1989, and net earnings per common share were $2.49, a 5.1 percent increase from $2.37 last year. First half sales were $795.0 million, 1.9 percent less than the $810.0 million in 1989.

For the first half of 1990, earnings from continuing operations were $57.3 million compared with $59.3 million in 1989. Earnings per common share from continuing operations were $2.32 compared with $2.35 a year ago. Average shares outstanding for the six-month period were 23.3 million, compared to 25.2 million in the year earlier period.

Square D is a worldwide leader in industrial control and electrical distribution products, systems, and services and had 1989 sales from continuing operations of $1.60 billion.

#90199p5869 07/18/1990 ~PR Newswire

DALLAS (JULY 18) PR NEWSWIRE - International Broadcast Systems, Ltd. (NASDAQ: IBTVA) announced today that for the quarter ended June 30, 1990 it had revenues of $2,703,000, pre-tax net income of $281,000, and net income after tax of $253,000 or $.08 per share. This compares to $1,929,000 in revenues and a net income after tax of $67,000 or $.02 per share during the same quarter in 1989.

The company's revenues increased 40 percent from $1,929,000 for the quarter ended June 30, 1989 to $2,703,000 for the quarter ended June 30, 1990. Revenues from program distribution increased 26 percent during the second quarter in 1990 to $2,362,000 compared to $1,879,000 during the

same quarter in 1989.

During the second quarter in 1990, consulting revenues increased to $341,000 from $50,000 for the same period in 1989. Consulting revenues represented approximately 13 percent of total revenues for the second quarter.

For the six months ended June 30, 1990, IBS had revenues of $4,952,000, pre-tax net income of $548,000, and net income after tax of $478,000 or $.15 per share compared to revenues of $3,496,000, pre-tax net income of $174,000, and net income after tax of $139,000 or $.06 per share, for the same six-month period in 1989. For the 12 months ended Dec. 31, 1989, the company recorded revenues of $4,834,000.

Costs and expenses rose 29 percent to $2,535,000 for the three months ended June 30, 1990 from $1,962,000 for the same period in 1989. Program licensing costs as a percentage of program distribution revenues decreased from 64 percent during the second quarter of 1989 to 54 percent during the first quarter of 1990. The decrease in program licensing costs is primarily attributable to the growth of the company's library of programs now licensed on a long-term basis. Costs and expenses during the second quarter of 1990 reflect higher advertising and promotion costs for trade shows, salaries and operating expenses associated with sales offices in Los Angeles, Paris, and Santiago, Chile, which were opened during the third and fourth quarters of 1989.

In addition to revenues from operations of $2,703,000, the company received interest income of $88,000 relating to cash and cash equivalent investments.

In commenting on the performance of the current quarter, Gary White, chief financial officer, stated, "We are pleased with the overall increase in sales volume and the resulting collection efforts during the quarter. During the first six months in 1990, we have surpassed the number of contracts written during all of 1989 and have seen collections increase 120 percent in the second quarter over the first quarter of this year."

With offices in Dallas, Los Angeles, Paris, Santiago, and Washington, D.C. IBS distributes television programming in more than 125 countries. Additionally the firm secures airtime and sponsorships internationally as well as providing broadcast management and consulting services for television stations and program producers domestically and abroad.

HANCOCK, MI (JULY 18) PR NEWSWIRE - D&N Financial Corporation (NASDAQ-NMS: DNFC) today reported net income of $1.6 million, or $0.43 per share, for the second quarter of 1990. In the same period of 1989, D&N reported a net loss of $816,000 or $0.23 per share. For the six months ended June 30, 1990, net income was $2.8 million, or $0.76 per share, versus $1.2 million, or $0.33 per share, for the same period a year ago.

Kenneth D. Seaton, chairman and chief executive officer, said, "We are continuing to progress in our plan to improve core income, reduce expenses and build our retail franchise. The second quarter reflects an increase in net income of $.4 million, or 30 percent, over the first quarter. These results primarily are attributable to continued strong net interest income, lower operating expenses, and a decrease in the provision for possible loan losses."

Core income (defined as net income, excluding net gains/losses on sales of loans and securities other than mortgage banking inventory) totaled $1.8 million for the latest quarter. This compares to the $165,000 loss for the same quarter of 1989, and represents a 42 percent increase from the $1.3 million reported for the first quarter of 1990. Core income for the first six months of 1990 equaled $3.1 million, an increase of 197 percent over the $1.0 million reported for the corresponding period of last year.

"An improved interest rate environment and increases in our lower- cost checking deposits, coupled with the benefits of our balance sheet restructuring at the end of last year, contributed to a stronger net interest income and margin," said Seaton. D&N's net interest income was $11.3 million for the quarter ended June 30, 1990, up 30 percent from the $8.7 million reported for the comparable quarter of 1989. Net interest income for the six months ended June 30, 1990, was $22.5 million, up 22

percent from the $18.5 million reported for the same period of 1989.

Comparing this year's to last year's second quarter, the net interest margin increased to 2.40 percent from 1.66 percent. For the first six months of 1990, the net interest margin increased to 2.34 percent from 1.68 percent for the first half of 1989. "Our growing emphasis on expanding our fee-producing lines of business, especially checking accounts, continues to strongly impact our bottom line," Seaton noted. Fee income was up $184,000, or 8.5 percent, compared to the second quarter of 1989, and up $81,000, or 3.6 percent, over the first quarter of 1990. Fee income for the first six months of 1990 was $4.6 million, a 20.9 percent increase over the $3.8 million reported for the first half of 1989.

With revenues up strongly, non-interest expenses held steady from the first to the second quarter this year. The results of 1989's cost control improvements show an $81,000 reduction in 1990 year-to-date operating expenses as compared to the same period in 1989.

Residential mortgage loan production by D&N and its mortgage banking subsidiary was $76.9 million for the second quarter of 1990, down from $79.4 million in the second quarter of 1989, due to an overall softness in the mortgage market. The portfolio of loans serviced for others reached $1.29 billion at June 30, 1990, compared with $1.18 billion at the same time last year. Year-to-date income from loan servicing and administrative fees was $2.8 million, 7.9 percent higher than the $2.6 million reported in the first half of 1989.

Consumer loan volume of $18.8 million was below the $31.1 million level of the second quarter of 1989, primarily because of a decision to curtail indirect consumer lending. For the first six months of 1990, commercial real estate lending as compared to a year ago dropped from $22.3 million to $5.2 million, reflecting a temporary reassignment of resources away from new lending to focus on strengthening the credit quality of the existing portfolio.

Provisions for possible loan losses were $1.3 million, comparable to the $1.1 million added in the second quarter of 1989. This is in contrast to the total of $8.5 million added in the 1990 1st quarter and 1989 4th quarter to counter major softening in the national commercial real estate market, and to comply with new regulatory requirements. Total loan loss reserves at quarter-end were $14.4 million, of which 7.0 million were unallocated to specific assets. Unallocated reserves were 11.75 percent of non-performing loans and .51 percent of total loans (excluding mortgage-backed certificates).

Deposits fell during the second quarter, to $1.12 billion at June 30, 1990 compared with $1.20 billion at June 30, 1989, and $1.16 billion at March 31, 1990. "Our research indicates some of the deposit outflows are due to

the continuing poor publicity surrounding S&L and bank problems in the Southwest, and now in the Northeast," Seaton noted.

"Also, the direct publicity regarding the proxy contest in connection with this year's annual meeting proved unsettling to some of our customers, resulting in lost business. Our continuing communications efforts with our customers, plus some aggressive marketing programs, were resulting in an improved deposit picture at quarter end."

At June 30, 1990, D&N had total assets of $2.0 billion, net loans and mortgage-backed certificates of $1.5 billion, and deposits of $1.1 billion. Shareholders' equity was $107.5 million.

In other events during the quarter, Company President Filmore J. Halonen retired at the end of May after 25 years with D&N. Halonen began his career with D&N in 1965 as controller. He had been president of D&N Savings Bank since 1980, a director since 1973, and president and a director of D&N Financial Corporation since the holding company's formation in 1988. "Fil has provided leadership and stability during these changing times," said Seaton, "and we are fortunate to have access to his wealth of experience as he continues as a director of both the bank and the financial corporation."

Joining D&N on June 1 as president and a director of the bank, and as president of the financial corporation, was George J. Butvilas. Noted Seaton, "George is an excellent addition to our strong management team. He brings 16 years of experience in commercial and community bank management that will contribute to our efforts to build a solidly profitable retail banking franchise."

Butvilas was formerly executive vice president of Boulevard Bancorp, Inc., of Chicago, a $1.6 billion multi-bank holding company, as well as chairman and CEO of Citizens National Bank of Downers Grove, one of Boulevard Bancorp's four wholly owned community banks.

In other news regarding the corporation, noting the death of long- time Director Richard E. Hinks on June 29, 1990, at the age of 73, Seaton said, "With our deepest sympathies to Dick's family, and a strong sense of loss by his friends at D&N, I want to acknowledge his invaluable contributions to the company over 26 years as a director. His commanding intellect, warm personality and ready wit will be missed by all who knew him."

D&N Financial Corporation, through its subsidiary, D&N Savings Bank, FSB, has 40 financial services offices throughout Michigan's Upper Peninsula and mid-Michigan, as well as 12 mortgage banking offices in Michigan and four other states. D&N is the fourth-largest savings institution in Michigan based on asset size.

DALLAS (JULY 18) PR NEWSWIRE - Extending its line of infant care products Kimberly-Clark Corporation (NYSE: KMB) today announced it will soon begin shipping Huggies baby wipes to markets in California.

Designed to clean like a washcloth, Huggies baby wipes are softer, thicker and more absorbent than other brands on the market, said Wayne R. Sanders, president of world consumer, nonwovens and service & industrial operations.

The clothlike product is an outgrowth of Kimberly-Clark's expertise in tissue-making and of its pioneering development of versatile nonwoven materials, Sanders said. Huggies baby wipes are made from a Kimberly-Clark fabric that blends natural and synthetic fibers to best meet consumers' needs for a moist, durable product.

The hand-sized wipes are embossed with a "teddy bear" design and are packaged to come out easily, one-at-a-time, he said. Huggies baby wipes will be sold in 80-count reclosable tubs and 16-count travel packs, and will be priced comparably to other premium brands.

The product will be made at Kimberly-Clark's new manufacturing facility in Maumelle, Ark. The 48,000-square-foot plant, which is designed to accommodate future expansion, started up in June.

Kimberly-Clark is a manufacturer of household, personal care and health care products, as well as newsprint and premium business, correspondence and specialty papers. The company's consumer products include Huggies disposable diapers, Kleenex facial tissue, Kotex and New Freedom feminine products, Kleenex premium bathroom tissue, Hi-Dri household towels and Depend incontinence products.

HOUSTON (JULY 18) PR NEWSWIRE - NaTec Resources, Inc. (NASDAQ: NATC), today reported operating results for the second quarter of this year. For the three months ended June 30, NaTec had a loss of $1.2 million on revenues of $885,000 compared with a loss of $131,000 on revenues of $613,000 for the same period last year.

For the first six months of this year, the company had a loss of $2.3 million on revenues of $1.5 million compared with a loss of $314,000 on revenues of $1.2 million for the same period last year.

NaTec also announced the signing of a Letter of Intent to purchase AER(asterisk)X, a division of RMT, Inc., a full service environmental consulting and engineering firm. AER-X is the nation's only company specializing in emission credit trading and also provides services in air permitting, air toxic issues, rule development and control technology assessments.

NaTec began construction of its mine and processing facility during the past quarter, and is currently ahead of its original completion schedule

with commercial operation expected during the first quarter of 1991. Initial capacity of the facility will be 125,000 tons of nahcolite per year.

NaTec Resources is committed to the control of pollutants commonly associated with acid rain. The company provides consulting engineering, injection system installation, operations and maintenance services, and processed sorbent supply. Primary markets are utility, industrial power generation, pulp and paper, refining and municipal solid waste.

OREM, UT (JULY 18) PR NEWSWIRE - Wicat Systems Inc. (NASDAQ: WCAT), announced today that DeKalb County Schools (Ga.) have agreed to purchase more than $6.2 million of Wicat integrated learning systems over the next six years.

"The value of a contract of this magnitude is significant," according to Marvin Higbee, senior vice president Wicat's Education Division, "but the district's research and purchasing process set a new precedent for educators to consider in acquiring educational software for the coming decade."

"The DeKalb County Schools' adopted a philosophy," said Higbee, "that instructional needs determine courseware decisions and courseware selection drives hardware purchases. Once Wicat's integrated learning system was chosen by the district and approved by the board of education a

hardware and networking Request for Proposal was released by DeKalb County Schools. Only those hardware vendors that had a Wicat Certification could submit a proposal."

Originally, eight integrated learning system (ILS) vendors had been considered as candidates for the contract, with that number being narrowed through initial presentations to three- Wicat, Josten's Learning Corp., and Computer Curriculum Corp.

During the fall of 1989, prototype testing was conducted at six DeKalb County Schools. This allowed for first-hand evaluation of the three ILS software packages.

Based on the information gathered and cost proposals, a recommendation was presented to the DeKalb County Board of Education that Wicat Systems be chosen to supply integrated learning systems for the district. It was approved unanimously.

Nearly $500,000 of the $6.2 million purchase will be dedicated in establishing an ILS curricula in the district's newly proposed "Magnet School Program" to be implemented in six schools this fall. These magnet schools are being established to provide highly concentrated education opportunities open to all students, regardless of school boundaries.

Wicat Systems is a world leader in technology-based training and education solutions, providing products and services to help clients achieve 30 to 50 percent learning improvement in schools, industry and government. Wicat's stock is traded in the NASDAQ market under the symbol WCAT.

BOULDER, COLO. (JULY 18) PR NEWSWIRE - Satellite Information Systems Co. (SISCOM) (NASDAQ: SATI) today announced a contract to provide CHEK TV of Victoria, British Columbia with a NewsPro(TM) newsroom automation system. Value of the contract was not announced.

Owned by WIC Corp. of Canada, CHEK is an affiliate of long-time SISCOM customer BCTV, which is closely aligned with CHEK both technologically and administratively and which first introduced CHEK to the broad capabilities and advantages of NewsPro.

"SISCOM has always enjoyed an outstanding relationship with the BCTV organization," said Mike Ellis, SISCOM's president. "As SISCOM's first NewsPro customer, BCTV pioneered many of the capabilities of the current release of NewsPro and has always provided valuable input to our ongoing

development efforts."

BCTV's Wray Embleton said, "Because NewsPro has been our choice for more than four years, introducing CHEK to the system was just a natural extension for us."

The SISCOM software will provide support on the DEC VAX-based system for 16 dual session terminals, high speed printers, closed captioning, prompting and the integration of CHEK's existing PCs.

NewsPro automates the editorial and production control aspects of broadcast news operations and provides information management facilities for use by organizations in the print media, public affairs, press relations and image industries.

With the addition of CHEK TV, SISCOM will have 22 NewsPro installations in the U.S., Canada, Europe, Australia and Japan.

NEW YORK (JULY 18) PR NEWSWIRE - Programming and Systems, Inc. (NASDAQ: PSYS) reported revenues of $6,801,259 for the quarter ended May 31, 1990 compared with $8,799,195 for the same period last year, Irwin Mautner, president announced today.

Net income for the quarter decreased 5.2 percent to $1,210,659 (67 cents per share), compared to $1,277,323 (71 cents per share) for the same period last year. Changes have occurred in our marketplace because of recent Federal regulations. Management has made some key decisions to help increase revenues and put the company in the best position to operate successfully in the new private career school environment. In addition, during this quarter the company acquired the assets of five Wendy's Old Fashioned Hamburgers Restaurants in the Clarksburg, W.Va. area. The restaurants operating results for this quarter were favorable. We feel that the steps we have taken to increase revenues and reduce overhead should effectively increase profits during the remainder of this fiscal year.

MINNEAPOLIS (JULY 18) PR NEWSWIRE - First Bank System, Inc. (NYSE: FBS), today reported second quarter 1990 net income of $29.9 million, an increase from the $28.5 million reported in the first quarter of 1990. Earnings of $53.0 million were reported in the same period a year ago. On a per-share basis, earnings were $.38 in the second quarter of 1990 compared with $.37 in the first quarter of 1990 and $.77 in the second quarter a year ago.

Results in the second quarter of 1990 included a provision for credit losses of $31.0 million, unchanged from the level in the first quarter. The provision was $20.5 million in the second quarter of 1989. Domestic nonperforming assets were $364.1 million at June 30, 1990, compared with $362.5 million at March 31, 1990, and $247.1 million at June 30, 1989. The increase from the prior year reflects increased nonperforming loan levels in the commercial real estate and highly leveraged transaction (HLT) portfolios.

Noninterest expense declined $7.5 million, or 4.2 percent, from the first quarter of 1990 to $170.4 million in the second quarter of 1990. Noninterest expense of $179.6 million was reported in the same period a year ago.

Results in the second quarter of 1990 also reflect tax benefits related to the utilization of operating loss carryforwards of $.03 per share compared with $.04 per share in the first quarter and $.15 per share in the second quarter of 1989.

"Promoting a culture of diligent cost control and prudent lending practices continues to be our top priority," said First Bank System's Chairman, President and Chief Executive Officer John F. Grundhofer. "During the second quarter, noninterest expense decreased 4.2 percent and salary expense declined for the third consecutive quarter. To strengthen the credit process, the key positions of chief credit officer and head of the commercial bank have been filled by executives with extensive credit backgrounds, Robert Hoffmann and Daniel Rohr. As we enter the second half of 1990, our energies will remain focused on improving the bottom line through our restructuring efforts."

First Bank System is a regional bank holding company headquartered in the Upper Midwest with assets of $19.4 billion.

NEW ORLEANS (JULY 18) PR NEWSWIRE - McDermott International, Inc. (NYSE: MDR), announced today that its McDermott Scotland operations had received a contract valued at approximately $206 million from Amerada Hess Limited (NYSE: HESS) for the design, procurement, fabrication and installation of steel jackets for two offshore platforms in the Scott Field of the United Kingdom's sector of the North Sea.

The first jacket, weighing 14,500 metric tons, is scheduled to be installed in 1992, and one weighing 8,000 metric tons in 1993. Water depth in the Scott Field is approximately 465 feet. Confirmation of the contract is contingent upon formal approval of the project by the Scott partners and the U.K. Department of Energy, but work on these jackets will begin immediately at McDermott Scotland Limited's yard in Ardersier, Scotland.

The Scott Field is located off the coast of Scotland approximately 125

miles northeast of Peterhead. With estimated recoverable reserves of about 450 million barrels of oil and 290 billion cubic feet of natural gas with 40 million barrels of natural gas liquids, the Scott Field is one of the largest scheduled for development in the U.K. North Sea in the 1990s. Amerada Hess Limited is the operator of the field.

McDermott International, Inc., is a leading worldwide energy services company. The company and its subsidiaries manufacture steam- generating equipment, defense products, and tubular products. They also provide engineering and construction services for industrial and utility facilities onshore, and to the oil and gas industry offshore.

#90199p5890 07/18/1990 ~PR Newswire

CHICAGO (JULY 18) PR NEWSWIRE - The System Roundtable of United Airlines, acting on behalf of the non-contract employees of UAL Corp. (NYSE: UAL), announced today that it has reached an understanding with United Employee Acquisition Corp. (UEAC) with respect to terms for the participation of UAL's non-contract employees in the proposed buyout of UAL by UEAC.

Based on the understanding reached with UEAC, the System Roundtable has decided to support the proposed acquisition of UAL by UEAC. A spokesman for the System Roundtable said today, "We believe that our understanding with UEAC established fair terms of participation of the non-contract employees in the ESOP transaction. The interests of all employees are best served by trying to work together to assure the future success of our airline."

As previously announced by UEAC, the UAL non-contract employees will own, through an ESOP, 14.26 percent of the equity in UAL after the buyout. The understanding between the System Roundtable and UEAC contemplates wage and cost reductions for the non-contract employees of approximately $50.5 million and modifications of certain pension and other benefits. The non-contract employees will be entitled to select one director on UAL's board. These and other terms of the understanding, all of which are effective only upon consummation of the buyout transaction, are embodied in a written policy statement. The System Roundtable's understanding is conditioned on the inclusion of certain of the terms of the understanding in a proposed amendment to the merger agreement between UEAC and UAL. UEAC has agreed to the amendment.

Formed by the three principal unions of UAL, UEAC announced in April that it had entered into a merger agreement with UAL pursuant to which the union and non-contract employees of UAL would acquire 100 percent of the equity of UAL. The three union groups of UAL agreed at that time to cost

reductions and benefit modifications for UAL's unionized employees to be effective upon consummation of the merger.

Today's understanding with the non-contract employees follows discussions between representatives of UEAC and First National Bank of Chicago, financial advisor to the System Roundtable, and Fried, Frank, Harris, Shriver & Jacobson, their legal counsel.

SAN JOSE, CA (JULY 18) PR NEWSWIRE - Plaza Commerce Bancorp (NASDAQ: PLZA), holding company for Plaza Bank of Commerce, announced net income of $2,320,000 for the second quarter ended June 30, 1990, compared with $2,105,000 for the second quarter of 1989, an increase of $215,000 or 10 percent. Earnings per share were $.33 in the second quarter of 1990, compared to $.30 for the like period in 1989.

Earnings of $4,430,000 were also announced for the six month period ended June 30, 1990, compared with $4,010,000 for the like period of 1989, an increase of $420,000 or 10 percent. Earnings per share grew to $.63 for the six month period, compared with $.57 for the like period in 1989.

Total assets reached $518 million at June 30, 1990, compared with $453 million at June 30, 1989, a 14 percent increase. Net loans were $392 million on June 30, 1990, compared with $295 million on June 30, 1989, a 33 percent increase. Total deposits increased to $455 million at June 30, 1990, compared with $410 million at June 30, 1989, an 11 percent increase.

Plaza Commerce Bancorp common stock is traded on the NASDAQ National Market System with the symbol PLZA. Plaza Bank of Commerce, a member of the Federal Deposit Insurance Corporation, is headquartered in downtown San Jose with regional offices in Sunnyvale and Fremont. The company's shareholders recently approved the proposed merger by Comerica Incorporated, Detroit. It is anticipated that the merger, subject to regulatory approval, will be consummated in the first quarter of 1991.

STAMFORD, CT (JULY 18) PR NEWSWIRE - Crompton & Knowles Corporation (NYSE: CNK) today announced that its board of directors voted to split the company's stock 2-for-1, increasing the number of average shares of common stock outstanding to 24.8 million from 12.4 million. The split will be payable Aug. 24, 1990, to shareholders of record Aug. 3.

"This split is further indication of the board's confidence in our company's ability to continue to grow and increase shareholder value," said Vincent A. Calarco, the company's chairman, president and chief executive officer.

Crompton & Knowles, a producer and marketer of specialty chemicals and equipment, also split its stock 2-for-1 in May 1989 and in April 1987 while increasing its dividend 35 percent in each of the last three years.

#90199p5894 07/18/1990 ~PR Newswire

HARTFORD, CT (JULY 18) PR NEWSWIRE - Society for Savings Bancorp, Inc. (NASDAQ: SOCS) earned $1.2 million in the second quarter ended June 30, 1990 or 10 cents per share from its operations, down from $8.3 million or 70 cents per share in net income for the same period last year. The prior-year comparison excludes the effect of the two material non-recurring transactions previously reported in the second quarter of 1989. Net income for the first half of 1990 was $6.0 million or 50 cents per share, a decrease of $11.2 million or 94 cents per share, excluding the effect of the two material non- recurring transactions for 1989, from the prior year's operations.

Society reported earnings in the second quarter 1989 of $22.8 million or $1.92 per share and $31.7 million or $2.66 per share for the first half of 1989. Net income in the second quarter of 1989 included two material non-recurring transactions that increased earnings on an after-tax basis $14.5 million. These transactions were the gain from the sale of the credit portfolio and the loss from the acceleration of goodwill amortization.

Net interest income for the second quarter ended June 30, 1990 was $30.2

million compared to $28.0 million for the second quarter 1989. Shareholder equity decreased from $263.2 million at June 30, 1989 to $260.4 million one year later. The ratio of equity to assets was 6.06 percent at June 30 1990 as compared to 6.14 percent a year earlier. Total assets were $4.3 billion at June 30, 1990 unchanged from June 30, 1989. Total loans were $2.8 billion on June 30, 1990 unchanged from the same period last year.

Non-performing assets were $147.3 million at June 30, 1990, an increase of $56.6 million from Dec. 31, 1989 and an increase of $80.0 million since June 30, 1989. Non-performing assets were 3.43 percent of total assets, consisting of $92.8 million of non-accrual loans, $34.3 million of repossessed assets, $4.7 million of performing loans restructured to lower interest rates and $15.6 million of loans delinquent more than 90 days but still accruing interest. Total allowance for loan losses was $41.3 million, an increase of $7.3 million since Dec. 31, 1989 and $14.0 million from June 30, 1989. The ratio of the allowance for loan losses to total loans was 1.47 percent at June 30, 1990.

Under the strain of the economic downturn in New England, Bancorp's earnings fell on a comparative basis from last year's quarterly result to this year's quarterly result. Society attributes its lowered earnings in the second quarter 1990 to its loan loss provision of $11.6 million for three months ended June 30, 1990, an increase of $8.1 million over the same period in 1989. Overall, the 1990 loan loss provision is $17.9 million at June 30, 1990, an increase of $10.5 million, when compared to the prior year's six month period. Also, operating expenses have grown because of an increase in problem loan workout costs and in the carrying costs of foreclosed property and repossesed assets.

#90199p5897 07/18/1990 ~PR Newswire

STAMFORD, CT (JULY 18) PR NEWSWIRE - Crompton & Knowles Corporation (NYSE: CNK), a producer and marketer of specialty chemicals, today announced that second quarter earnings rose 20 percent to a record $8.8 million, or 36 cents a share, from $7.3 million, or 30 cents a share, in 1989. The per share figures reflect a 2-for-1 split of the company's common stock announced earlier today and payable to shareholders at the close of business on Aug. 24, 1990.

On a pre-split basis, net earnings per share were 71 cents in the latest quarter versus 59 cents in last year's second quarter. This marks 21 consecutive quarters of improved earnings from continuing operations for the company. Sales increased nearly 4 percent to $98.4 million for the second quarter from $95 million in the same quarter last year.

For the six months, Crompton & Knowles' net income increased 24 percent to $15.7 million, or 64 cents a share, from $12.7 million or 52 cents a share in 1989. On a pre-split basis the earnings per share were $1.27 and $1.04, respectively. Sales in the latest six-month period were $192.7 million, up 5 percent from last year's six-month sales of $182.8 million.

"While the overall business environment is more difficult than last year, we expect that our specialized products and strong sales efforts, combined with our ability to manage costs, will enable Crompton & Knowles to stay on track and deliver another record year," said Vincent A. Calarco, chairman, president and chief executive officer.

Second quarter results from the company's two business segments were as follows:

The company's largest business -- specialty chemicals -- continued its strong performance with a 4 percent increase in sales and record operating profit. Gains in the U.S. dyes business were achieved primarily with products introduced over the past two years to serve the cotton, polyester and nylon apparel markets. This strength more than offset weak demand in the automotive and carpet industries. The pattern in the company's European dyes business was similar with strong sales in cotton apparel. The company's specialty ingredients business had lower sales during the quarter as product rationalization programs continued. However, food flavors had higher sales and new product development activities increased.

The company's specialty process equipment and controls segment -- North America's leading producer of extrusion equipment and systems for plastics -- maintained sales at prior year levels and reported record operating profits even as the overall industry showed order weakness. The order backlog for the company's extruder systems remained unchanged from the first quarter at more than $27 million.

PHILADELPHIA (JULY 18) PR NEWSWIRE - Bell Atlantic Corp. (NYSE: BEL) today announced that it has completed the purchase of Simborg Systems Corp., a leading provider of hospital information management systems solutions.

The company has been renamed Bell Atlantic Healthcare Systems Inc. Terms were not disclosed.

Bell Atlantic Healthcare Systems will market Bell Atlantic(R) STAT LAN(SM)

an integrated software solution, developed by Simborg, that allows a hospital's different departmental systems to share information. The product is complemented by Bell Atlantic's network, business systems and financial services offerings.

Donald W. Simborg, M.D., who founded Simborg Systems in 1984, has been named president of Bell Atlantic Healthcare Systems. Simborg Systems' 40 employees have become part of Bell Atlantic Healthcare Systems and operate out of Greenbrae, Calif., and Atlanta.

Philadelphia-based Bell Atlantic is the parent company of New Jersey Bell, Bell of Pennsylvania, Diamond State Telephone Company, and the Chesapeake and Potomac Telephone Companies of Maryland, Virginia, West Virginia and Washington.

It also is the parent of companies that provide information and communications business systems services and solutions across the United States including custom software applications, systems integration, consulting and software engineering incorporating artificial intelligence technology, and computer maintenance and comprehensive service and support for business systems and software.

Financial services for hospitals nationwide are provided by Bell Atlantic TriCon's Medical Finance Group, which offers accounts receivable financing real estate financing and a unique asset management program for equipment acquisition.

Bell Atlantic also owns businesses that provide mobile communications in the mid-Atlantic region and financial services in national and international markets.

CADILLAC, MI (JULY 18) PR NEWSWIRE - George R. Kempton, chairman of the board and chief executive officer of Kysor Industrial Corp. (NYSE: KZ) announced today the company has completed the purchase of the truck and off-highway heater and air conditioning business from Valeo Climate Control Limited, located in South Wales, United Kingdom.

The business represents a new opportunity for the Kysor Europe operations to significantly increase its sales volume as well as provide an entree to a number of new customers not previously served by Kysor.

Kysor has maintained European manufacturing operations serving the

transportation market since the 1960s and, as the easing of political tensions have changed the dynamics of the market, Kysor/Europe is positioned to benefit from further development of West European markets while capitalizing on entry in the newly emerging Eastern bloc countries.

Financial details were not disclosed.

#90199p5908 07/18/1990 ~PR Newswire

PEAPACK, NJ (JULY 18) PR NEWSWIRE - Fedders Corporation (NYSE: FJQ) today announced that sales of the room air conditioner manufacturer in the quarter ended June 30, 1990 declined 18 percent from the prior year's record volume. Sales totaled $103.4 million in the 1990 quarter versus $125.7 million a year earlier. Earnings per share were off five percent to 39 cents from 41 cents in the year- earlier quarter. Net income decreased seven percent to $7.4 million in the 1990 quarter compared with $7.9 million in the prior year.

For the six months ended June 30, 1990, sales decreased seven percent to $215.9 million from $232.7 million a year ago. Earnings per share in the first half of 1990 totaled 83 cents versus 77 cents, fully diluted, last year. Net income in the six months increased five percent to $15.5 million compared with $14.7 million in the prior year.

Chief Executive Officer Sal Giordano, Jr. said Fedders' operating cash flow "continues its strong rise." Earnings before depreciation, interest, amortization and taxes (EBDIAT) jumped 23 percent to $19.0 million, or $1.01 per share, in the second quarter of 1990 versus $15.5 million, or 80 cents per share, last year. EBDIAT increased 35 percent in the first half of 1990.

Giordano attributed the decline from last year's record sales to "unseasonably cool weather in the major U.S. room air conditioner markets in the second quarter. Through mid-July, we haven't had the sustained heat in the Northeast and upper Midwest that is necessary to stimulate strong sales," he said. "It will take protracted heat in those key markets during the next several weeks for us to reach the sales volume we projected for 1990 under our assumption of normal weather.

"Typically, if abnormally cool weather were to continue this summer, then next year manufacturers' shipments of room air conditioners would decline, because dealers would have a large carryover of inventory. However, even if the weather doesn't heat up this summer, completion of Fedders' recently announced plans to acquire Emerson Quiet Kool will enable us to

show a good sales gain in 1991," Giordano said.

CINCINNATI (JULY 18) PR NEWSWIRE - Larry Strutton today was named president, publisher and chief executive officer of Denver's Rocky Mountain News, a Scripps Howard newspaper. The 33-year veteran of the newspaper industry has most recently been president of The Baltimore Sun.

Strutton's appointment was announced by William W. Fletcher, former

president and general manager who has been elected chairman of the News' board of directors.

For Strutton, the move to Denver's largest newspaper is a homecoming. He spent 17 years with the Rocky Mountain News, beginning in 1964 as a linotype machinist in the composing room. He was named assistant production manager in 1969 and production director in 1972.

Strutton left Denver in 1981 to join The Detroit Free Press as vice president for production. In 1983 he was promoted to executive vice president in charge of operations, advertising, promotion and research at The Free Press, owned by Knight-Ridder.

In November 1983, Strutton joined The Los Angeles Times as vice president for operations. He became executive vice president in January 1986. His responsibilities at The Times included supervision of the construction of the $405 million Olympic printing facility in downtown Los Angeles. In April 1989, Times Mirror named Strutton president of The Baltimore Sun.

Fletcher, 61, joined the News' advertising department in 1952. He was promoted to personnel director and then to business manager before being named vice president and general manager in 1970. He was named president of the News in 1984.

The Rocky Mountain News is Scripps Howard's largest daily newspaper with circulation of 346,000 Monday through Saturday mornings. Its Sunday circulation is 406,000.

The Rocky Mountain News is one of 19 daily newspapers operated by Scripps Howard, the operating subsidiary of The E.W. Scripps Company (NASDAQ: EWSCA).

#90199p5913 07/18/1990 ~PR Newswire

WESTWOOD, Mass. (JULY 18) PR NEWSWIRE - Bird Corporation (NASDAQ: BIRD) reported net earnings from continuing operations of $2,144,000 on sales of $33,356,000 for the second quarter ending June 30, 1990. After provision for preferred and preference dividends, primary earnings per common share amounted to 48 cents.

In the prior year's quarter, Bird earned $460,000 from continuing operations which, after consideration of preferred and preference dividends, resulted in earnings per common share of 1 cent. Sales from continuing operations increased marginally from the prior year by about 2 percent. In the second quarter of 1989, Bird also had a one-time gain of

$8,963,000 from the sale of its Bird Machine Company subsidiary which contributed an additional $1.99 per common share.

For the first six months, Bird has earned $2,955,000 which, after provision for preferred and preference dividends, results in net earnings of 60 cents per common share for continuing operations. In the prior year's first half, the company earned $281,000 from continuing operation which translated into a loss of 11 cents per common share after payment of preferred and preference dividends. Sales were down marginally, trailing the prior year by approximately 2 percent.

Chairman George J. Haufler stated, "We are most gratified by the results of the second quarter and first half of 1990. While we have experienced very weak construction markets, most especially in the Northeast and in Arizona which represent the heaviest concentration of our sales, we are pleased that these results reflect our conscious strategic choice to concentrate on the remodelling/repair sector of the market. Additionally, our investment policies representing continuous quality improvement and plant modernization regardless of economic conditions have been highly productive and our patience is being rewarded with improved profitability, even in soft markets."

Bird Corporation is a U.S. based manufacturer and distributor of building material products and a provider of environmental services.

The unaudited results for the second quarter and the first half of 1990 compared to the same period in 1989 are presented below.

#90199p5914 07/18/1990 ~PR Newswire

DETROIT (JULY 18) PR NEWSWIRE - Reaching an agreement which addresses the interests of employees, unions, customers, stockholders, and suppliers in an intense competitive environment is General Motors primary contract bargaining goal, the company's chief negotiator said today.

Speaking at the opening of contract talks with the United Auto Workers Union (UAW), Alfred S. Warren Jr., vice president of the GM Industrial Relations Staff, challenged bargainers from both sides to pursue innovative solutions to ensure GM's preeminent position in the auto industry and the job and income security of its employees.

"Our future and our job security will depend on whether we can, together, find new ways to further improve GM's quality and productivity on a long-term basis," he said.

Warren said that the most realistic way to continue providing good paying GM jobs is to, "provide our customers with quality products, superior to those of our competitors, at competitive prices."

Noting that GM has retained its position as the most vertically integrated auto company, Warren said that competition in the components manufacturing area will present a significant challenge to GM in the 1990s.

"We must find innovative and cost-effective ways to become more competitive in component manufacturing," he said. "Our alternative is to face a price-sensitive market with uncompetitive products, which will cause a further erosion of jobs."

Recognizing the need to address a number of other critical issues during contract talks, Warren also called on bargainers from both the company and the union to:

-- Encourage full utilization of all GM people and support an environment of continuous improvement in assembly and manufacturing processes.

-- Closely examine historical restrictions such as rigid standards and work rules which discourage efforts to become competitive.

-- Address the continuing problem of high absenteeism and examine its relationship with substance abuse as the emerging new threat to America's work force.

-- Explore innovative work schedules that will provide jobs and increase market share while reducing fixed costs.

-- Ensure that total labor costs do not endanger job security by placing GM at a disadvantage in the marketplace, remembering that GM employes already enjoy one of the world's best wage and benefit packages.

-- Examine every conceivable way to reduce health-care costs which now place GM at a disadvantage with both foreign transplant and less vertically integrated domestic competitors.

In concluding, Warren acknowledged the considerable progress made in building relationships between the company and its employees and unions.

"What is needed most is an ability and a process to deal with differences, he said. "Open communication and honesty should enable us to work out an agreement that is satisfactory to both of us."

The present UAW-GM National Agreement, which covers approximately 280,000 of GM's 310,000 current active hourly work force, will expire at 11:59 p.m., Sept. 14, 1990.

#90199p5915 07/18/1990 ~PR Newswire
ANAHEIM, CA (JULY 18) PR NEWSWIRE - William Baker has been promoted to general manager of the Advanced Intelligent Machines/Artificial Intelligence (AIM/AI) Division of Odetics. Formerly the division's director of engineering, Baker is now responsible for all division operations. He reports to Joel Slutzky, chairman of the board and chief executive officer.

Baker joined the company in 1989 after spending 14 years with Smith Tool of Irvine, Calif. Prior to joining Smith Tool, he attended the University of Nevada, where he earned a bachelor of science in mechanical engineering. He also has a master of business administration from the University of Redlands.

In a concurrent announcement, the company also named George Westrom, assistant general manager. With more than 30 years of experience in computing and scientific fields, Westrom was formerly manager of artificial intelligence. He has a master of science degree from the University of Tennessee.

In addition, the company also named Ellie Kurrasch to the position of manager of artificial intelligence. A five-year associate of Odetics, Kurrasch will apply her extensive computer and technical background to this assignment. She has a bachelor of science degree in chemistry and mathematics from Mount St. Mary's College.

Odetics, headquartered in Anaheim, is a leading manufacturer of intelligent machines, including information systems, for collecting digital and analog data, as well as robotic and artificial intelligence systems.

#90199p5922 07/18/1990 ~PR Newswire

SOUTHINGTON, CT (JULY 18) PR NEWSWIRE - Southington Savings Bank (NASDAQ: SSBB) reports a net loss of $651,000 for the second quarter ended June 30, 1990 as compared to net income of $663,000 for the same quarter of 1989. The decline in earnings for the quarter resulted in a 36 cent loss per share as compared to earnings per share of 36 cents for the same quarter of 1989.

Ralph G. Mann, president and CEO of the bank stated, "the reason for the loss was an addition to the loan loss reserve of $1,335,000. Net income prior to the addition to the loan loss reserve and the payment of taxes totaled $1,048,000 down slightly from $1,183,000 for the same quarter of the prior year.

"Management's decision to increase the loan loss provision was in response to rising loan delinquencies created by a weak Connecticut economy and in particular its declining real estate market. Non-performing loans increased to 3.87 percent of total assets as compared to 2.52 percent at the end of the first quarter of 1990. The loan loss reserve was created to absorb potential loan losses. Actual loan charge-offs during the quarter totaled $232,000."

President Mann also stated, "the bank's capital is $31,694,000 or 12.1 percent of assets. It is difficult to project the length or depth of our regional real estate slowdown. However, the bank's strong capital position will enable it to withstand further increases in its loan loss reserve and still meet the growing banking needs of the community. The board of directors plan to continue its present dividend policy."

For the six months ended June 30, 1990, the bank sustained a net loss of $146,000, or eight cents per share as compared to net income of $1,429,000 or 78 cents per share for the same period of 1989. The bank's assets totaled $261,713,000 on June 30, 1990 as compared to $251,975,000 on Dec. 31, 1989.

Shareholder's equity totaled $31,694,000 and represents a bank value of $17.34 per share. Total outstanding shares as of June 30, 1990 were 1,827,992.

#90199p5923 07/18/1990 ~PR Newswire

COLUMBUS, IN (JULY 18) PR NEWSWIRE - Arvin Industries, Inc. (NYSE: ARV) reported sales of $445 million for the second quarter, an increase of nearly 12 percent over last year's $398 million. Net earnings for the second quarter rose 47 percent to $10.8 million or $0.47 per share from $7.3 million or $0.32 per share last year.

For the six months of 1990, sales rose 9.5 percent to $840 million compared to $767 million in 1989, while net earnings rose 29 percent to $13 million, or $.49 per share, compared to $10 million or $.41 per share reported for the comparable period last year.

Arvin Chairman and CEO James K. Baker said, "Arvin's second quarter performance was due to several key events -- European performance ahead of plan, recovery of earnings in the U.S. market and strong replacement sales."

Sales and operating profits in the European Common Market (EEC) were ahead of plan for both exhaust systems and ride control products indicating that Arvin is strategically in place in Europe. Sales of catalytic converters increased in response to the phasing in of emission control standards in the EEC and the addition of requirements from new customers.

In North America, sales and earnings increased despite North American vehicle production being down 5 percent. Increased sales of exhaust systems were due to new business from the Detroit Big Three and the Japanese transplants. Margins improved from reductions in start-up costs and a reduction in wage rates negotiated in 1989.

"Sales of replacement products continued to be strong in the second quarter and combined with a good first quarter made a solid first half," Baker continued. Incremental increase in sales of exhaust systems was the biggest contributor with margins benefiting from the additional volume.

The automotive parts outlook for the third quarter is positive based on forecasts that production in North America and Europe will increase compared to last year's third quarter. Baker added that business activity in the second half of the year also will benefit from the trend to lower interest rates.

Arvin Industries, Inc., an Indiana corporation, is a global company whose products are sold in more than 100 countries in North and South America, the European Common Market, the Pacific Rim and the Third World.

MOUNT AIRY, NC (JULY 18) PR NEWSWIRE - Forbes Steel & Wire Corporation, a subsidiary of Insteel Industries, Inc. (AMEX: III), today announced that operations at its Canonsburg, Pa. plant will be permanently discontinued on or before Sept. 30, 1990. The facility employs 87 people. Opportunities for relocation have been offered to several of the affected employees.

The Canonsburg plant, which has been in operation since 1947, produces concrete reinforcing products, galvanized fencing and galvanized caging fabrics. The closure of the facility is necessitated by high costs reflecting its dislocation from raw material sources and by weak business conditions in the market for concrete reinforcing products.

The products currently produced at the Canonsburg plant will be made at Forbes' Wilmington, Del. facility. Other Insteel plants also can be called on to supply concrete reinforcing products, if required. Certain capital investments have been made at the Wilmington facility to maintain and expand the company's presence in the galvanized fencing and caging fabric markets.

During the past several months, all sales and administrative functions of Forbes have been integrated with those of other Insteel companies. Further consolidation will take place in October when the administrative and sales operations of three subsidiaries -- Rappahannock Wire Co., Expo Wire Company, and Forbes Steel & Wire Corp. -- are relocated to a new facility under construction in Mount Airy. Forbes Steel & Wire was acquired by Insteel in October 1989. The closing of the Canonsburg plant is not expected to have a material adverse impact on the company's fiscal 1990 financial results.

Insteel Industries, Inc., one of the nation's largest wire products manufacturers, produces welded wire reinforcement, high and low carbon industrial wire, galvanized fencing products, specialty wire fabrics, and nails.

PITTSBURGH (JULY 18) PR NEWSWIRE - National Intergroup Inc. (NII) (NYSE: NII), announced today that, assuming the NII slate wins at next week's annual meeting, the board of directors has determined, immediately after the annual meeting, to: (i) offer a seat on the NII board to a member of the slate proposed by Centaur, NII's largest stockholder, and (ii) offer a seat on the NII board to a qualified individual to be selected from a list developed in consultation with NII's institutional stockholders. If Centaur turns down the offer for a seat, that seat would be offered to another individual to be selected from the list developed in consultation with NII's institutional stockholders.

The company also announced that it intends to place Robert King, president of FoxMeyer Drug, on the NII board at the next regularly scheduled board meeting. This is consistent with NII's focus on FoxMeyer Drug and its previously announced intention to designate King as chief executive officer of NII upon completion of the company's restructuring program.

In view of the classified nature of the NII board, the new seats will be spread evenly among the three classes: the seat for King will be for a three-year term, the seat for the individual to be selected from the list developed in consultation with institutional stockholders would be for a two-year term, and the seat for a member of the Centaur slate would be for a one-year term.

A spokesperson for NII stated in connection with the announcement: "A number of our stockholders have expressed their support for the principle that large stockholders should have representation on our board. We believe that our actions to offer board seats to representatives of our large stockholders will ensure that the perspectives of all of our stockholders are represented in our board room."

The spokesperson added, "We believe that our efforts will maximize value for all stockholders and ensure that all stockholders have a role in corporate governance."

#90199p5935 07/18/1990 ~PR Newswire

TAMPA, FL (JULY 18) PR NEWSWIRE - TECO Energy, Inc. (NYSE: TE) today announced second quarter earnings of 68 cents per share, up 10 percent over the same quarter of 1989.

Timothy L. Guzzle, president and CEO, said the 6-cent increase in earnings was the result of higher energy sales at the company's electric utility, plus lower interest costs and certain income tax adjustments.

Consolidated net income for 1990's second quarter was $38.4 million on revenues of $278.1 million, compared with net income of $34.9 million on revenues of $264.7 million for 1989.

At Tampa Electric Company, operating income was $58.3 million on revenues of $241.4 million, compared with $56.2 million on revenues of $233.6 million for the second quarter, 1989. Retail energy sales for the quarter were up 4.6 percent. Residential and commercial sales rose 5.3 and 5.2 percent, respectively, principally as a result of warmer-than-normal weather. Phospate sales were up 7.3 percent primarily due to expanded sales to certain existing customers.

"These strong results reflect the outstanding job our people have done in managing the business effectively," Guzzle said.

Operating income for TECO Energy's diversified businesses for the second quarter was $10.5 million on revenues of $83.2 million. That compares with operating income of $11.8 million on revenues of $85.8 million in the same quarter last year. The decline is attributable to a temporary drop in transportation activity.

Guzzle noted that TECO Energy's diversified companies had turned in a strong performance in the first quarter of the year which helped offset softer sales at Tampa Electric resulting from unseasonably mild weather.

"Our diversified businesses are making a major contribution to our overall financial strength. They now contribute more than 20 percent of our earnings, and that offers a good balance in our earnings mix," Guzzle said.

As an example, he cited higher prices on increased sales of coal during the most recent quarter to customers other than Tampa Electric. "Our coal business continues to be a strong performer, and we have said we want to increase our participation in that industry."

Earnings were also up for the first six months, from $1.11 per share in 1989 to $1.16. Consolidated net income was $65.8 million on revenues of $514.5 million, up from $62.8 million on revenues of $513.4 million for the same period last year. The increase in earnings resulted from lower

interest costs mainly due to the $125-million bond refunding transaction in August 1989 and income tax adjustments.

Tampa Electric earned operating income of $100.3 million year-to-date on revenues of $445.6 million. This compares to $104.5 million on revenues of $453.8 million for the same six months last year. Mild winter weather was the principal factor in this decline.

Operating income from the diversified companies for the six months ended June 30, 1990 was $19.3 million on revenues of $161.7 million, compared to $19.7 million on revenues of $157.7 million for the same period last year.

TECO Energy is a diversified energy-related holding company headquartered in Tampa.

#90199p5936 07/18/1990 ~PR Newswire

KALAMAZOO, Mich. (JULY 18) PR NEWSWIRE - Manatron, Inc. (NASDAQ: MANA) today announced substantially improved financial results for its fiscal year ended April 30, 1990. Net revenues were up 14 percent, and net income, which included a gain from the termination of a pension plan, was more than five times' net income of the prior year.

Manatron posted net revenues of $8,757,882 for fiscal 1990, compared to $7,681,673 the year before. Operating income was $231,613, up from $48,147.

In addition to higher income from operations, other income -- which includes interest from investments and systems financing -- more than doubled to $190,945 from $88,566. The company also reported a one-time gain related to its pension plan termination of $386,000 for the year.

Net income was $520,558, or 25 cents a share, up from $101,713, or 5 cents a share. There were approximately 2.1 million shares outstanding in all reporting periods.

For the final quarter of fiscal 1990, net revenues were up 15 percent to $2,228,645 from $1,941,118. Operating income was $164,593, more than four times' the comparable quarter's $38,086.

Other income rose to $42,500 from $12,033, and the $386,000 gain from the pension plan termination was recorded in the recent year's fourth quarter. Net income was $370,093, or 17 cents a share, compared to $39,119, or 2 cents a share.

"We have achieved these significant results from improvements virtually across the board," said Allen F. Peat, chairman and president.

"Revenues are growing as Manatron's customer base has broadened, partly as a result of recent acquisitions," said Peat. "Sales of PC- based software have also boosted volume. With more revenues from our high-margin software and maintenance agreements, Manatron's gross profit margin increased to 46 percent from 44 percent.

"The gain from the pension termination added $255,000 after taxes to net income, or 12 cents a share. While this was not a recurring event, we do expect to see continued growth in our 'other income' as a result of the solid financial condition of the company," said Peat.

"Net income grew faster than revenues as a result of record shipments of software products and recurring revenues from service contracts. With the virtual 100-percent margin in software after development costs are complete, the leverage for this business line is very high," he continued.

"Our balance sheet, already rock solid, has been strengthened this past year. We have a current ratio of 2.3 and working capital of $4.2 million. Book value per share is $2.74.

"We have the financial flexibility to continue making acquisitions similar to the three which have been completed since March 1989. Our growth target is 10 to 20 percent with emphasis on open systems for our customers and sales of higher margin products," Peat said. "As we enter the 1990s, management is optimistic that the trends established this past year can be maintained."

Manatron designs, markets, installs and maintains advanced computer- based turnkey data processing systems for local governments, using its own specialized proprietary software and hardware from leading manufacturers.

BRANCHBURG, N.J. (JULY 18) PR NEWSWIRE - Kenneth W. Turnbull, chairman and chief executive officer of United National Bancorp, today reported net income figures for the first six months of 1990 of $2,303,000 compared to $2,466,000 for the same period a year ago, a 7 percent decline. Per-share earnings were $1.07 vs. $1.15 for the prior-year period. Second-quarter net income was $1,166,000 compared to $1,209,000 in 1989, a 4 percent decline.

Total assets increased to $617,821,000 from $580,838,000, and deposits grew from $503,216,000 to $539,616,000, a 7 percent increase over 1989.

Reflecting a sluggish loan demand, total loans outstanding decreased marginally to $314,410,000 from $314,907,000 in 1989.

"Although net income was off to some degree, it is encouraging to note that income before provision for federal income taxes was slightly ahead of last year - $2,497,000 compared to $2,428,000 a year earlier. We look forward to continued earnings improvement in the second half of the year," Turnbull said.

WESTLAKE VILLAGE, Calif. (JULY 18) PR NEWSWIRE - Corporate Capital Resources Inc. (CorpCap) (NASDAQ: CCRS) and AquaSciences International Inc. (NASDAQ: AQSI) today disclosed that AquaSciences has signed a letter of intent with Phoenix Industries of Hastings, Neb., subject to the execution of a formal agreement whereby Phoenix agrees that it will produce 3,000 AquaNatural On-Site Bottled Water Purification Systems for Aquasciences distributors to install in retail food markets.

Phoenix Industries and its affiliates operate several facilities in the Hastings area, including an assembly plant, foundry and an electronics component facility. Phoenix, through an affiliate, has agreed to provide 100 percent financing for all systems it produces for AquaSciences. The aggregate value of the 3,000 systems is expected to approximate $15,000,000 over the term of the agreement.

AquaSciences' management believes this understanding, when finalized, will provide the manufacturing and funding relationship the company has been seeking. Irwin Pearl, chairman of AquaSciences, stated, "Phoenix is expected to provide AquaSciences with an economical and efficient U.S. manufacturing facility and allow AquaSciences to focus its resources on establishing exclusive territorial distribution of AquaNatural equipment throughout the country."

#90199p5949 07/18/1990 ~PR Newswire

HUDSON, NH (JULY 18) PR NEWSWIRE - Howtek, Inc. (AMEX: HTK) today announced summary results of its operations for the second quarter ended June 30, 1990. The company recorded second quarter revenues of $5,818,000 an increase of 30 percent over the $4,474,000 recorded in the same period in 1989 and a 5 percent increase over the $5,550,000 in revenues recorded in the first quarter of 1990. The company also announced second quarter profitability of $396,000 or 5 cents per share, vs. the loss of $1,694,000 or 25 cents per share recorded for the same period in 1989. The company's second quarter profit increased 129 percent or 3 cents per share over 1990's first quarter profit of 2 cents per share.

During the second quarter the company introduced its new series of Personal Color products, which include a 300 dpi color inkjet printer and a 300 dpi full color flatbed Scanner. With the scanner priced under $2,000 and the printer priced under $3,000, the company believes these products will set new price/performance standards for bringing color into the general office environment. In conjuction with these two new products the introduction of its new 400 dpi high resolution color flatbed scanner in the first quarter, and its existing line, the company has now positioned itself with one of the broadest offerings of color peripherals available in the marketplace. The company also introduced, during the second quarter, its Pixelmaster II. This is a modified version of the company's color inkjet printer and is capable of printing raised graphics and braille fonts to create tactile communications for the visually impaired.

The company also noted that sales of its color prepress page makeup system COLORSCAN, continues to increase significantly over sales recorded during 1989. During the second quarter the company also announced the availability of the Scanmaster D2000, a high resolution rotating drum color scanner, as a front end input device for the COLORSCAN system. The incorporation of this new scanner permits the COLORSCAN system to achieve levels of quality comparable to other prepress systems costing five to 10 times more. The addition of this new scanner also provides upgradeable scanning depth and sharpness to the company's existing worldwide installed base. Robert Howard, the company's chairman, stated that, "Over the past year and a half the company has been in the process of transitioning its

product base and expanding into different market segments. These efforts have proven to be very successful with the company recording its third consecutive profitable quarter. We now have a diversified product base to support the growing desktop publishing market, as well as, meet a substantial portion of the quality requirements of the prepress market."

Howtek was founded in 1984 by Robert Howard, who was also founder and president of Centronics Data Computer Corp. from 1969 to 1980. Howtek's product offering includes: COLORSCAN, a complete prepress color separation and page make-up system for newspapers, publishers and graphics arts markets; SCANMASTER, a series of reflective and transmitive copy and 35mm film scanners; and the PIXELMASTER, a full color plain paper high resolution solid inkjet printer. The company also offers workstations for design, composition, image capture and output, which operate interactively on local area networks incorporating various Howtek peripherals and proprietary software.

Howtek is a publicly held corporation whose stock is traded on the American Stock Exchange under the symbol HTK.

FINDLAY, OH (JULY 18) PR NEWSWIRE - Cooper Tire & Rubber Company (NYSE: CTB) today announced that continuing strong demand for tire products and efficient operations throughout the company resulted in record sales and increased earnings during the second quarter ended June 30, 1990.

For the quarter sales increased to $234.7 million compared with $229.4 million a year earlier. Net income for the period increased to $16.4 million, or 80 cents per share, versus $15.1 million, 74 cents per share, generated in the 1989 second quarter.

In the first six months of 1990, sales amounted to $443.3 million versus $425 million for the same period in 1989. Net income for the half amounted to $30.2 million compared with $25.4 million in the 1989 period. Earnings per share for the first half of 1990 amounted to $1.47 per share versus $1.24 per share in the comparable period of 1989.

Ivan W. Gorr, Cooper chairman and chief executive officer, in announcing the second quarter results stated, "Operations continued to be very satisfactory for both tires and industrial rubber products. Margins were constrained slightly by some of the competitive tire pricing pressures in the field during the period. There are indications that these pricing pressures will abate over the next several months.

"We believe we are headed for another record year in sales, earnings and stockholders' equity. Our markets remain sound and the general economic conditions in our nation are good. We remain optimistic about Cooper's performance in the coming quarters."

PITTSBURGH (JULY 18) PR NEWSWIRE - L.B. Foster Co. (NASDAQ: FSTRA) announced today net income of $888,000 or $.09 per share for the second quarter of 1990.

This compares to net income of $906,000 or $.09 per share for the same period in 1989. Sales were $62.4 million in the quarter vs. $62.7 million in the same period of 1989.

For the first six months of 1990, net income is $1.8 million or $0.19 per share compared to $1.5 million or $0.15 per share in the first half of 1989. Sales in 1990 are $118.8 million compared to $116.1 million in the

previous year.

"The second quarter results evidenced softening in the general construction and warehouse pipe markets, which was offset by a reduction of deferred employee compensation accruals. Management is focused on controlling inventory and expenses related to those markets while simultaneously becoming more aggressive in the infrastructure, water resource and transit products markets which offer considerable growth potential for the second half," stated Lee B. Foster, president and chief executive officer.

L.B. Foster Co., located in Pittsburgh, is a manufacturer, fabricator and distributor of construction, rail and tubular products.

NEW YORK (JULY 18) PR NEWSWIRE - The Bank of Bermuda (New York) Limited today announced the appointment of Donald J. Danilek as senior vice president responsible for the newly formed Private Banking/Personal Trust division.

The parent bank, the Bank of Bermuda Limited, has concentrated on personal trust and private banking business for more than half a century from the head office in Bermuda and through its foreign subsidiaries in Europe and the Far East.

"The addition of Mr. Danilek to the staff and the creation of the new division in New York will enable the Bank of Bermuda to offer a broad range of personal trust and private banking services to U.S. residents with international trust needs and/or international investment requirements," said Edgar C. Felton, president of The Bank of Bermuda (New York) Limited. "The bank will also be better positioned to service the U.S. fiduciary requirements of overseas clients."

Prior to joining the Bank of Bermuda (New York) Limited, Danilek was managing director of Bank of Liechtenstein Trust Company. Before joining the Bank of Liechtenstein he was senior partner in the trusts and estate department of Kirlin, Campbell & Keating.

Danilek is a graduate of Princeton University and the University of Virginia Law School. He lives in Port Washington, N.Y., with his wife, Jane. They have three sons and one daughter.

NEWTOWN SQUARE, PA (JULY 18) PR NEWSWIRE - ARCO Chemical Co. (NYSE: RCM) announced today that the Federal Trade Commission has filed suit in Federal District Court in Washington to challenge ARCO Chemical's proposed acquisition of the propylene glycol and urethane polyether polyols businesses of Union Carbide Chemicals and Plastics Co. Inc. (NYSE: UK).

On June 29, 1990, the Federal Trade Commission announced that it had authorized its staff to seek a preliminary injunction rescinding the proposed acquisition.

ARCO Chemical agreed in September 1989 to purchase the Union Carbide businesses, but the transaction has not been closed pending Federal Trade Commission review.

An ARCO Chemical Co. spokesman said, "ARCO Chemical is disappointed that the Federal Trade Commission has opted to file suit in lieu of entering into a reasonable consent order, which has been under negotiation for almost five months.

"We are convinced that a court, when presented with the facts, will conclude that the proposed acquisition would not lessen competition and the court will permit the proposed acquisition to proceed."

FINDLAY, Ohio (JULY 18) PR NEWSWIRE - Cooper Tire & Rubber Company (NYSE: CTB) directors today approved a two-for-one stock split in the form of a 100 percent stock distribution. Distribution of one additional share for each share held will be made Aug. 20, 1990 to holders of record July 30, 1990.

The directors also increased the regular quarterly dividend to six cents

on shares to be outstanding after the distribution. The declared dividend represents an increase of 33.3 percent over the equivalent dividend of 4.5 cents per share which was paid in each of the previous five quarters. The annual rate of the new dividend is 24 cents per share versus the equivalent 18 cents previously. The dividend will be paid Sept. 30, 1990 to holders of record Sept. 7, 1990.

In announcing the stock split, Ivan W. Gorr, board chairman, stated, "There is an advantage to stockholders and potential stockholders to have Cooper common shares trading in a lower price range. We believe the increased number of shares and a moderate price will help provide an active market for the stock." The trading range of Cooper Tire stock since May 1, 1990 has been $42 to $33, with yesterday's close at $36.25.

"The dividend was increased in view of the good earnings of the company during the first half, and our expectations for strong full year results," Gorr stated. He also said that prospects are good for continued growth in sales and earnings in future years. Annual dividend payments per share have been increased each year since 1979 and the company has paid dividends to its stockholders every year since 1950.

Cooper Tire will have approximately 41.2 million shares outstanding after the distribution. The company is authorized to issue 70 million shares of common stock.

For comparative purposes, the per share earnings of the company, as restated to reflect the stock split, would be 40 cents per share for the second quarter 1990 versus 37 cents per share for the 1989 quarter; and for the first half, 73 cents per share compared with 62 cents per share last year.

KING OF PRUSSIA, PA (JULY 18) PR NEWSWIRE - M/A-COM Inc. ("M/A-COM") and International Mobile Machines Corp. (NASDAQ: IMMC) have agreed that M/A-COM will convert its $7.7 million Convertible Note into IMMC common stock, at $5.49 per share.

Based upon the agreement to convert IMM's $7.5 million Convertible Subordinated Note held by Century Communications Corp. will be reclassified as long-term debt in the June 30, 1990, Form 10-Q. The reclassification has been agreed to by IMM's auditors. IMM said it believes that there is no longer a possibility of a cross default under the Century Note relating to nonpayment of the M/A-COM Note, as was previously discussed in IMM's 1989 Form 10-K. As a result of this, the

company's working capital should also be increased significantly.

The conversion will occur upon the earlier of M/A-COM receiving a favorable interpretative ruling from the Securities and Exchange Commission concerning the holding period of the shares under Rule 144 or the effective date of a Registration Statement covering the shares which M/A-COM can request the company file.

"We are extremely pleased that M/A-COM has agreed to convert their debt into IMM equity," stated Bill Hilsman, chairman of the board, president and chief executive officer. "This is a major step towards IMM's plan to restructure its balance sheet by increasing shareholders' equity and eliminating debt."

IMM is a world leader in wireless digital access technologies.

FORT WORTH, TX (JULY 18) PR NEWSWIRE - Cash America Investments Inc. (AMEX: PWN) announced today second quarter earnings.

Daniel R. Feehan, president, reported today that second quarter earnings for 1990 were $1,921,000, an increase of $403,000 or 27 percent from the $1,518,000 reported for the same quarter last year. Net earnings per share for the quarter were 16 cents, an increase of 3 cents or 23 percent over the 13 cents per share reported for the second quarter of last year. Revenues for the quarter were $26.6 million as compared to $20.2 million for last year's second quarter, an increase of $6.4 million or 32 percent.

Net earnings for the current six-month period were $3,761,000, an increase of 839,000 or 29 percent from the $2,922,000 reported for the six months ended June 30, 1989. Earnings per share for the six months ended June 30, 1990 were 31 cents per share, an increase of 29 percent from the 24 cents per share reported for the 1989 six-month period. Revenues for the first half of 1990 were $53.1 million as compared to $39.1 million last year, an increase of $14.0 million or 36 percent.

The company closed out the current quarter with 138 locations operating in the states of Texas, Louisiana, Tennessee, Oklahoma, Georgia and Florida. The company's stock is traded on the American Stock Exchange under the symbol PWN.

#90199p5966 07/18/1990 ~PR Newswire

SHELTON, CT (JULY 18) PR NEWSWIRE - The Forschner Group, Inc. (NASDAQ: FSNR) today announced increases in revenues and earnings for the quarter and six-month periods ended June 30, but expressed caution about the balance of the year.

Revenues of $10.7 million for the quarter and $20.9 million for the half-year were 17 percent and 16 percent better, respectively, than the same periods a year ago.

Net income of $502,000 for the quarter and $857,000 for the six months were 18 percent and 19 percent higher, respectively, than the comparable periods of 1989.

The company stated, however, that these figures may not be indicative of performance for the second half. Management expressed concern about the dollar's weakness against the Swiss franc in view of the fact that the great preponderance of Forschner's products are imported from Switzerland. The company said that although a hedging program has been in place for some time the currency exchange rates have continued to work against the

dollar. The company said that second-half earnings will be adversely affected if the dollar/Swiss franc relationship does not improve. It said also that although final 1990 results will depend on numerous factors, the continuation of present currency rates could result in earnings showing little if any improvement over 1989.

The company also stated that it faces a significant change in its stock ownership later this summer. The majority shareholder, the Prospect Group Inc., plans to distribute its 58 percent holding in Forschner to Prospect shareholders as part of its liquidation plan.

Forschner is the exclusive U.S. marketer of Victorinox Original Swiss Army Knives and Victorinox cutlery, other high-quality, Swiss-made products bearing the Swiss Army Brands label, and other imported cutlery for professional and consumer use.

#90199p5969 07/18/1990 ~PR Newswire

PROVIDENCE, RI (JULY 18) PR NEWSWIRE - Fleet/Norstar Financial Group (NYSE: FNG) today reported net income of $60 million for the second quarter of 1990. Second quarter net income per fully diluted share equaled 54 cents, compared to 80 cents in the second quarter of 1989.

Terrence Murray, chairman and chief executive officer, in announcing the results, said, "While we continue to be impacted by the soft economy in the Northeast, we are pleased by our return to profitability." In the first quarter, the company reported a loss of $98 million, primarily due to a special increase in reserves for possible loan losses. With the second quarter's profits, the loss for the first half of 1990 was $38 million.

Fleet/Norstar also announced today that its board of directors declared a regular quarterly dividend of 35 cents per share on the corporation's common stock. The dividend will be payable on Oct. 1, 1990, to stockholders of record on Sept. 15, 1990.

The board also declared a dividend of 75 cents on the corporation's preferred stock will cumulative and adjustable dividends, $1 par value. A dividend of $.7625 per share was declared on the corporation's preferred stock with cumulative and adjustable dividends, $20 par value. The preferred stock dividends will be payable on Sept. 1, 1990, to stockholders of record on Aug. 15, 1990.

Murray noted that the company's Financial Services Group performed especially well in the quarter, contributing $31.2 million to the

corporation's net income, up 31 percent from 1989's second quarter. Fleet Finance, the corporation's Atlanta-based consumer finance subsidiary, generated $12.8 million, up 27 percent, while Fleet Mortgage Group earned $9.2 million, a 70 percent increase over its year-earlier results.

The leading income producers among Fleet/Norstar's banks were Norstar Bank of Upstate NY, Albany, which earned $16.8 million for the second quarter, and Norstar Bank, N.A., Buffalo, which contributed $15.4 million to earnings.

Murray noted that Fleet/Norstar continues to benefit from the corporation's functional and geographic diversification, particularly in the financial services arena. "Thanks to actions we have taken over the past 20 years to diversify our earnings base and strengthen our balance sheet, Fleet/Norstar will continue to grow when economic conditions improve,'' he said.

In addition, Murray said, "The company continues to show strength in terms of both liquidity and capital. At June 30, the corporation held approximately $4 billion in excess liquid assets, principally in the form of Treasury bills. With regard to capital, excluding these excess liquid assets, the corporation's common equity-to-assets ratio increased from an already strong 6.5 percent in the first quarter to 6.7 percent at June 30, 1990."

Fleet/Norstar Financial Group is a diversified national financial services company listed on the New York Stock Exchange (NYSE: FNG).

CORAL GABLES, FLA. (JULY 18) PR NEWSWIRE - An international consortium led by Texaco has made a new discovery of crude oil in a wildcat well off

the northwest coast of Angola, it was announced today by C. Robert Black, president of Texaco Latin America/West Africa.

The wildcat, known as Savelha No. 1, is located seven miles offshore on Block 2, a one-million acre tract. The discovery flowed at the combined rate of more than 6,000 barrels of oil per day of 22- to 25- degree API gravity crude from three zones between 7,515 and 8,010 feet in a cretaceous dolomite reservoir. The well was drilled to a total measured depth of 10,620 feet in 69 feet of water.

Savelha-1 is the consortium's latest oil discovery in Block 2. The wildcat is located 46 miles northeast of Lombo-North-1, a new oil discovery announced in June 1990; two miles southeast of Bagre-1, a January 1990 new field discovery; and 8.5 miles southeast of Raia-1, a June 1988 new field discovery. The development potential of all four discoveries, which are located about 200 miles north of the capital city of Luanda, is under evaluation.

Operations in Block 2 are conducted under a production sharing agreement which was entered into with Sociedade Nacional de Combustiveis de Angola (SONANGOL), the State Oil Company of Angola, in 1980. Since that time, the consortium has been producing the Essungo and the Cuntala Fields in the northern part of the block. In the far southern part of the block, production began in late 1987 from the Lombo East, Tubarao, Sulele West and Sulele South fields.

An operating subsidiary of Texaco serves as operator of Block 2 and holds a 20-percent interest. Sociedade Nacional de Combustiveis de Angola (SONANGOL) is the concessionaire and holds a 25-percent interest, while Total Angola (TOTAL) and Petrobras Internacional S.A. (BRASPETRO) each holds a 27.5-percent interest.

NIAGARA FALLS, NY (JULY 18) PR NEWSWIRE - Sevenson Environmental Services Inc. (NASDAQ-NMS: SEVN) announced today that its subsidiary, Waste Stream Technology Inc. has been awarded a contract by a Canadian oil company to bioremediate 40,000 cubic meters of oil-tar contaminated soils at a former oil gasification plant site in Ontario, Canada.

The project, which is to start immediately and to be performed over four years, has an expected value of $4 million.

Waste Stream Technology provides a full range of bioremediation services for the cleanup of soil and water contaminated by petroleum products and

other organic contaminants. Bioremediation is the use of biological agents principally bacteria, to degrade contaminants into non-harmful compounds. Waste Stream, which has its headquarters and laboratory facilities in Buffalo, N.Y., was acquired by Sevenson in July 1989. In addition to the project announced today, Waste Stream has 16 bioremediation projects currently under way at various sites in the Northeast with a combined value in excess of $2 million.

Sevenson provides a comprehensive range of field services for the remediation of sites and facilities contaminated by hazardous materials. The company, which is headquartered in Niagara Falls, N.Y., operates in the United States and Canada. Since entering the site remediation business in 1979, the company has performed over 200 projects including projects at the Love Canal and at other Superfund sites.

#90199p5981 07/18/1990 ~PR Newswire

SYRACUSE, NY (JULY 18) PR NEWSWIRE - ONBANCorp, Inc. (NASDAQ: ONBK) today reported record quarterly net income of $3.8 million for the second quarter ended June 30, 1990, up 45 percent over the second quarter 1989 earnings of $2.6 million. Year-to-date earnings for the first six months were up 35 percent at $7.1 million versus $5.2 million for the first half of last year. 1990 earnings per common share were $.49 for the second quarter and $.95 for the first six months.

Robert J. Bennett, chairman, president and chief executive officer, attributed the earnings increase to improving fundamentals. He cited "targeted sales calling efforts, close attention to loan quality, a balance in interest sensitive assets and liabilities which is specifically aimed at guarding earnings against adverse interest rate swings, improved service fee income and control of expenses as the key fundamentals which helped earnings."

For the second quarter of 1990 compared to the same quarter last year ONBANCorp net interest income increased by $2.1 million, non- interest income rose by $1.2 million while direct operating expenses increased modestly by less than $.3 million. Return on average equity (ROE) increased to 12.8 percent for the 1990 second quarter compared to 11.2 percent in the same period last year, and the return on average assets (ROA) improved to .80 percent from .68 percent.

For the first six months of 1990 ONBANCorp net interest income increased $2.2 million and non-interest income and service fees increased $2.1 million, while direct expenses increased less than 2 percent by $249

thousand. At June 30, 1990 ONBANCorp had assets of $1.9 billion, deposits of $1.2 billion and primary capital, including the allowance for loan losses, of $123.5 million, for a tangible capital equivalent of 6.5 percent of assets. The book value of ONBANCorp common stock was $15.69 per share based on 7,721,136 shares outstanding at June 30, 1990. Excluding government guaranteed loans, loan quality as reflected by the ratio of non-performing assets to total assets is 0.38 percent. This ratio is considered a very acceptable level by any banking peer group comparison.

ONBANCorp is the banking holding company of OnBank and is the only Syracuse-headquartered banking company with assets exceeding $1 billion. OnBank operates out of 27 locations in upstate New York, including seven specialized lending offices, in the regional communities of Syracuse, Auburn, Rome, Utica, Rochester, Poughkeepsie, Rockland, Binghamton, Buffalo and Albany, and has insurance and investment operations.

PHILADELPHIA (JULY 18) PR NEWSWIRE - Philadelphia Electric Co. (NYSE: PE) reported today that electric sales were down slightly for the first half of 1990, compared with the record pace set in the first six months of 1989.

The company said that through June 1990 sales amounted to 16.029 billion kilowatt-hours (kwh), a 0.2 percent decrease from sales of 16.057 billion kwh through June, 1989.

PE attributed the decrease to warmer weather earlier in the year and a considerably cooler June.

The company said that on a weather corrected basis, sales for the first six months of 1990 actually were up 2.5 percent over the same period a year ago.

In June, 1990, PE sales were 2.579 billion kwh, a 5.7 percent decrease from sales of 2.734 billion kwh in June, 1989.

Sales in June 1990, reflecting the month's cooler weather, were actually up 1.7 percent over June 1989 on a weather corrected basis.

In 1989, PE set a record for sales of 32.675 billion kwh, a 1.4 percent increase over the previous record of 32.239 billion kwh, set in 1988.

SYRACUSE, N.Y. (JULY 18) PR NEWSWIRE - Community Bank System, Inc. (CBSI) a DeWitt, N.Y.-based multi-bank holding company with assets in excess of $625 million, has announced that net income for second quarter 1990 was $534,000, off 52.5 percent from the comparable period last year; earnings per share was 20 cents, down 48.7 percent from a year earlier.

For the first six months of 1990, net income was $1.304 million and earnings per share was 48 cents; these results are off 41.5 percent and 39.2 percent, respectively, from the first half of last year.

Edwin J. Lyons, president and chief executive officer, stated that the primary accomplishment of the quarter were to maintain asset quality and to build loan loss reserves in light of the current soft economy. In addition, the company's Community National Bank affiliate successfully integrated the operations of its new Corning office, which was recently acquired from Key Bank of Central New York.

Loan loss reserves reached an all-time high at June 30, 1990, as a result of a $665,000 provision for loan losses during the quarter. This provision, which was more than double that of a year earlier, was largely necessitated to build reserves at the Exchange National Bank affiliate, where several commercial loan credits have weakened. Management continues to carefully monitor the viability of these borrowers and will set aside additional reserves as necessary.

Company-wide loan loss reserves now exceed non-performing loans by a favorable 39 percent. Non-performers closely match the experience of one year earlier, having been reduced by 29 percent from the level at Dec. 31, 1989. This reduction in part reflects an increase in net charge-offs to a still-manageable .51 percent of average loans outstanding.

Earning assets reached $557 million on average during the quarter, more than 6.2 percent higher than a year earlier. This includes the contribution of the Corning branch acquisition, as well as growth

throughout the affiliate network. Partially offsetting the value of this growth was a narrowing in the net interest margin to 4.86 percent, largely caused by the company's now having to pay federal income taxes under the Alternative Minimum Tax (AMT) calculation. This requirement reduces most of the favorable benefits of CBSI's high level of tax exempt income on net interest margin. Top priority is being given to developing investment strategies which eliminate the AMT burden as rapidly as possible.

Fees from banking services improved during the second quarter; however, due to a planned reduction in revenues at Northeastern Computer Services, Inc., non-interest income for the first six months was 7.8 percent below 1989's level. Growth in second quarter operating expenses over the first quarter was reduced to about one-half the pace experienced last year. Nonetheless, with operating expenses to date remaining a high 8.0 percent over 1989's level, action is being taken to reduce all discretionary expenditures for the remainder of this year and to establish the proper relationship between personnel expenses and operating income with which to enter 1991.

CBSI presently has five commercial banking affiliates, a data processing subsidiary and a mortgage banking subsidiary. The five banking affiliates are: Community National Bank, headquartered in Addison, with four branches in Steuben County; The Exchange National Bank, located in Olean, with two branches in Cattaraugus County; Horizon Bank, N.A., having its principal office in Waterloo, with five branches in the Finger Lakes region; The Nichols National Bank, located in Nichols; and the St. Lawrence National Bank, headquartered in Canton, which operates 17 branches throughout northern New York and a representative office in Ottawa, Canada. Based in Syracuse, the data processing subsidiary, Northeastern Computer Services, Inc., provides services to the affiliate banks and other financial institutions in upstate and central New York. Community Financial Services, Inc., the mortgage banking subsidiary, is headquartered in Geneva, with a branch in Syracuse.

OMAHA, NE (JULY 18) PR NEWSWIRE - ConAgra Broiler Co., a ConAgra Inc. (NYSE: CAG) company, has announced plans to build a major chicken products complex near Farmerville in northern Louisiana. The project, approved last week by ConAgra's board of directors, includes a state-of-the-art broiler chicken processing facility, a feedmill and a hatchery. The total investment will be about $32 to $34 million.

The new complex, which will be ConAgra Broiler's ninth broiler chicken

complex, is being built in response to increasing demand for ConAgra Broiler's "Country Pride" brand chicken products. Construction is expected to begin this fall and will be completed 12 to 18 months later.

The Farmerville complex will employ 1000 to 1400 people and create a demand for independent farmers in the region to build approximately 400 additional broiler and breeder poultry houses to raise the necessary chickens. The Farmerville processing plant is expected to process about one million chickens per week and produce more than 150 million pounds of Country Pride chicken products per year.

ConAgra Broiler, headquartered in El Dorado, Ark., is part of ConAgra Poultry Co. ConAgra Poultry, also headquartered in El Dorado, is a ConAgra independent operating company with sales of more than $1.7 billion from its chicken product, turkey product and food distribution businesses. ConAgra, headquartered in Omaha, is a diversified food company with sales of $15.5 billion in the fiscal year ended May 27, 1990.

HARTSVILLE, S.C. (JULY 18) PR NEWSWIRE - The board of directors of Sonoco Products (NASDAQ-NMS: SONO) company today (July 18) declared a regular dividend of 23 cents per share. This 263rd consecutive quarterly dividend will be payable September 10 to shareholders of record August 17.

In other action, the board promoted R.C. King, Jr. to president and chief operating officer. Charles W. Coker was named chairman and continues as chief executive officer, a position he has held since 1970.

Russell C. King, Jr., 55, joined Sonoco in 1956 and has been serving as senior vice president since 1987. He has held senior management positions in both the company's industrial packaging and consumer packaging businesses. He has served on the company's executive committee since 1977.

A native of Darlington, S.C., he is a 1956 graduate of Wofford College. He attended the Executive Program at the University of North Carolina - Chapel Hill and the Harvard Advanced Management Program.

"One of Sonoco's major goals is developing a global focus for our businesses. We think having all our operations reporting to one corporate officer will accelerate this process. During his more than 30 years with Sonoco, Russell has been involved in all of our businesses. His diverse operational experience and exceptional management talent are a major asset to the leadership of this company," said C.W. Coker.

Sonoco Products Company is an international manufacturer of industrial and consumer packaging products with more than 15,000 employees around the world. The company had 1989 sales of $1.6 billion. Sonoco stock is traded on the NASDAQ national over-the-counter market (SONO).

CLEVELAND (JULY 18) PR NEWSWIRE - Earnings of Pioneer-Standard Electronics, Inc (NASDAQ: PIOS) for the company's first quarter ended June 30 rose to an all-time quarterly high, the Cleveland-based distributor of industrial electronic components and computer products reported today. The period's net income of $2,406,000, 45 cents per primary share (40 cents per share on a fully diluted basis), was 85 percent ahead of the $1,298,000, or 24 cents per primary share (23 cents fully diluted), of the like quarter last year, which the company noted was a relatively weak period.

Pioneer-Standard first quarter sales were $83.9 million, ten percent above the $76.4 million of last year's first quarter. The company's 50 percent owned affiliate, Pioneer/Technologies Group, Inc., also reported a strong sales performance boosting the two organizations combined sales for the quarter to $126.3 million, up 14 percent over the $111.0 million of a year earlier. For reporting purposes, sales of Pioneer/Technologies are not consolidated with those of Pioneer- Standard.

The current year's first quarter earnings were 16 percent greater than $2,083,000, or 38 cents per primary share, of a strong fiscal 1990 fourth quarter.

Preston Heller, Jr., chairman and chief executive officer, said that results for last year's final quarter coupled with those of the current year's first period point to continuing market share growth and the success of cost containment during a time of generally modest growth for industrial electronics components and computer systems products.

Heller said first quarter earnings benefited from an improved Pioneer/Technologies performance. The affiliate's first quarter equity earnings contribution amounted to $315,000, up from $20,000 a year earlier.

Pioneer-Standard and its Pioneer/Technologies affiliate market a broad range of electronic components and computer products through 41 locations and serve most of the nation's major markets.

Sales of Pioneer-Standard Electronics and its 50 percent owned affiliate, Pioneer/Technologies Group, Inc. are not consolidated for reporting

purposes. Combined sales of the two organizations are as follows for the three months ended June 30.

COLUMBIA, MD (JULY 18) PR NEWSWIRE - The board of directors of RAC Mortgage Investment Corporation (NYSE: RMR) today reported second- quarter earnings for the quarter ended June 30, 1990.

Net income was $3.1 million, or $0.22 per share, compared to $253,000, or $0.02 per share, for the second quarter of 1989. The company declared a second-quarter dividend of $0.15 per share compared to $0.13 per share for the same period last year.

Due to the costs of a hedge position on short-term borrowings entered into during the first half of 1989, net income was reduced by $943,000, or $0.07 per share. There will be no future charges related to this hedge position. The company presently has no open hedge positions on its mortgage assets held for investment or its short-term borrowings.

The volume of mortgage loans purchased through the company's mortgage loan purchase program decreased to a level below that of the previous four quarters. During the second quarter, RAC Mortgage purchased $128 million of mortgage loans, down from $224 million in the first quarter of 1990. In response to the lower volume, the company introduced two adjustable-rate loan programs.

In April, the board of directors authorized the repurchase of up to one million shares of common stock. As of June 30, the company had repurchased 360,100 shares at an average price of $4.54 per share.

RAC Mortgage Investment Corporation is a publicly held real estate investment trust which invests in mortgage loans, mortgage securities, mortgage residual interests and mortgage derivative securities. The company is managed by Ryland Acceptance Corporation, an indirect subsidiary of The Ryland Group, Inc.

COSTA MESA, CA (JULY 18) PR NEWSWIRE - Arthur E. Svendsen, chairman of the board of the managing general partner of Standard Pacific L.P. (NYSE:

SPF) today announced second quarter results.

For the quarter ended June 30, 1990, Standard Pacific earned $16,879,000 ($.62 per unit) on revenues of $110,725,000. This compares with earnings of $26,090,000 ($.95 per unit) on revenues of $110,259,000 a year ago.

For the six months, net partnership income was $35,591,000 ($1.30 per unit) on revenues of $209,900,000. For the same period a year ago, the partnership earned $49,681,000 ($1.81 per unit) on revenues of $212,938,000. The 1989 partnership income was positively impacted by a gain of approximately $1.5 million ($.06 per unit) from the sale of an industrial building located in Orange County, Calif.

Standard Pacific's earnings continued to be impacted by both a softening of the California housing market as well as change in its product mix. Market conditions have necessitated increases in certain sales and marketing costs as compared to the prior year. At the end of June 1990, Standard Pacific's backlog of presold homes stood at 462, compared to 604 at March 31, 1990.

Svendsen also announced that the board of directors has declared a $.35 per unit cash distribution payable Aug. 29, 1990, to unitholders of record on Aug. 15, 1990. Svendsen confirmed the 1990 general distribution policy of the partnership which is to approximately 60 percent of per unit earnings in the form of distributions. Svendsen further stated that the quarterly distribution rate will be reviewed each quarter and may be changed.

In announcing the results. Svendsen also reported the estimated taxable income per partner unit for the second quarter ended June 30, 1990, of approximately $.57 per unit, based on the partnership's inside tax basis.

Standard Pacific L.P. operates primarily as a geographically diversified builder of medium-priced single family homes with a majority of its operations in California. In addition, Standard Pacific L.P. assists homebuyers in obtaining financing for home purchases through its wholly owned subsidiary, Standard Pacific Savings F.A. Standard Pacific L.P. is also engaged in the manufacture and marketing of moveable and accoustical office partitions and wood office furniture through its wholly owned subsidiary, Panel Concepts L.P.

ARLINGTON, Va. (JULY 18) PR NEWSWIRE - Gannett Co., Inc. announced today that earnings for the second quarter of 1990 were $105,267,000, or 66 cents per share. In the year-earlier quarter, net income was $112,104 5/800 or 70 cents per share.

Revenues were down 1 percent in the quarter, to $893,795,000 compared to $904,174,000 in 1989. Operating income declined 10 percent to $193,067,000 from $215,597,000. During the quarter, the company sold its radio station in Seattle and realized a minor gain which is reflected in non-operating income.

For the first half of 1990, net income declined 4 percent to $180,268,000 from $187,005,000. Earnings per share were $1.13, compared to $1.16 in 1989. Revenues for the first six months totaled $1,707,195,000, down 1 percent from last year's $1,721,733,000. Operating income declined 8 percent to $330,595,000. In 1989's first half, operating income was $360,636,000.

In a letter to shareholders, Gannett said that continuing restructuring in the retail industry and a deteriorating consumer economy have stalled revenue growth in 1990. Normal cyclical pressures have been exaggerated by bankruptcies and consolidations of some major department stores, which traditionally have been among the company's largest advertisers.

Newspaper advertising revenues declined 4 percent in the second quarter, reflecting a 7 percent decline in ROP advertising volume and reduced newspaper advertising in Detroit, where a joint operating agency was implemented Nov. 27, 1989. Retail linage was down at most newspapers, and classified volume declined, reflecting lower demand for auto, help wanted and real estate advertising.

At U.S.A. Today, paid advertising pages totaled 929, compared to 1,054 in the year-earlier quarter. Year to date, ad pages were 1,780, down 9 percent from last year's 1,950. Because of rate increases and higher readership, advertising revenues advanced nearly 3 percent in the first half of 1990.

Outdoor revenues gained 6 percent. Transit revenues increased significantly as additional bus shelters in Los Angeles, New York and other cities attracted new advertisers.

Broadcasting revenues were lower in the quarter. Gannett is a nationwide news and information company that publishes 83 daily newspapers, including USA Today, and 54 non-daily publications, including USA Weekend, a newspaper magazine. It operates 10 television stations, 15 radio stations Gannett News Services and the largest outdoor advertising company in North America.

Gannett also has marketing, television news and program production, research satellite information systems and a national group of commercial printing facilities. Gannett has operations in 41 states, the District of Columbia, Guam, the Virgin Islands, Canada, Great Britain, Hong Kong, Singapore and Switzerland.

#90199p6001 07/18/1990 ~PR Newswire

TORONTO (JULY 18) PR NEWSWIRE - Quintette Coal Limited today asked the British Columbia Court of Appeal to overturn a Supreme Court judgment and set aside portions of a price award issued in May by a three-man arbitration panel.

Bruce McConkey, Quintette's chairman, said that "the appeal was filed to protect the interests of Quintette, its employees, its suppliers, its lenders and others who have a stake in the northeast British Columbia coal operation."

He said that "the prices set by the arbitration panel are below the cost of producing and delivering coal and threaten the existence of the company."

Under the award issued on May 28, 1990, the arbitration panel fixed a series of prices that Quintette may charge its only customers, the Japanese steel industry. Those prices range from $95.30 per tonne on April 1, 1987 to approximately $82.40 per tonne beginning Jan. 1, 1991.

Under the original pricing formula contained in the long-term contracts between Quintette and its customers, the price at April 1, 1987 would have been $103.80 per tonne, rising to approximately $112 per tonne by the beginning of 1991.

The arbitration was initiated by the Japanese steel industry when it and Quintette failed to reach agreement during a price review permitted every four years under their contracts.

"By fixing a series of prices, instead of a single price for the quarter beginning April 1, 1987, the panel went beyond the scope of the submission to arbitration," McConkey said.

"We have a responsibility to everyone who depends on Quintette for their livelihood to set aside the arbitration award and obtain a price settlement that will better enable Quintette to continue as a viable operation."

Quintette's initial appeal to the B.C. Supreme Court was denied last month prompting today's petition to the Court of Appeal.

In a separate action, Quintette was granted a restraining order last month that freezes the company's debts for six months, giving it time to reorganize its business.

RICHMOND, VA (JULY 18) PR NEWSWIRE - Ethyl Corporation (NYSE: EY) announced today it has completed the purchase of the fixed assets and inventories of Quantum Chemical Corporation's poly alpha olefin (PAO) production facilities in Houston, Texas, for approximately $48 million.

As announced earlier, Quantum will operate the PAO unit for Ethyl. With a capacity of approximately 30 million gallons (200 million pounds) per year it will be Ethyl's first such production unit in the United States.

Poly alpha olefins have achieved wide acceptance as performance fluids for premium multigrade motor oils. They provide excellent low-temperature fluidity and high-temperature stability with fuel efficiency and extended oil life. Other applications include greases, hydraulics and lubricants for gears, automatic trannmissions, compressors and two-stroke engines.

HOUSTON (JULY 18) PR NEWSWIRE - Continental Express announced today, low introductory fares from Ellington Field available for purchase between July 19 and Aug. 5, 1990. These initial fare levels are as low as $158 roundtrip to destinations such as Atlanta, Denver, Aspen, Chicago, Miami, and Toledo, and $238 roundtrip to cities including Los Angeles, Boston, Gillette, Las Vegas, and San Francisco.

The reduced fares carry minimal restrictions and are valid for travel between August 6, the airline's inaugural date of service, and Sept. 7, 1990. Continental Express will operate the first commercial air service from Ellington Field with nine daily departures to Houston's Intercontinental Airport.

John J. Prendergast, president of the Central Region of Continental Express, said, "Continental Express's low introductory fares will give customers the opportunity to experience our convenient service offering easy connections to Continental Airline's worldwide destinations."

From Ellington, customers can connect to over 200 daily Continental and Continental Express flights to destinations such as New York/Newark and LaGuardia, Los Angeles, San Francisco, Cleveland, Denver, Seattle, Laredo, San Angelo, New Orleans, Mobile, Shreveport, Atlanta, Minneapolis, and more. Continental operates nonstop service from Intercontinental to Honolulu, and numerous Mexican and Central American destinations. The airline recently began direct service to Tokyo as well.

As stated in earlier press releases, Continental Express is replacing its current flights from Hobby Airport to Intercontinental with the new Ellington service. Airline officials stress that Continental's jet service from Hobby will not be affected. A spokesperson for the company stated, "We are proud that our organization will now serve three Houston area airports ... Hobby, Intercontinental, and Ellington."

Continental Express is recognized as one of the leading regional airlines in the country, boarding more than 2.5 million passengers in 1989.

LOS ANGELES (JULY 18) PR NEWSWIRE - Rockwell International Corp. (NYSE: ROK) has presented the United Way with $750,000, providing the major

portion of its $1 million pledge for 1990.

Rockwell's corporate gift will be used by United Way in Los Angeles and Orange counties.

Sam F. Iacobellis, executive vice president and chief operating officer, along with other Rockwell executives, made the presentation to the president of United Way of the Greater Los Angeles area, Leo C. Cornelius.

"Rockwell is pleased to help United Way provide important programs to people throughout Southern California. We are proud to see our contributions used in so many valuable ways in the communities in which our employees live and work," Iacobellis said.

"Rockwell's leadership sets a strong example for corporate and community involvement," Cornelius said.

In addition to Rockwell's corporate contribution, its employees in Southern California raised $1.617 million in 1989 for 15 United Way chapters and three health partners. The contribution from the employees' Donate Once Club was among the largest given by an employee group in Southern California.

Rockwell International is a $12 billion, multi-industry company applying advanced technology to a wide range of products in its aerospace, electronics, automotive and graphics businesses.

SALT LAKE CITY (JULY 18) PR NEWSWIRE - Stansbury Holdings Corporation today announced that it had signed a letter of intent with Fred Bacon, the president and 60 percent stockholder of Canadian Trace Minerals, to acquire its subsidiary, Mineral Life Corporation, and Bacon's "Lost Anasazi Tribe" bean business.

Mineral Life is engaged in the business of Waterhold products, Waterhold application equipment, minerals for agriculture, and mineral supplements for coffee products, breeders, livestock, and human nutrition. Mineral Life is also engaged in real estate for resale. The company has also agreed with Bacon to acquire the "Lost Anasazi Tribe" bean business, which is a rediscovered, to-be-patented, climbing bean that was lost to antiquity for about 600 years. The acquisition is subject to all statutory required documentation being completed and shareholder approval by Canadian Trace Minerals, and to preparation of final agreements.

Mineral Life Corporation has a net value at June 22, 1990, of $1 million, which is substantially the same as the figures at March 31, 1990. The value is made up of inventory of various products, plant and equipment, real estate and cash. The company has been only marginally profitable over the last few years due to the failing health of the president and major shareholder. The board of Stansbury is optimistic that Mineral Life has significant potential in the years ahead. Bacon has agreed to remain employed by the company to assist the company in continuing the acquired business. Stansbury has agreed to repay Bacon approximately $251,000 in loans presently owed by the acquired companies to Bacon by a $25,000 payment at closing and $25,000 per quarter beginning in March 1991. Stansbury will also issue 3,315,416 shares of its common stock to Canadian Trace Minerals and Bacon as initial payment for the acquisitions. The ultimate purchase price will be based on the audited net profits achieved by Mineral Life and the bean business during the four years following the closing date and may result in the issuance of additional shares to Bacon.

ESSEXVILLE, MI (JULY 18) PR NEWSWIRE - "Consumers Power employees have demonstrated their commitment to safety in their everyday work practices. Their receipt of the National Safety Council's First Place Award in each of the last three years is indeed a truly remarkable accomplishment," said National Safety Council Vice President Thomas J. Decker today in presenting the award to the utility for 1989 performance.

"Maintaining such a high level of safety performance as Consumers Power's employees have, over such a long period of time, is indeed a demonstration of national leadership in industrial safety," said Decker. Consumers Power has received the award six times in the past nine years: 1981, 1984-85 and 1987-89.

Decker presented the award during ceremonies at the company's Dan E. Karn-John C. Weadock electric generating complex at the mouth of the Saginaw River near Essexville. Attending were plant employees and representatives of the Utility Workers Union of America Local 144, which represents approximately 300 employees at the Karn-Weadock site.

Consumers Power President and Chief Operating Officer Frederick W. Buckman accepted the award on behalf of the utility's 9,300 employees, for their 1989 performance operating the safest large combination gas and electric utility in the nation. Accepting the award with Buckman was Ron LaForest, president of the Michigan State Utility Workers Council, UWUA, AFL-CIO, which represents nearly 4,000 Consumers Power operating, maintenance and construction workers.

"I want to congratulate each employee for again achieving the National Safety Council's First Place Award. Your demonstrated concern for your safety and the safety of others has touched the lives of many people," said Buckman. "Your professionalism has won the respect of the community and I am proud of the winning tradition you have established," Buckman concluded.

Consumers Power's employees in 1989 recorded a lost workday incident rate of 0.09, the best in the nation for a gas and electric utility with more than 5,000 employees. The average lost workday incident rate in the utility industry last year was 0.89.

Also in 1989, Consumers Power employees surpassed their own record for the longest uninterrupted safe work period in the utility industry by working 7.8 million hours safely, from Dec. 5, 1988, to May 2, 1989.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

PHILADELPHIA (JULY 18) PR NEWSWIRE - Yaron Eitan, president and CEO of Geotek Industries, Inc. (NASDAQ: GOTK), announced today that the company reached an agreement in principle to enter into a strategic alliance with Aryt Optronics Industries Ltd. (NASDAQ: ARYTF). The alliance will combine both management and operations of the two companies. As part of this transaction Aryt will become the largest shareholder of Geotek. Geotek will issue securities to Aryt in exchange for approximately $11 million of values, $9 million of cash and equivalents and 50 percent of an optics subsidiary, Ophir-Aryt Optronics Ltd.

It was also announced that Geotek reached an agreement with Istec Industries and Technologies Ltd. (NASDAQ: ISTUF, ISTEF, ISTWF) to obtain shares in Aryt (approximately 47 percent) in return for Geotek's assuming certain of Istec's debts totalling some $4.9 million. Geotek will pay Istec an additional $1 million in a combination of debt and equity.

Eitan stated that the above two transactions will add substantially to Geotek's liquidity and provide the company's technology group with an optics capability.

Geotek manufactures a variety of products for the computer and

telecommunication industries in Israel and the United States, including high-quality transformers and power supplies. The company also manufactures sophisticated electronic fuses for munitions and other mechanical defense articles.

COSTA MESA, CA (JULY 18) PR NEWSWIRE - Following a period of significant growth, Parker Automotive Corporation's common stock began trading on the NASDAQ system last week. The company's Class A Warrants are scheduled to begin trading on NASDAQ this week.

"Parker Automotive has, in a relatively short period of time, expanded into a global company with distributors in more than fifty countries," said Michael E. Parker, chairman and chief executive officer of Parker Automotive Corp. "We believe that listing on the NASDAQ system is consistent with our business accomplishments, because our shareholders will now benefit from the increased visibility that listing on NASDAQ affords," added Parker. He went on to say that the listing is expected to broaden the company's access to international capital markets and increase opportunities for a more diversified shareholder base.

Parker Automotive Corp. manufactures and distributes a family of emission reducing products called CarbonClean. CarbonClean removes harmful contaminant deposits from the fuel systems of gasoline- and diesel-powered internal combustion engines. As a result of the cleaning, engine performance and economy are greatly restored and exhaust emissions are reduced anywhere from fifty to ninety percent.

Parker Automotive is headquartered in Costa Mesa. Manufacturing facilities are in Fountain Valley, Calif., and regional sales offices are maintained worldwide.

RIVERTON, WY (JULY 18) PR NEWSWIRE - U.S. Energy Corp. (NASDAQ: USEG) and its 44 percent owned subsidiary Crested Corp. (NASDAQ: CBAG) announced today that they had entered into an agreement to sell between 1 million and 1.8 million pounds of uranium oxide (U3O8) to a major domestic utility in annual installments from 1990 through 1993. This is the seventh uranium sales contract U.S. Energy and Crested, d/b/a USE/CC have entered into with major U.S. utilities on behalf of Sheep Mountain Partners, their Partnership with Cycle Resource Investment Corp., a wholly owned subsidiary of NUKEM Inc. of Stamford, Conn. USE/CC continues to bid on additional contracts for the sale of U3O8 to domestic and foreign utilities to meet the large amount of their unfulfilled requirements during the 1990s.

John L. Larsen, president of U.S. Energy said, "The recent increase in the spot market price for U3O8 from $8.80/lb. in April 1990 to the current level of about $11.75/lb. has been an encouraging development for uranium producers. Many of our domestic utilities have expedited their purchases of uranium to take advantage of these low prices and we expect to be successful on other bids for the sale of U3O8."

U.S. Energy and Crested are diversified mineral companies with interests in major uranium resources located in south-central Wyoming. The companies also have interests in molybdenum, gold and other base and precious metals properties.

NEW YORK (JULY 18) PR NEWSWIRE - The Keebee Corporation (Bulletin Board Symbol: KEBE) today announced that on July 17, 1990, Keebee management learned that a special meeting of the majority shareholders of the Keebee Corporation was held at Panama City, Panama, on July 13, 1990, at which it was resolved that the interest payments due to Keebee from Guardian Savings & Guaranty, Inc., and Bristol Merchant Savings, Inc., be drafted by purchasing, in the name of the Keebee Corporation, time certificates of deposit from American Security Bank, Ltd., and that Guardian Savings & Guaranty, Inc., and Bristol Merchant Savings, Inc., acquire from American Security Bank, Ltd., letters of credit guaranteeing the next three interest payments due to Keebee.

American Security Bank, Ltd., has confirmed to Keebee that the certificate of deposit is in the amount of $3 million payable to Keebee at 13 percent interest per annum and the letters of credit are in the aggregate amount of $9 million.

Non-rescindable completion of the previously announced agreement between Keebee, Guardian and Bristol is still subject to, among other things, Keebee being satisfied, after its due diligence, that the warranties and representations made by Bristol and Guardian in the agreement are true and correct and that the certificate of deposit and the letter of credit are valid instruments. At this time, Keebee is still in the process of determining whether or not the letter of credit and the certificate of deposit from American Security Bank, Ltd., have the value ascribed to them.

LOWELL, MA (JULY 18) PR NEWSWIRE - COMFED Mortgage Company recently announced the introduction of the "Low Down" Mortgage, a new program designed specifically for consumers who are seeking mortgages with low down payments and interest rates, minimal up-front costs, and good qualifying ratios -- with no income ceilings.

The "Low Down" Mortgage is perfect for first-time homebuyers, or those people who previously thought they were locked out of the housing market. This new program offers borrowers the intitial low-rate benefits of an adjustable rate mortgage without the payment shock normally associated with this type of loan. With this government-insured (FHA) adjustable rate mortgage, adjustments are capped at 1 percent per year, up to a maximum of 5 percent over the life of the loan.

Additionally, it has a much lower margin than conventional adjustable rate loans. With the low start rate, as well as reduced caps and margin,

homebuyers can ensure payment stability and security in the future.

Another great feature of the "Low Down" Mortgage is that it allows people to get into the housing market with less cash up-front. Both down payment and closing costs amount to only 5 percent, or in some cases, even less.

According to Gerald Devlin, senior vice president of COMFED Mortgage Company: "Taking advantage of the FHA's strong commitment to making homeownership more affordable, COMFED is now able to offer the "Low Down" Mortgage. No other mortgage program on the market today provides as many benefits for the first-time homebuyer. The "Low Down" Mortgage requires less up-front cash and offers low monthly mortgage payments, so more people can now realize their dream of homeownership. In addition, this program can be used effectively to refinance your current mortgage, or to purchase a vacation home."

COMFED BANCORP, INC. is a $1.4 billion asset holding company headquartered in Lowell, Mass. Through its principal operating divisions: COMFED Savings Bank and COMFED Mortgage Company, the bank engages in residential mortgage lending, loan servicing, and retail banking. COMFED Mortgage Company maintains a network of 16 offices in five Northeastern states. COMFED Savings Bank operates 28 retail banking offices in Massachusetts and Connecticut. The bank's loan servicing portfolio ranks in the top 20 among Thrifts nationwide. COMFED BANCORP, INC. is listed on the American Stock Exchange, symbol: CFK.

COLUMBUS, OH (JULY 18) PR NEWSWIRE - Huntington Bancshares Incorporated (NASDAQ: HBAN) today reported net income of $27.7 million for the second quarter, and $55.1 million for the first half of 1990. These figures represent increases of 2.0 percent and 3.5 percent, respectively, over the corresponding periods one year ago. Historical figures have been restated for the December 1989 acquisitions of First Macomb Bancorp, Inc. (Mt. Clemens, Michigan) and First Banc Securities, Inc. (Morgantown, West Virginia).

On a per share basis, second quarter 1990 earnings were $.49 versus $.48 reported last year. For the first six months of 1990, earnings per share were $.98 compared with $.95 earned in 1989. All per share figures have been adjusted to reflect the 10 percent stock dividend that will be paid on July 31, 1990.

Average total loans and leases increased 7.9 percent to $7.2 billion from

the second quarter of 1989 to the second quarter of this year. The majority of this increase was attributable to growth in commercial and consumer loans. Non-performing loans were $77.2 million at June 30, 1990 compared with $80.2 million at the end of the first quarter and $53.8 million last year. Other real estate owned was $39.2 million at the end of the second quarter versus $13.4 million at March 31, 1990 and $11.0 million one year ago.

Capital ratios have shown continued improvement over the last twelve months. Primary capital to total assets was 7.17 percent at the end of the second quarter compared with 6.85 percent at year-end and 6.75 percent one year ago. Total capital to total assets increased to 8.37 percent from 8.09 percent at year-end and 8.06 percent last year.

Huntington Bancshares is an $11.7 billion regional bank holding company headquartered in Columbus, Ohio. The Company's banking subsidiaries operate 253 offices in Ohio, Indiana, Kentucky, Michigan, Pennsylvania, and West Virginia. In addition, Huntington's mortgage, trust, investment banking, and automobile finance subsidiaries manage 32 offices in the six states mentioned as well as Delaware, Florida, Illinois, Maryland, Massachusetts, New Jersey, Rhode Island, and Virginia. Huntington's common stock is traded on the NASDAQ National Market System using the symbol "HBAN".

ATLANTA, (JULY 18) PR NEWSWIRE - American Business Products Inc. (NYSE: ABP) today reported second quarter and first half results reflecting the effects of the soft economy and weakened market conditions.

Sales for the three months ended June 30 were $94.8 million with net income of $3.0 million or $.42 per share of common stock compared with sales of $97.7 million and net income of $3.1 million or $.44 per share for the second quarter of 1989.

First half sales of $195.2 million were down slightly from last year's sales of $196 million. Bolstered by a strong first quarter, net income for the first half was a record $6.8 million compared to $6.5 million last year. Earnings per share increased to $.95 compared to $.90 for the first half of 1989.

"Our people are pushing hard to increase sales in this tough market environment, while we are continuing strong cost control programs in all operations. At the same time, we are working to expand our share of market niches and re-emphasizing our historic commitment to quality and service," said Thomas R. Carmody, president and chief executive officer.

American Business Products Inc., based in Atlanta, is a leading supplier of forms for computers and other electronic equipment; envelopes and specialty mailers; book printing, and other business supplies with 46 production facilities in the continental United States and Hawaii. ABP's major operating companies are Curtis 1000 Inc., Vanier Graphics Corp., BookCrafters USA Inc., and American Fiber-Velope Mfg. Co. and a joint venture, Curtis 1000 Europe GmbH in Neuwied, West Germany.

BRYN MAWR, Pa. (JULY 18) PR NEWSWIRE - Donald R. Walsh has announced his retirement as president of PSC Information Services Inc. (PSC/IS) effective June 16, 1990, according to John W. Boyer Jr., president and chairman of Philadelphia Suburban Corp. (NYSE: PSC).

Walsh, a former IBM executive, has served as president of a number of the data processing subsidiaries of PSC since joining the company in 1987. Most recently, he has served as president of PSC/IS, which includes Mentor Information Systems Inc. and Digital Systems Inc. Both firms provide advanced software and data processing services to utilities and local governments.

Boyer also announced the election of Dr. Thomas E. Gibbs to replace Walsh as president of PSC/IS. Gibbs was the founder of Mentor Systems Inc., of Lexington, Ky., which was acquired by PSC in 1987. Most recently he has served as PSC's senior vice president-information technology. In his new position, Gibbs will be responsible for a 300- person organization with annual revenues of $25 million and more than 1,400 clients worldwide.

Gibbs has a Ph.D. in business administration from the University of Cincinnati and lives in Lexington with his wife and two daughters.

Philadelphia Suburban Corp. operates Philadelphia Suburban Water Co., one of the nation's largest investor-owned water utilities, as well as several nonregulated subsidiaries which provide information and engineering services mainly to utility and municipal customers.

CHICAGO (JULY 18) PR NEWSWIRE - Great American Management and Investment Inc. (NASDAQ: GAMI) announced today that Great American and Equity Holdings Limited, an Illinois limited partnership, have entered into a stock purchase agreement with Hellman & Friedman Capital Partners, a California limited partnership, and Hellman & Friedman Capital Partners International, a British Virgin Islands general partnership, for Equity Holdings Limited to sell 2,000,000 shares of Great American at $25.00 per share to the Hellman & Friedman group. The transaction is subject to, among other things, various governmental approvals.

Equity Holdings Limited currently owns approximately 92 percent of Great American's 11,113,756 shares of common stock outstanding. After the transaction is completed, Equity Holdings Limited will own approximately 74 percent and the Hellman & Friedman group will own approximately 18 percent. Upon completion of the transaction, Hellman & Friedman will be granted two seats on Great American's board of directors, which will be filled by F. Warren Hellman and David J. Johnson.

Great American is a diversified company with principal businesses in manufacturing, agricultural chemicals and fertilizers, and financial services. For the nine months ended April 30, 1990, Great American's revenues were $1.67 billion and earnings from operations before depreciation and amortization were $210 million.

"We are very pleased to be an investor in Great American," said David Johnson, a Hellman & Friedman general partner. "Great American has excellent, experienced operating management. The core manufacturing businesses in Eagle and Jepson have high market shares and efficient low cost operations. KAC is a strong integrated agricultural chemicals and fertilizer business. We believe there will be excellent opportunities to further develop and grow these core businesses."

"I've worked with Warren Hellman, Tully Friedman and their associates before, and having them as my partners was a major motivating factor in this transaction," said Sam Zell, chairman of Great American. "There is no question that their contribution will increase the value of the company."

Hellman & Friedman Capital Partners and Hellman & Friedman Capital Partners International are special situation investment funds affiliated with Hellman & Friedman, a San Francisco-based private investment banking partnership. The Hellman & Friedman funds were created to invest in friendly positions in public companies, financial restructurings, financial service companies and leveraged buyouts.

PITTSBURGH (JULY 18) PR NEWSWIRE - Fidelity Savings Association (NASDAQ-NMS: FSVA) today announced results for the third fiscal quarter ended June 30, 1990.

Net income for the period was $334,000 or $.34 per share compared with net income of $208,000 or $.21 per share for the third quarter of fiscal 1989. The increase in net income over the prior year was primarily attributable to an improved net interest margin and, to a lesser extent, the favorable impact on interest income of the collection of previously deliquent loans. Net interest income for the quarter increased 25 percent to $1,391,000 vs. $1,109,000 for the third quarter a year ago. At June 30, 1990, the association had total assets of $163,334,000 and stockholders' equity of $14,216,000 or $14.54 per share.

For the first nine months of fiscal 1990, net income was $804,000 or $0.82 per share compared to net income of $1,092,000 or $1.12 per share in the same period last year. Net interest income was $3,817,000 vs. $3,409,000 for the nine-month period a year ago. Included in the results for fiscal 1989 was a non-recurring pre-tax gain of $414,000 from the sale of Federal Home Loan Mortgage Corp. preferred stock.

The board of directors of Fidelity Savings today declared a quarterly dividend of $.06 per share on the association's common stock. The dividend is payable Aug. 10, 1990, to stockholders of record Aug. 1, 1990. This represents the eighth consecutive cash dividend paid by Fidelity Savings.

Fidelity Savings Association is a Pennsylvania-chartered, FDIC-insured savings institution conducting business through six offices in Allegheny and Butler counties.

#90199p6055 07/18/1990 ~PR Newswire

DETROIT (JULY 18) PR NEWSWIRE - Comerica Incorporated (OTC: CMCA) today reported quarterly earnings of $32.2 million, or $1.90 per share. This compares with earnings of $30.3 million, or $1.86 per share in the second quarter 1989. Return on common shareholders' equity was 18.02 percent for the quarter and return on assets was 1.07 percent.

Net income for the first six months of 1990 was $63.7 million, or $3.76 per share, compared to $57.7 million, or $3.52 per share for the same period in 1989.

The increase in quarterly earnings was due in large part to growth in outstanding loans, according to Eugene Miller, chairman, president and chief executive officer. Average outstanding loans were $796 million higher than in the second quarter of 1989. This growth occurred mainly in the consumer and mid-sized business portfolios, and was for the most part unrelated to acquisitions. The higher level of loans, along with higher levels of investment securities, caused an increase in net interest income of $9.3 million. Also contributing to the improvement in net income was an increase in noninterest income of $5.6 million which was due mainly to acquisitions that occurred late in 1989.

Nonperforming assets were $135 million at June 30, 1990, up from $109

million at year-end 1989. The increase from year-end reflects the addition of one loan of approximately $25 million to the nonaccrual category. As a percentage of period-end loans, nonperforming assets were 1.67 percent at June 30, compared with 1.37 percent at Dec. 31, 1989. Net charge-offs for the quarter were $10.8 million, compared with $9.3 million for the second quarter last year.

At June 30, 1990, assets totaled $12.2 billion compared with $11.5 billion a year earlier, and loans totaled $8.1 billion compared with $7.3 billion. Deposits were $9.9 billion compared with $9.3 billion, and shareholders' equity was $747 million compared with $676 million at June 30, 1989.

(a) The primary earnings per share computation is based on the weighted average number of shares outstanding during each period. The fully diluted earnings per share computation is based on the conversion of the corporation's convertible subordinated debentures into its common shares and the elimination of the interest expense, net of income tax effect, related to these debentures. Cash dividends declared are calculated on the number of shares outstanding as of the record date.

MORRISTOWN, (JULY 18) PR NEWSWIRE - Jersey Central Power and Light Company takes issue with contentions by New Jersey Public Advocate Wilfredo Caraballo that the Oyster Creek Nuclear Generating Station has outlived its usefulness and should be shut down.

"While we have not yet had an opportunity to review the details supporting the Public Advocate's position, the most definitive study done by JCP&L and filed with the New Jersey Board of Public Utilities (NJBPU) in December 1988 concluded that Oyster Creek is still the most economical source of power for our customers," said Dennis Baldassari, vice president of rates, materials and services for JCP&L.

"We know of no alternative that would allow JCP&L to supply electricity to its customers more economically than continued operation of Oyster Creek," he added, noting that both capital and operations and maintenance expenses for the plant have levelized in recent years following a five-year period of major expenditures by JCP&L to modernize and refurbish the facility.

EL PASO, TX (JULY 17) UPI - U.S. immigration officials confirmed Tuesday that 63 Chinese refugees smuggled into the United States via Panama are being held in detention and are seeking political asylum.

The refugees were arrested in a sting operation in Fairhope, Ala., on June 9 and 11. Many of the refugees claim persecution because they supported the democracy movement in China that was crushed June 4, 1989.

The ringleader of the smuggling ring was identified by the INS as a Panamanian restaurateur of Chinese descent, Alfonso Mock Castillo.

Officials said Mock Castillo contracted to smuggle 35,000 Chinese from Panama.

Of the 63 arrested in Fairhope, across the bay from Mobile, about 50 were sent to El Paso and the rest, mostly women, were taken to a facility in Krome, Fla.

Officials said the Chinese spent as much as $12,500 each to be smuggled into the United States.

#90199u0057 07/18/1990 ~United Press International

HUNTSVILLE, TX (JULY 17) UPI - Johnny Paul Penry was sentenced to death Tuesday for the second time in the rape-murder of a southeast Texas woman

despite claims that he is mentally retarded and deserved a life sentence.

The U.S. Supreme Court last summer overturned Penry's first death sentence and said the first jury did not have a chance to adequately consider his retardation and history as an abused child before sentencing him in 1980.

The second jury, made up of nine men and three women, was told to consider those facts, but after 2 1/4 hours of deliberation, their decision was no different.

''Everyone feels the same way,'' said one juror, who asked not to be identified. ''Whether Penry was mentally retarded or not, he did it and they proved it.''

Penry, 34, has spent the last 10 years on death row and in 1986 came within 13 hours of execution. He showed no emotion when the verdict was returned. His attorneys said they will argue on appeal that the second jury had no better opportunity to consider Penry's mitigating circumstances than the first.

Penry's victim, Pam Carpenter, was attacked in her Livingston home on Oct. 25, 1979. She was raped, beaten, kicked and stabbed in the chest with a pair of scissors. Before she died in a hospital emergency room, Carpenter gave police a description that led them to Penry, a convicted rapist paroled from prison less than two months earlier.

#90199u0169 07/18/1990 ~United Press International

(JULY 18) UPI - Poland's foreign minister says he's perfectly satisfied with a pledge that Poland will get a treaty to protect its borders AFTER Germany is re-unified. That reaction came in Paris Tuesday at a meeting of the four World War Two allies and East and West Germany. U-S officials say participants agreed on five principles to protect Poland's German border. The sources say German re-unification is complete, but for the details.

Authorities in Peru suspect that Shining Path guerrillas killed at least 70 peasants Tuesday in attacks on two northern towns. Two rebels were also reported killed. An official said the attacks occurred in two mountain towns 140 miles north of Lima. The area is one of 54 Peruvian provinces under a state of emergency because of growing violence.

The Coast Guard Tuesday overruled Alaska's requests that Exxon put a mechanical rock washer to work on beaches oiled by the Exxon Valdez spill. The machine was designed to excavate beaches and wash oily rocks on a conveyor belt. The Coast Guard said the new rock washer would do more harm than good. Exxon immediately suspended construction of the cleanup machine and canceled tests slated for later this month.

El Salvador's Supreme Court says a judge is considering ordering two U-S servicemen to testify in the investigation of the killings of six Jesuit priests last year. One of the soldiers has already provided written testimony saying the head of an investigation covered up a confession by a Salvadoran colonel who's been charged with ordering the murders. The court also announced that a defense lawyer has dropped the case because of threats.

#90199u0197 07/18/1990 ~United Press International

WASHINGTON (JULY 18) UPI - If a single mother of two earning roughly $9,400 annually holds her rent, food and child care expenses to the minimum established under federal standards, she would have about $30 left at the end of each month for health care and other household items and clothing.

Federal policy indicates that salary is enough money for a family of three to live on without being classified as poor.

But a study released Wednesday challenged conventional poverty standards, saying the criteria met by 32 million Americans is deceptive and arbitrary and skimps at the expense of people in need.

The survey of 3,511 Americans, conducted by the Gallup Poll for the Families For United Senior Action Foundation, found that most believe the guidelines understate the number of people living in poverty because the income levels used to decide who is poor is too low.

The study, conducted between July and October 1989, also found that the poor are more likely to be white, older and better educated than ''would appear'' under federal poverty guidelines.

''The government poverty line is based on an arbitrary, arcane and outdated formula intended to serve the needs of bureaucrats and politicians,'' said Ron Pollack, executive director of the non-profit Families USA Foundation.

''The real life poverty line is rooted in the experience of America's consumers who know the real costs they have to pay to purchase the essential necessities of life,'' said Pollack.

The ''real life'' poverty level established by respondents to the survey averaged $15,017 for a family of four, while the federal government poverty line for the same family is $12,092.

The survey showed that if ''real life'' figures were applied there would be 44 million Americans living in poverty.

Comparing ''real life'' figures to government statistics, there would be 2.4 million more poor blacks, 8.1 million more poor whites, 5.4 million

more poor males and 7.5 million more poor females.

There are more than 6.5 million people over 65 who fall below the ''real life'' poverty standard, which is 23 percent of all Americans in that age group. That compares with the government's elderly poverty calculation of 12 percent.

The method for determining the federal poverty line was set in 1963 and was based on family needs and used consumption data from a 1955 survey showing that the average American family spent about one-third of its budget on food.

The Census Bureau, which counts the poor each year, officially adjusts the line for increased prices. The definitions of family or individual needs have not changed. The latest figures are based on 1988 Census statistics.

Patricia Ruggles, an economist with the Urban Institute, noted that the proportional food budget of most Americans has declined, while spending on housing, health care and child care have increased.

Although programs adopted by Congress for food stamps, school lunches and health care allow benefits for some living slightly above the federal poverty line, policy makers have failed to adopt a blanket policy for everyone living above the accepted poverty line.

One of the problems is that there is continuing debate within the government on what should constitute income. Some argue non-cash benefits like food stamps and Medicaid should be counted as income, an accounting plan some feel would push the most needy further into poverty.

Another problem is public perception. The United States does not want to adjust its poverty line to show a larger problem than it admits to, study organizers said.

(JULY 18) UPI - A convicted prostitute was released from an Oakland, Calfironia, jail Tuesday apparently without being tested for the AIDS virus though she acknowledged using dirty hypodermic needles. Under a new state law that has NOT been enforced... convicted prostitutes must undergo

counseling and a test for the AIDS virus. Some health officials fear that the law will lead to breaches of confidentiality and discrimination against those who test positive.

News reports Tuesday said at least 40 mountaineers were killed when a mild earthquake triggered an avalanche in the Soviet Union. The avalanche occurred in a mountain chain of Soviet Central Asia. The official Tass news agency says 43 people died in the accident Friday... but the coach of the Soviet national mountaineering team cited 40 deaths and said three climbers likely survived. He said there has NEVER been such a tragedy in the history of Soviet mountaineering.

#90199u0249 07/18/1990 ~United Press International

HUNTSVILLE, Texas (JULY 18) UPI - Condemned killer Mikel James Derrick, a former male prostitute who confessed to a 1980 robbery-murder out of fear his brother would be accused of the crime, was executed early Wednesday by injection.

Derrick, 33, was taken into the death chamber in the state prison at Huntsville shortly after midnight, injected with a lethal dose of drugs and pronounced dead by corrections officials at 12:17 a.m. CDT.

''I just ask that everyone I ever hurt or done anything wrong to them to forgive me ...,'' Derrick said in his final statement. He then looked up to the ceiling of the death chamber, closed his eyes and appeared to say a prayer.

Texas Attorney General Jim Mattox said Derrick ''was resloved to his fate. He made a decision to make amends with his fellow human beings.

Derrick spent most of Tuesday watching television and talking to fellow death row inmates and a prison chaplain. He refused his last two meals and spent several hours on the telephone speaking with relatives.

The Supreme Court refused Tuesday to stay the execution. Attorneys for the condemned man turned to the high court Monday after the 5th U.S. Circuit Court of Appeals in New Orleans refused to intervene in the case.

The lawyers had argued that the original defense attorney was ineffective by not raising objections to certain testimony. The high court last October refused to review an earlier appeal from Derrick.

Derrick was the 134th person put to death in the United States since the Supreme Court lifted its ban on capital punishment in 1976 and the 37th in Texas since the state resumed executions in 1982.

Derrick was condemned to die for the Oct. 10, 1980, slaying of Edward Sonnier, 32, who was stabbed to death in his Houston apartment during a robbery attempt.

Derrick, an admitted male prostitute, was in prison serving time for a robbery conviction when he confessed to Sonnier's slaying after learning his brother, Marshall, had been linked to the victim's stolen car.

Derrick wrote in a letter to the Harris County district attorney, saying, ''I killed a man to get a car.'' He said he stabbed Sonnier 15 times after the man made homosexual advances toward him. Derrick claimed he then stole Sonnier's car, which he later stripped with the help of friends.

Derrick, a former laborer with an eighth-grade education, also served a prison term for larceny and burglary in the mid-1970s.

He also was the victim of a 1985 slashing attack by two other death row inmates, suffering cuts on his arms and chest from a 9 1/2-inch sharpened piece of metal wielded by his fellow prisoners.

#90199u0294 07/18/1990 ~United Press International

(JULY 18) UPI - NASA officials in Washington Tuesday said they expect to

eliminate at least 95 percent of the Hubble Space Telescope's blurry vision. Engineers plan to replace nickel-sized mirrors in a new camera to be installed in about three years. NASA says any remaining near-sightedness should be made negligible by pushing or pulling on Hubble's primary mirror to make subtle changes in its shape.

U-S immigration officials confirmed Tuesday that 63 Chinese refugees smuggled into the United States through Panama are being held and are seeking political asylum. The refugees were arrested last month in a sting operation in Fairhope, Alaska... and are held in Texas and Florida. Many of the refugees claim persecution for supporting democracy in China. Officials said the Chinese spent as much as 12-thousand-dollars each to be smuggled into the United States.

Georgians are waiting for the results of Tuesday's Democratic primary for governor to see if Andrew Young will move one step closer to becoming the state's first black governor. Exit polls show opponent Zell Miller the clear favorite... but he is NOT expected to rally the votes needed to avoid an August 7th Democratic run-off. Young is expected to win a spot in that election.

The Labor Department proposes new rules that would cut by one-half the limits of worker exposure to cancer-causing asbestos. The assistant labor secretary said Tuesday that the proposal is meant to ''significantly reduce'' deaths resulting from prolonged exposure. The move comes as a federal judge in Cleveland ordered the establishment of a national class action to address asbestos-related lawsuits.

#90199u0298 07/18/1990 ~United Press International

SIBIU, ROMANIA (JULY 18) UPI - A defense lawyer for Nicu Ceacescu, the son of the executed Romanian dictator, says her client may not live to see the verdict in his genocide trial because he is suffering hepatitis and other ailments.

Ceausescu, looking gaunt and haggard in the second session of his long-delayed trial on charges of committing genocide, listened Tuesday as witnesses testified about his actions in the Transylvanian city of Sibiu where he was Communist Party boss.

Public sympathy for Nicu Ceasuescu has been growing as the trial progresses and prosecutors say they are worried their case may be undermined.

''The way the trial is going, it looks like he'll get off scott free,'' said Prosecutor Capt. Nicau Aron.

''He's so ill he may not live to the end of the trial,'' said defense Lawyer Paula Jakob after Tuesday's session.

The 39-year-old Ceasescu told a local newspaper he is suffering from hepatitis and chronic cirrhosis of the liver and claimed he is being refused medical treatment in prison.

''I am beyond medicine now and anyway they refuse to treat me here,'' Ceasescu told the Tribunal newspaper in an exclusive interview from prison.

Government officials could not be reached to comment on the charge.

Monday, Ceasescu again denied charges that he ordered security forces to fire on protesters during the December revolution that ousted his father. Ninety-two people died in Sibiu during the week of Dec. 21.

During his first appearance two months ago, Ceausescu, 39, said the order to crush the uprising was a throwaway after-dinner remark that he retracted when he sobered up. He maintained again Monday he did not give an order to shoot the anti-government protesters.

Despite his reputation as an alcoholic playboy and a gambler, public sympathy for the younger Ceausescu has grown since his first appearance in court in May when he cracked jokes and jumped from his seat to question witnesses.

The son of former dictator Nicolae Ceausescu, who was executed in the aftermath of the revolution, is believed to know many details of his father's secret security police, which opponents to the new elected government say is still functioning.

Critics also charge authorities deliberately stalled the beginning of Nicu Ceausescu's trial to protect those who still hold positions of power in the new National Salvation Front government, led by Ion Iliescu.

Seven months after the revolution, nothing has emerged from any of the trials of former communist activists to reveal which of the security forces fired on the protesters and who gave the orders.

The trial is expected to continue for at least a week.

#90199u0310 07/18/1990 ~United Press International

Minnesota third baseman Gary Gaetti can answer to the title of soothsayer after Tuesday's game in Boston.

Gaetti predicted the first of two triple plays in one game in major league

history before triggering both in the Red Sox 1-0 win over the Twins.

With no score in the fourth inning, Boston's Wade Boggs walked and went to third on a Jody Reed double. Carlos Quintana walked to load the bases.

''I turned to Boggs and the third base ump and said, 'The next pitch is a 5-4-3','' said Gaetti. ''You can ask 'em.''

''Yeah, he said it,'' Boggs said. ''I turned to him and said, ''Oh, really?'''

Gaetti told catcher Junior Ortiz and second baseman Al Newman to get ready before fielding a Tom Brunansky hit.

''I knew I had to play pretty close to the line with Brunansky up,'' Gaetti said. ''I tried to position myself about an arm's length from the bag.''

Gaetti positioned himself perfectly, tagging third and throwing to second to nail Reed. Newman's relay to first beat Brunansky by a step.

In an almost identical play in the eighth inning, Jody Reed lined one to Gaetti with runners at first and second. Again, Gaetti stepped on third, threw to second, and Newman beat Reed easily at first.

''That one just developed,'' Gaetti said. ''If the ball isn't hit extremely hard, you can just forget about it (getting a triple play).''

Gaetti has started five of the last six Minnesota triple plays and was involved in six of the last 10 in Twins history.

After an inauspicious debut, Boston rookie Tim Naehring ruined Minnesota's history-making performance with his game-winning single in the fifth to score Mike Greenwell. Naehring, who made an error and struck out three times in his first major league appearance Monday, began Tuesday's game with an error when leadoff hitter Shane Mack's ball went through his legs.

''I thought, 'Oh, no, not again,''' Naehring said. ''I didn't stay with it long enough, but I learned from it.''

''I just told him after last night 'hang in there, Babe','' said Boston Manager Joe Morgan. ''And he did. He made some nice plays and showed a major league arm. He threw some bullets over there (to first).''

Tom Bolton, 3-0, gave up five hits and struck out four in eight innings.

Scott Erickson, 1-2, pitched six innings, giving up four hits and one unearned run. John Candelaria pitched the final two innings for Minnesota.

Jeff Reardon picked up his 16th save.

In other American League action, Cleveland tripped Oakland 4-2, Kansas City pounded New York 10-7, Baltimore beat Texas 5-3, Chicago pummeled Detroit 7-3, Seattle defeated Toronto 7-5 and California bombed Milwaukee 8-1.

In the National League it was: Chicago 7, San Diego 2; San Francisco 6, Pittsburgh 3; Cincinnati 6, Montreal 2; Atlanta 14, Philadelphia 10; New York 6, Houston 2 and St. Louis 3, Los Angeles 0.

-- AROUND THE AL --

Indians 4, Athletics 2

At Oakland, Jerry Browne broke a tie with a seventh-inning sacrifice fly to lift Cleveland and snap the Athletics' three-game winning streak. Greg Swindell, 5-5, worked 6 2-3 innings while scattering six hits. The left-hander allowed one earned run, walked one and struck out five. Oakland starter Mike Moore, 8-8, allowed 11 hits and four runs in seven innings.

Royals 10, Yankees 7

At New York, Bo Jackson hit home runs in his first three at-bats, driving in seven runs to lead Kansas City. Jackson, who now has 19 on the year, injured his shoulder trying to catch Deion Sanders' fly ball on his inside-the-park home run. Andy Hawkins, 1-8, took the loss. Storm Davis, 3-6, went five innings, giving up eight hits four earned runs, walked two and struck out one.

Orioles 5, Rangers 3

At Baltimore, Joe Orsulak slugged a three-run homer and Pete Harnisch gave up four hits over 8 2-3 innings, pacing Baltimore. Harnisch, 8-5, gave up two first-inning singles and retired 22 consecutive batters, walking none and striking out eight. Gregg Olson notched his 20th save. Kevin Brown, 11-7, gave up four runs on eight hits walked five and struck out two in seven innings.

White Sox 7, Tigers 3

At Detroit, Dan Pasqua's two-run home run capped a three-run sixth inning and Melido Perez pitched six one-hit innings to help Chicago. Perez, coming off a six-inning no-hitter at New York in his last outing, gave up hits to the first three batters he faced and was touched for four altogether in Detroit's three-run first but moved to 9-7. Jack Morris, 8-11, took the loss.

Mariners 7, Blue Jays 5

At Seattle, Edgar Martinez hit an RBI double with two outs in the eighth inning to snap a 5-5 tie and guide Seattle. Mike Jackson, 4-3, worked 1 1-3 innings in relief to pick up the victory. He allowed two hits and struck out one. Mike Schooler pitched then ninth for his 24th save. Duane Ward, 1-5, took the loss.

Angels 8, Brewers 1

At Anaheim, Calif., Dante Bichette slugged a three-run homer and Brian Downing added three hits including a solo homer run to power California. Angels starter Kirk McCaskill, 7-6, surrendered just four singles in seven innings to pitch the Angels to their fourth win in five games. Loser Ted Higuera, 6-4, gave up the first seven runs on 10 hits in his five innings.

#90199u0325 07/18/1990 ~United Press International

(JULY 18) UPI - The prosecution is preparing to rest its case against Washington Mayor Marion Barry. The government presented two witnesses Tuesday who said that Barry's cocaine use went back to 1984... and that he used coke while attending the 1988 Democratic National Convention in Atlanta. A final government witness is expected to testify Wednesday before prosecutors turn the trial over to the defense.

Canadian police and armed Mohawk Indians remain at an impasse after police Tuesday barred U-S civil-rights lawyer William Kuntsler from joining the negotiations. Kuntsler says the Mohawks will NOT renew negotiations without him. The Mohawks are occupying a Quebec site west of Montreal to fight the expansion of a golf course onto land they claim as their own.

The government filed suit against the District of Columbia Tuesday to clean up wastewater discharges into the Potomac River. The action is part of a co-ordinated crackdown on pollution of the Chesapeake Bay. The Environmental Protection Agency says 56 enforcement actions had been brought since April against polluters in Pennsylvania, Virginia, and Maryland.

Despite the thousands of major league baseball games played over the years... there have NEVER been two triple plays in one game... until Tuesday night. The Minnesota Twins turned the trick against the Boston Red Sox... but still lost 1baseman Gary Gaetti started both triple plays... and says he predicted the first one.

#90199u0326 07/18/1990 ~United Press International

WASHINGTON (JULY 18) UPI - A proposal to deal with the government's financial problems by amending the Constitution to require the federal budget to be balanced each year was rejected by the House.

The proposed amendment received a 279-150 majority vote in favor Tuesday, but fell seven votes short of the two-thirds vote needed for approval.

The debate took place as congressional and administration negotiators continued their search for a plan to trim this year's budget deficit and slow the debt spiral in coming years. A meeting was scheduled with President Bush at the White House Wednesday afternoon.

The budget picture became even more gloomy with Monday's report by the administration raising the estimate of next year's deficit by $10 billion to $168.8 billion.

Defeat of the constitutional amendment had been forecast by House Speaker Thomas Foley, an opponent of the plan.

The Constitution ''should be rarely amended,'' Foley said, calling it a mistake to proceed with the balanced budget amendment ''when the problem has not been a legal or a constitutional deficiency'' but a political disagreement on spending.

But during debate, supporters of the amendment said it was the only way to impose discipline on the spending habits of Congress and the executive branch.

The proposed amendment would have required that starting with fiscal year 1995 the president to submit a balanced budget plan to Congress, and would prohibit spending from exceeding the government's income.

The amendment would have allowed spending to exceed receipts only in time of war or if three-fifths of the House and Senate vote for a specific deficit.

The vote marked the second time in a month that the House considered - and rejected - a proposed amendment to the Constitution. The House defeated the flag protection amendment June 21.

Opponents said Congress must face up to the hard decisions on cutting the budget deficit.

House Budget Committee Chairman Leon Panetta, D-Calif., said, ''My fear is that a constitutional amendment is not a place to find courage. It's a place to hide courage. The myths of the '80s are over and the bitter realities of the '90s are here. The time has come to act like it. Vote

against the amendment and brace yourself for the very tough choices that are coming in the next few weeks.''

Passage of the amendment was urged by Bush, who sent a letter to House leaders saying the amendment, along with authority for a line-tem veto, would restore ''fiscal integrity'' to the government.

''Together with political courage and discipline, these tools are vital to solving the problem of budget deficits,'' he said.

Critics scoffed at Bush's endorsement, however, noting that neither Bush nor President Ronald Reagan ever submitted a balanced budget over the past decade despite their avowed support for the constitutional amendment.

Although balanced budget amendments have been introduced in every Congress the House has not considered the issue since 1982 when a similar amendment failed to win the needed two-thirds majority. The Senate, by a one-vote margin, approved an amendment in 1986, but the House did not consider it at that time.

#90199u0335 07/18/1990 ~United Press International

(JULY 18) UPI - The Atlanta Braves must figure that if you score 14 runs often enough you're going to win a few games.

Tuesday night, the Braves crossed home plate that many times in defeating the Philadelphia Phillies, 14-10. This past Sunday, however, Atlanta's dozen-plus runs weren't enough to stop the Montreal Expos 16-14 slug-fest victory.

Jim Presley ripped two homers, the first a 435-foot shot to center field, and drove in four runs against the Phillies. On Sunday, he collected four hits including a homer, and four RBI in falling to the Expos.

''Everyone is swinging the bat good so we have to concentrate on defense a little better, I think,'' Presley said.

Despite collecting 48 hits and 32 runs over the last four games, opponents have out-batted Atlanta, with 60 hits and 39 runs in the same four games.

The Braves almost slipped again last night. Presley's three-run homer helped Atlanta to five runs and a 10-1 lead in the fourth. But Charlie Hayes homered in the fifth, Ricky Jordan scored a two-run double in the sixth and Philadelphia closed to 10-7 in the seventh when Len Dykstra doubled home two and John Kruk hit an RBI single.

Two more runs in the seventh and two more in the eighth assured Atlanta a

victory. 14-10 victories and 16-14 defeats: could be football season is on the way.

Elsewhere in the National League, Chicago pummeled San Diego, 7-2; San Francisco stopped Pittsburgh 6-3; Cincinnati outduelled Montreal, 6-2; New York defeated Houston, 6-2; and St. Louis blanked Los Angeles, 3-0.

In the AL, it was: Cleveland 4, Oakland 2; Kansas City 10, New York 7; Boston 1, Minnesota 0; Baltimore 5, Texas 3; Chicago 7, Detroit 3; Seattle 7, Toronto 5; and California 8, Milwaukee 1.

-- AROUND THE NL --

Giants 6, Pirates 3

At Pittsburgh, Matt Williams snapped a sixth-inning tie with a grand slam and recorded his second straight three-hit. Don Robinson, 6-1, gave up four hits over eight-plus innings, struck out four and walked one. John Smiley, 4-4, allowed five runs on seven hits in 6 2-3 innings. He walked five and struck out four.

Reds 6, Expos 2

At Cincinnati, Scott Scudder, a late replacement for scheduled starter Danny Jackson, struck out nine in 6 1-3 innings to help the Cincinnati Reds to victory. Scudder, 2-2, started when Jackson experienced tightness in his left shoulder while warming up and was to undergo diagnostic testing Wednesday. He gave up two runs, eight hits and walked none. Loser Mark Gardner, 6-5, gave up four runs on five hits, striking out three and walking three.

Mets 6, Astros 2

At Houston, Dwight Gooden won his seventh straight start and Kevin Elster and Howard Johnson each blasted solo home runs in powering the New York Mets. Gooden, 10-5, allowed two runs on seven hits while walking three and striking out eight in 7 2-3 innings. John Franco pitched the final 1 1-3 innings for save number 19. Bill Gullickson, 6-7, was the loser.

Cubs 7, Padres 2

At Chicago, pitcher Shawn Boskie smacked a two-run double to highlight a six-run fifth inning, driving the Chicago Cubs to a 7-2 victory. Boskie, 4-5, gave up six hits over 6 2-3 innings in his 11th start. He struck out two and walked two. Benes, 6-7, gave up eight hits over 4 1-3 innings for the loss.

Cardinals 3, Dodgers 0

At St. Louis, Bryn Smith and Lee Smith combined on a 10-hit shutout and Pedro Guerrero doubled twice and drove in two runs to lead the St. Louis Cardinals. Bryn Smith, 7-7, scattered eight hits in 7 2-3 innings for his first victory since June 3. He struck out five and walked two to snap a personal three-game losing streak. Lee Smith pitched the final 1 1-3 innings, giving up two hits, for his 12th save. Valenzuela, 7-8, pitched a no-hitter against St. Louis on June 29.

#90199u0363 07/18/1990 ~United Press International

PARIS (JULY 18) UPI - An aide to U.S. Secretary of State James Baker said talks between the two Germanys and the Big Four Allies of World War II leading to German unification are essentially over now that the issue of Poland's border with a united Germany has been settled.

Foreign ministers of the two Germanys and the four major World War II allies - the United States, the Soviet Union, Britain and France - agreed Tuesday that a treaty ensuring Poland's western border would be signed as soon as possible after German unification is complete.

Any non-border issues between Poland and Germany would be resolved in a separate pact between the two countries apart from the auspices of the Two-plus-Four talks on German unity. Those talks included the Polish foreign minister for the first time Tuesday.

Also, West Germany agreed to meet with Poland this summer on Polish economic problems, but officials said it was premature to specify aid the Germans might offer.

''All agree that a united Germany will consist of the FRG (West Germany), the GDR (East Germany) and Berlin - no more, no less,'' Baker said.

Aides to Baker later said the agreement outlined five principles to guarantee Poland's western border against future legal challenges, including an amendment to the constitution of a united Germany. The Baker aides said Tuesday's meeting virtually wrapped up the Two-plus-Four talks agenda.

''The lion's share of substantive agreements are done. The devil is in the details,'' one aide said.

The Poles initially sought a signed border treaty before the four wartime allies relinquished their rights in Germany, but accepted the compromise accord - which amounted to what diplomats termed a ''solemn promise'' that Poland would not be double-crossed on the border issue after unification.

''The question of the confirmation of the border that has been decided is entirely satisfactory,'' Polish Foreign Minister Krzysztof Skubiszewski said after Tuesday's meeting.

Poland lost bargaining power Monday when Soviet President Mikhail Gorbachev said a united Germany could belong to NATO with no restraints on its sovereignty, thus ruling out residual rights for the four wartime allies.

President Bush congratulated Gorbachev and West German Chancellor Helmut Kohl by telephone Tuesday for their agreement on NATO membership for a unified Germany and said the accord moves Europe closer to ''new era of freedom.''

West German Foreign Minister Hans-Dietrich Genscher said a border treaty with Poland would be achieved ''in the shortest possible time after unification,'' and be submitted for ratification by the Parliament of a united Germany.

He also said ''it is now clear that German unification will be possible by the end of this year.''

Baker issued a similar timing prediction to Genscher's, expecting completion of German unification by the mid-February first anniversary of Ottawa talks that launched the Two-plus-Four process.

''We have worked very long and very hard for exactly this result,'' a satisfied Baker said of this week's developments. ''These are the terms supported by the United States since last December when we called for a unified Germany as a member of the NATO alliance.''

He said the parties agreed Tuesday ''on a set of principles to guide the final settlement of the border issue,'' which would guarantee the border's ''definitive character.''

The Paris session was the third at foreign ministers' level for the Two-plus-Four talks, which involve the two Germanys, Britain, France, the United States and the Soviet Union. Poland was invited only to the Paris meeting. The foreign ministers appeared jointly at a closing news conference.

Formal conclusion of the talks, which resume Sept. 12 in Moscow, will contain clear reference to the Oder-Neisse Line as Poland's western frontier. The talks are due to end before a November summit, in Paris, of the 35-nation Conference on Security and Cooperation in Europe.

Foreign ministers directed their political directors to begin drafting the formal end of the Two-plus-Four process.

The Oder-Neisse Line, drawn along two rivers in 1945, ceded to Poland several former German territories, including Silesia and Pomerania, to compensate for areas in eastern Poland lost to the Soviet Union.

#90199u0384 07/18/1990 ~United Press International

CABANATUAN, PHILIPPINES (JULY 18) UPI - A wiry high school dropout slithered through tiny crevices in a quake-flattened building searching for classmates pinned in the rubble.

''Do not die; you will live,'' Bernardo Malaluan, 15, yelled to a moaning friend beneath the ruins of the six-story Christian College of the Philippines.

As he emerged soot-covered, Malaluan directed workers to the location of former classmate Mylen Velasco, a victim of Monday's 7.7 earthquake that rolled across the main Luzon island and toppled numerous buildings.

Workers rescued Velasco.

Malaluan helped point to where seven classmates also were found. Three died.

''They were my former classmates and I will risk my life to save them,'' Malaluan said. ''I could have been one of those in there.''

At least 49 people died in the school in Cabanatuan in the rice-producing province of Nueva Ecija, 60 miles north of Manila.

Since the quake struck, he has snaked through gaps in the wreckage repeatedly, bringing food and water to his trapped classmates.

''One of them didn't want water. He asked for orange juice. I had to go back,'' Malaluan said.

Workers in the impoverished town used picks, shovels and their hands in their rescue effort.

Confusion reigned. Philippine troops joined peasants and residents in uncoordinated efforts, but still managed to find about 140 survivors.

Thousands of bystanders joined grief-stricken relatives rushing to look at teenagers being pulled out of the collapsed building.

A burst of applause greeted workers as they brought out survivors.

A contingent of engineers from the nearby U.S. Clark Air Base and Subic Bay Naval Complex came Tuesday, sealed the area and methodically went to work.

They brought with them generators, air compressors and other equipment.

Four survivors were pulled out overnight, but a U.S. soldier said some of them later died.

Three days after the quake, chances were dimming that there are still survivors in the mass of twisted steel and crumpled concrete that was once a school for 2,000 students.

Officials said about 40 remain in the building.

''I love the school,'' said Malaluan.

#90199u0385 07/18/1990 ~United Press International

(JULY 18) UPI - Saturated soil in areas of southern Texas received a further soaking Wednesday as storms moved through the area, keeping roads closed and flood warnings up, while heavy rains also hit Nebraska and Virginia.

Separate areas of thunderstorms moved across the southwest and northeast corners of Nebraska, bringing winds up to 40 mph and hail the size of marbles.

Slow-moving storms headed southeast in Southern Lincoln and Hayes counties in southwest Nebraska, causing brief heavy rains with small hail.

A flash flood warning was posted in southwest Virginia where 3 inches of rain fell in about an hour as thunderstorms stalled over Montgomery County the National Weather Service said.

In Texas, where days of heavy rains caused rivers to overflow their banks, closed roads and damaged buildings, the soaking continued.

Flood warnings were in effect for Kimble and Val Verde counties in south-central Texas as storms moved through the area.

A 30-mile stretch of U.S. 77 from Refugio to Victoria in southeast Texas remained closed by high water Wednesday, a dispatcher for the Refugio County Sheriff's office said. Farm roads were reported closed Menard and Kimble counties northeast of San Antonio.

The continued wet weather was blamed on tropical moisture flowing

northward and a high pressure system over the eastern United States. The system also produced rains over eastern New Mexico and southern Louisiana Wednesday.

Thunderstorms with very heavy rain moved through the northern foothills of North Carolina early Wednesday and a storm stalled in an area west of Winston-Salem, the NWS said.

Elsewhere, scattered but strong thunderstorms occurred in parts of Idaho, Oregon, California and Arizona. Some of them brought locally gusty winds, lightning and hail.

Humid and hazy conditions prevailed over most of Pennsylvania, Maryland and southern New Jersey early Wednesday, with patchy fog reported in many areas. Temperature lows ranged in the 50s and 60s throughout most of the region.

#90199u0425 07/18/1990 ~United Press International

LONDON (JULY 18) UPI - The dollar opened lower against the major European currencies Wednesday ahead of Federal Reserve Bank chairman, Alan Greenspan's statement to Congress later in the day.

Dealers said the market was hoping the speech would give further pointers to whether the Fed would further ease its monetary stance.

The dollar opened lower against the German mark in Frankfurt, at 1.6435 marks against Tuesday's close of 1.6505, and also was lower in Zurich at 1.4055 Swiss francs against 1.4105.

In London, the pound strengthened against the dollar to open over a cent higher at $1.8240 from $1.8110.

Analysts said the pound was helped by a weaker dollar and British Chancellor of the Exchequer, John Major's warning that there will be no early reduction in U.K. interest rates.

The U.S. unit opened lower in Paris, Brussels and Milan, at 5.5140 French francs against 5.5315, at 33.895 Belgian francs against 34.01, and at 1,204.50 lire against 1,208.60.

Earlier in Tokyo, the U.S. dollar plunged against the Japanese yen as market participants ditched the U.S. currency because of a narrowing interest-rate differential with Japan.

The dollar closed at 147.25 yen, down 0.95 yen from Tuesday's close of 148.20 yen, the Bank of Japan said.

Dealers said market players bought the yen in exchange for dollars as they saw no incentives in the dollar now.

''Since federal fund rate lowered and Japanese short-term interest rates seems to be stable at a high level, the dollar is not so attractive,'' said Hiroaki Adachi, a vice president at Lloyds Bank Plc.

The dollar closed lower in Singapore, at 1.8175 Singapore dollars from 1.8185, and was down in Hong Kong at 7.7665 Hong Kong dollars against 7.7689.

Gold closed lower in Hong Kong at $359.75 an ounce against $361.15 an ounce Tuesday.

In Zurich, gold opened lower at $360 an ounce from $361 an ounce Tuesday, and also was down in London at $359.75 an ounce against $361.25 an ounce.

Silver was unchanged in Zurich at $4.85 an ounce, and was lower in London at $4.82 an ounce from $4.84 an ounce.

-30- 2276

#90199u0475 07/18/1990 ~United Press International

MOSCOW (JULY 18) UPI - Military helicopters and tanks Wednesday patrolled the ancient Central Asian city of Osh to discourage ethnic clashes between Kirghizians and Uzbeks that have left at least four people dead and 100 wounded.

The most recent violence in the republic of Kirghizia's second-largest

city paralyzed transportation and shut down all business activity, the official Tass news agency said.

''Despite measures taken by local and central authorities, the situation in the Osh region of Kirghizia, the site of an inter-ethnic conflict that began June 4, remains tense,'' Tass said.

''Military helicopters are patrolling the city and armored vehicles are posted at crossroads,'' it said.

The mayor of Osh, one of Central Asia's oldest cities founded in the eighth century as a silk-trading center, ''was replaced Tuesday by decision of regional authorities'' and the police chief was also fired, Tass said.

Demonstrators at unsanctioned rallies of mainly women demanded the resignation of the area's Communist Party leaders, it said.

Acts of arson and pogroms continued in Osh, a city of 209,000, and the surrounding region along the troubled border of Kirghizia and Uzbekistan, the news agency said, but it did not say who was on the attack.

''Another four men have died in the past 24 hours, bringing the death toll in the inter-ethnic conflict to 204 since the disturbances began in June '' Tass said. ''Some 100 people have been injured in the clashes.''

Tass reported earlier that police clubbed rioters and fired warning shots to halt the clashes and that additional police and soldiers were sent to Osh. It said 160 residents had been arrested for violating the curfew imposed when the ethnic violence first flared early last month.

Soviet television showed troops disembarking from a plane and setting up barricades in Osh, where it said the violence had caused $64 million worth of damage to houses and other buildings.

Thousands of people in Osh surrounded the regional Communist Party branch and demanded that its leadership resign, news reports said.

A similar incident was reported in another region of the Soviet Union. The independent Interfax news service said demonstrators besieged the local party building in Simferopol, regional capital of the Ukraine's Crimea peninsula, and set up a tent camp to demand the restoration of their homeland in the Crimea.

Ethnic unrest also continued to plague the Transcaucasian area of the world's most ethnically diverse country. Tass said a bomb killed the director of the regional airport in the enclave of Nagorno-Karabakh, located in the republic of Azerbaijan but populated mostly by Christian

Armenians.

Tass also said militants in the neighboring republic of Armenia raided police posts for weapons.

Maj. Gen. Alexander Girenko, head of the Soviet Interior Ministry's political department, told the official army newspaper Krasnaya Zvezda that extremists in Nagorno-Karabakh were circulating leaflets urging the mainly Armenian population to take up arms.

The leaflets called for an escalation of the Armenians' 2 1/2-year struggle to wrest control of Nagorno-Karabakh from the republic of Azerbaijan and annex it to neighboring Soviet Armenia.

#90199u0480 07/18/1990 ~United Press International

(JULY 18) UPI - Around the world... around the clock... U-P-I has the latest news.

A former male prostitute who confessed to killing a man in his Houston apartment during a 1980 robbery was put to death early this morning in the Hunstville, Texas, state prison. 33-year-old Mikel James Derrick died of a lethal injection after the Supreme Court refused to stay his execution.

Strong aftershocks continue to rock the Philippines today, hampering rescue efforts to find hundreds of people believed trapped under crushed buildings. The Philippine Military Civil Defense says Monday's quake killed 311 people and injured at least 682. The Social Welfare Department says more than 60-thousand are homeless.

An aide to Secretary of State Baker says the ''two-plus-four'' talks concerning German reunification essentially are over now that the issue of Poland's border has been settled. The foreign ministers of the two Germanys, the four World War Two allies agreed yesterday that a border treaty will be signed as soon as possible after Germany is reunited.

British Prime Minister Thatcher says she has faith in Germany as a firm military and economic ally. Thatcher made the remarks yesterday in her first appearance in the lower house of Parliament since the publication of a damaging memo that labeled Germany as egotistical, aggressive, and self-pitying.

The Senate has opened the door for passage of an important civil rights bill by limiting debate on the issue. The move has left Republicans infuriated, saying they've been treated- ''like a bunch of bums.'' The White House is threatening to veto the measure, fearing it may impose quotas in hiring and promotions.

#90199u0488 07/18/1990 ~United Press International
(JULY 18) UPI - Philadelphia police say a prominent cancer doctor hooked himself, his wife, and two children up to an intravenous device, killing them all. Police found Dr. Anthony Paul and his family in a second-floor bedroom in their home. Authorities say the oncologist left a note indicating he was overwhelmed by his wife's and daughter's illnesses.

Former Atlanta Mayor Andrew Young and Georgia Lieutenant Governor Zell Miller won the Democratic primary yesterday and will face each other in a run-off election next month. A run-off is necessary because NEITHER candidate scored a 50 percent majority. Young is trying to become Georgia's first black governor.

In Piqua, Ohio, a bomb squad yesterday detonated a house where a supply of the liquid explosive nitroglycerin was found, causing little damage. The incident forced authorities to evacuate 25-hundred residents from a 12-block area. Police found the nitroglycerin Monday while responding to a domestic quarrel at the house.

More than three-thousand firefighters are battling several wildfires, mostly caused by lightning, in five Northwest states. The largest blaze has consumed 17-hundred acres of Montana's Bitterroot National Forest and continues to burn out of control. More fires burn in Oregon, Idaho, and Washington state.

Mickey Mouse, Goofy, Peter Pan, and Donald Duck and thousands of others were in Anaheim, California, yesterday to celebrate Disneyland's 35th birthday. Roy Disney, Walt's nephew, remarked- ''Times have changed, but Disneyland hasN'T.'' The birthday party included a spectacular musical production, fireworks, and a 30-foot cake.

#90199u0512 07/18/1990 ~United Press International
PHILADELPHIA (JULY 18) UPI - A prominent cancer doctor, overwhelmed by illness striking his family, hooked himself, his wife and two children up to an intravenous device, killing them all with a fatal dose of an unspecified drug, authorities said Tuesday.

Police found oncologist Anthony Paul, 50, his wife Malanie, 48, his daughter Madhini, 17, and his son Rajiva, 12, in a second-floor bedroom in their Chestnut Hill home at 10 a.m. after a suicide note was discovered at Fox Chase Cancer Center.

''The note just indicated he was sort of desperate with the illnesses in

his family and he indicated what he intended to do,'' said Dr. Robert Comis, Paul's supervisor at Fox Chase.

''He indicated in the note that he was going to commit suicide and take his family with him,'' Comis said.

Paul's wife had been stricken with a chronic, debilitating muscle disease for several years, his daughter was autistic and his brother had died last year, Fox Chase spokeswoman Susan Tobin said.

Paul apparently had connected himself and his family members to syringes attached to intravenous tubes and medicine bags, police said.

A suicide note identical to the one discovered at Fox Chase was found in the home, police and hospital officials said.

Police had not yet determined what fluid was in the intravenous device, and Fox Chase officials said Paul could easily have written a prescription for any drug.

The note found in Paul's Fox Chase office was discovered Tuesday morning when an employee had gone into Paul's desk looking for something else, said Comis, vice president for medical science.

No one knew how long the note had been there, Comis said.

Comis and Tobin both said although they knew of the Paul family's medical problems, the doctor had recently displayed no unusual signs of strain.

Paul, who was born in the former British colony Ceylon, was a highly respected oncologist who had worked at the prestigious cancer center in Northeast Philadelphia since 1975, Tobin said.

He received his medical training in Ceylon before serving his internship New York City.

#90199u0561 07/18/1990 ~United Press International

(JULY 18) UPI - German unification talks a success... U-S experts join search for quake victims in the Philippines... Andrew Young wins spot in Democratic runoff for Georgia governor's nomination. All the top news and more, from U-P-I:

It's all over but the waiting for the unification of East and West Germany... according to an aide to Secretary of State Baker at talks in Paris.

Foreign ministers of the two Germanys, the four major World War Two allies and Poland agreed yesterday that a treaty ensuring Poland's western border would be signed as soon as possible after German unification is complete.

The Polish border was the last remaining issue to be decided at the talks... clearing the way for complete unification by the end of 1990.

West German Foreign Minister Hans-Dietrich Genscher said a border treaty confirming the Oder-Neisse line with Poland would be achieved ''in the shortest possible time after unification.''

The Oder-Neisse Line, drawn along two rivers in 1945, ceded to Poland several former German territories, including Silesia, Pomerania and parts of Prussia.

Ratification would be required by the Parliament of a united Germany.

The Poles initially sought a signed border treaty before the four wartime allies relinquished their rights in Germany... but accepted the compromise accord promising that Poland would NOT be double-crossed on the issue.

#90199u0580 07/18/1990 ~United Press International

MILWAUKEE (JULY 18) UPI - Attorneys for escaped murderer Lawrencia Bembenek have appealed again to the Wisconsin Supreme Court for a new trial.

Officials have no new leads to the whereabouts of the onetime Playboy model and bunny, who was serving a life sentence for killing her former husband's ex-wife, although she is believed to be accompanied by her fiance, Dominic Gugliatto, 34, Milwaukee, who met her while she was in prison.

Attorneys Martin Kohler and Mia Sefarbi of Milwaukee on Tuesday filed a petition in Madison with the Supreme Court for a new trial for Bembenek, 31, who was found guilty of the 1981 slaying of Christine Schultz. The victim was the ex-wife of Elfred Schultz, then a Milwaukee police officer married to Bembenek but who is now divorced from her and living in Florida.

The petition attacks attorney Donald Eisenberg, who defended Bembenek, for not representing her properly and claimed Elfred Schultz was a suspect in the murder.

At least three of the seven Supreme Court justices would have to approve a new trial for Bembenek, who will face escape charges once she is apprehended.

The petition claimed the trial court believed Eisenberg when he said Elfred Schultz could not have killed his wife.

''Thus, while Bembenek produced evidence tending to show that Attorney Eisenberg had formed an alliance with Schultz and sought to protect his interest, the trial court gave credence to Eisenberg's testimony that he believed that Schultz had an airtight alibi and that Schultz was not a defense worth pursuing,'' the petition said.

Bembenek escaped Sunday from the Taycheedah Correctional Institution, where she was serving a life sentence without parole until at least 1993.

#90199u0582 07/18/1990 ~United Press International

(JULY 18) UPI - There's NO relief in sight for rescue workers in the Philippines. The island nation continues to suffer strong aftershocks after this week's killer earthquake which has claimed at least 311 lives, including one American.

Officials say one aftershock measuring six-point-three on the Richter scale struck this morning... was was followed by another less than 15 minutes later.

Officials say more than 200 aftershocks have rocked the area since Monday's seven-point-seven tremor rumbled across the main Philippine island of Luzon.

The Philippine Department of Social Welfare says the quake leveled one-thousandhundred more. More than 60-thousand people are estimated homeless.

International rescue teams today joined workers in quake-stricken areas.

Rescue efforts are being concentrated in the devastated towns of Cabanatuan and Baguio, where about one-thousand people were reported trapped in half a dozen luxury hotels and factories. Rescuers in Baguio say most of the people they managed to pull from the piles of concrete and twisted metal were dead.

Democrats used their majority in the Senate to virtually assure the passage of an important civil rights bill. Senators yesterday voted 62 or imposing cloture- on the legislation.

The action angered Republicans. Senate Republican leader Robert Dole displayed his displeasure with the vote saying- ''To have this jammed down our throats... it seems we're going to be in for a long, hot summer.''

All Democrats, except Senator James Exon of Nebraska, and eight Republicans voted for limiting debate. 37 Republicans voted against the cloture.

The White House and Republicans fear the bill will impose quotas in hiring and promotions. President Bush has threatened to veto the bill.

Civil rights advocates say the bill is necessary to protect women, blacks and other minorities against on-the-job discrimination. The legislation would reverse six 1989 Supreme Court rulings and restore previous anti-bias safeguards.

-30- 2201

#90199u0586 07/18/1990 ~United Press International

(JULY 18) UPI - In Georgia, former Atlanta Mayor Andrew Young and Lieutenant Governor Zell Miller will meet in an August 7th runoff to decide the state's Democratic gubernatorial candidate in November.

Miller ran way ahead of Young in yesterday's primary voting. But a runoff is necessary because NEITHER candidate scored the 50 percent majority needed for an automatic spot on the November general election ballot.

With nearly 79 percent of the precincts counted, Miller totaled nearly 41 percent of the vote... while Young registered nearly 32 percent.

Three other candidates... including Lester Maddox, the former segregationist governor... also ran in the primary.

The Republicans nominated Johnny Isakson, who has his work cut out for him since the G-O-P has NOT won a gubernatorial election in Georgia in 122 years.

Alabama Governor Joe Frank Harris, a Democrat, is retiring because state law limits gubernatorial administrations to two terms.

A former male prostitute who confessed to a 1980 robbery and murder out of fear his brother would be accused of the crime was executed in Texas this morning.

33-year-old Mikel James Derrick died by lethal injection after the Supreme Court refused to stay his execution. In a final statement, Derrick asked those he had hurt for forgiveness. Texas Attorney General Jim Mattox says Derrick was ''resolved to his fate.''

While he was in prison on a separate robbery conviction, Derrick confessed to killing Edward Sonnier after learning his brother had been linked to the victim's stolen car.

Derrick spent yesterday watching television, talking to fellow death row inmates and a prison chaplain. He refused his last two meals and spoke with relatives on the phone for several hours.

Derrick was the 134th person put to death in the United States since the Supreme Court lifted its ban on capital punishment in 1976.

#90199u0590 07/18/1990 ~United Press International

(JULY 18) UPI - A prosecution witness who was arrested by U-S Marshals and escorted to Washington, D-C, testified yesterday she used cocaine with Mayor Marion Barry as far back as 1983. This sets back by two years the chronology of the mayor's alleged drug use.

Bettye Smith also said Barry came to her home to get cocaine between January 1st and January 18th of this year. But Smith's testimony sheds doubt on two misdemeanor charges against Barry because under cross-examinatio. She said she could NOT remember if the incident actually occurred in January or last December.

One of 10 misdemeanor cocaine charges against Barry alleges he possessed the drug between January 1st and January 18th, the night of his arrest in a Washington hotel. Smith also admitted she gave the mayor cocaine, saw him go in a bathroom, but NEVER saw him use the drug.

Smith said between 1983 and 1986 she and the mayor shared cocaine about five times a year. Smith said she had an ''intimate'' relationship with Barry, but NEVER a sexual one.

Smith had been hospitalized in Tennessee for stress she says was related to testifying against her long-time friend.

#90199u0619 07/18/1990 ~United Press International

WASHINGTON (JULY 18) UPI - Consumer prices jumped by a surprising 0.5 percent in June on higher food, housing and energy costs, the Labor Department reported Wednesday.

Private economists expected an increase of 0.3 percent in the government's closely watched Consumer Price Index.

In May and April, consumer prices advanced by 0.2 percent after rising by 0.5 percent in March, according to the report compiled by the department's Bureau of Labor Statistics.

With the overall 0.5 increase in consumer prices in June, inflation for the last 12 months has been running at about 4.7 percent, the Labor Department said.

Prices for housing surged by 0.6 percent in June after gaining 0.2 percent in May, while food and beverage prices shot up 0.7 percent last month after inching up 0.1 percent in May, the department said.

''Rising homeowner costs were primarily responsible for the increase in the shelter index,'' the report said. ''A substantial upturn in the index for fruits and vegetables, coupled with a sharp rise in pork and poultry prices, were largely responsible for the increase in the food index.''

Gasoline prices rocketed by 2.5 percent in June after falling by 1.6 percent in May, as overall transportation costs moved ahead by 0.4 percent in June against a drop of 0.2 percent in May, the government said.

In other categories in June:

-Apparel and upkeep costs slipped another 0.1 percent after a 0.3 percent decline reported in May.

-Medical care costs advanced 0.7 percent after a 0.8 percent gain in May.

-Entertainment costs increased by 0.2 percent for the second straight month.

The Labor Department also reported that the costs of other consumer goods and services shot up by 0.9 percent last month after increasing by 0.8 percent in May.

''About 60 percent of the June increase (in this category) was accounted for by a 2.4 percent jump in prices for tobacco and smoking products,'' the report said. ''This follows a sharp rise in wholesale prices for tobacco products in May.''

The Consumer Price Index, itself, finished the month at 129.9, with 100 equal to what $100 would buy in 1984.

#90199u0642 07/18/1990 ~United Press International

(JULY 18) UPI - Stock prices on the Tokyo Stock Exchange closed lower Wednesday, breaking a five-day winning streak as investors turned to profit-taking. Trading remained sluggish.

The bleu-chip Nikkei Stock Average of 225 selected shares, which gained 150.55 points Tuesday, slipped 124.17 points to 33,048.11.

The narrower Tokyo Stock Exchange Price Index of all major shares, which gained 7.15 points Tuesday, lost 9.53 points to 2,397.78.

An estimated 600 million shares changed hands, compared with 628 million shares Tuesday.

Declines outnumbered advances 505 to 446, while 176 issues remained unchanged.

Brokers said the market was taking a natural rest after five consecutive days of rising prices.

Elsewhere in Asia, stock prices surged 1.8 percent in their biggest gain since February on the Hong Kong Stock Exchange as bulls stormed back into the market after a two-day breather.

The benchmark Hang Seng Index, which fell 24.91 points Tuesday, climbed 64.34 points to 3,528.34, a new post-1987 high.

Among the narrower indexes, industrials gained 55.71 points, financials increased 8.92, utilities climbed 96.69 and properties rose 144.57 points.

Turnover was heavy as an estimated 2.28 billion shares changed hands, compared with 1.77 billion shares Tuesday.

In Singapore, stock prices closed lower on the Singapore Stock Exchange as profit-taking pared recent gains in lackluster trading.

The closely-watched Straits Times Industrial Index, which fell 4.90 points Tuesday, fell 5.12 points to 1,565.92. The narrower All Singapore Index fell 1.95 points to 444.37.

An estimated 107.1 million shares changed hands, compared with 105.6 million shares Tuesday.

In Australia, stocks closed slightly lower in thin trading on the Sydney Sharemarket.

The key All Industrials Index, which climbed 15.4 points Tuesday, eased 4.4 points to 2,518.4. The All Resources Index eased 1.7 points to 935.4 while the All Ordinaries Index dropped 8.5 points to 1,615.5.

An estimated 96.7 million shares changed hands, compared with 109.2 million shares Tuesday.

#90199u0646 07/18/1990 ~United Press International

MIAMI (JULY 18) UPI - Colombian authorities extradited two cocaine trafficking suspects to the United States for trial, bringing to 19 the total extradited since that country began a drug crackdown last August, the U.S. Marshals Service said Wednesday.

Marshals identified the suspects as Edward George Mitchell, 44, who escaped from a Texas halfway house a day before new charges were filed against him in Milwaukee in 1983, and Jose Fernando Gill, 26, who was indicted in Miami in June 1989.

Colombian authorities turned over both men to the U.S. marshals in Bogota Tuesday night, said Marshals Service Director K. Michael Moore.

Fernandez was flown to Miami Tuesday night and Mitchell arrived in Milwaukee early Wednesday.

Nineteen suspects have been extradited from Colombia to the United States on drug charges since President Virgilio Barco and the Colombian government began a new anti-drug drive in August, Moore said.

The Milwaukee indictment charged Mitchell with cocaine offenses that occurred while he was in a work-release program at the halfway house in El Paso. He had entered the program after serving a four-year sentence on a federal cocaine trafficking conviction.

Mitchell and four others were charged with distributing 2.2 pounds of cocaine, and conspiring to possess 4.4 pounds of cocaine with intent to distribute.

Born in Masontown, Pa., Mitchell escaped from the halfway house the day before an arrest warrant was issued on the Milwaukee charges. He was a fugitive until Colombian police arrested him Jan. 22.

Gil was indicted in Miami on charges of possessing with intent to distribute at least 11 pounds of cocaine. He is a naturalized U.S. citizen who was born in Colombia and lived in Hialeah when the indictment was returned.

Colombian police arrested him in Medellin in January.

#90199u0653 07/18/1990 ~United Press International

GENEVA (JULY 18) UPI - OPEC predicted Wednesday its base reference price will ''soar above and beyond'' its current $18-a-barrel level after next week's crucial ministerial conference in Geneva.

The Organization of Petroleum Exporting Countries said its 13 members lost $5 billion to $7 billion since March because of slumping prices.

The reference price - the average for all the different grades of crude oil pumped by member states - plunged to just $14 a barrel but has ''rebounded,'' it said.

That is primarily because Kuwait and the United Arab Emirates announced they were reducing production, the cartel's news agency OPECNA said.

Both countries had been pumping 2 million barrels a day - far in excess of Kuwait's official OPEC quota of 1.5 million and the UAE's 1.1 million barrels.

The over-production depressed prices because it meant OPEC was glutting markets by reaching 23.5 million barrels a day, or 1.5 million barrels above the official ceiling of 22.086 million barrels a day.

Following the pledge by Kuwait and the UAE, the Tehran-datelined report said, ''prices have already narrowed the gap and the feeling is they are likely to soar above and beyond the targeted level.''

''Their decision to limit output leaves one to conclude that the next OPEC ministerial conference in Geneva on July 15 will be an historic event,'' OPECNA said.

''Fresh optimism for the future prevails'' as well because big Persian Gulf producers Saudi Arabia, Iran and Iraq ''are bringing their oil policies closer together,'' it said.

OPEC countries, individually or in groups, said a hike in the official $18 reference price can be supported given agreement on production discipline.

Iran proposed $20 while Iraq said a $25 average price was feasible.

''Perhaps the OPEC member states who are now fighting so hard to bolster the market still have vivid recollections of the last decade when the organization saw its oil revenues plummet from $284.5 billion in 1980 to just $77.3 billion in 1986, the year of the price crash,'' the news agency said.

Other reports said Kuwait could promise to honor its 1.5 million barrel daily quota.

The UAE may also acccept a 1.5 million quota and rejoin the OPEC pricing and production framework it left a year ago because the others would not hike its official quota.

OPECNA said Iran for its part believes there is a ''new unified stand'' among member countries and ''looks forward'' to that unity continuing at the ministerial conference.

The OPEC oil ministers are to fix an official combined production ceiling and possibly a new reference price for the remainder of 1990.

#90199u0704 07/18/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (JULY 18) UPI - British Prime Minister Margaret Thatcher believes President Frederik de Klerk is engineering a racial settlement in South Africa and bringing hope for the future, according to an interview published Wednesday.

The British leader also praised black nationalist Nelson Mandela for his ''great courage'' and said he is now as important as de Klerk in designing a non-racial South Africa.

Thatcher told the Johannesburg newspaper the Star that de Klerk ''has created an entirely new situation in South Africa ... I think that is a remarkable achievement.''

''I now see light at the end of the tunnel in a way I certainly could not before,'' Thatcher said in the interview.

The British leader, de Klerk's firmest foreign supporter, said his apartheid reforms, which were launched February, have ''created conditions in which you can work out agreement on a new constitution and that gives us great hope for the future.''

But Thatcher warned that South Africa will lose its pariah status and be reaccepted into the world community only when ''a new, democratic constitution is in place and the remaining apartheid legislation is removed.''

She said de Klerk and Mandela, released from jail after 27 years by the president Feb. 11, ''are both necessary for the future.'' Thatcher said ''it is absolutely vital'' that whites put their trust in the African National Congress deputy president and de facto leader.

Mandela was returning home Wednesday after a 45-day tour of 14 nations on three continents and Thatcher said of her meeting with him earlier this month, ''I am sure he is genuinely committed to negotiations.''

But she said she pointed out her opposition to trade sanctions aimed at punishing Pretoria for applying apartheid and to the ANC's 30-year armed struggle against white minority rule.

''Now that Mr. de Klerk is offering negotiations, it does not make any sense to talk about the use of violence,'' she said.

The ANC says it will continue its armed struggle, although now regarded only as nominal, until it believes an irrevocable end to apartheid is in sight.

Thatcher also said she clearly put to Mandela her opposition to the ANC's policy of nationalizing key industries. ''I think that if you want a bright future ... it is absurd to talk about nationalization.''

She repeated British criticism of Mandela's comment before arriving in London that Britain and the Irish Republican Army should meet for peace talks. ''That was absolutely and utterly appalling, a great mistake. I think perhaps he did not realize the enormity of what he was saying.''

Thatcher said she and Mandela agreed on ''the need to end apartheid ... and to achieve a fully democratic constitution.''

The prime minister encouraged South African whites not to yield politically to growing threats and violence from far-right groups trying to curtail racial reform. ''That would be a dead end,'' she said.

#90199u0713 07/18/1990 ~United Press International

WASHINGTON (JULY 18) UPI - New housing construction tumbled 2.3 percent in June to the lowest level since the recession of 1982, the Commerce Department reported Wednesday.

But applications for new housing permits - a harbinger of future construction activity - jumped 3.9 percent last month in the first increase since January, according to data released by the Department's Census Bureau.

In May, new housing starts were off 0.9 percent, while building permits dropped 3.9 percent, the government said.

A Commerce Department spokesman said the seasonally adjusted annual rate of about 1.2 million new housing starts in June was the lowest since approximately the same level in October 1982, as the United States was emerging from its worst economic downturn since the Great Depression of the 1930s.

For most of the year, construction has been in the doldrums as the economy has slowed following eight years of unprecedented growth. But, June's drop was worse than many private economists expected and may signal a bottoming

out in the construction industry.

Construction of new single-family homes nationwide edged down 0.1 percent in June, while work on new dwellings with two, three and four apartments advanced 5.1 percent. Starts on buildings with five or more apartments dropped 10.6 percent.

By region, housing starts slipped 11 percent in June in the Northeast, fell 9.2 percent in the Midwest, increased 8.8 percent in the South and dropped 10 percent in the West.

#90199u0727 07/18/1990 ~United Press International

NEW YORK (JULY 18) UPI - The New York Stock Exchange reported Wednesday these odd lot transactions by principal dealers through NYSE facilities for July 17: Purchases of 532,783 shares and sales of 817,163 shares including 16,506 shares sold short.

-30- 401

#90199u0740 07/18/1990 ~United Press International

(JULY 18) UPI - A 16-member U-S search and rescue team, along with search dogs, arrived in the resort town of Baguio north of Manila this morning. The team brought 40-thousand pounds of rescue equipment to aid in the search for victims of Monday's earthquake. Australia, Japan, and European nations also are helping the earthquake relief effort. The foreign teams recently were in Iran to assist rescues in a quake of similar magnitude.

Strong aftershocks rocked the Philippines today, hampering rescue operations. Officials say 311 people died in the quake. But that number may rise since one-thousand people are believed still trapped under flattened hotels and factories. The Social Welfare Department says more than 60-thousand people are homeless. To make matters worse, tornadoes hit two villages outside Manila last night, injuring four people and leaving hundreds more homeless.

The so-called ''two-plus-four'' talks in Paris appear to be over since the issue of securing Poland's western border with Germany has been resolved. Foreign ministers of the two Germanys and the four World War Two allies yesterday agreed a border treaty would be signed as soon as possible after Germany becomes one nation. Warsaw initially wanted a treaty before Germany reunited, but accepted the compromise deal after being assured Germany would NOT go back on its promise after reunfication.

Nelson Mandela returns to South Africa today after a triumphant but grueling 45-day world tour. Supporters have planned a rousing welcome at Johannesburg's airport which will also coincide with Mandela's 72nd

birthday. But the African National Congress leader is coming home to face serious divisions among black opposition groups and government charges that he is stalling on peace talks.

#90199u0759 07/18/1990 ~United Press International

CINCINNATI (JULY 18) UPI - Fallen baseball star Pete Rose will be on crutches Thursday when he is sentenced for tax evasion. Rose, who was banned from the game for life last year for gambling, could be sentenced up to six years in prison and fined up to $500,000.

The former Cincinnati Reds star was seldom injured in a brilliant quarter-century play career but he tore a cartilage in his right knee Sunday playing stickball with children at his wife's family reunion. He is scheduled for surgery Friday.

Rose was the Reds manager last year when he was banished from baseball for life for gambling. Three months ago, Rose pleaded guilty to filing false federal income tax returns in 1985 and 1987 that omitted $300,000 in income. "I am truly sorry for what has happened," Rose said. "I am not a bad person, but I did some bad things."

When Rose made his plea, U.S. District Court Judge Arthur Spiegel did not indicate what type of sentence he might impose. However, he repeatedly asked Rose if he understood that by pleading guilty he could be sentenced up to six years. Rose repeatedly answered, "Yes sir."

There are a number of possibilities for sentencing, among them, no prison time, probation, a stiff fine, community service, a few months of prison time or a few years in prison, or a combination of punishments.

"The judge has a great deal of latitude," said federal prosecutor Michael Crites. "It's tough to say if the case merits prison time. Some people in similar cases are sentenced, some receive probation."

Rose's tax problems stemmed from concealing income from baseball card shows, personal appearances, memorabilia sales, and gambling between 1984 and 1987. In a plea bargain agreement, Rose pleaded guilty to filing false tax returns in 1985 and 1987. In return for the two guilty pleas, the government agreed not to file charges for 1984 and 1986.

Rose blamed his tax-cheating on gambling. "I have a sickness," said Rose. "I had a gambling problem. I did not want anybody that I cared about to know how much I was gambling."

Assistant federal prosecutor Bill Hunt said Rose lied on his tax returns to keep his financial advisers from learning that he was spending much of

his income on gambling.

Among memorabilia that Rose sold for gambling money was the bat he used for hit No. 4,192, which broke Ty Cobb's hit record. Rose sold the bat for $129,000.

NEW YORK (JULY 18) UPI - George Steinbrenner told baseball commissioner Fay Vincent he paid gambler Howard Spira $40,000 because he feared Spira would harm Steinbrenner or his family, The National reported Wednesday.

-30- 404

#90199u0793 07/18/1990 ~United Press International

MOSCOW (JULY 18) UPI - Cosmonauts on the orbiting Mir station ended a seven-hour emergency space walk early Wednesday, repairing insulation around the Soyuz TM-9 capsule that is to take them back to Earth next month.

The official Tass news agency said Cosmonauts Anatoli Solovyov and Alexander Balandin successfully completed their troubleshooting mission but a British magazine said the effects of the latest mishap in the problem-plagued Mir program still could endanger their scheduled Aug. 9 return home.

''The principle task of their work outside the (Mir) station was to determine the cause of the opening of several blankets of the Soyuz TM-9 spacecraft's screen-vacuum thermal insulation and to fix them to ensure a safe return to Earth,'' Tass said.

Solovyov and Balandin, the 22nd and 23rd cosmonauts to visit the Mir since it was launched Feb. 20, 1986, began their space walk Tuesday at 5:06 p.m. Moscow time and returned to the space station just past midnight, Tass said.

''That was probably one of the longest space walks ever made,'' Steven Young, assistant editor of the London-based Spaceflight magazine, told United Press International.

Young said the cosmonauts' spacesuits are only designed for a maximum six hours in open space and that the extended walk likely forced Solovyov and Balandin to use emergency oxygen reserves.

Tass said they used special extending ladders to stay close to the spacecraft while reattaching the insulation.

''After inspecting and video-filming elements of the spaceship's structure the cosmonauts fixed the two opened blankets of thermal insulation,'' the Soviet news agency said.

Solovyov and Balandin reported feeling normal at the end of ''strenuous working day,'' it said.

But the British magazine quoted two other Soviet cosmonauts as saying that the spacecraft's re-entry heat shield may have been damaged while the insulation sheets were torn free.

The shield was not designed for exposure to the harsh environment of space and may have been harmed by radiation, atomic oxygen or the sudden swings of temperature, senior cosmonaut Vladimir Dzhanibekov and trainee cosmonaut Sergei Kirkalev told the magazine.

They said four research institutes were working on the problem and that four cosmonauts were being trained for a possible emergency rescue mission with a decision to be made by Aug. 1.

Dzhanibekov and Kirkalev said the unplanned exposure caused by the separated insulation also may have damaged several bolts that separate the Soyuz descent capsule from its engine compartment.

If the bolts fail to operate properly, the spaceship could re-enter the Earth's atmosphere with its engine compartment still attached, placing Solovyov and Balandin in grave danger, said their two fellow cosmonauts.

''It is quite possible (the bolts) are not in good condition,'' Dzanibekov told the magazine.

In another problem for the mission, when Solovyov and Balandin ended their space walk, they did not close the escape hatch of the Kvant-2 module through which they had left the Mir seven hours earlier, Tass said.

Tass did not say why the door was left open, but Young said the cosmonauts would likely have to take another space walk to close it.

Solovyov and Balandin are to complete the 10th manned mission to the Mir on Aug. 9 with their scheduled landing at the Baikonur Cosmodrome in the Soviet Central Asian republic of Kazakhstan.

Moscow had hoped their six-month mission would earn $40 million in hard currency from the United States and other nations sponsoring applied research on the space station.

But the recurrent problems with the Mir have prompted newly emboldened Soviet lawmakers and journalists to question the $17.1 billion annual cost

and direction of their country's space program.

Delays in launching the Kvant-2 module addition to the Mir forced the Soviets to leave the space station empty for 132 days last year.

After the Kvant-2 was finally launched, one of its solar power panels failed to unfold. The module's docking mechanism then malfunctioned last Dec. 6, forcing the crew then on the Mir to use manual controls to connect it to the space station.

#90199u0842 07/18/1990 ~United Press International
BELGRADE, YUGOSLAVIA (JULY 18) UPI - A coal mining town in western Yugoslavia has become the first in the nation to change its name amid growing rejection of the personality cult of late communist leader Josip Broz Tito, state radio said Wednesday.

Belgrade radio did not disclose precisely when the town of Titovo Velenje, or Tito's Velenje, in the republic of Slovenia dropped the reference to Tito and returned to its former name of Velenje.

It quoted newspaper reports as saying a majority of municipal officials voted for the name change at a recent meeting in the town hall in Velenje, located about 50 miles northeast of the Slovenian capitl of Ljubljana.

The motion was proposed by the town's chapter of Slovenia's Greens environmental party, the radio said.

The town was one of at least eight in the country named after Tito, the World War II Communist guerrilla leader who seized power as president in 1945 and ruled Yugoslavia with an iron hand until his death in May 1980 at the age of 88.

The Communist Party cultivated a personality cult around Tito, who broke with Soviet leader Joseph Stalin in 1948, and his pictures still hang in shops, offices and homes across Yugoslavia.

Velenje was renamed Titovo Velenje a year after Tito died, when Yugoslavs pledged to ''follow Tito's path'' of a unique decentralized economic system and a non-aligned foreign policy.

But in the mid-1980s, nationalist sentiments began rising - particularly in the republics of Serbia and Slovenia - and many Yugoslavs started openly blaming Tito for his authoritarian rule and the country's economic and political problems.

Tito was criticized by Communists and non-Communists alike and with politicians of all hues seeking to retain power by appealing to growing nationalism among Yugoslavia's different ethnic groups, many Yugoslavs are now calling for rewriting the official version of their countrys post-war history.

Municipal councils in other towns named after Tito have discussed proposals to change their names, but only Velenje has done so.

Velenje first gained renown in the early 1950s, when coal miners staged the first labor strike since the 1945 Communist takeover.

(JULY 18) UPI - The Philippines today were rocked by two strong aftershocks to Monday's quake that's killed at least 311 people. Officials say the dead includes two Americans. The U-S Embassy has NOT released the names of the dead Americans.

A second execution in as many weeks. Condemned killer Mikel Derrick was executed early today in Huntsville, Texas, by injection. He confessed to a 1980 robbery-murder for fear his brother would be accused of the crime.

Georgia Lieutenant Governor Zell Miller and former Atlanta Mayor Andrew Young will square off next month in a runoff in the state's Democratic gubernatorial primary. NEITHER candidate won the 50 percent majority needed for nomination.

Southern Texas received another soaking this morning as storms moved through the area, keeping roads closed and flood warnings up. Days of heavy rains have caused rivers to overflow their banks, closed roads and damaged buildings.

In Paris, the ''two-plus-four'' talks on German unification have yielded final agreement on the German-Polish border, which was seen as the last obstacle to East and West Germany uniting. Poland participated in the final talks.

Following yesterday's conclusion of the ''two-plus-four'' meeting, Secretary of State Baker and Soviet Foreign Minister Shevardnadze met today in Paris to discuss conventional forces talks and other U-S-Soviet issues.

Nelson Mandela arrives in South Africa today following his triumphant 45-day world tour. Mandela supporters have planned a welcome at Johannesburg's Jan Smuts airport to coincide with his 72nd birthday.

#90199u0883 07/18/1990 ~United Press International

RALEIGH, N.C. (JULY 18) UPI - Sen. Jesse Helms says he will not fire his

aide, James Meredith, for putting out a news release charging the vast majority of delegates to the NAACP convention were drug users or engaged in immoral acts.

The charges brought demands from NAACP leaders that Helms, a conservative Republican, fire Meredith and disavow his remarks. Helms is running against Harvey Gantt, a black, in his bid for re-election to the Senate.

Meredith, a former civil rights activist who became the first black to integrate the University of Mississippi, claimed in the release mailed to North Carolina reporters that 60 percent of the NAACP's delegates are drug users and 80 percent percent are immoral or criminal.

''Of course I have no knowledge whether those figures are right or wrong '' Helms said Tuesday. '' I have found him in so many matters to be correct. But this is between the NAACP and a well-known black man.

''You can debate the contents of his statement all you want,'' he said. ''But I'm not going to debate it, because I don't know the facts.''

Helms, in an interview with the News and Observer of Raleigh, declined to criticize or directly embrace Meredith's comments.

''Even the News and Observer is bound to agree with me that freedom of expression belongs to everybody, including James Meredith,'' Helms said.

Gantt joined the fray saying the incident was designed to inject race into the campaign.

Gantt, who was campaigning in eastern North Carolina, said the incident showed that people on Helms's staff ''are racist, obtuse, or silly, or Mr. Helms doesn't have much control of his staff.''

''Mr. Helms is not going to say anything that might be considered a racist remark,'' said Gantt, a former Charlotte mayor.

Kelly Alexander Jr., president of the NAACP in North Carolina, wrote Helms saying Meredith should either prove his claims or be fired.

Benjamin Hooks, the NAACP executive director, called Meredith's news release ''irrational and irresponsible.'' He said Helms should disavow it.

NAACP officials say the delgates to the convention were mostly church or community leaders who have attended the gathering for years.

About 3,000 delegates attended the convention earlier this month in Los Angeles.

#90199u0895 07/18/1990 ~United Press International

TOPEKA, KS (JULY 18) UPI - Karl A. Menninger, dean of American psychiatry and co-founder of the internationally famous Menninger Foundation, died Wednesday. He was 96. Menninger was foremost a psychiatrist but considered himself a doctor in the broadest sense of the word.

Menninger's foundation, the best example of his humanistic and professional concerns, is considered one of the world's largest psychiatric organizations. It was started in a converted farmhouse on the edge of Topeka and now employs nearly 1,000 people, operates on a yearly budget of $29 million and houses research, medical, educational clinical, and preventive psychiatry departments.

Menninger was imposing both physically and intellectually with a six-foot frame, a somewhat oversized head and a gravelly voice which often bellowed his impatience at the slowness of change.

He wrote seven books and dozens of articles, visited hundreds of prisons, gave countless speeches and threw himself into a number of other projects - all after his 65th birthday.

Menninger was a physician, psychoanalyst, stubborn social reformer, vigorous conservationist, best-selling author, lecturer, educator, avid chess and bridge player, gardener, hospital administrator, omnivorous reader, and moralist.

In appreciation of Menninger's work, President Jimmy Carter awarded him the Medal of Freedom on Jan. 16, 1981. The citation accompanying the highest honor given to a civilian said Menninger was "an acute observer and social critic."

Menninger was born in Topeka on July 22, 1893, to an easy-going physician father and a religious, hard-working mother who instilled large ambitions in her three sons, particularly her eldest, Karl.

Menninger was known to his staff, family and friends as Dr. Karl, partly from affection and partly to distinguish him from the various other Menningers, including his father Dr. C.F., his brother Dr. Will, his nephews Dr. Roy and Dr. Walter, and his son Dr. Bob.

C.F. Menninger and his sons Karl and Will founded the Menninger Clinic in a converted farmhouse on the edge of Topeka in 1925. Dr. Karl was the last survivor of the three. He and his wife, Jeanetta, were the parents of three daughters and a son.

Menninger's interest in psychiatry was inspired by his teacher at the

Harvard Medical School, Dr. Ernest Southard, for whom the Menningers named their school for disturbed children. After his graduation in 1917, he focused much of his attention on syphilis, the most pressing neuropsychiatric illness of the time.

Soon he became disturbed at the public's ignorance and misplaced fear of the still-young science of psychiatry and at the way patients in mental hospitals were abused and neglected.

His first book, "The Human Mind," was published in 1930. It quickly became a best seller and was hailed as the first real effort to explain mental health in down-to-earth terms. The book, which is still in print, helped bring public acceptance of Freudian psychoanalytic theories.

Two more widely acclaimed books aimed at the public, "Man Against Himself" and "Love Against Hate," followed in 1938 and 1942. Both works explored what many authorities consider his major contribution to psychiatric theory: that man's most important struggle is against his own self-destructive impulses.

The World War II years saw Menninger caught up in the administration of the Menninger Foundation, founded in 1941 as a nonprofit corporate umbrella for the expanding Menninger mental health concerns. After the war he headed a training program at the Topeka Veterans Administration Hospital to provide psychiatrists for the thousands of soldiers coming home with emotional injuries.

Menninger's long-standing concern for abandoned children and prison inmates - two groups he considered prime examples of the need for prevention rather than punishment - asserted itself increasingly in the 1960s and 1970s.

His two concerns of crime and children came together in 1964 with the founding of The Villages, a non-profit organization using innovative ideas to help abandoned and neglected children. It is the project he considered closest to his heart in his later years. In 1968 his best-selling book, "The Crime of Punishment," helped touch off a public debate on penal reform.

He voiced his opposition to the death penalty before the Kansas Legislature in 1979, suggesting that if lawmakers wanted to hang prisoners they should do it on the Statehouse steps in public view.

Even after he had surgery for a brain tumor in January 1976 and prostate surgery in June 1980, Menninger stayed busy with voluminous correspondence and his travels. He continued to spend time at Topeka's Veterans Administration hospital, sometimes seeing patients.

In the summer of 1980, Menninger broke the ground for a $27 million building project to relocate the institution's entire complex and treatment centers, now split in two parts of Topeka. The project, which adds to the complex on a 310-acre tract on a west Topeka hilltop, was the foundation's first major building effort in 54 years.

The celebration of his 90th birthday in July 1983 brought visitors from across the nation to Topeka - dignataries, friends, and former students, many of whom had gone on to become movers and shakers in the world of psychiatry.

In an interview shortly before that birthday, Menninger fretted about the matters still requiring his attention, saying there still was "so much to be done in this troubled world."

In an earlier interview, he talked about his concern for society's neglected: "Every case of suffering or underdog mistreatment I hear about - that fellow's me. To the extent that he's an underdog or persecuted or picked on or suffering or hurt or captured, I suffer with him. I want to see it lessened, so when I succeed to any extent I'm happy. Even when I don't succeed I like to stir people up to the iniquity of it."

"Nobody'll ever come in here and talk to me for a little bit and capture my essence. Read my books!" Menninger's most recent book, a collection of his correspondence during the years 1919-1945, was published in 1988. He received honorary degrees from 15 universities, including his alma mater, Harvard University, which recognized him in 1986.

#90199u0924 07/18/1990 ~United Press International

LONDON (JULY 18) UPI - British nurse Daphne Parish returned home Wednesday and described ''moments of intense gloom and despair'' during her 10 months in an Iraqi jail on spying charges.

An Iranian-born British journalist was executed by Iraq in the controversial case.

Iraq's President Saddam Hussein freed Parish on Monday from her 15-year sentence, saying her release was the result of a personal appeal on humanitarian grounds from his Zambian counterpart, Kenneth Kaunda.

Parish, beaming and relaxed after flying in from Lusaka to London's Gatwick Airport, reiterated her innocence and said she only saw a lawyer twice before her trial by the military tribunal that condemned journalist Farzad Bazoft.

''It has been a fantastic day for all of us and I really feel the whole

country is just as happy as we all are,'' she told a swarm of reporters while embracing her daughter, Michele de Vries, who campaigned for her release.

''I had moments of intense despair and gloom as you can imagine, when I wrote on the walls things like 'If I should die, think only this of me, that there is some corner of a foreign field that is forever England,''' Parish said, paraphrasing the English poet Rupert Brooke.

''I wrote this with a stone on a wall at one point and then rubbed it off 24 hours later,'' said Parish, 52.

She said she only saw Bazoft a few times after their arrest for traveling to a restricted military facility north of Baghdad to verify reports of a massive explosion that killed hundreds of people.

Iraqi authorities claimed Bazoft masqueraded as a doctor to gain entry to the area but Parish denied there was any spying. She said she and Bazoft ventured to the area in full public view after informing authorities.

''I did not know that he was going to be executed,'' she said of the 31-year-old reporter, who paid the ultimate price for trying to get a scoop for The Observer newspaper. ''I heard from the embassy that he had been executed that morning. I was shocked.''

Parish said her first priority is to celebrate, before searching for work as a nurse. She worked in Saudi Arabia before working in Iraq.

''I have happy memories of Iraq,'' she said. ''I worked there for a year (before going into jail). I worked with the Iraqi people. They are lovely people.''

Britain hailed Parish's release as a first step toward repairing its tense relations with Baghdad. Bazoft's execution prompted London to temporarily withdraw its ambassador, suspend ministerial visits to Iraq and send home Iraqis training with the British military.

#90199u0947 07/18/1990 ~United Press International
(JULY 18) UPI - Rescue workers in the Philippines had to temporarily give up their search for more earthquake victims today when two strong aftershocks rocked the area north of Manila. More than 200 aftershocks have shaken the Philippines since Monday's initial quake, keeping rescue workers on edge as they try to recover as many as one-thousand people trapped under the debris.

East and West Germany have promised Poland they will sign a border treaty ensuring Poland's western borders as soon as Germany reunites. West German officials also have agreed to meet with Polish officials this summer to discuss Poland's economic problems. But officials say it's too early to say what aid West Germany might offer.

Wildfires are raging in five Northwest states, most of them sparked by lightning. Nearly three-thousand firefighters are battling the blazes, the largest of which has charred nearly 17-hundred acres of Montana's Bitterroot National Forest. Other fires are burning in Oregon, Idaho, and Washington state.

The Senate seems certain to pass a major civil rights bill since voting to limit debate on the measure. Yesterday's Senate action angered Republicans who said they felt like the Democrats were forcing them to vote on the issue. Civil rights advocates say the rights bill is necessary to guard against on-the-job discrimination.

Massachusetts Governor Michael Dukakis is expected to sign a one-point-three-BILLION-dollar tax bill today. Dukakis declared yesterday- ''The Massachusetts miracle is beginning to revive.'' The state's Supreme Judicial Court ruled key portions of the legislation are constitutional.

#90199u0960 07/18/1990 ~United Press International
(JULY 18) UPI - African National Congress leader Nelson Mandela arrives in Johannesburg today after a 45-nation world tour that included successful meetings with various national leaders. Mandela faces many challenges back in his native country. Among them, assassination threats from the extreme right and discord with other black opposition groups.

President Bush says he's encouraging South African President Frederik de Klerk to visit the United States... that following the recent U-S visit by Nelson Mandela. The South African leader was set to meet with Bush in mid-June, but canceled trip after it appeared he would face large demonstrations.

The Justice Department has filed a lawsuit against the District of Columbia as part of a crackdown on pollution in the Chesapeake Bay. E-P-A officials say the lawsuit will force the district to clean up wastewater discharges into the Potomac River.

The government is ordering the makers of fish oil capsules to stop claiming the product reduces cholesterol levels or the risk for heart disease. The F-D-A say there's NOT enough evidence to support those claims. A trade organization for food supplement manufacturers says it will appeal the decision.

Stanford University researchers say a long-term public health education program apparently has succeeded in reducing smoking and other major risks for heart disease in two California communities. Scientists say the five-year multi-media project proved that providing health and nutritional information to people can have a significant impact on mortality rates.

#90199u0987 07/18/1990 ~United Press International

BRUSSELS, BELGIUM (JULY 18) UPI - The Soviet Union's next ambassador to

Belgium will also be the Soviet Union's liaison to NATO, the chief of the Western alliance said Wednesday.

NATO leaders at a landmark summit in London this month invited Warsaw Pact countries to establish ''diplomatic liaison'' as part of a sweeping peace offer toward the Soviet Union.

The arrangement with Moscow was worked out by NATO Secretary General Manfred Woerner during a visit to the Soviet Union that ended Tuesday.

Hungary will also be represented at NATO by its ambassador to Belgium, Woerner said after meeting Wednesday with Hungarian Prime Minister Jozsef Antall. It was the first visit to NATO headquarters by a Warsaw Pact leader, and Woerner accepted an invitation to visit Budapest in November.

According to NATO, the liaison arrangements would take effect with the next ambassadors to Belgium from the Soviet Union and Hungary because a ''machinery'' for accrediting Warsaw Pact liaisons to the Western alliance had not yet been worked out.

''Once this is in place, when NATO wants to contact the Soviet Union it can do it through the ambassador to Belgium,'' a NATO spokesman said. ''That's probably the way we would have done it anyway, but this will make it a little more formal.''

The most recent Soviet ambassador to Belgium returned to Moscow in May and his replacement has not been named, the Soviet Embassy said. The Soviets are represented in Belgium by a charge d'affaires.

Although the London NATO summit invited only Warsaw Pact countries to establish liaisons, interest has also been expressed by some non-aligned European countries.

#90199u1009 07/18/1990 ~United Press International

ATLANTA (JULY 18) UPI - Former Atlanta Mayor Andrew Young, trying to become Georgia's first black governor, and Lt. Gov. Zell Miller topped the state's Democratic gubernatorial primary balloting and will meet in a runoff next month.

Although Miller ran way ahead of Young in voting Tuesday, a runoff was necessary because neither scored the 50 percent majority needed for an automatic spot on the November general election ballot.

With nearly 91 percent of the precincts counted, Miller had 418,283 votes, or 40.7 percent, while Young registered 322,389 votes, or 31.4 percent, and state Sen. Roy Barnes had 202,854, or 19.7 percent. The runoff will be

Aug. 7. Trailing far behind in the Democratic primary were state Rep. Lauren McDonald and Lester Maddox, the former segregationist governor.

The Republicans nominated Johnny Isakson, who has his work cut out for him since the GOP has not won a gubernatorial election in Georgia in 122 years. With 80 percent of the GOP primary precincts counted, Isakson, a real estate developer, had 72.4 percent of the vote. Isakson crushed three other challengers.

Gov. Joe Frank Harris, a Democrat, is retiring because state law limits gubernatorial administrations to two terms. Harris was elected in 1982 and again in 1986.

Miller credited his success to his support of a state lottery to help fund education and other anti-crime and anti-tax proposals."It was the message that I was delivering," Miller said. "These new solutions to old problems that I've been talking about - the lottery for education, boot camps for first-time (drug) offenders and taking the sales tax off groceries and doing something about the rising automobile (insurance) rates. Those are the things that the people of Georgia identify with."

Young, U.N. ambassador during the Carter administration, thanked his backers and said he was "looking forward to a new day in Georgia."

Isakson would not predict the outcome on the Democratic side. "Whomever they nominate, more than likely the voters are going to have a clear decision between a conservative and a liberal, so the personality doesn't matter," Isakson said.

Young criss-crossed the state on a flying tour Monday after addressing a predominantly black crowd in the heart of his Atlanta stronghold. Emphasizing his achievements as mayor of bolstering Atlanta's economy and educational opportunities, Young told a group of ministers that he wants the chance to do the same for the rest of Georgia.

"People ... look with envy on Atlanta at what economic development has done for the city, what education has done for its young people," Young said. "They look at the opportunities in Atlanta and say, 'Why hasn't the state done anything like that for us?"'

Miller, who billed himself as the "candidate of change," also traveled across the state Monday to urge people to vote.

#90199u1021 07/18/1990 ~United Press International
JERUSALEM (JULY 18) UPI - Foreign Minister David Levy will ask visiting leaders of the European Community to convince Arab states that Jewish immigration is not a threat to their security, a senior official said Wednesday.

The government official also said Israel would not stand in the way of EC efforts to provide additional aid to Palestinians in the Israeli-occupied West Bank and Gaza Strip, but would not allow the establishment of an EC consulate or other high-level mission in the territories.

The remarks were made in advance of next Monday's visit to Israel by the so-called EC troika, which consists of the past, present and future presidents of the EC Foreign Ministers Council - Ireland, Italy and Luxembourg.

After meeting with Levy, who is still recovering from a heart attack he suffered last month, and perhaps Prime Minister Yitzhak Shamir, the Europeans head to Tunis on Tuesday for talks with Arab League officials.

Italian Foreign Minister Gianni de Michelis said earlier this week that the group wanted to find a way to advance the peace process and begin a dialogue between Shamir's new right-wing government and Arab countries.

Israel's relations with the EC have been strained since earlier this year when the European Parliament suspended joint technical and scientific projects because of Israel's handling of the Palestinian uprising and for the lack of progress in the peace process.

Levy will ask the Europeans to use their influence with Israel's Arab neighbors - namely Jordan and Syria - to ''join the peace process,'' the senior Israeli official said Wednesday.

The official, who requested anonymity, said Israel remains committed to Shamir's May 1989 peace plan, which calls for Palestinian elections in the occupied territories and the possibility of limited Palestinian autonomy.

''The Israeli peace initiative is the only one on the table. We will ask the Europeans to use their influence over the Arabs to accept the initiative for its real value,'' the official said.

In addition, Levy will urge the Europeans to tell Arab leaders that the 150,000 Soviet Jews expected to emigrate to Israel this year pose no threat to Arabs, who have denounced the immigration as a means to uproot Palestinians.

In Paris Wednesday, Soviet Foreign Minister Eduard Shevardnadze, saying ''the Arabs have a legitimate concern,'' called on the United States to use its influence with Israel to stop the settlement of Soviet Jews in the Israeli-occupied Arab territories.

Speaking after two hours and 15 minutes of talks with U.S. Secretary of State James Baker in Paris, the Soviet envoy said he had asked Baker that Washington ''use all its authority to exert an adequate influence'' so that new immigrants from the Soviet Union are not placed in the Gaza Strip and West Bank.

''We are presenting no more obstacles'' to the emigration of Jews from the Soviet Union, Shevardnadze told reporters.

Earlier this week, Arab foreign ministers meeting in Tunis said Jewish immigration posed ''a very grave threat to national security, to the inalienable rights of the Palestinian people and to peace efforts.''

The delegates also said they would take steps to boycott companies and other institutions that help Jews immigrate to Israel.

Asked about reports that the EC intends to establish a permanent presence in the occupied territories, the official said Israel was prepared to reach a compromise on the issue but ruled out the establishment of an EC consulate there.

''It cannot be a consulate, but I do hope we find a formula'' for an agreement, the official said. ''We do support humanitarian aid to the (Palestinian) population, and (the EC) can assist.

NEW YORK (JULY 18) UPI - Criminal charges have been filed against a management official at the Empire State Building because of a defect in an alarm system that may have slowed the response time of firefighters battling a blaze at the skyscraper, the Fire Department said Wednesday.

The fire department filed the charges filed Tuesday in Manhattan Criminal Court against Gordon Sestan, assistant director of operations at the skyscraper, said Efrain Parrilla, a Fire Department spokesman. Sestan is to appear in court Sept. 6.

The charges involve the alarm system and the absence of the building's safety director, the spokesman said. Each charge involves violations of New York City's Administrative Code and is punishable by fines of $500. The court can impose a jail sentence at its discretion.

The first count said the alarm system failed to alert AFA Protective Systems Inc., a central dispatching station that flashes an alarm to the Fire Department.

The second said the building's safety director was not around when the first fire companies arrived at the building. The fire occurred at 6:30 p.m. when most building employees had gone home for the day.

A spokesman for Howard Rubenstein Associates, a publicist that represents Helmsley-Spear Inc., the building's managing agent, denied the accusations. Real estate billionaire Harry Helmsley heads the syndicate that owns the Empire State Building.

Assistant Fire Commissioner John Mulligan said Tuesday it was not clear how much time was lost as a result of alarm defects. Instead of being alerted by AFA, firefighters first received word of the blaze by telephone possibly from a tenant although the identity of the caller was not clear, Mulligan said.

The blaze sent smoke billowing onto the midtown street lined with spectators and shut down traffic in the surrounding area as fire trucks and ambulances rushed to the scene. The blaze was extinguished at 7:30 p.m. and the building staff worked through the night to tidy up for tenants and visitors Tuesday morning.

The 1,250-foot building was the tallest in the world when it opened May 1,

1931, and held the title until the opening of the World Trade Center in lower Manhattan. The tallest building in the world is the Sears Tower in Chicago at 1,454 feet and 110 stories.

#90199u1031 07/18/1990 ~United Press International

BANGKOK, THAILAND (JULY 18) UPI - An American medical researcher called Wednesday for U.S. government funding for urgent research on the effects of spraying toxic Agent Orange herbicide in Vietnam before most of the evidence disappears.

''It is imperative to collect thousands and thousands of tissue samples in the next 24 months because each year the levels (of contamination) go down '' said Dr. Arnold Schecter, a professor of preventive medicine at the College of Medicine at the State University of New York.

Schecter, who returned from collecting tissue samples in Vietnam for a privately funded study, said much more extensive sampling is needed to assess the effects of the herbicide on the Vietnamese population and on the U.S. servicemen who served in Vietnam during the Vietnam war.

The herbicide Agent Orange was sprayed over large areas of southern and central Vietnam to reduce the jungle giving cover to the communist guerrillas.

The herbicide included dioxins, which are believed to cause certain kinds of cancer, genetic damage and reproductive problems.

The U.S. government has funded studies on dioxin poisoning among American Vietnam War veterans but has refused to provide funds for studies in Vietnam.

Schecter said studies in Vietnam were necessary to learn the geographic distribution of dioxin absorption and to determine its health effects.

Even 20 years after exposure, dioxins can be detected in body tissues such as fat, blood and breast milk.

The levels, however, gradually decrease and are currently getting close to the normal levels found in the body, Schecter said.

''To do a good job we need about $500,000 to $1 million per year for five to 10 years and we have to start soon,'' he said.

''It is highly probable that such a study will get some results showing the effects of dioxin on human health - what levels do we need to worry about,'' he said.

Schecter, who has made eight trips to Vietnam for dioxin research, said private funds of about $95,000 per year, were inadequate to collect the thousands of samples needed and to carry out the expensive dioxin detection tests needed.

He said he collected about 300 blood samples, frozen for later analysis, during his most recent trip.

''The Vietnamese government is cooperating fully, but they don't have sufficient resources to carry out this research on their own,'' he said.

The researcher said most of the $100 million the Congress approved for dioxin research in 1984 has been poured into massive federal studies that have not used the latest techniques, preventing them from reaching firm conclusions.

The research has also failed to take advantage of the fact that large populations were exposed to dioxins in southern Vietnam while dioxins are almost unknown in the north. Schecter said this difference provides extremely useful controls that are unavailable in industrial countries where the background level of dioxins is relatively high.

HARARE, ZIMBABWE (JULY 18) UPI - The Zimbabwe government, cheered by a lenghty period of peace in the country, announced Wednesday it will lift the nearly 25-year-old nationwide state of emergency next week. Home Affairs Minister Moven Mahachi told Parliament the emergency, imposed by the white minority government of Ian Smith when it declared the former British colony of Rhodesia independent from Britain in November 1965, will expire at midnight next Wednesday.

Mahachi said the emergency is being scrapped because ''the country is enjoying peaceful conditions and atmosphere, the best ... for a long time in the history of this country.''

The emergency, which has given security forces special powers and severely restricted civil liberties, was due for a regular six-month review by the 150-member legislature before August. Mahachi announced earlier this month his plans to scrap it.

Smith imposed the emergency the month he unilaterally decreed independence from Britain to quell black opposition to his rule.

When Zimbabwe achieved full independence in 1980, President Robert Mugabe renewed the measures, citing black dissident action and plundering of farms by right-wing rebels coming across the eastern border from Mozambique.

Mahachi said early this month, ''We are assessing the political and security situation in the country and also developments in South Africa and on our eastern border.''

South Africa, a bitter enemy of the socialist Harare government, announced on June 8 the lifting of a 4-year-old national state of emergency in most parts of the country along with a program of racial reforms.

Political analysts believe a major reason for Mugabe's dedcision to scrap the emergency is that he does not want to be overshadowed by Pretoria's measures.

#90199u1056 07/18/1990 ~United Press International

(JULY 18) UPI - The Labor Department says consumer prices jumped by a higher-than-expected five-tenths of one percent in June... largely due to higher food, housing and energy costs. Private economists expected an increase of three-tenths of one percent in the government's closely watched Consumer Price Index. In May and April, consumer prices advanced by two-tenths of one percent.

Officials in the Philippines say two Americans are among the 311 people killed in Monday's devastating earthquake... but NO further information is being released. Two strong aftershocks within 15 minutes of each other this morning sent rescue workers scrambling from crushed buildings where hundreds of people remain trapped. More than 200 aftershocks have rocked the area since Monday.

Nelson Mandela returns to his native South Africa today after his 45-day world tour to fears by some that the black nationalist leader faces assassination attempts from the extreme right. News reports last month said a shadowy group led by a former Nazi was planning to gun down Mandela at the airport. Mandela shrugged off the issue, saying... ''I caN'T afford to worry too much about that.''

Violence was reported today in South Africa's strife-torn Natal province. Police say gunmen fired on a mini-bus, causing it and another bus to plunge off a winding road, killing 26 blacks and injuring 54 others. Police say the attack stems from black-on-black violence. Police say NO one was hit by the gunfire... but the hail of bullets forced the two vehicles into a ravine.

#90199u1060 07/18/1990 ~United Press International

BEIJING (JULY 18) UPI - A Chinese man who hijacked a passenger jet to Japan last year was sentenced to eight years in jail, the official Xinhua News Agency reported Wednesday.

Zhang Zhenhai, identified as a 36-year-old farmer from north Hebei province, was sentenced to ''eight years imprisonment and deprivation of political rights for two years by the Beijing Municipal Intermediate People's Court,'' the Xinhua report said.

Zhang, accompanied by his wife and their 10-year-old son, hijacked an Air China Boeing 747 on the Beijing-to Shanghai leg of a flight for New York on Dec. 18 and threatened to blow it up.

The plane, with 233 people aboard, landed at the Fukuoka airport in southwestern Japan. No one was hurt and it was later found that the hijackers had no explosives or weapons.

The family was extradited back to Beijing by the Japanese government despite Zhang's request for political asylum.

Zhang, a self-described leader of last spring's democracy protests, maintained throughout his 133 days in Japan that he had commandeered the jet to escape political persecution in Beijing.

Zhang claimed he faced torture and possible execution for his role in the nationwide demonstrations that came to a bloody end when the Chinese army entered Tiananmen Square in June 1989, killing hundreds and perhaps thousands of peaceful protesters.

Technically, Zhang can appeal to a higher court within 10 days of receipt of the verdict, Xinhua said. But suspects in China are usually considered guilty before going to trial, and the verdict is not likely to be overturned.

Zhang's wife and son ''have not been implicated in any wrongdoing'' and were not sentenced, the news report said.

#90199u1063 07/18/1990 ~United Press International

(JULY 18) UPI - Senate Democrats have cleared the way for passage today of the major civil rights bill of 1990. The Senate voted yesterday to limit debate sharply, which provoked a veto threat from the White House. Senate Democratic and Republican leaders agreed to give negotiations with the White House a final chance for a compromise. The results of the latest discussions are expected this morning.

The New York Times reports today that the city's Fire Department has filed criminal charges against the management of the Empire State Building in the wake of this week's fire that injured 38 people. The newspaper says the department cited alarm system defects for slowing the response time of firefighters. Two summonses were filed against the building management.

A defense lawyer for Nicu Ceacescu, the son of the executed Romanian dictator... says her client may NOT live to see the verdict in his genocide trial because he is suffering hepatitis and other ailments. Public sympathy for Nicu Ceasuescu has been growing as the trial progresses and prosecutors say they are worried their case may be undermined.

A Polish government commission has lowered the number of people believed

to have died at the Auschwitz death camp during World War Two and conceded the overwhelming majority were Jews. The decision to revise the official number of those killed in the Nazi camp from four-Million to one-Million 500-thousand is a formal rejection of original figures released by the Soviet Union.

#90199u1066 07/18/1990 ~United Press International

SRINAGAR, INDIA (JULY 18) UPI - The Indian official charged with controlling the Moslem uprising in the northern Kashmir Valley predicted ''difficult weeks'' ahead Wednesday amid reports that soldiers killed 34 militants trying to enter India from Pakistan.

Gov. Girish Saxena, the New Delhi-appointed administrator of India's Jammu and Kashmir state, said Moslem rebels fighting for independence from India had stepped up activity since mid-June, but ''we are checking them up, and over 100 Pakistani-trained militants have been arrested during the last month.''

Despite the number of rebels captured, the governor said huge amounts of arms and ammunition were thought to have entered the mostly Moslem Kashmir Valley in recent weeks along with substantial numbers of guerrillas. ''We may be heading for difficult weeks,'' he added.

Saxena's remarks came in an interview hours after Indian troops ambushed a group of Kashmiri militants Tuesday night as they tried to infiltrate across the border from Pakistan.

Officials said the soldiers killed 21 of the rebels during the ambush. Soldiers chasing the rest of the infiltrators killed another 13 militants in clashes Tuesday night and Wednesday.

The death toll was the heaviest between militants and Indian forces along the border since the Moslem separatist movement against Hindu-dominated India gained widespread support in mid-January. Officials said the rebels were carrying AK-47 rifles, light machine guns and a grenade launcher.

Residents of the Kashmir Valley staged a general strike Wednesday to protest talks in Islamabad between India and Pakistan apparently focusing on reducing tensions over Kashmir.

Authorities imposed a curfew on most of Srinagar Wednesday to prevent violence related to the strike, which was called by the Jammu and Kashmir Liberation Front, the leading Moslem militant group fighting for independence.

The JKLF said no talks between India and Pakistan were acceptable unless

the people of Kashmir were equal partners. India and Pakistan claim sovereignty over parts of the Kashmir region, but the JKLF is seeking independence.

Kashmiri separatists have been fighting the Indian government for about 2 1/2 years, but the movement gained widespread support in mid-January when Indian security forces fired on a peaceful demonstration, killing more than 35 people.

JERUSALEM (JULY 18) UPI - Three Palestinian prisoners were strangled to death Wednesday at the Ketziot military detention center by a fellow inmate who suspected them of collaboration, military and Palestinian sources said.

Military sources said the bodies of Fami Azam, 22, Arafat Abu Sariah, 24, and Bassam Tzaker, 30, were discovered during morning roll call at the prison in southern Israel. All three, who had lived in the Gaza Strip, had been killed during the night, the sources said.

Another prisoner, Wael Abu Fanuna, 24, also from the Gaza Strip, confessed to killing the three inmates, military sources said. Palestinian sources said he suspected them of collaborating with the Israeli authorities.

Since the start of the 32-month-old Palestinian uprising, 23 Palestinians have been killed by fellow inmates in Israeli detention centers, the military spokesman said.

MIAMI (JULY 18) UPI - A fugitive indicted with former Panamanian leader Manuel Noriega surrendered to American authorities in Panama and was flown to Miami to stand trial on cocaine smuggling charges.

Amet Paredes turned himself in to Drug Enforcement Administration agents at the U.S. Embassy in Panama City Tuesday and was flown to Miami and jailed at the Metropolitan Correctional Center, the same federal prison where Noriega is being held. Paredes was scheduled to make his initial appearance before a U.S. magistrate at 2 p.m. EDT Wednesday, a magistrate's clerk said.

Paredes, the son of Gen. Ruben Dario Paredes, is the seventh defendant to be arrested in the case. A February 1988 indictment charged that Noriega and 15 others, including leaders of Colombia's Medellin drug cartel, conspired to smuggle tons of cocaine into the United States betwen 1981 and 1986. If convicted, Paredes could face up to 95 years in prison.

The indictment claims that Paredes and his late brother Ruben smuggled cocaine with the help of Panama drug pilot Cesar Rodriguez. In March 1986, Rodriguez and the younger Ruben Paredes were murdered in Medellin, where they tried to acquire a load of cocaine.

The indictment also alleges that Paredes was involved in a plot to smuggle about 730 pounds of cocaine aboard the vessel "Krill" between November 1985 and March 1986. Co-defendant Brian Davidow of Miami and William Saldarriaga of Colombia are accused of taking part in the same smuggling scheme. Paredes also is charged with helping process tons of cocaine in a remote region of Colombia.

It was unclear why Paredes gave himself up. Married and the father of two children, he eluded U.S. troops who overthrew Noriega in December. The invasion forced the surrender of Noriega, Lt. Col. Luis del Cid and pilots Eduardo Pardo and Daniel Miranda. Davidow and Saldarriaga were arrested months before the incursion.

Pardo pleaded guilty to flying drug profits from Florida to Panama in 1983 and was sentenced in May to 30 months in prison. The other defendants are

awaiting trial, set for Jan. 28, 1991.

#90199u1080 07/18/1990 ~United Press International
ATHENS, GREECE (JULY 18) UPI - Iraqi Foreign Minister Tareq Aziz accused Kuwait and the United Arab Emirates of dumping oil on the world market to undermine prices and weaken the Iraqi economy, Baghdad radio said Wednesday. The charge, contained in a letter to Arab League Secretary General Chedli Klibi, appeared to escalate Iraq's campaign against the two Gulf states.

Tuesday, Iraqi President Saddam Hussein charged unnamed Gulf Arab oil-producing states of plotting with the United States to flood the world oil market with an unwanted surplus and causing a general price slide to hit the war-damaged Iraqi economy. Regional diplomats said Hussein's verbal assault was directed against the United Arab Emirates and Kuwait.

"Officials in the government of Kuwait, despite our sincere efforts to continue our brotherly dialogue with them, are attempting to harm Iraq and weaken it in a premeditated and deliberate way," Aziz said in his letter, broadcast on Baghdad radio monitored here.

"Attempts by the governments of Kuwait and the United Arab Emirates to dump additional crude on the oil market is a premeditated and deliberate plan aimed at weakening Iraq and undermining its economy and security," he said.

Kuwaiti Prime Minister Sheikh Saad al Abdullah al Sabah, who is also crown prince, called a special session of the newly-elected Parliament to discuss the growing rift with Iraq. The premier described the session as critical and important.

Aziz also accused Kuwait of stealing $2.4 billion worth of Iraqi oil during the 1980-90 decade, and said Baghdad reserved the right of "recovering the stolen amounts and correcting the violations."

He said Kuwait stole Iraqi oil from the Al Rumeilah oilfields on the Kuwait-Iraq border. "Such conduct is tantamount to a military aggression," the Iraqi foreign minister said.

From 1981 to 1990, Arab states suffered oil revenue losses totaling $500 billion because of a series of price slides, and Iraq's share of these losses totaled $89 billion, Aziz said. Tuesday, the Iraqi president explained that a drop in oil prices of one dollar a barrel led to a $1 billion loss in oil revenues for Iraq in one year.

In his letter to Klibi, the Iraqi foreign minister called on Arab states to denounce Kuwait and the United Arab Emirates for violating oil production

quotas set for them by the Organization of Petroleum Exporting Countries. "We call on all our brothers to urge those concerned to stop their deliberate aggression against Iraq," Aziz said.

In his broadcast Tuesday, Hussein lashed out at the United States accusing it of plotting with some Gulf Arab states to undermine world oil prices. Hussein said the oil policy pursued by some Gulf Arab states "is an American policy, (drawn up) at the request of the United States against the interests of the nation and the region's people."

He said it ran counter to the interests of the Arab states in the Gulf, and warned that Iraq could no longer remain silent. "Raising our voice against the evil is not the final resort, if the evil continues," Hussein said.

Last week, the United Arab Emirates announced it was slashing its production by 400,000 barrels a day and would abide by an OPEC quota of 1.5 million barrels a day, until the cartel set a new quota. Kuwait simultaneously indicated it would cut production by several hundred thousand barrels a day.

The two came days before OPEC was scheduled to begin a ministerial meeting in Geneva July 25 to consider its production and pricing strategy for the second half of 1990.

#90199u1118 07/18/1990 ~United Press International

BANGKOK, THAILAND (JULY 18) UPI - The Vietnamese-backed government of Cambodia said its forces recaptured a key district town serving as the unofficial resistance capital, but resistance officials said Wednesday their troops were still holding off government attacks.

The Khmer Rouge resistance, counterattacking in the propaganda war, said its forces attacked the country's second-largest city and reported clashes between government troops and their Vietnamese allies.

The claims came as Secretary of State James Baker, in Paris, sought the assistance of Vietnam in providing for free elections in Cambodia. He also said the United States would no longer support allowing the resistance to hold Cambodia's seat in the United Nations instead of the government.

The move was aimed at trying to blunt the influence of the Khmer Rouge.

Government radio, in a report Tuesday night, said government forces on Sunday ''attacked and seized total control of Stoung District in Kompong Thom Province,'' about 100 miles northwest of Phnom Penh.

The district, with about 100,000 inhabitants, has served as the unofficial

capital for resistance forces loyal to Prince Norodom Sihanouk, since it was captured from the government early this year. Travelers from the town, which is on the main highway in the north, said it had a large and active market under resistance administration.

The radio said government forces killed 63 resistance soldiers and captured 26 others in the attack. They also seized a ''large quantity of war material,'' it said.

In Bangkok, however, a spokeswoman for Sihanouk's group said a message received from its forces in Stoung reported heavy fighting from Friday to Sunday.

''They were trying to recapture Stoung but our forces pushed them back,'' said the spokeswoman who asked not to be identified. ''At the moment we are holding our positions.''

She said government artillery shelled populated areas near Stoung but had no further details on the extent of the fighting or the casualties involved.

The Sihanouk forces, which receive assistance from the United States, control much of the countryside in northwest Cambodia and briefly occupied the provincial capital of Kompong Thom last month.

The Khmer Rouge, a Chinese-backed resistance group allied with the Sihanouk group, reported that its forces attacked Battambang, the country's second-largest city, on Saturday.

Khmer Rouge radio, in a broadcast Wednesday, said 15 Vietnamese soldiers were killed in the attack.

The attack, which included shelling by 107-mm rockets, destroyed an aircraft, two aircraft shelters, and a 50-yard (meter) section of the main railway line, the radio said.

''We liberated and controlled the airfield for a night,'' it said. The radio said the attack panicked defenders and sent people fleeing out of the city, about 160 miles northwest of Phnom Penh.

It also reported a clash between government troops and 300 Vietnamese soldiers sent to arrest them for siding with an anti- Vietnamese faction allegedly led by the defense minister, Gen. Tie Banh.

The radio claimed that 28 Cambodians and 10 Vietnamese were killed in the hourlong clash.

The government had no immediate reaction to the reports, but spokesman

Chum Bun Rong earlier rejected Khmer Rouge reports that Tie Banh was under arrest.

He has also dismissed previous Khmer Rouge reports of attacks on Battambang as exaggerations of small-scale probes against the city' s outer defense and rejected charges that Vietnamese combat troops remain in the country following their announced pullout last September.

The Cambodian government was installed in power following the December 1978 Vietnamese invasion that ousted the Khmer Rouge government blamed for the deaths of more than 1 million Cambodians.

BANGKOK, THAILAND (JULY 18) UPI - Burmese dissident students said they plan demonstrations against the military government Thursday during ceremonies to celebrate ''Martyrs' Day,'' an event that sparked a massive government crackdown on political dissent last year.

''There will be some demonstrations Thursday,'' Htun Aung Gyaw, a leader of the dissident All Burma Students Democratic Front, said Wednesday.

''The students inside the country say they are willing to give up their lives to make the military hand over power to the elected Parliament and release the political prisoners,'' he said in a phone call from a border area of Thailand.

He said the demonstrations would be peaceful and take place mostly in the capital Rangoon and the country's second-largest town of Mandalay.

''We want to test whether the army is loyal to the people or only to their officers,'' he said. ''We have indications that some units may not accept orders to kill the people.''

Htun Aung Gyaw said the demonstrations would coincide with government-sponsored ceremonies honoring the country's independence hero, Gen. Aung San, who was assassinated with his closest associates in 1947.

Aung San's daughter, Aung San Suu Kyi, the leader of the main opposition party, has been under house arrest since July 20 last year - the day after the previous Martyrs' Day event - on charges of defying the military.

Her party, the National League for Democracy, swept 80 percent of the seats in Parliament in elections on May 27, but the military government has delayed handing over power to the newly elected legislature.

Last week military intelligence chief Brig. Gen. Khin Nyunt said there would be no transition of power until a new, acceptable constitution was drafted and approved by the people, apparently in a national referendum.

He warned the military would not permit the formation of any government without its permission.

#90199u1155 07/18/1990 ~United Press International

SIDON, LEBANON (JULY 18) UPI - Palestinian forces, deployed in an embattled region in southern Lebanon to stop fighting between rival Moslem Shiite groups, warned pro-Iranian Hezbollah gunmen Wednesday to evacuate a strategic village within 24 hours.

''We give Hezbollah an ultimatum of 24 hours to evacuate the village of Jarjou before we are forced to use our own methods (to drive them out),'' Zeid Wehbe, Palestine Liberation Organization representative in Lebanon, told reporters in the southern port city of Sidon, 24 miles south of Beirut.

According to radio reports, PLO chief Yasser Arafat contacted Iranian President Hashemi Rafsanjani and urged him to exert pressure on Hezbollah to pull out of Jarajou.

Hezbollah and its rival Shiite Amal militia have been engaged in fierce house-to-house and street fighting since Monday for the control of a cluster of villages, including Jarjou, in the mountainuous district of Iklim Al Tuffah, east of Sidon.

The fundamentalists have gained the upper hand in the artillery and rocket fighting, forcing the Amalists to retreat.

At least 40 people have been killed and more than 150 others have been wounded in the three days of fighting, police said.

While the feuding forces battled with mortars, rocket launchers, jeep-mounted cannons and automatic arms for the third consecutive day, Israeli warplanes made several passes over the battleground, breaking the sound barrier.

#90199u1158 07/18/1990 ~United Press International

RALEIGH, N.C. (JULY 18) UPI - State officials told Mobil Oil the company's plans to drill for a natural gas field off Hatteras Island, N.C., were not acceptable because Mobil did not provide enough information.

Gov. Jim Martin told Mobil officers Tuesday the company failed to prove its claims the project was not a threat to coastal environment.

Martin also said President George Bush's recent executive order delaying most offshore activity for 10 years ''indicates there is no need to search for additional energy reserves in the ocean.''

Mobil Exploration and Producing U.S. Inc., based in New Orleans, wants to drill an exploratory well 36 miles off the Outer Banks to determine if there is a field with 5 trillion cubic feet of natural gas, as studies have indicated.

The proposal has drawn severe criticism from elected officials, coastal residents and conservation groups.

''When the environmental process ... is completed, I will take all the steps within my power to see that drilling does not take place off the coast of North Carolina,'' Martin said in a letter.

The U.S. Environmental Protection Agency cannot grant Mobil a permit the company needs to begin the search off Cape Hatteras because of the state's objection.

Mobil will recommend to its partners that they appeal the ruling, Mobil attorney James P. Cain said. A final decision on the ruling won't be made until at least next week, he said.

In a related matter, the state Coastal Management Division said Mobil has not provided enough information to refute the state's claim the project was not consistent with the policies and standards of the Coastal Management Program.

The division said the project would threaten fish spawning areas and recreation areas, and cause the relocation of wildlife along the coast.

Mobil did not provide information needed to ''guage the effects of drilling on those policies and standards,'' said Roger Schecter, director of the division.

''Should Mobil subsequently provide the required information, the state will then be in a position to review the proposed activity to determine whether it may be conducted in a manner consistent with North Carolina's Coastal Management Plan,'' Schecter said.

#90199u1161 07/18/1990 ~United Press International

NEW YORK (JULY 18) UPI - The art and antiques collection of legendary movie star Greta Garbo, valued in excess of $20 million, will be sold by Sotheby's auction gallery in mid-November, it was announced Wednesday.

John Marion, president of Sotheby's North America, said the collection reflects the "unique vision, sensitivity to color, and sophisticated taste" of Garbo, who died in New York April 15 at the age of 84. "For more than 50 years, Greta Garbo acquired art and antiques with the eye and passion of a serious collector," Marion said.

Proceeds from the sale will go to Garbo's estate, which was left to a niece, Gray Reisfield, wife of a New Jersey gynecologist and resident of Passaic, N.J. Garbo's will is being contested by a nephew in Sweden who was not named as a beneficiary.

Marion said Garbo's collection includes a number of important French Impressionist and modern paintings including three intimate scenes by Renoir, a Bonnard still life, and works by Van Dongen, d'Espagnat, Jawlensky, Rouault, and Valtat.

Her furniture, he said, is mainly 18th century French, and will be sold along with Savonnerie carpets and European and Chinese ceramics, rare books, and a group of decorative paintings and drawings.

Most of the lots in the one-owner sale have been removed from Garbo's apartment in Manhattan, according to Sotheby's. They are the first of Garbo's possessions, which include important Hollywood real estate and other invetments, to be sold.

#90199u1179 07/18/1990 ~United Press International

BANGKOK (JULY 18) UPI - Burma, the world's leading heroin producer, said its police and military have seized nearly 1 ton of narcotics in the past six months and arrested more than 4,000 people on drug charges.

Government radio, in a broadcast Tuesday night, said police and troops have seized about 30 pounds of heroin, 1,287 pounds of opium and 849 pounds of marijuana in the first six months of the year.

It said 4,148 people have been arrested in connection with the seizures.

''The total value of narcotics seized by the Defense Services and the People's Police Force in the first half of 1990 was $211,567,794,'' it said, apparently basing the figure on the street value of the drugs in New York.

U.S. officials have accused the military government of failing to act vigorously against narcotics production and trafficking.

The U.S. State Department estimates that since the military seized power in 1988, opium production in Burma has more than doubled to 2,625 metric

tons, making it the world's leading producer of illicit heroin.

The department has said up to 50 percent of the heroin reaching the United States comes from the Golden Triangle area of Burma, Laos and Thailand.

#90199u1198 07/18/1990 ~United Press International

LONDON (JULY 18) UPI - Stock prices closed lower Wednesday on the London International stock exchange after a relatively active trading session, pressured by weakness on Wall Street.

The blue-chip Financial Times 100-stock index, which gained 8.5 points Tuesday, fell 13.0 points to 2,402.0. The narrower top 30 industrial average lost 12.3 points to 1,900.6.

Volume swelled to around 595 million shares compared with 374 million shares changing hands on Tuesday.

Market watchers said the volume was helped by the placing of 54 million British Gas shares, representing a line of stock held by the company to meet a bonus offer to shareholders.

Shareholders who held stock for 3 years following the November 1986 privatization were entitled to one extra share for every 10 shares held.

Analysts said the trading was characterized by some profit-taking following the rally during the last week, although there was selective buying.

Stocks opened higher, market watchers noted, but the absence of fresh local economic news and favorable news from the corporate front held prices mostly in check until Wall Street opened.

But as Wall Street retreated from the psychologically important 3,000 level, the market also fell as worries over the impact on earnings from a strong pound increased.

On the trading floor, among the most widely traded issues, B.A.T Industries fell 14 cents to $10.12 on news that the company's earnings may be hit by the strong British pound.

Hawker Siddeley climbed 18 cents to $9.20 as buyers took the opportunity to purchase the stock after its 10 percent fall last week.

Hoskyns Group, an electronics company, jumped $1.08 to $6.40 after Cap

Gemini announced it had purchased 69.5 percent of the company.

Elsewhere in the electronics sector, Logica gained 29 cents to $3.67 in sympathy, but Sema Group fell 36 cents to $10.98 as hopes for a bid from Cap Gemini faded.

Among some of the day's other highlights, Burton Group gained 9 cents to $1.96 after announcing the sale of its financial services division.

Imperial Chemical Industries lost 23 cents $20.74 ahead of the company reporting its latest earnings early next week and amid speculation of a right issue.

Elsewhere in Europe, stock prices on the Frankfurt Stock Exchange surged 1.9 percent to end just below their all-time high in active trading.

The closely watched German Stock Index, which slipped 2.86 points Tuesday, climbed 37.04 points to 1,966.04, its highest closing since April 3.

Traders said prices were boosted by a wave of foreign buying and firm German bond prices.

#90199u1202 07/18/1990 ~United Press International

CHALON-SUR-SAONE, FRANCE (JULY 18) UPI - Five people were killed and another was injured Wednesday by a World War II shell that exploded while workers were cleaning up an old German munitions site in the village of Epervans, officials said.

The clean up operation was ordered after a 20-year-old man was killed by one of the shells May 21.

Police discovered a German unit had been based at the village some 40 miles south of the eastern city of Dijon during World War II. Experts discovered that several 20mm and 37mm shells were buried along a road less than a mile from inhabited buildings.

Most of the people killed in the explosion Wednesday were part of bomb disposal units that had already discovered and destroyed as many as 2,664 shells at the site.

BAGUIO, PHILIPPINES (JULY 18) UPI - Clarita Gonzales stood in front of the crumpled remains of the five-star Hyatt Terraces Hotel where her 5-year-old daughter and nanny were still trapped, pleading for them to

show some sign they were still alive.

''Sonia, anybody, if you can hear me, please tap,'' Gonzales said into a bullhorn in a message she hoped would be heard by the nanny of her small child. ''Knock on the wall. Keep knocking so we can find you.''

Gonzales was among the survivors of the Monday's 7.7 tremblor, which rumbled across the main Philippine island of Luzon killing more than 300 people, clinging to hopes that their loved ones trapped under four hotels in the popular mountain resort of Baguio will be found alive.

Tomas Gomez, a spokesman for President Corazon Aquino, said the quake killed 142 people in Baguio alone, flattened 28 buildings including four hotels and 132 houses.

Gomez said 60 people remained trapped at the five-star Hyatt Terraces, 40 at the Nevada Hotel, 30 to 40 people at the Baguio Park Hotel and 30 at the Hilltop Hotel.

''She could still be alive. I'm just hoping for the best,'' Gonzales said.

Rescue efforts were concentrated on the devastated towns of Cabanatuan and Baguio.

Laboring for much of the day with only picks, shovels and their bare hands rescuers searched for survivors in piles of rubble and twisted metal as strong aftershocks continued to rock the northern Philippines.

Aquino flew to Baguio and directed the evacuation of students making up a third of the resort's population of 120,000.

Baguio was built by American colonizers and is a favorite among tourists and affluent Filipinos who send their children there to study because of its balmy weather. It is also the site of Camp John Hay, a rest and recreation center for the U.S. military.

In Cabanatuan, a city 60 miles north of Manila, where the quake was centered, about 49 children were killed when the six-story Christian College of the Philippines collapsed. About 30 children remained underneath the mass of twisted steel and slabs of concrete and given up for dead.

Three days after the worst earthquake in the Philippines in 14 years, food was running short. There still was no electricity and water. Gasoline was running short and was being rationed. The few grocery stores opened were crammed with people. Restaurants were closed.

The city was pitched dark except at the Hyatt Terraces and Nevada hotels

illuminated by floodlights brought by a U.S. military rescue team.

Workers blasted away boulders blocking Naguillan road, one of the three approaches to Baguio closed by landslides, opening the resort area to motorists.

Aquino's spokesman Gomez said workers have rescued some of the 500 to 600 workers trapped in factories, but that some were believed to have burned to death in the fire that broke out Tuesday. Residents told reporters that many more were probably trapped in the flattened buildings.

Felimon Relis, a funeral parlor owner, told a radio reporter he feared an outbreak of an epidemic, reporting the stench of decomposing bodies.

Relis also said he had ran out of coffins for the dead and asked authorities to do something about the bodies in cadaver bags at the campus of Saint Louis University.

#90199u1225 07/18/1990 ~United Press International

EAST BERLIN (JULY 18) UPI - The Berlin Wall has fallen but it remains a death strip on its east side - at least for plants, the Berliner Zeitung daily newspaper said Wednesday.

The East Berlin paper reported that recent tests indicated the area is ''heavily saturated with herbicides.''

The former communist authorities sprayed the area with herbicides to prevent the growth of plants that might have provided cover to East Germans seeking to escape to the West.

The no man's land, enclosed between barbed wire and concrete slabs, was known as the death strip because East German border guards had orders to shoot anyone trying to escape across it.

The Berliner Zeitung said the soil must be rehabilitated before it can be put to public use.

#90199u1243 07/18/1990 ~United Press International

WASHINGTON (JULY 18) UPI - Lawmakers said Wednesday the Department of Health and Human Services has done a poor job of supervising the Food and Drug Administration and the public might be better served if the FDA were made an independent agency.

The House Energy and Commerce oversight subcommittee grilled Health and

Human Services Secretary Louis Sullivan on his agency's commitment to enforcing the FDA's mandate.

Rep. John Dingell, D-Mich., chairman of the full committee, charged HHS with failing to provide ''needed authority and resources'' to enforce the Food, Drug and Cosmetic Act and to assure the ''honest and efficient management'' of FDA programs, including the generic drug approval process.

Last year, the FDA's credibility was attacked when a scandal involving the approval of generic drugs was discovered. To date, 13 individuals, including former FDA officials, have pleaded guilty to federal charges of paying or receiving payoffs for expedited application approvals.

''It is these failures that have led members of Congress of this subcommittee, from both sides of the aisle, to question whether the FDA should be reborn as an independent agency,'' Dingell said. ''Continued inaction (on prosecuting dishonest generic drug manufacturers) only serves to buttress the growing belief on Capitol Hill that FDA would be better off by itself.''

He charged the Cabinet agency's response to FDA problems has been ''benign neglect.''

Dingell has not introduced legislation to make FDA an independent agency, similar to the Environmental Protection Agency or the Federal Trade Commission.

Rep. Ron Wyden, D-Ore., said it seems ''logical'' to reorganize FDA as an independent agency and promised to pursue the debate.

Sullivan labeled the idea a ''mistake.''

''This would really lead to fragmentation of our health effort in the country,'' Sullivan said, adding FDA currently works closely with other agencies, such as the National Institutes of Health and the Centers for Disease Control.

''I believe very strongly that this kind of (proposal) would not only be disruptive but it would be to the detriment not only of the FDA, but also our citizens in having a comprehensive, coordinated health program,'' the secretary said.

Dingell accused Sullivan of failing to request adequate funding for FDA and of neglecting the generic drug approval process since the scandal, resulting in a ''slow strangulation'' of application approvals for honest manufacturers.

Sullivan contended his agency's plan for dealing with the generic drug

scandal has strengthened enforcement efforts.

He also said he is establishing a new Office of Generic Drugs to ensure quality control over all generic drug applications, has appointed an FDA ombudsman to address grievances in the agency's management of generic drugs and is requesting 85 more FDA criminal inspectors, to augment the current staff of 10.

''We believe our strong response is signaling to the (generic drug) industry that we will respond appropriately to any and all illegal conduct on their part,'' Sullivan said.

#90199u1244 07/18/1990 ~United Press International

TORONTO (JULY 18) UPI - Don't squash that spider! He's got Hollywood connections, is a champion bug buster and can even make a good pet.

But some say the creepy crawly movie Arachnophobia, which opened around North America Wednesday, could unfairly do for spiders what Jaws did for sharks.

''Hopefully, people won't go crazy against spiders after seeing the movie '' said Brad Hubley, an entomologist at the Royal Ontario Museum in Toronto.

''If anything, people may appreciate them a bit more after seeing all the things they do in the movie,'' Hubley said.

Arachnophobia, meaning fear of spiders, is a comedy thriller that pits a malevolent nine inch wide spider and his army of poisonous offspring against the residents of a sleepy California town. It's produced by Hollywood Pictures and Steven Spielberg's Amblin Entertainment.

Hubley, who called the movie ''pretty wild'' after a preview screening Monday, said only a handful of the thousands of types of spiders in the world are dangerous to man.

In North America, there's the black widow spider, a southwest native that is increasingly being found in northern regions; and the brown recluse spider, found mainly in the southwest.

''They give spiders a bad name,'' Hubley said. The black widow's bite can be deadly to the very young or old, while the brown recluse's bite can fester into a gaping wound if left untreated.

Hubley said spiders bite people in self-defense but men have been bitten on the genitals in outhouses where black widows often live because the

creatures think they're food.

Tarantulas, which are imported to North America as pets, can inflict nasty bites that can be fatal if a victim has an adverse allergic reaction, Hubley said.

Hubley, who oversees the museum's collection of live tarantulas, said spiders are an effective, environmentally friendly pest control mechanism.

''They eat a hell of a lot of insects,'' he said. ''They're probably the largest predator in terms of the numbers of insects they eat.''

''Without spiders we'd be overrun with insects,'' Hubley said.

Hubley said spiders ''make good pets - they're docile if handled properly''- and that visitors to the museum's spider display are fascinated by the creatures even though they might have an initial fear.

That fear isn't unusual, according to Dr. Frank Cashman, a psychologist and phobia specialist, who says over 90 percent of people have some aversion to spiders and their ilk.

''There is an almost universal fear of spiders. Most people are at least somewhat uncomfortable around them,'' Cashman said.

''What sets people off is the unpredictability of the spider. They have an image of the spider suddenly attacking them,'' Cashman said. ''They're afraid of their inability to control the spider.''

#90199u1247 07/18/1990 ~United Press International

(JULY 18) UPI - The Labor Department says higher food, housing and energy costs were primarily responsible for a surprising five-tenths of one percent increase in consumer prices last month. Private economists had expected an increase of only three-tenths of one percent in the Consumer Price Index. The index showed increases of only two-tenths of one percent in April and May.

A report by the Commerce Department says new housing construction tumbled two-point-three percent in June to the lowest level since the recession of 1982. However, applications for new housing permits- a harbinger of future construction activity- jumped nearly four percent last month in the first increase since January.

Secretary of State Baker revealed a major U-S policy shift in Paris today, saying the United States will ask Vietnam to help arrange free elections in Cambodia. Baker said the change in policy does NOT constitute a

decision to normalize relations with Vietnam. In his words... ''It is a decision to begin a dialogue with Vietnam about Cambodia.'' Baker said the United States wants to prevent the Khmer Rouge from returning to power in Cambodia.

Georgia's Lieutenant Governor Zell Miller and former Atlanta Mayor Andrew Young will meet in a runoff election next month to determine the Democratic candidate for governor in November. Young is trying to become Georgia's first black governor. Although Miller ran way ahead of Young in yesterday's primary, a runoff becomes necessary because neither scored the 50-percent majority needed to win an automatic spot on the November ballot.

#90199u1254 07/18/1990 ~United Press International

(JULY 18) UPI - A study says the federal government's poverty figures are too low. The Gallup poll questioned more than 35-hundred people and found most believe the federal poverty guidelines understate the number of people who are poor because the income levels used to decide are too low. It also found that the poor are more likely to be white, older and better educated than federal guidelines show. The study was done for the non-profit Families U-S-A Foundation.

A seven-hour emergency space walk is over. The Soviet news agency Tass says cosmonauts on the orbiting Mir station successfully completed a repair job on insulation around the Soyuz T-M-9 capsule that will return them to Earth next month. But a British magazine reports the effects of the latest problem may still endanger the cosmonauts' scheduled August 9th return.

Military tanks and helicopters patrolling the Central Asian city of Osh to curb ethnic fighting betweens Uzbeks and Kirghizians that have left at least four people dead. The Soviet news agency Tass reports at least 100 people were wounded in the ethnic fighting. The most recent fighting in the Soviet republic of Kirghizia's second largest city paralyzed transportation and caused businesses to close.

ATHENS, GREECE (JULY 18) UPI - Albanian soldiers shot dead a man trying to cross the border into Greece, leaving his body on the scene, a Greek Orthodox bishop in the area said Wednesday.

The semi-official Athens News Agency quoted Metropolitan or Bishop Sevastianos as saying in a telegram to Prime Minister Constantine Mitsotakis the incident occurred early Tuesday and Greek farmers in the area witnessed the killing.

Sevastianos said farmers from the villages of Argyrochori and Oreinos saw and heard 10 Albanian soldiers chasing a would-be defector just 200 yards from the border.

''The farmers heard one shot and then a second shot, followed by a terrible cry of pain from the executed man,'' the bishop said in his telegram.

''After a while there was silence, and the body of the man, left to the beasts and the vultures, lay at the scene of the incident.''

The shooting occurred less than a week after nearly 5,000 Albanian refugees, who took refuge in foreign embassies in Tirana, were allowed to leave the country in foreign vessels sent to Durres, an Albanian port close to the capital.

Sevastianos, who is metropolitan of the towns of Dryinopoulos, Pogoniani and Konitsa near the Albanian border, has campaigned for years for the rights of the ethnic Greek minority in Albania and has given refuge to scores of Albanian refugees crossing over.

Last week Sevastianos told United Press International that Albanian border guards shot dead several refugees trying to cross the border into Greece in the past few weeks, and left their bodies exposed near the border.

But he said three out of four defectors did make it across, despite an electrified barbed wire fence running along the border.

In Ankara, a Foreign Ministry official said Egypt has refused to accept six Albanians who sought refuge in the Egyptian embassy during the two-week crisis in Tirana this month. The six were among the 76 refugees flown to Ankara Sunday, aboard a special plane sent to Tirana to pick them up. The other 70 took refuge in the Turkish embassy.

Foreign Ministry spokesman Murat Sungar said the six who sheltered in the Egyptian embassy were flown to Ankara in a Turkish plane at the request of the U.N. secretary-general's special representative in Ankara.

After their arrival in Ankara, the Foreign Ministry contacted the Egyptian embassy in Turkey and Sungar said ''we have been informed that Egypt did not want to give entry to the six Albanians.''

Turkey has not yet given refugee status to the 76 Albanians, and has sent them to a camp in Yozgat, some 96 miles east of Ankara. Among the refugees is a 20-day-old baby girl.

The Istanbul newspaper Gunaydin quoted some Albanians as saying they would

rather die than return to East Europe's last remaining Stalinist state.

''For years and years we have lived under economic and political pressure. It is better to die in a free country than to live in an oppressed home,'' one refugee said.

STAMFORD, Conn. (JULY 18) UPI - General Electric Capital Corp. has acquired Burton Group Financial Services, the largest store credit card operator in Europe, for $329 million, the company said Wednesday.

The acquisition will give GE Capital Retailer Financial Services a strategic foothold in retail financial services in Europe, the company said in a statement.

The current management team at Burton Group Financial Services will continue to operate the company. The deal did not include the stockbroking and investment businesses of Burton Group.

GE Capital Retail Financial Services manages 37 million customer credit card accounts for more than 200 retail businesses in the United States and Canada. Burton Group Financial Services manages 3 million customers.

GE Capital Retail Financial Services is one of 20 businesses of GE Capital a diversified financial services company with more than $59 billion in assets. The company, a subsidiary of General Electric Corp., Fairfield, Conn., has headquarters in nearby Stamford.

SOFIA, BULGARIA (JULY 18) UPI - The embalmed body of Georgi Dimitrov, the founder of the Bulgarian communist state and one of the most graphic symbols of the hated regime, was cremated in Sofia Wednesday after being moved from its mausoleum, according to the Bulgarian news agency BTA.

A commission of prominent policitians, scientists and cultural figures had debated since January the question of moving Dimitrov's body from its resting-place of 40 years. The mausoleum had been the site of recent protests.

Dimitrov's son, Boiko Dimitrov, criticized the authorities for the ''unjustified'' delay in settling the matter in a statement carried by BTA.

Georgi Dimitrov was once head of the Soviet-dominated Comintern, the international communist movement, and was also an advisor of Soviet dictator Josef Stalin.

He took power in Bulgaria in 1946 after King Simeon II was deposed and founded Bulgaria's hard-line and often brutal communist state which ended last month with democratic elections.

Dimitrov died in 1949 and was interred in a mausoleum in Sofia. The city council is to decide the future of the building.

Only close relatives were present at the cremation, according to BTA. The urn will be buried at a later date.

(JULY 18) UPI - Internationally known psychiatrist Karl Menninger died today in Topeka, Kansas, at 96. Menninger was diagnosed as having abdominal cancer three-and-a-half weeks ago. He was a co-founder of the Menninger Foundation in Topeka, one of the world's largest psychiatric organizations.

Secretary of State Baker said in Paris today that the United States will ask Vietnam to help arrange free elections in Cambodia to blunt the influence of the Khmer Rouge. It is a major policy shift for Washington, which has never recognized the Vietnamese-backed government in Cambodia.

Federal Reserve chief Alan Greenspan says it's unlikely the nation will fall into a recession soon. Greenspan told a Senate panel today the economy appears to have grown at a slower rate in the second quarter. Greenspan said the Fed may adjust its policy if major cuts are made in the federal budget deficit.

North Carolina's Jesse Helms says he's NOT going to fire an aide for putting out a controversial news release. The Republican senator also is refusing to disavow the remarks by James Meredith, who wrote that most of the delegates to an N-double-A-C-P convention were drug users or engaged in immoral acts.

-30- 1373

#90199u1382 07/18/1990 ~United Press International

EAST BERLIN (JULY 18) UPI - East German Prime Minister Lothar de Maiziere, in open disagreement with some of his government coalition partners, said Wednesday the two German nations should hold separate elections before they merge.

De Maiziere said that otherwise, East Germany would simply surrender itself to a government it did not elect.

The Social Democratic and the Liberal partners in the conservative-led government said they favor unification before the elections, which would mean East and West Germans would vote in a single poll.

In another issue related to the merger, Junior Agriculture Minister Peter Kauffold said after a Cabinet meeting that the East German government is determined to revitalize the country's ailing agriculture sector before German unification expected in December.

Since the introduction of the German currency union this month, East German farmers have failed to compete with West German wholesalers and domestic prices have dropped drastically.

In recent weeks, farmers unable to find buyers for their produce have been dumping fresh milk onto their fields and leaving cherries to rot on trees.

Kauffold said the farming sector deficit for July will run up to $788 billion, and a spokesman for a union of about 50,000 East German farmers said that the farm cooperatives are overrun by foreign competition.

Union spokesman Heinrick Beier called for the swift privatization of the farming sector, which he said is still run by officials who lack understanding for a free market economy.

De Maiziere said for the time being East Germany should ''export raw agricultural commodities to West Germany and import raw processed products made from these commodities.''

He also told the Bild Zeitung that only half of the 800,000 East German farmers can survive in a restructured agriculture.

On the election debate, De Maiziere told the West German Express daily if the merger took place before the elections, East Germany would give itself up to the West German government, ''which is not legitimized through elections by the people in our country.''

''The people in this country did not fight for the freedom of secret elections to surrender to a government that does not have their mandate,'' he said.

Members of the small Liberal Party said separate elections might create confusion.

''The phase after the elections has to be a stable one,'' said Conrad-Michael Lehment of the Liberal Party.

Rudolf Seiters, senior aide to West German Chancellor Helmut Kohl, said it is up to the East German government to decide on the election procedures.

De Maiziere said earlier that separate election procedures will enable smaller East German parties to send delegates to the German Parliament.

German officials are confident the elections, whether joint or separate, will be held Dec. 2.

At a meeting in the Soviet Union this week, Kohl and Soviet President Mikhail Gorbachev removed a major obstacle to swift unification when they agreed that Germany will have full sovereignty and may be a member of the Western military alliance, NATO.

De Maiziere said the agreement between Kohl and Gorbachev would not change the pace toward German unification.

''What happened between Kohl and Gorbachev in the Caucasus fits into the schedule, but does not change it,'' he said.

#90199u1388 07/18/1990 ~United Press International

LONDON (JULY 18) UPI - The Egyptian Al-Fayed brothers, who own the House of Fraser and the Harrods department store, will ask the European Commission of Human Rights to judge if their reputation was damaged by a Department of Trade and Industry inquiry, officials said Wednesday.

House of Fraser said the three brothers wanted a neutral assessment on a DTI investigation in March that found the brothers consistently lied about their origins, business standing, and wealth during their controversial 1985 takeover of the House of Fraser Group.

In a statement, the brothers said they would soon apply to the European human rights court in Strasbourg, France, to obtain "effective remedies by internationally accepted standards" on what they called the unfairness of the DTI system of inspections.

They said no remedy is available under British law and charged the DTI report was published amid great publicity, despite much evidence being based on hearsay that would be inadmissible in a court.

"Our action is aimed at not only exposing the grave injustice done in our paticular case but also at improving the British system of government inspections for the benefit of others," said Mohamed Al-Fayed, chairman of the House of Fraser Holdings. "I do not believe that any other civilized country in the world would sanction such a system," he said. "It is quite simply an affront to justice."

Tiny Rowland, a newspaper baron and industrialist, has also condemned the DTI for allowing the Al-Fayeds to buy the the Fraser Group when it had in 1981 ruled against his Lonrho group taking over the chain on grounds it would not be in the public interest. The dispute between Rowland and the Egyptians has been acrimonious.

The Al-Fayeds also said they were dropping a libel suit against The Observer newspaper, which is owned by Rowland, because they believed the intense publicity surrounding the proceedings could affect their chances in Strasbourg. Observer Deputy Editor Adrian Hamilton responded that the newspaper intended to recover more than $1.8 million in legal costs it had paid so far.

"As far as we are concerned, The Observer ran a totally justifiable story and it has been proved justified," he said. "The Fayeds have now implicitly acknowledged it... we feel it is only right that we should be recompensed for our costs."

Michael Cole, spokesman for the Al-Fayeds, said it could be two years before a decision is obtained at Strasbourg and the Al-Fayeds would go as far as necessary and spend as much as is involved to get the DTI report repudiated.

He complained the rules under which DTI investigations could be carried out precluded the parties accused from cross-examining or even hearing witnesses.

#90199u1393 07/18/1990 ~United Press International

MIDDLETOWN, CT (JULY 18) UPI - My Weekly Reader, a guide to world events published for ten million school children each week, is up for sale to the

right bidder, its publisher announced Wednesday.

Field Publications, which has put together, printed, and distributed the lucrative children's newspaper for 61 years, may be sold if the price is right, its parent company, Field Corp. of Chicago, announced. Also up for possible sale is the corporation's Funk & Wagnalls Inc., encyclopedia affiliate in Ramsey, N.J.

The potential sale is not the result of the slowed economy but was considered only after a number of unsolicited offers were submitted, said Field Publications President Bruce Seide.

"This has nothing to do with the performance of Field Publications," Seide said. In the five years since the Middletown subsidiary was purchased from Xerox Corp., revenue has about doubled and sales for 1990 are expected to reach about $300 million, Seide said. He said the Field family decided to seriously consider selling the subsidiaries to increase liquidity.

Seide said the parent company has hired the investment banking firm of Morgan Stanley to negotiate with potential buyers. No prospective sale price has been established, he said.

"There are a number of publishing, direct marketing, and other companies who are looking for the possibility to expand," he said. "We will evaluate them all and make some final decisions in about three months," Seide said.

Beside publishing the highly successful newspaper format for school children the privately held publishing subsidiary prints and sells publications to children and adults, many through book clubs.

Field Publications has about 950 employees, including 300 at the Middletown facility and 650 at its distribution center in Columbus, Ohio, Seide said. Funk & Wagnall employs about 60 people, he said.

The publishing company was founded in Ohio in 1902 and purchased by Wesleyan University in Middletown for $8.2 million in 1949. It was sold to Xerox in 1965 for about $55 million.

#90199u1400 07/18/1990 ~United Press International

TOK, AK (JULY 18) UPI - A wind-blown spark from a "contained" wildfire ignited trees outside the firelines and sent flames roaring through timberland toward an Indian village that was partially evacuated, fire officials said Wednesday.

''We had drastic fire behavior,'' said Bill Beebe of the state Division of Forestry. ''We are concerned about Tetlin village.''

The fire that for nearly two weeks threatened the eastern Alaska town of Tok was contained - but not out - last Friday when firefighters finished carving 50 miles of containment lines around the blaze.

But Tuesday afternoon, when a single spruce tree flared up at a hot spot on the troublesome southeast edge of the 44,400-acre fire, winds carried sparks - or perhaps a burning spruce cone - 150 yards away and the wildfire was off and running.

''Ten acres burned within 5 minutes,'' Beebe said. ''One hundred acres burned in less than 30 minutes.''

Flames devoured another 2,000 acres in six hours before moist, cool night temperatures slowed the wildfire, Beebe said.

It took 1,200 firefighters and rain to finally contain the Tok fire. When flames escaped, 600 firefighters were still working to control it. With the blaze out of control again and warm, dry weather back, Beebe said 500 more firefighters were being dispatched to Tok.

Tok is a highway town - at a crossroads leading to Canada and to Alaska's two biggest cities, Anchorage and Fairbanks. When the fire was raging around Tok, smoke and flames closed the crossroads, but road access also made the fire easier to fight. Flames spreading southeast of Tok moved into a roadless area. No roads go to the village of Tetlin.

But Tetlin was not in imminent danger, fire information officer Sue Mitchell said from Fairbanks. To reach Tetlin, 6 miles away, she said the fire had to travel up and over the Tetlin Hills, which offered less fuel for flames than forested lowlands covered with black spruce.

About two dozen village elders were taken by boat on the Tetlin River out of the smoky village in a voluntary evacuation, Beebe and Mitchell said.

Last week, while the Tok fire was burning out of control, the joint federal-state Alaska Fire Service ''sent firefighters to Tetlin to teach people how to fight fires and left equipment there,'' Mitchell said.

Before its dramatic escape, the Tok fire had burned 8,800 acres of state land, 34,300 acres of native lands and 1,300 acres of other private lands.

So far this summer, Mitchell said, lightning-sparked fires have blackened 773,400 acres of Alaska lands with 110 fires still burning on 713,500 acres.

#90199u1403 07/18/1990 ~United Press International

WASHINGTON (JULY 18) UPI - The Federal Reserve's recent reduction of the federal funds rate was made amid concerns that tighter credit conditions threatened to push the U.S. economy toward recession, Fed Chairman Alan Greenspan said Wednesday.

Greenspan, giving his semiannual testimony on the economy and monetary policy, told the Senate Banking Committee that the likelihood of a near-term recession now "seems low" and suggested the Fed might again adjust its monetary policy if major cuts are made in the federal budget deficit.

Greenspan said the economy appears to have grown at a "somewhat slower rate" during the second quarter, while banks and thrifts have restricted their lending practices in response to the regulatory concerns about the growing savings and loan debacle.

Further credit tightening "is not something we'd like to see," Greenspan told the panel, adding that the reduced availablity of credit "certainly raises the risk of tipping us over" into recession.

Greenspan said the risks of recession and inflation are about the same as when he last reviewed the economy for Congress in February. But under questioning, he said the economy is leaning "perhaps a shade more toward recession than earlier in the year." A recession occurs when the economy fails to grow for two consecutive quarters. The economy last suffered a recession in 1981-82.

Greenspan later added that he does not see any evidence that the economy is now headed toward a recession, but he said the Fed does not intend to allow credit conditions to deteriorate further. "It is our intention to keep credit conditions where they are," he said.

On balance, Greenspan said, "the economy still appears to be growing, and the likelihood of a near-term recession seems low, in part because businesses have been working hard to keep their inventories in line with sales trends." He said the Fed's monetary policy is directed at sustaining economic expansion while battling inflation.

Recent evidence of tightening credit conditions prompted the Fed last week to lower its federal funds rate - the rate banks charge one another for overnight loans - to eight percent from 8.25 percent.

A drop in rates could lower interest payments for companies, which in turn could encourage businesses to expand and prompt bankers to ease their lending requirements.

The Fed chairman split semantical hairs by telling the panel he does not

think the current credit situation represents a "credit crunch," because "those words connote a contraction of lending on a major scale." Instead, he said, lenders are returning to norms set before the 1980s, a decade Greenspan noted was fraught with financial excess.

"But I can well appreciate that my view on this topic may be perceived as a semantic nicety by a borrower who today is suddenly unable to get a loan on the terms formerly available," he said.

Turning toward monetary policy, Greenspan said the Federal Reserve "must remain alert" to the possibilities of adjusting its "posture in reserve markets" to maintain stable economic conditions.

He said the Federal Open Market Committee, which sets Fed monetary policy, has lowered its range for growth of the M3 aggregate money supply to one percent to five percent for next year from 2.5 percent to 6.5 percent as a result of adjustments in financial markets to the federal rescue of the nation's savings and loan industry.

"Taking into account the current lending posture of the commercial banks and remaining thrifts, we now expect the closures of insolvent thrifts to show through in very subdued growth in M3," Greenspan said.

The Fed chairman urged Congress and the Bush administration to reach an accord on trimming the federal budget deficit, in the range of $50 billion to $60 billion, a move that he suggested could prompt action in monetary policy.

"Major substantive, credible cuts in the budget deficit would present the Federal Reserve with a situation that would call for a careful reconsideration of its policy stance," Greenspan said. "What adjustment might be necessary, and how it might be timed, cannot be spelled out before the fact." Still, Greenspan guaranteed that "the Federal Reserve will act" to keep the nation's "economic expansion on track."

White House press secretary Marlin Fitzwater said a decision by the Fed to ease its monetary policy in response to a deficit-reduction accord is "certainly a direction we'd like to see."

Economists said the Fed's move last week could be seen as an effort to appease the Bush administration, which has been pressuring the central bank to lower interest rates as a means to prod the slow-moving economy.

#90199u1444 07/18/1990 ~United Press International

WASHINGTON (JULY 18) UPI - Facing renewed pressure from Republican ranks to oppose new taxes, President Bush met with congressional leaders Wednesday in hopes of giving ''a little nudge'' to budget negotiations.

The White House meeting was to be the third between the president and congressional leaders since the budget summit began May 15 and the first since Bush said June 26 that ''tax revenue increases'' would be part of any successful plan to reduce the 1991 deficit, which is now estimated at $168.8 billion.

Since then, negotiators for the administration and Congress have discussed a variety of proposals in private. Wednesday marked the first time those ideas were to be elevated to the top level of budget summit talks.

Invited to the White House were House Speaker Thomas Foley of Washington, House Republican leader Robert Michel of Illinois, Senate Democratic leader George Mitchell of Maine and Senate Republican leader Robert Dole of Kansas.

Foley said the meeting was intended to ''review where we are'' and added that he did not ''expect any breakthrough.''

White House spokesman Marlin Fitzwater said he thought both sides had ''a pretty good feel'' for the size of the overall package and the mix of spending cuts and new revenues that would be required.

''This is a point were the leadership can get together and give a little nudge to the negotiators and also give them a taste of the right direction so that they can know that they've got good support as they more forward '' he said.

Before the meeting, House Republicans did some nudging of their own by voting in a closed-door caucus for a resolution saying they oppose ''new taxes and all tax rate increases.''

The resolution also criticized Mitchell for saying he would only back Bush's call for a cut in the tax on capital gains if it were accompanied by a hike in the tax rate for the wealthiest Americans.

The action was denounced by Democrats and dismissed by the White House.

Foley called the vote ''regretable'' and a contradiction of Bush's position. Fitzwater said, ''We are aware of their position and we don't need a resolution to make us aware of that.''

But the Republicans argued the resolution strengthened Bush by forcing the Democrats to agree to deeper cuts in domestic programs.

''We are strongly supporting the president in his effort to get everything on the table in order to have Democrats address the question of cutting spending,'' said Rep. Jerry Lewis, R-Calif., chairman of the House Republican conference.

''The last resort that is under consideration is the question of new revenue by way of new taxes. The president has yet to say he supports new taxes, but rather new revenue,'' Lewis said.

Rep. Richard Armey, R-Texas, sponsor of the resolution, said Republicans would back a ''responsible'' package but would oppose any budget agreement that included ''repressive tax increases'' - even if that meant risking spending cuts under the Gramm-Rudman balanced budget law.

The administration announced earlier this week that a failure to reduce the deficit would force some $100 billion in cuts, under the process known as sequestration.

''Our message to the Democrat leadership is: Get real,'' Armey said.

''If it comes to a choice between the kind of irresponsible packages that the Democrat leadership in this body are capable of putting together and sequester, yes, I'd take a sequester. You should never underestimate how irresponsible these people are capable of being.''

#90199u1463 07/18/1990 ~United Press International

NEW YORK (JULY 18) UPI - Flamboyant minister Al Sharpton surrendered to authorities Wednesday to begin a 15-day jail sentence for disorderly conduct stemming from an anti-racism protest in Queens.

Sharpton, joined by the Rev. Timothy Mitchell, marched into the Queens criminal court building with about 75 supporters chanting, ''No justice, no peace.''

Inside the overflowing courtroom, the outspoken ministers assailed the criminal justice system, comparing it with that of the segregationist

South of the 1960s.

''One day, this court will be as ashamed of itself as Alabama courts are now,'' Sharpton said, receiving a standing ovation from courtroom spectators.

Mitchell, who surrendered to serve a similar sentence, demanded to be placed in handcuffs but supporters shouted, ''No, no, no.''

Judge William Erlbaum said handcuffs were not necessary and called for quiet as the pair was taken into custody.

The two were convicted of disorderly conduct for a ''Day of Outrage'' demonstration Jan. 27, 1988, near LaGuardia Airport that disrupted traffic.

The action was a protest of the Howard Beach racial attack that led to the death of Michael Griffith on Dec. 20, 1986.

Sharpton and Mitchell will serve their sentences in Rikers Island's Northern Infirmary Complex, where they will be under maxiumum security rather than with the general population, Correction Department spokeswoman Ruby Ryles said.

#90199u1468 07/18/1990 ~United Press International

BONN, WEST GERMANY (JULY 18) UPI - West German Foreign Minister Hans-Dietrich Genscher said Wednesday he was confident that the final German unification negotiations will be held earlier than previously anticipated.

He stressed that Germany will gain full sovereignty upon unification and reiterated there will be no need for a peace treaty between Germany and the victorious World War II allies.

West German officials have in the past expressed fears that such a treaty - which has never been signed - would open the way for war reparation claims worth billions of dollars.

Genscher made the remarks in an interview with the West German Deutschlandfunk radio station Wednesday, one day after the latest round of negotiations on the external aspects of German unification.

The talks held in Paris included Genscher's East German and Polish counterparts as well as the foreign ministers of the wartime allies - Britain, France, the Soviet Union and the United States.

''On this occasion, it was jointly noted that the final document, which we

will sign with the four powers responsible for Germany as a whole, will deal with all questions related to sovereignty,'' Genscher said.

''That means there will be no peace treaty and no ruling similar to a peace treaty,'' he said.

''Our staff is currently working on the formulation of this document, so that we can expect to have final negotiations earlier than anticipated,'' Genscher said.

The foreign ministers of the two German states and the four World War II allies are due to meet again in Moscow, Sept. 12. Earlier, West German officials expected the unification process to be completed after all-German elections due in December.

Government officials in Bonn are confident the negotiations will move swiftly, now that the Soviet Union has dropped its objections to the NATO membership of a united Germany.

West German Chancellor Helmut Kohl was given a hero's welcome, receiving praise even from the opposition, after his return Monday from the Soviet Union, where he obtained the concession from Soviet leader Mikhail Gorbachev.

Transport Minister Friedrich Zimmermann noted Wednesday that in the early days of the West German republic, cabinet members would have stood to attention to welcome the chancellor on his return from such journey.

''The Moscow results have been welcomed by all sides,'' said Genscher.

#90199u1488 07/18/1990 ~United Press International

WASHINGTON (JULY 18) UPI - More than 2,000 calls were placed from Mayor Marion Barry's cellular car telephones to 10 people with whom he was linked to cocaine use over a four-year period, a police officer who analyzed telephone records testified Wednesday.

Sgt. James Pawlik, a member of the District of Columbia police internal affairs division, said the calls were traced only from five cellular car phones used by Barry and did not include hundreds of other calls which may have been made to or from his home or office.

Seven of the 10 people to whom the calls were traced testified during the drug and perjury trial they supplied cocaine to Barry or saw him use the drug. The other three were implicated in drug use through testimony, but did not themselves take the stand.

Under cross-examination, Pawlik said he could not be certain who had made the calls from Barry's government-supplied limousines, who had answered the return calls or if any of the calls were related to drugs.

''You have no way of indicating that those calls you tracked were related to drugs, do you?'' asked defense attorney R. Kenneth Mundy.

''No,'' said Pawlik.

Pawlik was expected to be the final government witness in Barry's trial, which was in its seventh week.

Mundy said he planned to call about a dozen witnesses of his own, but thought the case could go to the jury as early as next Monday.

Since the trial began June 4, prosecutors called 26 witnesses, 10 of whom testified Barry used cocaine in 20 homes, 15 hotels and four boats in the District of Columbia, Atlanta, the Virgin Islands and the Bahamas.

Pawlik said 2,312 phone calls were traced from Barry's car phones to the 10 people named, and 634 were traced from those 10 to Barry's answering services from 1986 to 1990.

Mundy said as many as 30,000 total calls were made from Barry's car phones during that four-year span. Telephone company records were not kept on local calls to or from Barry's home or office, Pawlik testified.

Of the calls analyzed, 358 went to former model Rasheeda Moore and 224 came from her, said Pawlik.

Moore, Barry's former lover who worked with the FBI in luring him to the Jan. 18 sting operation that led to his arrest, testified earlier she and Barry used cocaine together ''more than 100 times'' over a three-year period.

Pawlik said 573 calls were made to Theresa Southerland.

Southerland, another former Barry girlfriend, testified last week she talked to Barry on the telephone about twice a week during their two-year affair, and used cocaine with him on many occassions.

Bettye Smith received 508 calls traced to the Barry's limousines, said Pawlik.

Smith testified Tuesday that she and the mayor shared cocaine often at her Capitol Hill home and in other locations dating back to 1983.

Pawlik said 243 calls were made to Hassan Mohammadi, a Washington

restaurateur who said he was a key cocaine supplier to Barry and shared opium with him.

Another 27 calls were placed from Barry's limousines to Lydia Pearson in July, August and September of 1988, said Pawlik.

Pearson, a street-level drug dealer, testified Barry bought crack from her 25 times during that three-month span and said he normally would call her from his car phones to set up drug buys.

The government also admitted into evidence a list of 16 calls made between Dec. 16 and Dec. 22, 1988, the time Barry allegedly used cocaine with former city worker Charles Lewis at a downtown Ramada Inn.

The Ramada Inn incident forms the basis for the only felony counts Barry faces, three charges of perjury.

Calls were traced from Barry's cars to the Ramada Inn on each of the four days he allegedly used cocaine with Lewis, Dec. 16, 17, 19, and 22, Pawlik testified.

In addition, Lewis left three messages for Barry from his Ramada room during that seven-day span, Pawlik said.

Barry, 54, is charged with three felony counts of perjury, 10 misdemeanor counts of cocaine possession and a single misdemeanor count of conspiracy to possess cocaine.

For the second day in a row, Barry prayed with local religious leaders beneath a tent outside the courthouse during lunch break from the trial.

#90199u1504 07/18/1990 ~United Press International

DETROIT (JULY 18) UPI - General Motors Corp. and the United Auto Workers officially began negotiations Wednesday for a new labor contract covering about 320,000 hourly and idled workers, while several hundred retirees demanded cost-of-living adjustments to their fixed pensions.

As union and management leaders shook hands across the bargaining table to formally open talks on the fifth floor of GM's headquarters, demonstrators from about a dozen UAW locals circled the landmark building outside. Most of them wore shirts saying "Don't leave the retirees holding the bag."

Circling them was a mock armored truck topped with fake money bags, pretending to deliver the $1.2 million annual pension shareholders approved for Chairman Roger Smith at the carmaker's annual meeting in May.

"Make way for Roger's millions," retirees shouted. "Roger got his - where's ours?" Smith, who has led the giant automaker since early 1981 with mixed reviews, is to retire at the end of this month.

"It's scary," said pensioner Elaine Bickford, representing her husband, Jack. Jack Bickford retired from GM's AC Spark Plug Plant in Flint, Mich., in 1982 after 32 years with a $1,100-a-month pension. "You have to watch every penny, and now you can't even buy a GM car that you helped make," she said.

Following opening statements outlining their concerns, GM and union officials expressed willingness to reach a settlement before Sept. 14, when three-year pacts covering about half a million workers at all three top U.S. automakers expires. The UAW opens negotiations with Ford Motor Co. Thursday, and Chrysler Corp. on Friday. But posturing continued from earlier this year.

"Disappointment is far too mild a word for how (GM) has treated the job security agreements," UAW President Owen Bieber told reporters, noting GM has used the term "idling" to characterize four assembly plants effectively closed since 1987.

Tightening the language on job security from the 1987 agreement is the top issue for the one million-member union, which has seen its ranks decline by 30 percent since 1970.

Bieber also said GM has been "blaming and victimizing workers for their own management mistakes." "There is no greater asset than a stable and secure workforce," he said, adding that GM "can't put quality on the road while putting workers on the street."

The UAW will also be seeking to restrict carmakers from sending work outside to other companies, tie profit sharing to executive bonus amounts, and win wage increases.

Bieber also expressed his resolve to grapple with the thorny issue of soaring health care costs, which GM said adds $622 to the price of each car it builds, vs. between $60 and $100 for transplants, or Japanese-owned automakers with U.S. assembly plants. Those firms have a much younger labor force and virtually no retirees.

Bieber, who briefly walked the line with pensioners, said the union would be "looking at all kinds of approches to protect pensioners, whether it be COLA or something else" during this summer's labor talks. But GM has indicated it simply could not afford COLAs on pensions.

GM, as well as Ford and Chrysler, will be looking for ways to cut costs and become more competitive with not only their domestic counterparts, but

transplant companies, which have been enjoying steadily rising sales.

"Our future and job security will depend on where we can, together, find new ways to further improve GM's quality and productivity on a long-term basis," said Alfred S. Warren Jr., vice president of GM's Industrial Staff and the company's chief bargainer.

#90199u1529 07/18/1990 ~United Press International

WASHINGTON (JULY 18) UPI - Brazilian officials Wednesday presented the International Monetary Fund an economic program they hope will help the South American nation renegotiate its staggering $115 billion foreign debt the developing world's largest.

Antonio Kandir, Brazil's secretary for economic policy, discussed with IMF officials the economic program of Brazilian President Fernando Collor de Mello, a financial source said. According to government sources in Brasilia, Kandir was also expected to ask the IMF for a $2 billion loan.

Kandir was to hold separate talks Thursday with IMF Managing Director Michel Camdessus and with David Mulford, treasury undersecretary for international affairs, on Brazil's economic program and foreign debt. The Treasury Department, the IMF, and the World Bank have all expressed support for a reduction in Brazil's $72 billion debt to private banks.

After the talks with Kandir in Washington, the IMF could send a study group to Brazil to analyze in detail the country's economic program, the financial source said.

Meanwhile, Economy Minister Zelia Cardoso de Mello was in Europe discussing the Brazilian economic program with officials from members of the Paris Club of lending nations.

The meetings represent the first official steps by Brazil to normalize relations with international creditors since Collor de Mello took office in March. Brazil has not made any interest payments on its debt since July 1989.

Cardoso de Mello said recently that Brazil will launch formal renegotiation talks in October with the Paris Club as well as with the commercial banks that are the country's leading creditors.

Shortly after taking office, President Collor said that Brazil would not pay any more than $5 billion in interest annually. He has since been urged by Citicorp Chairman John Reed of Citicorp, with whom he had personal discussions last week, to make more of an effort than that to show good faith.

Recently, U.S. banking regulators ordered Citibank and other major U.S. lenders to write off substantial amounts of Brazilian debt as "value-impaired."

Cardoso de Mello estimated last week that by the end of the year Brazilian interest arrears will rise to $22 billion, but predicted that Brasilia will have paid only about $1 billion to $2 billion by then. At the IMF in Washington, Kandir will present new economic figures projecting a Brazilian fiscal surplus for 1990.

The predicted surplus is the result of a severe economic plan started in March, which sharply curtailed government spending. It also freed foreign exchange from official controls, froze price and wage increases and severely limited withdrawals from bank accounts.

CHICAGO (JULY 18) UPI - Soybeans rallied on short-covering and hopes of a pick-up in export business and closed higher Wednesday on the Chicago Board of Trade.

Grain futures were mostly lower in choppy trading.

Higher basis levels contributed to the gains in soybeans, along with ideas that recent losses were overdone. Beans also were supported by moderate gains in soybean meal on reports of active trading on European markets.

Corn opened higher, then turned lower on a pick-up in selling activity. Favorable weather conditions and the prospect for more of the same continued to pressure corn and soybeans.

Wheat sold off in sympathy with the decline in corn futures. Wheat had underlying support from the sale of 210,000 tons of wheat to the Philippines and reports that Taiwan had bought a small quantity.

Basis levels were firm.

At the close, corn was off 1/2 to 2 1/2, soybeans up 1 to 5, wheat up 1 1/4 to off 1 1/2 and oats unchanged to off 3/4.

(JULY 18) UPI - Soviet Foreign Minister Shevardnadze wants Washington to use its influence with Israel to halt the settlement of Soviet Jews in Israeli-occupied Arab territories. He met in Paris with Secretary of State Baker. Shevardnadze says that while Moscow is NO longer hindering emigration of Jews from the Soviet Union, the Arabs have a legitimate concern about the settlement of Soviet Jews in the West Bank and Gaza Strip.

Civil Defense officials in the Philippines say 315 people- including two Americans- are now confirmed dead in this week's massive earthquake. Strong aftershocks rocked northern parts of the Philippines today, sending rescue workers scrambling from crushed buildings where hundreds are still trapped. But hope is dimming that workers still will find life in the piles of rubble.

A runoff is in the works in Georgia, where ballots are still being counted

in yesterday's gubernatorial primary. Former Atlanta Mayor Andrew Young and Lieutenant Governor Zell Miller lead the Democratic field, but neither has the 50 percent needed to run in the November general election. With nearly 91 percent of the precincts counted, Miller had 40-point-seven percent... while Young took 31-point-four percent. The runoff will be held August 7th.

Jurors in the trial of three youths charged in a rape and beating in New York City's Central Park last year are expected to view crucial pieces of evidence later today. Prosecutors are expected to display videotaped and written confessions allegedly given by the defendents to police one day after the attack. In this morning's testimony, defense lawyers cross-examined a police chemist who examined semen and blood stains on the clothing of the three youths.

#90199u1599 07/18/1990 ~United Press International

WASHINGTON (JULY 18) UPI - The haunting fear of racial quotas, shared by employer and employee, has been a red flag in debate since the halcyon days of civil rights legislation in the 1960s. That flag is fluttering again in the Senate.

As the Senate approaches final passage of the 1990 Civil Rights Act, designed to restore safeguards against discrimination in the workplace, the lines are drawn hard and fast on whether it would lead to quotas.

President Bush, backed by almost all Republicans and some Sun Belt Democrats, is convinced the legislation, even if not intentionally, will lead to quotas in employee selection.

Senate Democrats, led by Sen. Edward Kennedy, D-Mass., and the numerous civil rights organizations, are equally adamant the bill does not lead to quotas in such areas as hiring, promotion and training.

Despite two months of effort, including long discussions between White House chief of staff John Sununu and key senators, no compromise has been reached that convinces the administration the bill will not lead to quotas.

And top-notch lawyers and politicians still cannot agree on exactly how the bill will affect the workplace - whether it will force employers to make their decisions on on the basis of race, sex or ethnic origin or not.

Sen. Orrin Hatch, R-Utah, said, ''Even a cursory review reveals that (the

bill) is simply and unalterably a quota bill''

''The legislation still eliminates existing defenses (for the employer) to a challenge of discrimination, forcing employers to hire on the basis of race, sex and ethnicity to avoid being sued.''

Kennedy, however, said he has redrawn the bill, partly adopting suggestions from the administration, that remove ''the last thin reeds in the quotas argument that has been used by opponents of civil rights in their attempts to undermine this bill. The argument is dead.''

In the middle is Sen. Dale Bumpers, D-Ark., a thoughtful Southerner, who is concerned that the bill could lead to quotas - especially in small businesses. His views are shared by some other Democrats.

Bumpers acknowledges ''you don't find the word quota'' in the bill, adding that the legislation, nevertheless, could have that effect. He said it was easy to see how an employer, faced with the possibility of defending himself against ''huge punitive damages'' would resort to hiring by quotas.

The Civil Rights Act of 1990 would reverse six Supreme Court decisions handed down last year which civil rights advocates said diminished anti-discrimination protections.

In one, known as Wards Cove, the court ruled that a worker who claims that a company discriminates, must identify the specific practice each time and the burden of proof each time is with the employee.

It overturned a prior ruling held that once a disparate impact is shown, the burden was on the employer to prove a business necessity for hiring and promotion standards. Although that 1971 ruling never led to quotas, opponents insist the language essentially restoring that decision would compel employers to resort to hiring and promoting on a quota basis to avoid lawsuits - and damages.

But Kennedy said that punitive damages, under the bill, could only be awarded in cases of ''malicious disregard'' where the employer violates ''time and time again'' anti-discrimination laws.

(JULY 18) UPI - A war of words, as well as a war of guns, is being waged in embattled Cambodia. The Vietnamese-backed government says its forces have recaptured a key district town serving as the unofficial resistance capital. However, resistance leaders say their troops are holding off government attacks. The Khmer Rouge resistance also reports clashes between government troops and their Vietnam allies.

Rival militias are battling for a third consecutive day in Lebanon, with one group issuing an ultimatum. Palestinian forces today warned pro-Iranian Hezbollah gunmen to evacuate a strategic village in southern Lebanon within 24 hours. The Palestinian troops have been trying to stop the fighting between rival Moslem groups that police say has killed at least 40 people this week.

Soviet cosmonauts staged what may be one of the longest space walks ever... seven hours to fix insulation on a Soyuz capsule that will return them to Earth next month. The official Tass news agency says the two spacemen finished a troubleshooting mission outside the orbiting Mir station today. An editor at London-based Spaceflight magazine says the space walk was likely one of the longest ever made.

A doctor wants the U-S government to pay for research on the effects of spraying the Agent Orange herbicide in Vietnam... before much of the evidence disappears. Dr. Arnold Schecter is in Thailand after collecting tissue samples in Vietnam for a private study. He says extensive sampling is needed to assess effects of Agent Orange on the Vietnamese people and U-S servicemen in Vietnam during the war. The toxic herbicide is believed to cause cancer.

WESTLAKE VILLAGE, CA (JULY 19) BUSINESS WIRE - Incomnet Inc. (NASDAQ:ICNT) announced Thursday the receipt of an order to provide four ICN 3000 electronic message switching systems to the Department of Telecommunications (DOT) for the government of India.

The Unix-like systems are being used to upgrade the telegraph system in India. An ICN 3000 system ordered previously operates the central telegraph office in Janpoth East, carrying 30,000 to 50,000 messages daily. The telegraph system is the main method of communications in India.

Incomnet expects to deliver the four additional systems within this quarter. Each system sells for approximately $140,000 or a total of approximately one-half million dollars. In addition, the DOT has told Incomnet India that it plans to place additional orders for two systems per month for the next 12 months. The total of these orders should be approximately $3.5 million.

''This is certainly an outstanding opportunity for Incomnet,'' said Stephen A. Caswell, vice president of marketing. ''Incomnet is now the leader in the message switching market in India.''

Separately, Incomnet said it is exploring several opportunities for the joint production of software products in India with other companies utilizing some 20 in-house software engineers to develop software.

Incomnet is a niche telecommunications company that operates autoNETWORK, the largest computerized buy-sell network in the western United States. Incomnet also operates a domestic marketing and an offshore software development subsidiary.

#90200b0026 07/19/1990 ~Business Wire

LOS ANGELES (JULY 19) BUSINESS WIRE - ''Louise,'' the madcap adventures of Louise Hellman, an heiress to the Wells Fargo fortune, is the newest feature film project of Cine-Source Inc. (NASDAQ:FILM), it was announced Thursday by Robert Whitmore, president of the independent film production company.

Rize Productions, which owns the rights to Hellman's story, is providing the financing to Cine-Source for the development of this project which Cine-Source will produce.

''Rize had been previously active only in the music and recording side of the entertainment industry,'' said Jerry Marcellino, president of Rize and

executive producer of the film. This film marks Rize's first co-venture with Cine-Source as well as its debut in the movie field.

Set in New Orleans in the 1950s, ''Louise'' tells the story of the zany heiress Hellman who, in her many loves and bizarre adventures, falls far from the family tree. Carol Billings, author of numerous off-Broadway plays, including the critically praised ''Death and Peace at 10 in the Morning'' (1987), wrote the screenplay from a story by Pamela Brown.

Michael Pesta of TMG Pictures Inc., a Los Angeles-based film and development company, facilitated the co-venture between Cine-Source and Rize and will co-associate produce with Myra Morris of Cine-Source.

Marcellino also will supervise the film's soundtrack and soundtrack album. He has produced and written for such stars as Michael Jackson and Diana Ross and was head of A & R for Mega Records and president of Apollo Records & Filmworks.

Cine-Source recently announced the launching of three other major film projects. ''Black Orpheus,'' an English-language remake of the Oscar-winning Best Foreign Film of 1959, will begin filming in February in Brazil. The picture will be helmed by an all-Brazilian team: director Carlos Diegues, screenwriter Leopoldo Serran and composer Antonio Carlos Jobim.

''Five-O'' is a music-driven film set in Harlem, starring platinum rap musician Kool Moe Dee as one of two brothers struggling to escape from the ghetto. ''Three Part Harmony'' stars Irene Cara, who also will write and perform several original songs in the picture.

Cine-Source is co-presenter with Nelson Entertainment of ''Texasville,'' the long-awaited sequel to director Peter Bogdanovich's 1971 ''The Last Picture Show.'' Due for release in late summer or early fall, ''Texasville'' was written, directed and produced by Bogdanovich and reunites ''Last Picture Show'' stars Jeff Bridges, Cybill Shepherd, Timothy Bottoms, Randy Quaid and Cloris Leachman.

''Texasville'' is based on Pulitzer Prize-winning author Larry McMurtry's 1987 best seller. ''Last Picture Show'' also was based on a McMurtry book.

#90200b0033 07/19/1990 ~Business Wire

SAN FRANCISCO (JULY 19) BUSINESS WIRE - BankAmerica Corporation Thursday

reported second-quarter 1990 earnings of $267 million, compared with $304 million for the same period in 1989.

Last year's second-quarter results included $54 million of Brazilian cash interest payments on medium- and long-term obligations on nonaccrual status. Earnings for the second quarter of this year did not include any of these payments. The payments in the second quarter of last year contributed $44 million to net income.

Earnings per common share were $1.17 in the second quarter of 1990, compared with earnings per common share of $1.50 reported in the same period a year ago. Brazilian cash interest payments discussed above contributed $0.23 to the earnings per common share for the second quarter of last year. Earnings per common share were also affected in the second quarter of 1990 by an increase in average common shares outstanding of 9 percent from the second quarter of 1989.

''The corporation's results in the second quarter underscore the strength of our primary businesses,'' Richard M. Rosenberg, chairman and chief executive officer said.

''Although we did not receive income from Brazilian medium- and long-term debt, our earnings remained strong, reflecting good growth in domestic loans and core deposits, close expense management, and a substantial decline in nonaccrual assets. The strength of our financial performance was also reflected in the rate of return on average total assets, which remained above 100 basis points, and the capital ratio of common equity to total assets, which continued above 5 percent,'' Rosenberg added.

The results for the quarter brought year-to-date earnings to $545 million, compared with $579 million for the first half of 1989. The earnings for the first half of 1990 did not include the Brazilian cash interest payments, while last year's first-half results included $100 million of such payments, which contributed $82 million to net income in that period.

Earnings per common share were $2.41 in the first half of 1990, compared with earnings per common share of $2.88 reported in the comparable period of 1989. Brazilian cash interest payments contributed $0.43 to the earnings per common share for the first six months of last year. Earnings per common share were also affected in the first half of 1990 by an 11 percent increase in average common shares outstanding from the first half of 1989.

SAN JOSE, CA (JULY 19) BUSINESS WIRE - Microscience International Corp. (NASDAQ/NMS:MSIC) Thursday announced that the company's common shares are now listed on the NASDAQ National Market System (NMS).

Previously, the company's common shares had been listed on the NASDAQ over-the-counter quotation system.

The NMS listing enables professional investors the opportunity to have immediate access to a market quotation and volume on a ''real time'' basis. ''We are extremely pleased with this added recognition,'' said Peter Kevin Nagle, president and chief executive officer of Microscience International.

Microscience International Corp., founded in 1982, designs, develops and manufactures industry-leading, high-quality 3.5-inch and 5.25-inch half-height Winchester disk drives for the desktop computer and workstation industries.

MOUNTAIN VIEW, CA (JULY 19) BUSINESS WIRE - Hughes LAN Systems Thursday announced the LINC/Term HUB Series model 5208 integrated terminal server module.

This is the first available multi-protocol server offering full-function asynchronous terminal connectivity directly in the chassis of Chipcom's ONline smart wiring hub.

The 5208 is compatible with and occupies one slot in the chassis of Chipcom's ONline concentrator. Multiple 5208s are supported in a single hub, subject only to slot availability.

The 5208 high performance terminal server module supports up to eight RS-232 devices with full EIA lead control via telco-standard modular connectors. It provides an extensive set of user and network management features, including a comprehensive multi-level security and access control subsystem as well as a complete remote command and diagnostics support capability. SNMP is a standard feature.

As an extension of Hughes' popular LINC/Term Multi-Protocol Terminal Server family, the LINC/Term HUB Series operates the same field-proven network operating software which simultaneously supports the defacto standards TCP/IP Telenet and DEC LAT, plus Hughes' own LocalNet protocols.

LINC/Term supports both incoming and outgoing connections in each protocol as well as remote printer support. Users can hot key between multiple sessions with any mix of the protocols. LINC/Term is the result of Hughes' vast experience in the terminal server market, with shipments exceeding a hlaf million ports over the past decade.

The LINC/Term HUB Series terminal server modules are available in both Read-Only Memory (ROM) and downloaded versions. The ROM model is self-contained while the downloaded unit receives its operating software across the network from a central loading device. Designed for larger networks the downloaded version facilitates distributed network intelligence and easy software updates.

List price for the 5208 terminal server module is $1,395. It will be available in August from Hughes LAN Systems and Hughes Authorized Resellers worldwide in addition to selected Chipcom Resellers.

Hughes LAN systems builds local area networks for organizations that need connectivity throughout a mixed-media, multi-vendor computing environment. The company designs, manufactures, integrates, markets and supports four product families under the trade name LocalNet. Hughes' installed base includes more than 2,200 networks connecting more than 700,000 devices. More than 70 of these networks have over 1,000 connections.

Hughes LAN Systems is a subsidiary of Hughes Aircraft Company, a subsidiary of GM Hughes Electronics.

Chipcom is a privately held company headquartered in Southborough, Mass. Founded in 1983, Chipcom is a leading supplier of high-performance, high-reliability facility networking solutions for a variety of markets including manufacturing, government and financial services.

PLEASANTON, CA (JULY 19) BUSINESS WIRE - William Y. Tauscher, chairman and chief executive officer of ComputerLand Corp., and Richard Bard, vice chairman of ComputerLand Corp. and chief executive officer of ComputerLand

International, Thursday jointly announced two executive appointments.

Tauscher and Bard announced the promotion of B. Wade Monroe, chief financial officer of ComputerLand Corp., to executive vice president of ComputerLand Corp., and the promotion of Gary Kulesza, previously vice president of international finance, to president and chief operating officer of ComputerLand International.

As executive vice president and chief financial officer, Monroe is responsible for the ComputerLand Corp.'s financial activities worldwide, including treasury, financial planning, accounting and taxation. As chief operating officer of ComputerLand International, Kulesza is responsible for ComputerLand's business functions overseas.

Monroe joined ComputerLand as senior vice president and chief financial officer in June 1989. Before joining ComputerLand, Monroe was chief financial officer and vice president of finance, Datapoint Corp., San Antonio, Texas. He joined this minicomputer and networking company in January 1988.

Monroe holds a bachelor's degree in accounting and finance and a master's degree in business administration, both from the University of Houston, Texas. Monroe, 48, lives in Alamo, Calif.

Kulesza joined ComputerLand in February as vice president of international finance, responsible for the company's financial, legal and licensing activities outside the United States.

Before joining ComputerLand, Kulesza was vice president and controller at CoastAmerica Corp., a hardware and auto store franchisor and operator in Denver.

Kulesza holds a bachelors degree in business and finance from Niagara University, New York. He has also completed the American Management Association's executive management course and the Harvard University case study course. Kulesza, 39, lives in Denver.

ComputerLand Corp., headquartered in Pleasanton, operates the world's largest multivendor computer reseller network, servicing the corporate customer. ComputerLand International, headquartered in Denver, oversees ComputerLand operations in 33 countries.

ComputerLand Corp. reported 1989 retail sales of more than $2.5 billion.

MOUNTAIN VIEW, CA (JULY 19) BUSINESS WIRE - Hughes LAN Systems Thursday announced the LINC/Term HUB Series of integrated terminal server modules as the first available multi-protocol servers offering full-function asynchronous terminal connectivity directly in the chassis of leading third-party smart wiring hubs.

The LINC/Term 3208, is compatible with and occupies one slot in the chassis of SynOptics' LattisNet System 3000. LINC/Term models TSRV-8 and 5208 function similarly with the Cabletron Multi Media Access Center (MMAC) and Chipcom's ONline concentrators, respectively. Multiple LINC/Term modules are supported in a single hub, subject only to the available slots in the chassis.

Each of the high performance terminal server modules supports up to eight RS-232 devices with full EIA lead control via telco-standard modular connectors. It provides an extensive set of user and network management features, including a comprehensive multi-level security and access control subsystem as well as a complete remote command and diagnostics support capability. SNMP is a standard feature.

As an extension of Hughes' popular LINC/Term Multi-Protocol Terminal Server family, the LINC/Term Hub Series operates the same field-proven network operating software which simultaneously supports the defacto standards TCP/IP Telenet and DEC LAT, plus Hughes' own LocalNet protocols.

List price for the 3208, 5208 and TSRV-8 terminal server modules is $1,395. All three modules will be available in August from Hughes LAN Systems and Hughes Authorized Resellers worldwide. Hughes separately announced today that the 5208 would also be available through selected Chipcom resellers.

Hughes Lan systems builds local area networks for organizations that need connectivity throughout a mixed-media, multi-vendor computing environment. The company designs, manufactures, integrates, markets and supports four product families under the trade name LocalNet. Hughes' installed base includes more than 2,200 networks connecting more than 700,000 devices. More than 70 of these networks have over 1,000 connections.

#90200b0053 07/19/1990 ~Business Wire
SEATTLE (JULY 19) BUSINESS WIRE - Seafirst Corp. Thursday announced second-quarter 1990 net income of $34.3 million.

This compares with net income of $31.7 million in last year's second quarter, an 8.1 percent increase.

According to Cooley, Seafirst's second quarter results were affected by continued growth in consumer, residential and commercial loans, as well as continued concentration on cost control measures.

Return on average equity was 15.27 percent for the second quarter of 1990, compared with 15.85 percent in the year-earlier quarter. Seafirst's return on average assets was 1.11 percent for the second quarter of 1990, compared with 1.17 percent a year ago. Net interest income was $126.8 million for the second-quarter 1990, compared with $127.4 million a year ago.

Noninterest income for second-quarter 1990 was $56.1 million, compared with $51.9 million a year earlier.

Noninterest expense increased to $111.2 million for second-quarter 1990 from $108.2 million a year ago. Seafirst's expense-to-revenue ratio, which measures operating efficiency, was 61 percent for the quarter compared with 60 percent a year ago. Seafirst provided $18.6 million for credit losses in the second quarter of 1990 compared with $23.5 million a year earlier.

Net credit losses were $18.6 million in this year's second quarter, compared with $14.0 million a year ago. Nonperforming assets were $303.2 million at June 30, 1990, compared with $266.2 million a year ago. At June 30, 1990, the allowance for credit losses was $195.7 million, or 1.90 percent of total loans, compared with $182.3 million, or 1.96 percent a year ago.

Seafirst contributed $32.7 million to BankAmerica's 1990 second-quarter net income. The difference between Seafirst's results and its effect on BankAmerica's results arises because BankAmerica records its Seafirst investment using the purchase method of accounting.

Seafirst Corp., a BankAmerica subsidiary, is a Seattle-based bank holding company that engages in commercial banking through its principal subsidiaries, Seafirst Bank, which has 187 branches in Washington state, and Seafirst Bank Oregon with three locations in the Portland area. Seafirst also offers mortgage banking, leasing and credit-related

insurance underwriting services.

GERMANTOWN, TENN. (JULY 19) BUSINESS WIRE - Community Bancshares Inc. (NASDAQ:CBOG), the parent company of Community Bank of Germantown, Thursday announced a $1.3 million addition to its allowance for credit losses for the second quarter ended June 30, 1990, as a result of management's ongoing analysis of the bank's loan portfolio.

The addition will increase the allowance to $3.4 million from $2.1 million raising the percentage of the allowance for credit losses to 2.2 percent of loans outstanding. In addition, the company decided to reduce the book value of real estate acquired through foreclosure by approximately $650,000.

The company has not yet released second quarter earnings; however, the company estimates that the aforementioned actions will result in an after-tax loss of approximately $320,000 for the six months ended June 30, 1990.

Donald E. Russell, president and chief executive officer, stated that the company's capital remains in excess of 8.5 percent of total assets and the anticipated loss should not adversely impact the company's recent trend of paying a quarterly dividend. Russell also stated that the company anticipates being profitable for the year.

Community Bancshares Inc. is a bank holding company headquartered in Germantown, a separately incorporated municipality adjacent to Memphis.

Community Bancshares' principal subsidiary is Community Bank of Germantown which serves Germantown and the Memphis area through seven branch locations.

EL SEGUNDO, CA (JULY 19) BUSINESS WIRE - Rockwell International Corp. has been selected by the U.S. Army Strategic Defense Command, Huntsville, Ala. for final contract negotiations to demonstrate, validate, and design a near-term Kinetic Energy Anti-Satellite (KE ASAT) system.

The 24-month contract is worth approximately $100 million. Work will begin in mid-August. If ASAT progresses to a contract for full-scale development, the total contract value could exceed $800 million.

The ASAT is a ground-based defensive tactical missile system that will launch a small, lightweight, non-explosive vehicle that detects, identifies, and negates specified hostile satellites.

The program will be managed by Rockwell's Strategic Defense Center utilizing resources at the company's California facilities including: Space Systems division, Downey; Rocketdyne division, Canoga Park; Satellite & Space Electronics division, Seal Beach; Autonetics Strategic Systems division, Anaheim; and Tactical Systems division, Duluth, Georgia.

The Rockwell team also includes LTV, Dallas; Logicon, San Pedro, Calif; SAIC, Torrance, Calif.; and Advanced Technologies Inc., San Bernardino, Calif.

Rockwell International is a $12 billion, multi-industry company applying advanced technology to a wide range of products in its electronics, aerospace, automotive, and graphics businesses.

OAKLAND, CA (JULY 19) BUSINESS WIRE - Robert A. Bolingbroke, 52, has been elected president and chief operating officer and a director of The Clorox

Co. (NYSE/PSE:CLX), a diversified manufacturer and marketer of household grocery products.

His election becomes effective Aug. 1. C.R. Weaver continues as chairman and chief executive officer.

Bolingbroke is a 28-year veteran of the grocery products business, all with Clorox. Most recently, he was group vice president with senior management responsibility for the company's Kingsford Products, Food Service Products, restaurant equipment and bottled water subsidiaries.

Bolingbroke joined Clorox in 1962. He has held a number of positions in the company's marketing organization and also has had senior management experience in line and staff functions.

Concurrent with Bolingbroke's election, the company announced additional responsibilities for two other officers.

Group Vice President G. Craig Sullivan was newly assigned responsibility for food service products operations in addition to household products and international.

Group Vice President Williard E. Lynn's new responsibilities include the company's barbecue and retail food products and bottled water operations in addition to continuing overall responsibility for corporate sales and business development.

Bolingbroke is a native of Rexburg, Idaho, and is a graduate of both the Stanford Business School (1962) and Washington State University (1960). He is a member and past president of the Mt. Diablo Council - Boy Scouts of America, and is vice president, Golden Gate Scouting Federation. He resides with his family in Danville, Calif.

#90200b0082 07/19/1990 ~Business Wire

OAKLAND, Calif. (JULY 19) BUSINESS WIRE - American President Companies Ltd. (NYSE:APS) Thursday announced second quarter earnings of $1.5 million which, after reflecting the preferred stock dividend, resulted in a loss of 1 cent per common share, compared with net income of $5.7 million, or 14 cents per share, for the second quarter of 1989.

Revenues declined to $511 million in the second quarter from $530 million in 1989. For the first half of 1990, the company had a net loss of $1

million, or 22 cents per share, on revenues of $1.1 billion, compared with net income of $11.5 million, or 27 cents per share, on revenues of $1.1 billion for the first half of 1989.

Commenting on the financial results, Chairman W.B. Seaton said the company's transportation operations had pretax losses of $0.9 million and $12.1 million for the second quarter and first half of 1990, respectively, compared with pretax income of $1.6 million and $9.5 million reported for the same periods in 1989. This decrease was due to a decline in international volumes, continuing rate pressures in the intra-Asia market, a decline in margins in the company's intermodal freight brokerage operations and increased equipment costs.

International transportation revenues in the second quarter decreased 5 percent to $351 million and in the first half of 1990 decreased 2 percent to $755 million. The decline in second quarter international revenues was due to a drop in trans-Pacific volumes and a decrease in the average revenue per forty-foot equivalent unit (FEU) for intra-Asia shipments, partially offset by improvements in the company's U.S. import and U.S. export average revenue per FEU and an increase in intra-Asia volumes.

Domestic transportation revenues rose 7 percent to $156 million in the second quarter and 4 percent to $328 million for the first half of 1990. The second quarter increase in domestic revenues was due to an increase in stacktrain volumes and an improvement in stacktrain average revenue per FEU.

APC's real estate operations contributed pretax income of $3.4 million in the second quarter and $10.2 million in the first half of 1990, compared with $7.9 million and $9.3 million for the comprable periods in 1989. In the second quarter, the company sold 19 acres of land for a total of 67 acres sold year-to-date.

During the second quarter, the company repurchased 434,600 shares of its common stock at an average price of $24.43 per share. Year-to-date the company has repurchased 904,200 common shares. The company has repurchased a total of 1,410,650 common shares since the board of directors approved an open-market repurchase program for up to two million shares of common stock in January 1989.

American President Companies Ltd. provides container distribution and transportation services within and between Asia and North America through an intermodal system combining ocean, rail and truck transportation.

#90200b0084 07/19/1990 ~Business Wire

AKRON, Ohio - (JULY 19) BUSINESS WIRE - Myers Industries Inc. (AMEX:MYE) today reported record financial results for its second quarter and first six month periods ended June 30, 1990.

This is the eighteenth consecutive quarter of higher year-to-year net sales and the seventeenth consecutive quarter of higher year-to-year net income and net income per share.

Net sales in the second quarter of 1990 were $52,586,579, up 4 percent from $50,448,978 in the same year-ago period. Net income for the three months ended June 30, 1990 was $3,103,176, a 19 percent increase from the $2,601,134 reported in 1989. Net income per share for the quarter was 47 cents, an increase of 21 percent over the 39 cents per share earnings reported in the year earlier period.

For the six months ended June 30, 1990, net sales increased 4 percent to $97,837,086 from $93,693,874 a year ago. Net income of $5,097,793 for the six months improved 21 percent over the year ago earnings of $4,207,166. Net income per share for the first six months of 1990 was 77 cents, a 22 percent increase over the 63 cents per share earned in the year earlier period. Per share data has been adjusted to reflect a 10 percent stock dividend paid in Sept. 1989.

''Earnings benefitted from a favorable mix of products, both in existing lines and new offerings,'' said Stephen E. Myers, president and chief executive officer. ''Reduced raw materials prices and improved operating efficiency, particularly in our manufacturing segment, favorably influenced our profitability for the quarter and six months. All indications point to another record year for Myers Industries,'' Myers said.

In other business, the board of directors, in a meeting held July 19, 1990 voted a 10 percent stock dividend payable on Aug. 31, 1990, to shareholders of record as of Aug. 17, 1990. The board then declared a 5 cents per share quarterly cash dividend payable Oct. 1, 1990, to shareholders of record as of Sept. 14, 1990. The per share dividend will be payable on the increased number of shares resulting from the 10 percent stock dividend.

This is the 15th consecutive year in which the company increased its effective cash dividends.

Myers Industries Inc. is a manufacturer of polymer and metal products used in material handling and small parts storage, tire repair and retreading, automotive and construction applications and a nationwide wholesale distributor of tire repair and service products.

Myers Industries Inc.

#90200b0088 07/19/1990 ~Business Wire

MONTGOMERY, AL (JULY 19) BUSINESS WIRE - Colonial BancGroup Chairman and Chief Executive Officer Robert E. Lowder announced on Wednesday that earnings improved to $4,271,000 as of June 30, 1990, compared with $3,249,000 for the same period in 1989.

Earnings per share increased to 66 cents per share for the first six months of 1990, compared with 50 cents for the same period in 1989.

''We are pleased with the growth in earnings and the progress we have made as a single statewide bank,'' said Lowder. ''Earnings over the previous year have improved more than 31 percent.''

This figure includes an extraordinary tax credit of $562,000 from utilization of a net operating loss carry-forward from 1989.

Lowder said that a major factor contributing to the increase in earnings per share was the growth in net interest income from $11,309,000 for the second quarter of 1989 to $12,450,000 for the same period in 1990.

For the comparable six month period, net interest income increased to $24,037,000 in 1990 from $22,521,000 in 1989, a 6.7 percent improvement.

In addition, Colonial BancGroup contributed $1,415,000 to its loan-loss reserve during the second quarter of 1990, bringing the year-to-date total of the provision for loan-loss reserves to $2,420,000, as compared with $717,000 in the same period of 1989.

''This conservative approach underscores our commitment to sound banking practices in light of uncertain economic conditions in the marketplace,'' said Lowder.

Colonial BancGroup also experienced an increase in net loans from $976,249,000 to $1,038,839,000, a gain of 6.4 percent.

For the first two quarters, BancGroup's return on average assets improved from 0.45 percent in 1989 to 0.58 percent in 1990.

Return on average equity increased to 11.53 percent at June 30, 1990, compared with 5.74 percent in the same period in 1989. Total assets were $1,484,468,000, and showed little change from the previous year.

At its quarterly board meeting, the company's board of directors approved payment of its regular dividend of 15 cents on Class A common stock and 5 cents on Class B common stock.

Colonial BancGroup is an Alabama-based bank holding company with 72 offices throughout the state.

SEATTLE - (JULY 19) BUSINESS WIRE - University Savings Bank reported record net income of $3.3 million for the fourth quarter of fiscal 1990, which ended June 30, 1990.

This compared to $1.4 million in the final quarter of fiscal 1989.

The bank posted record net income of $8.1 million for fiscal 1990. This represented an 84 percent increase over earnings of $4.4 million achieved in the 12 months ended June 30, 1989.

The Seattle-based bank generated $115.8 million in loan volume during the fourth quarter this year - $57.4 million more than in the quarter ended June 30 a year ago. The bank's loan originations during the fiscal year reached a record level of $307.5 million compared to $218.6 million in loan volume originated during the 12 months ended June 30, 1989.

Customer deposits were $760.6 million on June 30, 1990, compared to $680.5 million one year earlier.

The bank's interest rate spread, the difference between the yield on earning assets and cost of funds, was 2.98 percent for the fourth quarter this year. This compares to 2.37 percent in the quarter one year ago and 2.70 percent in the third quarter this year.

University Savings Bank had assets of $916.2 million on June 30, 1990. The bank's net worth was $88.1 million resulting in a ratio of net worth to average assets of 10.38 percent. At year end, the bank exceeded each of the capital requirements established by the Federal Deposit Insurance Corp. for its member institutions.

University Savings Bank is a wholly owned subsidiary of Glendale Federal Bank, the nation's third largest savings institution. GLENFED Inc. is the parent company of Glendale Federal Bank and today reported earnings of $24.4 million or 77 cents per share for the quarter ended June 30, 1990, and $117.3 million or $3.79 per share for the just completed fiscal year.

University Savings Bank serves the Puget Sound market through a network of 22 offices in King, Pierce and Snohomish counties. The bank ranks fifth among Washington savings institutions in customer deposits and seventh in the state in total assets.

PHOENIX (JULY 19) BUSINESS WIRE - Three-Five Systems Inc. (NASDAQ:TFSY) Thursday reported that net income for the three months ended June 30, 1990 increased to $163,724, equal to 5 cents per share, compared with $33,710 or 1 cent per share, the previous year.

Sales for the second quarter rose to $4,147,966 from the prior year's $2,736,064. For the first six months, net income was $237,422 on sales of $6,935,764 as compared to net income of $44,410 on sales of $5,377,344 the previous year.

''The higher sales and earnings are due in part to the recent acquisition of ERA and in part to higher sales by internal growth,'' said David R. Buchanan, chairman and chief executive officer. ''The consolidation of ERA's products into Three-Five's manufacturing system has not yet been fully completed. When it is, we hope to improve the earnings as a percent of sales even more.''

Three-Five Systems Inc. is an international manufacturer of custom integrated LCD and LED displays and keyboards as well as discrete optoelectronic components. The company maintains corporate headquarters in Phoenix, an engineering design center in Winsted, Conn., European headquarters in Swindon, England, and manufacturing facilities in Manila, The Philippines.

#90200b0116 07/19/1990 ~Business Wire

SACRAMENTO, CA. (JULY 19) BUSINESS WIRE - McClatchy Newspapers Inc. (NYSE:MNI) Thursday reported second quarter earnings of $7.8 million, or 27 cents per share, compared to 1989 second quarter earnings of $10 million, or 35 cents per share.

Earnings for the first half totalled $10.1 million, or 36 cents per share, compared to $14.8 million, or 52 cents per share, for the 1989 period.

McClatchy cited continued start-up losses from a newsprint mill partnership, the costs associated with the six newspapers acquired on January 1 in South Carolina, and a higher effective tax rate as major contributors to the earnigns decline.

Excluding the partnership loss and acquisition costs, earnings were 34 cents and 49 cents for the quarter and first half of 1990, respectively. The higher effective tax rate lowered earnings by an additional 2 cents per share in the second quarter and 3 cents per share for the six months.

Revenues rose 10.6 percent to $107.6 million in the second quarter from $97.3 million in 1989. Advertising revenues rose 10.3 percent to $86 million and circulation revenues were $17.5 million, a 12.6 percent gain. Excluding the new South Carolina operations, total revenues grew 6.1 percent to $103.2 million.

Operating income grew to $17.1 million from $16.4 million in the 1989

quarter and operating cash flow (operating income plus amortization and depreciation) grew 9.3 percent to $24.8 million from $22.7 million in 1989.

Higher interest expense resulting from larger debt levels and the newsprint mill partnership loss overshadowed the gains in operating income lowering net income for the quarter. Net income was also impacted by the higher effective tax rate in 1990.

Erwin Potts, chief executive officer, said ''we're pleased with the second quarter growth in operating income and cash flow despite the continued slowdown in advertising voloume. We will maintain our focus on containing costs to protect our margins.''

''The strength of our newspapers is evident in their substantial gains in circulation and their competitive positions in their markets. At our western operations, circulation in the second quarter grew 3.2 percent for our daily newspapers and 4.2 percent for our Sunday newspapers. Including South Carolina, daily circulation grew 10.4 percent and Sunday was up 9.6 percent. Compared to the industry, we're somewhat optimistic about our newspapers' performance for the remainder of the year.''

Revenues for the six months ended June 30, 1990 increased 10 percent to $202.7 million compared to $184.3 million in 1989. Excluding the new operations, revenue increased 5.6 percent in the period to $194.6 million reflecting a 5.2 percent growth in advertising revenues and 8.7 percent growth in circulation revenues.

Operating income for the first half was $23.7 million compared to $24.5 million in 1989, and operating cash flow grew to $39 million from $36.9 million.

Headquartered in Sacramento, McClatchy Newspapers Inc. publishes 11 daily newspapers and eight non-daily newspapers located principally in western coastal states and South Carolina. It also publishes a group of senior citizen tabloids in the West.

Its six South Carolina newspapers were acquired on Jan. 1 and includes The Herald in Rock Hill, The Island Packet on Hilton Head Island and the Beaufort Gazette in Beaufort. McClatchy is also one of six partners in a newsprint mill in Usk, Wash., which began operating in December 1989 and is expected to incur losses in the first several years of operations.

#90200b0145 07/19/1990 ~Business Wire

DALLAS (JULY 19) BUSINESS WIRE - Central and South West Corp. (NYSE:CSR) reported a decrease in consolidated earnings for the three and 12 month periods ended June 30, 1990.

These decreases were due to the inability to recognize equity cost deferrals associated with the South Texas Project nuclear power plant and to various non-recurring items during the prior periods. These decreases were offset by interim rate increases at Central Power and Light Co.

Consolidated earnings per share for the second quarter decreased to 54 cents from 75 cents on 94.1 million average shares outstanding. Net income for common decreased to $51 million for the three month period from $70 million during the same period in 1989.

For the 12 months ended June 30, 1990, earnings per share were $2.63 on 94.1 million average shares as compared with $3.40 on 94.3 million averags shares for the same period a year ago. Net income for common decreased to $247 million from $321 million.

Earnings for the first and second quarters of 1990 will be restated if the Public Utility Commission of Texas approves Central Power and Light Co.'s stipulated agreement to settle all issues in its rate request to recover its investment in STP.

The settlement would allow recognition during the first quarter of 1990 of $110 million of income related to deferred interest charges, to the extent actual interest charges were incurred during the period between commercial operation of STP Units 1 and 2 and March 1990.

The settlement would also allow recognition of an additional $49 million of income related to deferred interest, to the extent it was incurred, on STP Unit 2 for the balance of 1990. A Texas PUC order is not excpected until the third or fourth quarter of this year.

Central and South West Corp. is a Dallas-based public utility holding company with four electric subsidiary companies that provide service to portions of Texas, Oklahoma, Louisiana and Arkansas.

SAN FRANCISCO (JULY 19) BUSINESS WIRE - Lewis Galoob Toys Inc. (NYSE:GAL), a South San Francisco-based toy company, Thursday announced that the U.S. Court of Appeals for the Ninth Circuit granted Galoob's emergency motion for an expedited appeal of a preliminary injunction which two weeks ago temporarily halted Galoob's sales of its new Game Genie video-game enhancer.

The lower court's order, enjoining Galoob from selling the Game Genie pending trial of the case between Galoob and Nintendo of America Inc., has been appealed by Galoob. The company believes that its new product, which allows video game owners to play their games as they desire, does not infringe on Nintendo's copyrights.

''We are pleased with the order of the Court of Appeals granting Galoob's emergency motion. With an expedited briefing schedule, we anticipate that our appeal will be heard and decided within 60 days,'' said Steven M. Klein, executve vice president and general counsel of Galoob Toys. ''If the injunction is reversed, we will be free to begin selling Game Genie immediately thereafter,'' said Klein.

The Game Genie is the world's first and only video-game enhancer. It offers a new dimension to video-game play by allowing players to modify game play to explore all ''levels'' of an individual game by giving players infinite lives, enhanced ''fire'' power or increased jumping abilities.

Lewis Galoob Toys designs, develops, markets and distributes a variety of toy products sold worldwide.

LOS ANGELES (JULY 19) BUSINESS WIRE - I.H.V. Corp., which recently acquired two popular Los Angeles restaurants -- Gladstone's 4 Fish and R.J.'s - The Rib Joint -- Thursday announced a name change to California Beach Restaurants Inc. (sold OTC in the pink sheets).

The company concurrently announced the appointment of three new directors to its board: Anwar Soliman, J. Christopher Lewis and Robert W. Schulz.

''The name California Beach Restaurants clearly defines the primary focus of our company,'' said Chairman and Chief Executive Officer Robert J. Morris, who is the original founder of Gladstone's and R.J.'s. ''Our current and future growth will focus on the acquisition and development of additional waterfront restaurants that provide the West Coast's best food and service in unique settings.''

The company's board of directors brings diverse restaurant, business and investment experience to California Beach Restaurants. Inducted into the Southern California Restaurant Hall of Fame in 1986, Morris has developed a dozen restaurants in the Los Angeles area in the past 20 years.

Gladstone's, which was established in 1972, is the eighth largest restaurant in the nation, currently serving 1.1 million customers a year. With annual gross receipts of more than $13 million, Gladstone's is the top-grossing restaurant in California. R.J.'s, also founded by Morris, is one of the most established and popular casual restaurants in Beverly Hills.

Richard S. Stevens, a veteran of the recreation, resort and hospitality industries, is president and chief operating officer of California Beach Restaurants.

In addition to his extensive experience in developing and operating private-membership clubs, Stevens worked 22 years with Wrather Corp., serving as president of the hotels and real estate division overseeing the Disneyland Hotel, the Queen Mary, the Spruce Goose and other properties.

Soliman, chairman and chief executive officer of American Restaurant Group (ARG) in Newport Beach, Calif., brings additional restaurant experience to California Beach Restaurant's board. Before founding ARG, which owns and operates Black Angus, Velvet Turtle, Spoons and Grandy's restaurants, Soliman spent 22 years with W.R. Grace & Co.

Lewis, an executive with Riordan Venture Management of Los Angeles, and

Schulz, president of Cushman Equities Corporation of Santa Barbara, Calif. round out the California Beach Restaurants board with significant business and investment expertise.

I.H.V. Corp. acquired Gladstone's and R.J.'s through its wholly owned subsidiary, Sea View Restaurants Inc. in April 1990. Sea View also holds management contracts for Cabo Cabo Cabo restaurant in Century City, Calif. and El Paseo restaurant on Olvera Street in downtown Los Angeles.

California Beach Restaurants also owns American Microsonics located in Carson, Calif., which manufactures and sells patented microphonographs and microrecords.

A publicly held company, California Beach Restaurants has headquarters at 17351 Sunset Blvd., No. 404, Pacific Palisades, Calif., 90272.

LOS ANGELES (JULY 19) BUSINESS WIRE - Health Care Property Investors Inc. (NYSE:HCP) Thursday reported that its board of directors increased the company's quarterly cash dividend by 1.25 cents to 76.5 cents per share.

The dividend will be paid on Aug. 20, 1990, to shareholders of record as of the close of business on Aug. 3, 1990. As a result of the increase, the annualized rate of distribution is $3.06 per share. This is the 19th consecutive quarterly increase in the payment of dividends since the company's inception in 1985.

Kenneth B. Roath, chairman and chief executive officer of the company, reported that cash flows from operating activities amounted to $9,881,000, or 86 cents per share of common stock.

The per-share amount equaled the record per-share results reported for the first quarter of this year. Dividends paid per share for the first six months of 1990 amounted to 88 percent of cash flows.

Health Care Property Investors is a self-administered equity-oriented real estate investment trust which invests in health care-related facilities, including long-term care facilities, acute care, rehabilitation and psychiatric hospitals, substance-abuse recovery centers, congretate care and assisted-living facilities and medical office buildings.

#90200b0161 07/19/1990 ~Business Wire
SHREVEPORT, LA (JULY 19) BUSINESS WIRE - Arkla Energy Resources (AER) today announced a long-term agreement in which Exxon will purchase almost 60 million cubic feet (MMcf) per day of firm capacity from AER.

Under the terms of the contract, AER will initially provide firm transportation service of 57,232 MMBtu's daily on Line AC, emanating from the Arkoma Basin in eastern Oklahoma and northwest Arkansas. Line AC is currently under construction, with completion set for Nov. 1, 1990.

Gas owned by Exxon will enter Line AC from the Arkoma Basin and be delivered at existing transmission points on the eastern end of the AER system to various interstate pipelines serving the Midwest and Eastern United States.

Jim Terrill, president and chief operating officer of the Arkla Pipeline Group, said the long-term contract with Exxon underscored Line AC's position as the premier link from the gas-rich Arkoma Basin to Midwest, Gulf Coast and Northeast markets.

''Exxon is the latest in a growing list of major commitments to utilize Line AC and we anticipate additional significant announcements shortly which will further solidify Line AC's success,'' Terrill said.

#90200b0171 07/19/1990 ~Business Wire
NEWPORT BEACH, CA (JULY 19) BUSINESS WIRE - MIP Properties Inc. (ASE:MIP), an equity-oriented real-estate-investment trust advised by Koll Realty Advisors, Thursday reported financial results for the three months ended June 30, 1990.

Consolidated funds available for distribution were 16 cents per share for the three months ended June 30, 1990, compared with 19 cents per share for the second quarter of 1989. The reduction relates to lower net interest income offset by increased cash distribution from joint ventures.

Consolidated net income for the second quarter of 1990 was $995,600, or 11 cents per share, compared with $1,291,800, or 14 cents per share, for the second quarter of 1989. The decrease was primarily the result of lower net interest income offset by the combined income from real estate

operations and equity investments.

The reduction in net interest income primarily stems from the planned reduction in loan volume and non-earning loans, offset by the receipt of a contingent interest fee of $385,000 from the successful conclusion of the Mart of Montebello investment.

As of June 30, 1990, three loans have been classified on the balance sheet as non-earning loans. These loans include a $12.4 million loan secured by 23.5 acres of land in San Diego, a $1.7 million loan secured by 4.2 acres of land in San Bernardino and a $11.5 million loan secured by San Dimas Corporate Park.

The company believes the underlying collateral for these loans adequately secures MIP's investments.

San Dimas Corporate Park is a well-located 144,600-square-feet office/R&D project east of downtown Los Angeles. Although there is interest in the project from several prospective tenants, the company has decided to consider the loan non-earning until there is sufficient leasing to contribute to debt service.

On June 8, 1990, the company acquired title to Miramar D, a 27,648-square-foot building in San Diego that had secured a $3,380,000 loan. This 100-percent leased building is an attractive addition to our equity portfolio.

#90200b0174 07/19/1990 ~Business Wire

MILPITAS, CALIF. (JULY 19) BUSINESS WIRE - LSI Logic Corp. (NYSE:LSI) Thursday announced the industry's first off-the-shelf chipset for use in designing a complete computer system based on the MIPS microprocessor.

Called the ''MIPSET,'' the five-chip family can replace 40 or more standard logic circuits.

''With the new MIPSET, we're opening the market for low-cost, compact RISC systems based on the MIPS architecture,'' said Brian Halla, vice president of LSI Logic's Microprocessor Products Group. It will make possible a new generation of UNIX-based portable computers as well as X windows terminals, laser printers and other peripherals.''

The MIPSET, developed in Japan by LSI Logic KK, is designed to work with the company's LR3000 CPU (with on-chip memory management and cache control) and the LR3010 floating-point accelerator.

Keiske (''KK'') Yawata, president of LSI Logic Japanese company, said: ''This new chipset will enable startups and established PC clone makers to enter the market quickly for low-cost systems compatible with the current high-performance MIPS-based workstations in the market.

''SONY, Silicon Graphics, Digital Equipment, MIPS Computer and other firms have recently announced products using the MIPS RISC architecture.''

Chet Silvestri, MIPS Computer Systems vice president and general manager of the Technology Products Group, called the MIPSET ''an example of how our semiconductor partners can add value to the MIPS technology, expanding product support for end users who choose R3000-based platforms for their workstations.''

The new chipset, available in 20- and 25-MHz speeds, consists of the LR3201 reset/interrupt controller, the LR3202 bus controller, the LR3203 DRAM controller, the LR3204 DRAM data controller and the LR3205 block transfer buffer.

The LR3201 reset/interrupt controller features asynchronous reset input with a Schmitt trigger circuit for power-on reset, synchronized interrupt inputs and programmable reset duration.

LSI Logic Corp. is a leading supplier of high-performance semiconductors. The company is the world's premier manufacturer and marketer of HCMOS application-specific integrated circuits (ASICS) in gate array and cell-based technologies, with over 8,000 designs completed worldwide.

#90200b0175 07/19/1990 ~Business Wire

LOS ANGELES (JULY 19) BUSINESS WIRE - H.F. Ahmanson & Co. (NYSE:AHM) announced Thursday the sale of its downtown Los Angeles headquarters building, the Home Savings of America Tower, to a partnership consisting of Kawasaki Enterprises Inc. of Japan and Takenaka & Co. of Los Angeles.

Terms of the sale were not disclosed.

Richard H. Deihl, chairman and chief executive officer, said: ''Under the new capital requirements mandated by the Financial Institutions Reform, Recovery and Enforcement Act (FIRREA), maintaining ownership of the Home

Savings Tower requires us to carry capital equivalent to that which would allow us to fund more than $2 billion in single family home loans to nearly 16,000 individuals and families.

''Consequently, the decision to sell the Tower allows us to continue concentrating our efforts in our primary business of residential mortgage lending.''

H.F. Ahmanson & Co. yesterday reported an earnings increase of over 50 percent for the second quarter and first half of 1990. This earnings increase was fueled by record loan originations and deposit increases. The company's mortgage loan originations for the first six months of 1990 exceeded $7.5 billion, a record volume for the first half of the year.

All of these loans were on residential properties and 92 percent were loans on single family residences.

Under the fully phased-in capital requirements mandated by FIRREA, thrifts must set aside a dollar of capital for every dollar invested in real estate development activities.

As part of its program to meet the fully phased-in capital standards as soon as possible, Ahmanson previously announced that it plans to replace the bulk of its investment in real estate development operations with third-party, non-recourse borrowings and joint venture partnerships or to sell some or all of the operations.

The sale resulted in a pre-tax gain of approximately $12 million, which will be deferred and added to the company's reserves.

The 24-story, 260,000-square-foot office tower, located at 7th and Figueroa streets in downtown Los Angeles, was developed by Ahmanson Commercial Development Co., a subsidiary of Home Savings of America. The company will retain its branch and executive offices on the first and 24th floors.

H.F. Ahmanson & Co., with more than $47 billion in assets, is the parent company of Home Savings of America. Home's $35.5 billion deposit base is the largest of any U.S. savings institution. It operates 358 savings branches in nine states and 102 mortgage lending offices in 17 states.

#90200b0178 07/19/1990 ~Business Wire

BEAVERTON, OR (JULY 19) BUSINESS WIRE - Mentor Graphics Corp. Thursday announced revenues and earnings for the second quarter which ended June 30.

Revenues for the quarter were $101,001,000 compared to $105,829,000 reported for the second quarter of 1989. Net income for the quarter was $3,648,000 (8 cents per share) compared to $12,332,000 (29 cents per share) earned in the second quarter of 1989.

Revenues for the first six months of 1990 were $217,748,000, compared to $206,337,000 for the first half of 1989. Earnings for the six month period of 1990 were $15,205,000 (34 cents per share) compared to $23,990,000 (56 cents per share) for the first half of 1989.

Included in the second quarter results is $2.3 million, net of amortization, of FASB 86 software capitalization; this capitalization reflects the substantial activity related to the development of the company's 8.0 software project.

On July 3, Mentor Graphics announced that both revenues and earnings for the second quarter would be significantly less than the company had anticipated. The company noted several possible reasons for the shortfall including a slowing U.S. electronics industry and a delay in orders as customers anticipate new computing platforms from Hewlett-Packard, the port of the company's products to Sun Microsystems platforms, and the company's own 8.0 software products. The company also noted that it expects similar financial results for the third quarter of 1990.

''Our results are in line with those we projected in our July 3 announcement,'' said Thomas H. Bruggere, Mentor Graphics chief executive officer and chairman of the board of directors. ''While we are obviously disappointed, we are also encouraged because we believe the reasons for this performance are short-term in nature and symptomatic of the transition issues which accompany our move to new products running on new and more powerful computer platforms. Longer term, we believe these new products will be the foundation for an improved 1991. For now, we are taking appropriate measures both to maintain revenues and control expenses.''

Mentor Graphics Corp. (NASDAQ: MENT) Beaverton, was established in 1981 to design, manufacture, market and service electronic design automation (EDA) systems. The company is the leader in worldwide EDA sales, with revenues of $437,770,000 over the last 12 months. The company currently employs more than 2,500 people. In addition to its corporate offices in Beaverton Mentor Graphics has sales and support offices in 66 locations worldwide. The company's headquarters are located at 8500 S.W. Creekside Place, Beaverton, Ore., 97005.

#90200b0183 07/19/1990 ~Business Wire

SARATOGA, CA (JULY 19) BUSINESS WIRE - Western Micro Technology, Inc. (NASDAQ/National Market System -- WSTM) reported sales of $19,871,000 for the first quarter ended June 30, 1990 of the nine month period ending December 31, 1990, (the company's new fiscal year end), compared with $21,759,000 for the corresponding quarter a year earlier, a decrease of 8.7 percent.

The net loss for the quarter was $436,000, equivalent to $.15 per share, compared with net income of $168,000, or $.06 per share for the first quarter of fiscal year 1990.

Commenting on the results, Marshall G. Cox, Chairman and Chief Executive Officer of Western Micro Technology stated, ''Revenues in the first quarter were primarily impacted by the surplus of memory products available in the marketplace. Although prices rose for a short period during the fourth quarter, ended March 31, 1990, that condition was short lived and prices dropped again during the June 1990 quarter. Low memory prices also impacted our Test Lab operations. However, on a positive note Test Lab bookings of new business were the best in recent quarters, and profitability returned to our Durham, N.C. test operation. We are confident that the Santa Clara, California operation will return to profitability next quarter. In addition, our systems business as a percentage of our total corporate revenue continues to grow, and gross margins for the corporation grew approximately 1 percent over the March 1990 quarter to 19.2 percent. Finally, based upon our recent bookings, our new Value Added activities (custom memory modules and cable assemblies), should start generating income for Western Micro by the end of the year.''

Western Micro Technology, Inc. is a leading, full service electronic distributor, specializing in components and systems products. The company also offers memory testing and burn-in facilities. It is a publicly-owned company traded on the NASDAQ National Market System under the symbol WSTM. Western Micro Technology, Inc. is headquartered in Saratoga, California with branches in Saratoga, San Diego, Agoura Hills, and Orange, CA., Beaverton, OR., Burlington, MA., Philadelphia, PA., Fairfield, N.J., Redmond, WA., and Dallas, TX., and reliability testing facilities in Santa Clara, CA. and Durham, N.C.

#90200b0184 07/19/1990 ~Business Wire

MUSKEGON, MI (JULY 19) BUSINESS WIRE - SPX Corp. (NYSE:SPW) today reported its sales and earnings results for the second quarter of 1990.

Sales for the April - June second quarter rose 24 percent to $202.8 million, as compared to sales of $163.9 million in the comparable period one year ago.

Net income in the second quarter rose 32 percent to $10 million and earnings per share increased 29 percent to 72 cents per share. These results compared to net income of $7.6 million from continuing operations, or 56 cents per share, in the second quarter of 1989.

Second quarter sales to the service sector increased 30 percent ot $175.2 million and were 86 percent of revenues. Within that sector, sales of specialty repair tools and diagnostic equipment were $129 million, and sales of aftermarket repair parts were $46.2 million. Sales of products for the industrial sector were $27.6 million and accounted for the remaining 14 percent of the quarter's revenues.

For the first half of 1990, SPX Corp.'s sales were $369 million, an increase of 13 percent over first half 1989 sales of $328 million. Earnings for the January - June period were $14.1 million, or $1.02 per share. This compared to first half 1989 earnings of $15.3 million or $1.12 per share. The 8 percent decrease in earnings from the comparable period in the prior year reflected first quarter specialty tool and equipment and aftermarket repair parts market softness.

Commenting on second quarter 1990 performance, Dale A. Johnson, president and chief executive officer of SPX said, ''We are naturally pleased with the substantial gain in second quarter performance. Our results benefitted strongly from the sale of environmentally driven products, principally refrigerant recovery and recycling and gas emission testing equipment. Important contributions also came from sales of specialty tools and equipment and building products.

''Looking ahead, we expect to benefit from the continued growth of our specialty tools and equipment businesses, the more focused approach of our aftermarket repair parts business, and the seasonal upturn of the construction industry.''

SPX Corp., headquartered in Muskegon is a Fortune 500 company and a world leader in the production and distibution of specialty repair tools and equipment, performance test and wheel service equipment and repair parts to the motor vehicle service industry.

LOS ANGELES (JULY 19) BUSINESS WIRE - Caesars World Inc. (NYSE:CAW) Thursday announced that its board of directors has approved a cash tender offer by Caesars World for the 2,175,945 outstanding shares of Caesars New Jersey Inc. (ASE:CJN) it does not currently own at a price of $22 net per share.

Caesars World currently owns approximately 86.6 percent of the 16,261,531 outstanding shares of Caesars New Jersey common stock.

Caesars World stated that it expects to commence the tender offer early next week. The offer will be subject to certain customary conditions but will not be conditioned upon any minimum number of shares being tendered or the obtaining of financing.

Neither Caesars World nor Caesars New Jersey makes any recommendation as to whether shareholders should tender or refrain from tendering shares of common stock.

The board of directors of Caesars World has received an opinion from its financial advisor, Wasserstein Perella & Co. Inc., that the $22 offer price is fair to the shareholders of Caesars New Jersey (other than Caesars World) from a financial point of view.

The board of directors of Caesars New Jersey has received an opinion from an independent investment banking firm, The Lodestar Group, that the $22 offer price is fair to the shareholders of Caesars New Jersey (other than Caesars World) from a financial point of view.

The board of directors of Caesars World is identical to the board of directors of Caesars New Jersey. Accordingly, the board of directors of Caesars New Jersey will not be taking any position with respect to the offer.

Caesars World stated that in the event it owns 90 percent or more of the outstanding common stock following consummation of the tender offer, it currently intends, subject to a variety of factors, to effect a merger of Caesars New Jersey with Caesars World or an affiliate of Caesars World at the same per-share consideration paid in the offer. Caesars World said that there can be no assurances that a merger will be effected or as to the price or other terms of any such merger.

#90200b0221 07/19/1990 ~Business Wire

LOUISVILLE, Colo. (JULY 19) BUSINESS WIRE - Storage Technology Corp. (NYSE:STK) Thursday reported a 17 percent increase in revenue and a 263 percent increase in net income excluding an extraordinary charge for its second quarter ended June 29, 1990, compared with the second quarter of 1989.

Revenue for the quarter totaled $276.4 million, compared with $236.0 million for the second quarter of 1989.

Net income for the second quarter of 1990, excluding an extraordinary charge of $4.5 million resulting from the redemption of its remaining 13.5 percent Senior Debentures, was $15.9 million, or $.47 per share. Net income for the second quarter of 1989 was $4.4 million, or $.17 per share.

''Growth in sales revenue is primarily the result of solid performance in our 18-track tape business led by the 4400 Automated Cartridge System (ACS),'' said Ryal R. Poppa, chairman, president and chief executive officer.

''Service revenue has improved as well with the continued growth of the installed base of ACS systems.

''Late in the quarter we shipped our 1,500th ACS, just over two years after shipping the first one. Of the 550 customers that have installed ACS systems to date, forty percent are new accounts.

''We remain optimistic about our prospects for the year as a whole. However, demand patterns continue to look stronger in Europe than in the United States. The U.S. outlook appears somewhat less certain at this time. In addition our policy of recognizing revenue on customer acceptance rather than product shipment can contribute to some degree of fluctuation in earnings on a quarterly basis,'' Poppa said.

Storage Technology Corp. manufactures, markets and services, worldwide, information storage and retrieval subsystems for high-performance computers.

#90200b0229 07/19/1990 ~Business Wire

MILPITAS, CA (JULY 22) BUSINESS WIRE - Quantum Corp. (OTC:QNTM) Thursday

reported record sales and earnings for the first quarter of fiscal 1991, ended June 30, 1990.

Sales for the first quarter were $162.7 million, an increase of 77 percent over the $91.8 million reported for the first quarter of fiscal 1990, and up 25 percent from $129.8 million for the fourth quarter of fiscal 1990, ended March 31, 1990.

Net income for the first fiscal 1991 quarter was a record $17.3 million, or 60 cents per share, up 50 percent from $11.6 million, or 43 cents per share, in the previous quarter. The net income for the first fiscal 1991 quarter includes 8 cents per share from the settlement of a patent infringement suit with Western Digital Corp.

Net income for the March 1990 quarter includes 5 cents per share, a non-recurring gain that is a result of the reversal of a reserve that had been established in 1988 for discontinuance of 5-1/4-inch products.

Gross margin for the first quarter of fiscal 1991 was 26.6 percent compared with 27.4 percent reported in the prior quarter and 33.7 percent in the comparable quarter a year ago. The sequential quarterly margin decline is attributed to inefficiencies associated with ramping procution of new products and competitive pricin pressures.

Quantum's balance sheet remains strong with $122 million in cash and long-term cash investments, and no bank debt. This represents an increase in cash of $18 million when compared with the March 1990 quarter.

Berkley noted that shipments of the company's two newest product families -- the high capacity ProDrive 120/170/210 products and the one-inch high ProDrive LPS drives are reflected in the first quarter results.

The company's subsidiary, Plus Development, contributed approximately 9 percent to Quantum's first quarter revenues. Plus' revenue increased compared with the prior quarter as a result of strong demand for the Plus Impulse products and the Hardcard II drives.

Since its founding in 1980 Quantum has emerged as a leading independent manufacturer of reliable, high-performance, mass storage systems for business, engineering, and scientific computing. The publicly held company offers products designed for desktop workstation and personal computer applications.

Quantum markets its drives to OEMs and distributors worldwide. Plus Development Corp., a Quantum subsidiary established in 1983, designs and markets personal computer storage enhancement products for end users through 2,500 dealers worldwide.

#90200b0242 07/19/1990 ~Business Wire

PASADENA, CA (JULY 18) BUSINESS WIRE - Beverly Enterprises Inc. (NYSE:BEV) Thursday announced operating results for the second quarter of 1990.

For the three months ended June 30, 1990, revenues were $520,807,000, compared with $523,584,000, reported for the second quarter of 1989. The decrease in revenues was primarily due to the sale of the company's homes in Michigan and Iowa.

Income before taxes for the second quarter of 1990 was $5.15 million compared with a loss before taxes of $120,755,000, in the same period last year. Included in the second quarter 1989 operating results were pre-tax restructuring charges of approximately $120,023,000.

Net income for the second quarter of 1990 was $3,296,000, or 5 cents per share, compared with a net loss of $97,941,000, or $1.83 per share, in the same period last year.

For the six months ended June 30, 1990, Beverly recorded revenues of $1,022,694,000, compared with $1,034,685,000, recorded in the same period last year. Income before taxes for the period was $6,215,000, compared with a loss before taxes of $134,125,000, for the comparative period first six months of 1989.

Included in the operating results for the six months ended June 30, 1989, were pre-tax restructuring charges of approximately $128,104,000. Net income for the period was $3,978,000, or 6 cents per share, compared with a net loss of $107.3 million, or $2.01 per share, in the first six months of 1989.

Beverly Enterprises is a long-term health care company, operating nursing facilities, pharmacies, retirement living center, and home health centers. Its mission is to be the provider of choice in the communities where it operates, by delivering high-quality health care services that meet the unique needs of each of those communities.

#90200b0249 07/19/1990 ~Business Wire

SAN FRANCISCO (JULY 19) BUSINESS WIRE - Home Federal Savings and Loan Association of San Francisco (NASDAQ:HFSF) reported net income of $647,000 or 47 cents per share, and $1,720,000, or $1.25 per share, for the three months and six months ended June 30, 1990, respectively.

This compares to a net loss of $559,000, or 41 cents per share, and $20,000, or 1 cent per share, for the comparable periods one year earlier.

Home Federal's President and Chief Executive Officer, Stanley E. Bailey said net interest income increased to $3,870,000 for the second quarter of 1990 from $2,899,000 for the similar period in 1989, reflecting a lower cost of funds.

Bailey further reported that the Association increased its allowance for loan losses by $410,000 during the second quarter in response to management's concern over the general risk in the event of an economic downturn.

While management does not anticipate any material increase in non-performing assets, it has prepared the Association for uncertain economic times by bringing its loan loss reserves to $935,000, or 0.25 percent of total loans.

Bailey also reported that stable earnings performance is also attributable to a quality loan portfolio. Home Federal's non-performing assets at June 30, 1990 totaled $976,000 or 0.16 percent of total assets, an enviable ratio.

The Association currently has no real estate owned acquired through foreclosure.

Home Federal's assets totaled $602,391,000 at June 30, 1990 and its stockholders' equity rose to $36,419,000, or $26.39 per share, compared to total assets of $570,944,000 and stockholders' equity of $34,698,000, or $25.14 per share at December 31, 1989 and total assets of $609,031,000 and stockholders' equity of $32,301,000, or $23.41 per share at June 30, 1989.

Loan originations and purchases for the second quarter totaled $56,769,000 compared to $32,722,000 for the like period in 1989.

Home Federal has been headquartered in San Francisco since 1936 and operates throughout Northern California in fifteen branch office locations and one loan agency office.

#90200b0252 07/19/1990 ~Business Wire
LOS ANGELES (JULY 19) BUSINESS WIRE - On July 19, 1990, the board of directors of LIVE Entertainment Inc. (NYSE:LIVE) adopted a Stockholders' Rights Plan in which one stock Purchase Right will be distributed as a dividend on each outstanding share of common stock.

The Stockholders' Rights Plan is designed to protect stockholders against unsolicited attempts to acquire control of the company, whether through accumulation of shares in the open market or through tender or exchange offers, that do not maximize stockholders' value.

The Plan is intended to address some of the disruptions created by market accumulators who engage in coercive practices not in the interests of all stockholders. By discouraging these abusive tactics, the Plan promotes the fair and equal treatment of all stockholders.

The Rights do not prevent a takeover but should encourage anyone seeking to acquire the company to negotiate with the board first. The Plan has been under consideration for some time and is similar to plans adopted during the last several years by many public companies. It is not being adopted in response to any takeover attempt and the company is not aware of any such attempt.

Each Right will entitle stockholders to purchase one one-hundredth of a newly issued share of LIVE Entertainment Preferred stock intitially at an exercise price of $90 (subject to adjustment to prevent dilution), each Preferred share having essentially the rights and economic characteristics of 100 shares of common stock.

The Rights will trade with the common stock and will not be exercisable until 10 business days after any person (except the company, a company employee benefit plan, Carolco Pictures Inc. or Mario F. Kassar and his related entities), has acquired 20 percent or more of the outstanding common stock or the commencement or announcement of tender offer resulting in such ownership, or in the event of certain mergers or business or asset sales by the company following such an acquisition.

Upon the acquisition of 20 percent or more of the company's common stock (subject to the exceptions described above), each right (other than those held by the acquirer and its affiliates) will entitle the holder to purchase common stock of the company at the current exercise price having a market value equal to twice the exercise price.

In the event of a merger or sale causing the Rights to become exercisable,

each such right will entitle the holder to acquire at the current exercise price shares of the survivor or purchaser having a market value equal to two times the current exercise price.

The board, by action of the independent directors, may redeem the Rights prior to the time they become exerisable for common stock of the company or of the survivor or purchaser and may, under certain circumstances, cause the rights to be exchanged for common stock of the company or reduce the 20 percent share acquisition level to not less than 10 percent, or otherwise amend the terms of the Rights.

The dividend distribution will be made on Aug. 1, 1990, payable to stockholders of record on that date. The rights will expire on July 19, 2000, 10 years after the date of adoption of the Stockholders' Rights Plan unless sooner redeemed or exchanged. The Rights distribution is not taxable to stockholders.

Details of the plan are outlined in a letter which will be mailed to stockholders.

#90200b0255 07/19/1990 ~Business Wire
SAN JOSE, CA (JULY 19) BUSINESS WIRE - VLSI Technology Inc. reported revenues of $84.6 million for the second quarter ending June 29, up 20 percent from the corresponding period a year ago and up 7 percent from the previous quarter.

Net income was $2.4 million, or 10 cents per share, as compared to $.7 million, or 3 cents per share for the second quarter of 1989.

Alfred J. Stein, chairman and chief executive officer, said: ''Our production bookings were in line with industry averages. They were strong in the areas of gate arrays, cell-based devices, and logic products, including chipsets. New ASIC design-wins were high as a result of our worldwide technology center network and our leading technologies in both software tools and wafer processing.

''Revenues of $84.6 million reflect strong ASIC shipments. Logic chipset demand has been good although price erosion continues in the Asia/Pacific area.

''Earnings reflect improvement as a result of production revenue growth of over 20 percent from the second quarter of 1989 and higher utilization of our San Antonio wafer fab. We continue to see productivity improvements

in all fab, assembly, and test operations and continued yield improvements in our 1.5 and 1.0 micron products.''

James R. Fiebiger, president and chief operating officer, said: ''On the product side, we announced a Single-Chip AT Mid-Range Performance Laptop controller called SCAMP-LT, with production scheduled late this year and building up in 1991. SCAMP offers a cost-effective solution for PC/AT-compatible hand-held and laptop systems.

Sanyo Electric Co. of Gunma, Japan, and VLSI Technology introduced a jointly developed RISC-based I/O Processor (IOP) for PC/AT-compatible systems. The IOP will be used to enhance the performance of computer peripheral devices for such applications as communication networks.

We introduced a cache data random-access memory (RAM) for 80386 applications and a 25-nanosecond, 256-kbit static RAM for high-speed cache and buffer memory applications, and a family of 3 high-speed, 20-nanosecond FIFOs.

''We also continued our strategy of providing advancements in the software tools used to design application-specific integrated circuits. The ASIC Division introduced self-testing capabilities that will automatically generate test circuitry for compilers which construct read only memory (ROM) and multipliers.

''These capabilities significantly reduce the time needed to test ASICs and allows the device to be tested in the field without special hardware. This capability is crucial in high-reliability and military systems.

''At the Custom Integrated Circuits Conference in May, we demonstrated the ASIC Synthesizer software tool, which lets designers synthesize, or create complete chips from a high-level description. The high design productivity offered by this new tool will be a fundamental requirement for designing higher density ASICs, while achieving shorter development cycle times.

''We enhanced our organization to provide more synergy between our strategic business units and expand our long-range planning capabilities. Promoted to the position of senior vice president were Douglas J. Bartek, with new responsibility for ASIC products, as well as Logic and Government Products; Douglas G. Fairbairn, responsible for Corporate Strategy and Development; and Dieter Mezger, senior vice president of the company and president, VLSI Europe.''

Alfred J. Stein, chairman and chief executive officer, said: ''We have accelerated the ramp-up of the second module for our San Antonio facility, with production scheduled for the first quarter of 1991, to accommodate heavy demand for chipsets, as well as other one-micron and sub-micron

products. We are encouraged by ASIC demand and customer reaction to TOPCAT and SCAMP. We are well poised to support substantial revenue growth. Our manufacturing capability and quality levels are the best they have ever been.''

#90200b0282 07/19/1990 ~Business Wire

DUBLIN, Calif. (JULY 19) BUSINESS WIRE - Hexcel Corp. (NYSE,PSE:HXL) Thursday announced earnings of $1,705,000 for the second quarter of 1990, 51 percent below the $3,462,000 earned in the second quarter of 1989.

These expected lower results reflect reduced funding for military aerospace programs and lower profitability due to competitive pressures, factors which have impacted the company's earnings since 1989. Sales in the second quarter of $110,196,000 were 1 percent below the $110,809,000 level of the second quarter of 1989.

Both primary and fully diluted earnings per share were 24 cents in the recent second quarter compared with 50 cents primary earnings per share and 47 cents fully diluted earnings per share for the second quarter of 1989.

For the first half of 1990, earnings of $2,934,000 were 41 percent below the $5,007,000 reported for the first six months of 1989. Sales of $216,959,000 in the recent first half were 2 percent above sales of $212,091,000 for the comparable period of 1989.

On a per share basis, both primary and fully diluted earnings were 42

cents through the first half of 1990. This compares with primary earnings of 72 cents and fully diluted earnings of 71 cents per share for the like period of 1989.

Included in second quarter and first half 1990 results were benefits of approximately 7 cents and 14 cents, respectively, due to the extension of the depreciation recovery periods of certain property and equipment to coincide with changes in business conditions.

''Second quarter earnings improved to 24 cents per share from the 18 cents per share earned in the first quarter of 1990. Furthermore, the recent quarterly results did not include a gain on the repurchase of convertible bonds, which contributed to first quarter performance,'' said Robert L. Witt, president and chairman.

Hexcel is an international developer and manufacturer of honeycomb, advanced composites, reinforcement fabrics, chemicals and resins used in commercial aerospace, space and defense and other markets.

#90200b0285 07/19/1990 ~Business Wire

BURBANK, Calif. (JULY 19) BUSINESS WIRE - Western Security Bancorp, the parent to Western Security Bank, has released the company's mid-year financial results.

Total assets at June 30, 1990, reached $82.86 million, compared with $65,252,000 at June 30, 1989, an increase of 27 percent. During the same period, total deposits increased 28.4 percent to $74,293,000 and net loans were up 24.7 percent to $55,262,000. Shareholders' equity continues to grow and at June 30, 1990, was $6,835,000, up 24.3 percent over the $5,499,000 reported on the same date last year.

Per-share earnings at mid-year 1990 were $1.27, compared with the $1.21 per share at June 30, 1989. Book value per share increased 24.9 percent, reaching $16.31 at June 30, 1990. Net earnings increased 5.4 percent to $638,800.

During the first six months of 1990, Western Security Bank expanded its service capability by opening two full-service banking offices. The Santa Clarita Valley Regional Office is located at 24355 Lyons Ave. in Valencia, and the Pasadena Regional Office is at 132 E. Colorado Blvd. in Old Pasadena.

Western Security Bank is a full-service, commercial bank with headquarters at 4100 W. Alameda Ave. in the Toluca Lake area of Burbank. The bank has

established a leading position in business banking and financial services for professionals. A subsidiary of Western Security Bancorp, the bank is a member of the FDIC and the Federal Reserve System.

#90200b0291 07/19/1990 ~Business Wire

KANSAS CITY, MO (JULY 19) BUSINESS WIRE - Kansas City Southern Industries Inc. reported second quarter 1990 earnings for the period ended June 30 of $8.7 million, equivalent to 82 cents per share, as compared to $9.3 million and 88 cents per share in second quarter 1989.

Second quarter 1989 results also included a 16 cents per share loss from discontinued operations.

In making the announcement, the company noted that seasonal shifts in coal shipments of Kansas City Southern Lines had a significant impact on first and second quarter 1990 revenue and profitability comparisons with the prior year.

First quarter 1989 coal tonnage and revenues were weak, followed by a strong second quarter, whereas in the current 1990 fiscal year, the opposite trend was experienced with coal tonnage and revenues being strong in the first quarter of 1990, followed by a decline in the second quarter.

On a consolidated basis, second quarter revenues rose $4.2 million over 1989 to $129 million, and operating income declined $4 million to $22.1 million from 1989. A 29 percent increase in financial services revenues and a 60 percent increase in financial services operating income partially offset revenue and operating income declines in transportation caused principally by the shifts in coal revenues noted above.

Earnings per share for the six months of 1990 were $1.73, up 8 percent over the $1.60 per share earned in 1989. However, earnings from continuing operations in 1990 were 10 percent below comparable results in 1989, which included a 40 cent per share one time gain on the partial sale of stock in Trailer Train Co.

Exclusive of the Trailer Train gain, income from ongoing operations of $1.73 per share in first half of 1990 rose 14 percent over 1989's level of $1.52 per share.

Consolidated revenues rose $10.9 million to $259.6 million over 1989. Operating income of $44.7 million rose 3 percent over 1989, excluding the $6.9 million one time pretax gain experienced in 1989 on the Trailer Train

transaction. Financial Services operating income from DST Systems Inc., Janus Capital Corp. and Southern Leasing, rose 36 percent to $18.2 million on a 21 percent rise in revenues to $86.6 million.

This activity partially offset a second quarter 1990 decline in transportation operating income. Operating results also benefitted from a reduction in general corporate expenditures, a decline in interest expense associated with lower debt levels and a lower effective income tax rate.

#90200b0311 07/19/1990 ~Business Wire

PHOENIX (JULY 19) BUSINESS WIRE - Arizona Commerce Bank (ASE:AZB) Thursday announced it lost $441,000 in the second quarter of 1990.

This compares with a loss of $1,390,000 in the same quarter of 1989 and a loss of $334,000 in the first quarter of 1990.

F. Lee Jacquette, chairman and chief executive officer, said the main factors in the 1990 losses were ongoing expenses from substantial loan recovery efforts combined with the heavy impact of foregone income on the large portfolio of nonaccrual loans.

Jacquette again emphasised that the bank can meet federal and state regulatory requrements only by returning to profitability, reducing the level of classified loans already identified by regulators and avoiding classified loans in the future.

Arizona Commerce Bank has offices in each of the three major cities in Arizona: Phoenix, Tucson and Mesa.

#90200b0323 07/19/1990 ~Business Wire

BEVERLY HILLS, CA (JULY 19) BUSINESS WIRE - International Lease Finance Corp. (NASDAQ:ILFC) Thursday announced that the special meeting of shareholders to consider the approval of the merger of ILFC with a wholly owned subsidiary of American International Group Inc. (AIG) has been scheduled for Aug. 31.

The record date for that meeting will be the close of business on July 27.

As previously announced, in connection with the merger, ILFC common shareholders will receive $32.50 in cash per ILFC common share or, if a shareholder elects, 50 cents in cash plus 0.375 shares of AIG common stock (after giving effect to the stock split of AIG common stock payable on July 23) per ILFC common share, subject to a maximum number of shares and certain other adjustments contained in the merger agreement.

If the shareholders of ILFC approve the merger at the Aug. 31 meeting, ILFC and AIG presently intend to consummate the merger on that day if all other conditions to the merger have been satisfied. If the merger is consummated on Aug. 31, holders of ILFC's warrants will be entitled to receive $8 per share subject to the warrant, net of the exercise price.

If the merger is consummated after Aug. 31, holders of ILFC's warrants will receive $6.40 per share subject to the warrant, net of the exercise price.

If the merger is consummated, holders of ILFC's 5-3/4 percent convertible subordinated debentures due 2001 (other than ILFC) will, after the date of the merger, be entitled to convert their debentures into $1,392.95 in cash per $1,000 principal amount of the debentures in lieu of ILFC common stock.

ILFC is the world's premier operating lessor/owner and remarketer of

advanced-technology jet transports.

#90200b0347 07/19/1990 ~Business Wire

HADDONFIELD, N.J. (JULY 19) BUSINESS WIRE - United Medical Corp.'s (ASE: UM) income from continuing operations for the quarter ended June 30 was $490,000, or 18 cents per share, versus $98,000, or 3 cents per share a year ago.

Revenue for the quarter increased 20 percent to $10,634,000 in 1990, compared to $8,841,000 in 1989. Included in 1989 results was income from discontinued oeprations of $510,000, or 18 cents per share, resulting in net income for the second quarter of 1989 of $621,000, or 21 cents per share, versus net income in 1990 of $490,000, or 18 cents per share on 2,934,000 shares and 2,778,000 shares, respectively.

Income from continuing operations for the first six months of 1990 was $895,000, or 32 cents per share, compared to $356,000, or 12 cents per share in 1989. Revenue for the same period was $21,178,000 in 1990, versus $18,367,000 in 1989, an increase of 15 percent.

Income from discontinued operations for the first six months of 1989 was $8,834,000, or $2.97 per share, and reflects the gain on the sale of Renal Care Centers Corp. Net income through June 30 was $895,000, or 32 cents per share in 1990, compared to $8,813,000, or $2.96 per share for the same period in 1989.

The quarter ended June 30 marks the eighth consecutive period that income from continuing operations has increased, compared to the previous year, and the 10th consecutive quarter of profitability.

Arthur Hicks, chief financial officer of United Medical, stated, ''this trend is a result for the consistent earnings results of UM's five operating units. We are well-positioned to take advantage of prospective opportunities in our industry and plan to continue growing and developing our existing businesses.''

As previously announced, UM declared a quarterly dividend of 5 cents per share of common stock payable Aug. 15 to holders of record as of July 30.

COLUMBUS, OH (JULY 20) BUSINESS WIRE - Partech Holdings Corp. (NASDAQ BSE:APHC) Thursday announced that it has ended negotiations relating to an agreement in principle with Intercontinental Enterprises Inc. (NASDAQ:ENTI) regarding a proposed issuance by Partech of its common stock and warrants with Intercontinental in return for Intercontinental common stock and cash.

Partech also announced in a related matter that it has ended negotiations with Blinder, Robinson & Co. for a financial services and advisory contract. Blinder, Robinson & Co. is an investment banking company and registered broker-dealer based in Englewood, Colo., and a wholly owned subsidiary of Intercontinental.

Partech is continuing to explore sources of capital to expand its business activities to include public income fund programs and aircraft acquisition and leasing. Partech, based in Columbus, is engaged primarily in the business of acquiring, managing, financing, refinancing and selling leased data processing and other capital equipment.

CLEVELAND (JULY 19) BUSINESS WIRE - The Lamson & Sessions Co. earned $1.8 million, or 14 cents a share, on sales of $84.6 million in the second quarter ended June 30, 1990, it was announced today by John B. Schulze, chairman and chief executive officer.

In the year-ago second quarter, the company earned $3.4 million, or 27 cents a share, on sales of $92.3 million.

''Sales and earnings continue to be adversely impacted by the general softness in the construction industry, a condition which now has extended into the usually strong Southern California and Southeastern marketing regions,'' Schulze said. Earlier, the company reported that its Industrial/Construction segment business in the Northeast and North Central markets was experiencing weakened demand for thermoplastic pipe and conduit.

Lamson & Sessions remains the major domestic supplier of thermoplastic pipe and conduit although competitive pricing strategies are depressing earnings as margins on some product lines continue to narrow, the executive said.

In the first half, the company earned $2.1 million, or 16 cents a share,

on sales of $159.8 million. In the year-ago first half, earnings were $6.8 million, or 54 cents a share, on sales of $180.0 million.

Lamson & Sessions is the leading domestic producer of thermoplastic electrical conduit and related fittings and accessories for the construction, power and communications industries, and a producer of thermoplastic sewer pipe. It is also a manufacturer of products for the transportation equipment industry.

#90200b0510 07/19/1990 ~Business Wire

BATAVIA, NY (JULY 19) BUSINESS WIRE - Graham Corp. (ASE: GHM) Thursday reported results for the second quarter ended June 30.

Sales for the quarter were $21,512,000 producing net income of $382,000, or 37 cents per share. Sales for the 1989 second quarter were $17,457,000 producing net income of $1,157,000, or $1.20 per share.

For the six months ended June 30, sales were $37,664,000 producing net income of $714,000 or 70 cents per share. For the six months ended June 30 sales were $31,653,000 producing $1,215,000, or $1.26 per share.

New orders for the 1990 second quarter were $19,645,000 compared to $22,300,000 for the 1989 second quarter. New orders for the first six months of 1990 were $34,867,000 compared to $39,520,000 for the first six months of 1989. Consolidate backlog on June 30, 1989, was $37,952,000 compared to $39,627,000 on March 31, and to $33,573,000 on June 30, 1989.

Commenting on these results, Frederick D. Berkeley, Graham's chairman and CEO, said, "The second quarter results were less favorable than we anticipated, due to production delays at our Cheltenham plant in the U.K., some of which will continue to have an impact on the third quarter.

"Nevertheless, we expect the year as a whole to be satisfactory, with the fourth quarter being on track. Based on our present backlog position and continuing strengths in Graham's principal markets, namely the chemical and petrochemical process industries and cogeneration power, and encouraging signs in the oil refinery market, we continue to be optimistic about Graham's future."

Berkeley also said, "In comparing 1990 results with those in 1989, it should be noted that 1989 net income did not carry normal income taxes

because of loss carryforwards. By contrast, 1990 net figures reflect payment of income taxes at the full applicable rates."

Graham designs and manufactures vacuum and heat transfer equipment for the process industries. The principal markets for Graham's equipment are the chemical, petrochemical, petroleum refining and electric power generating industries, including co-generation and geothermal plants. Other process industry markets served include the food and beverage industry, shipbuilding, steel mills and paper mills.

#90200b0511 07/19/1990 ~Business Wire

MERIDEN, CT (JULY 19) BUSINESS WIRE - Cenvest Inc. (NASDAQ:CBCT), the bank holding company for Central Bank, First Central Bank, and Meriden Trust & Safe Deposit Co. announced a loss for the quarter ended June 30, 1990 of $7,548,000 or ($1.93) per share, compared to net income of $865,000 or 22 cents per share for the quarter ended June 30, 1989.

The loss was the result of a special loan loss provision of $13,200,000, before adjustment for income taxes, taken in response to continued weakness in the Connecticut real estate market and as a result of recently concluded regulatory examinations.

For the six months ended June 30, 1990, the net loss was $6,957,000 or ($1.78) per share, compared to net income of $2,120,000 or 54 cents per share for the comparable period last year.

Cenvest's allowance for loan losses at June 30, 1990 was $15,642,000 after recognizing net loan losses during the quarter of $5,135,000. The allowance at June 30, 1990 was 2.13 percent of total loans compared to 0.95 percent at Dec. 31, 1989, Cenvest's fiscal year end. The allowance for loan losses was 65.04 percent of nonperforming loans at June 30, 1990 compared to 45.52 percent at Dec. 31, 1989.

Nonperforming assets were $33,470,000 at June 30, 1990 or 3.90 percent of total assets, up from $23,192,000 or 2.78 percent of total assets at year end 1989.

On June 26, 1990 in anticipation of the second quarter loss, Cenvest announced the suspension of the regular second quarter cash dividend.

Total assets were $858,347,000 at June 30, 1990, up $23,153,000 or 3 percent from Dec. 31, 1989 and up $54,993,000 or 7 percent from June 30,

1989. Cenvest's primary capital was $78,293,000 or 9.12 percent of assets at June 30, 1990. Primary capital, as defined by the Federal Reserve Board, is shareholders' equity plus the general loan loss allowance.

Primary capital on Dec. 31, 1989 was 9.21 percent of assets and on June 30 1989 was 9.34 percent of assets.

Cenvest banks serve the central Connecticut area with sixteen branches in eleven cities and towns.

#90200b0612 07/19/1990 ~Business Wire

LA HABRA, CA (JULY 19) BUSINESS WIRE - Landmark Bancorp and its wholly owned subsidiary Landmark Bank reported consolidated second-quarter earnings of $540,000, or 36 cents per share, and earnings for the six months ended June 30, 1990, of $1,008,000, or 67 cents per share.

The year-to-date earnings represent an 8-percent increase over the $932,000 reported for the same period in 1989. Revenue for the first six months increased 16 percent from $8,695,000 in 1989 to $10,070,000 in 1990. Loans grew 19 percent from $109,702,000 at June 30, 1989, to $130,842,000 at June 30, 1990. Deposits rose 14 percent during the same period to $166,119,000.

These increases brought the asset base to $181,922,000, or 14 percent, over the $159,944,000 reported in 1989. Landmark Bancorp has increased its shareholder equity to $14,843,000 at June 30, 1990, exceeding 8 percent of total assets. Net book value per share is $9.83.

Craig Collette, president/chief executive officer, said, ''We are pleased with the bank's ability to grow during a period of a softening economic conditions and negative news resulting from the S & L crisis.

''Even though higher cost of deposits reduced our margins, Landmark reported record earnings, higher capital formation and asset growth. At the same time, the bank maintains high loan quality, with a less-than-1-percent delinquency rate and a low loan charge-off rate.''

#90200b0618 07/19/1990 ~Business Wire

SARASOTA, FL (JULY 19) BUSINESS WIRE - OMNI Films International Inc. (NASDAQ:OFII) announced Thrusday that it has entered into an agreement for installation of a Motion Master theater in Japan.

The $2.4 million contract, inclusive of Magnavision Projection System components and film lease agreements, is the single largest contract in OMNI's history.

Delivery of the unit is scheduled for October 1990. As a result of this sale, contract sales backlog for fiscal 1991 beginning Oct. 1, 1990 is approaching $4 million.

Fred Hollingsworth III, president, stated, ''We are pleased to announce this contract which is more than double the size of our previous largest sale. We believe this demonstrates the continuing potential our company has for total growth in terms of sales and contract size. While we have just begun the fourth quarter of our current fiscal year, which is continuing to produce record sales and earnings, we fully expect fiscal 1991 to once again be a year of strong growth accompanied by record revenues and earnings.''

The Japanese group will operate its Motion Master theater at an amusement park that is currently under construction at Kure Portpialand, Japan. The amusement park will have a Spanish theme and the Motion Master theater will be installed in the hold of a ship that will be docked at the amusement park. This will be the sixth Motion Master theater to be installed in Japan.

Under terms of the agreement, OMNI will supply a complete Motion Master theater package, including theater design, hydraulically actuated motion seats, synchronization and show controls, projection screen, 70mm projecter, six channel surround sound, installation guidance and training of operating and maintenance staff. The agreement also includes the leasing of films produced by OMNI.

OMNI Films International specializes in the design and sale of advanced 70mm wide screen cinema entertainment systems. Omni also produces, distributes and licenses 70mm films for these systems. OMNI is traded on the NASDAQ system under the symbol OFII.

NASHVILLE, TN (JULY 19) BUSINESS WIRE - O'Charley's Inc. Thursday

announced its initial public offering of 2,500,000 shares of common stock at a purchase price of $9 per share.

Of the shares being offered 2,435,450 are being sold by the company and 64,550 shares are being sold by selling shareholders.

Net proceeds of the offering will be used by the company to repay bank debt and to finance development of additional restaurants. Alex. Brown & Sons Inc., J.C. Bradford & Co. and Morgan Keegan & Co. Inc. are managers of the underwriting syndicate.

O'Charley's Inc., based in Nashville, operates and franchises casual dining, full service restaurants, under the O'Charley's name, that are desinged to appeal to a broad range of customers. The restaurants, which emphasize consistently high quality food and customer service, feature a variety of menu items at moderate, value-oriented prices.

There are 20 company-operated and eight franchised O'Charley's restaurants operating in seven Southeastern states. Long-term objective of O'Charley's is to expand in selected markets in the South and Midwest, primarily through the development of additional company-operated restaurants. Ten additional O'Charley's restaurants, including three franchised restaurants, are expected to be open by the end of 1991.

The common stock will be traded in the NASDAQ National Market System under the trading symbol ''CHUX.'' A Registration Statement relating to these securities has been filed with the Securities and Exchange Commission and has become effective.

These securities are being offered only by means of a prospectus which may be obtained from Alex. Brown & Sons Inc., 135 E. Baltimore St., Baltimore, Md. 21202; J.C. Bradford & Co., 330 Commerce St., Nashville, Tenn. 37201 and Morgan Keegan & Co. Inc., 50 Front St., Memphis, Tenn. 38103.

TAMPA, FL (JULY 19) BUSINESS WIRE - Early this month, Pharmacy Management Services Inc. acquired ownership of Agar USA Inc., an Israeli company located in Vienna, Va. specializing in the sale and distribution of TENS and NMS electro-therapy equipment.

PMSI expanded its TENS marketing to the physical therapy clinics last year by establishing its Technical Medicine Division. The PMSI Technical Medicine Division focuses on the fast-growing physical rehabilitation and therapy clinic marketplace which is currently estimated at 43,000 clinics nationally.

The addition of the new business volume represents approximately a five percent increase in TMD's current business. The purchase of Agar USA's assets, including patient, clinic and dealer account listings and all inventory further enhances PMSI's Technical Medicine Division entry in this growing market.

#90200b0712 07/19/1990 ~Business Wire

STAMFORD, CT (JULY 19) BUSINESS WIRE - American Maize-Products Co. Thursday reported second quarter 1990 income from continuing operations of $4,657,000, or 70 cents per share, compared with $6,294,000, or 95 cents per share, in 1989.

Net income from the 1989 quarter was $5,784,000, or 88 cents per share, which included losses from discontinued operations of $510,000, or 7 cents per share.

Income from continuing operations for the six months ended June 30, 1990 was $7,924,000, or $1.19 per share, compared with $10,322,000, or $1.56 per share in 1989. Net income for 1989 was $7,922,000, or $1.20 per share, which included losses from discontinued operations of $2,400,000, or 36 cents per share.

The lower income from continuing operations was due to lower operating results in the Corn Processing Business and a lower ownership interest in the earnings of the company's subsidiary, American Fructose Corp. Operating profits in the Tobacco Business were ahead of a year ago.

Sales from continuing operations were $129,438,000 in the current quarter compared to $138,585,000 a year ago. Sales for the six months ended June 30, were $244,619,000 compared to $257,703,000 in 1989.

HUNTSVILLE, AL (JULY 19) BUSINESS WIRE - Thursday, Intergraph Corp. (NASDAQ:INGR) announced that Mexico City, Mexico, has awarded the company $1.5 million contract for expansion of the city's geographic information system (GIS).

Following a competitive benchmark, Intergraph was selected for demonstrating the best integrated solution for the city's large data volume and multiple municipal applications.

Under the contract terms, Intergraph will supply 20 InterPro workstations running Intergraph's MicroStation GIS Environment (MGE) software. The city's existing land records will be loaded into an Oracle relational database residing on an Intergraph InterServe 3005

Using its existing VAX-based Intergraph system, the Mexico City Cadastral Department captured data for 2.2 million parcels on 2,700 maps. With the initial $800,000 installation in 1985, the city was able to achieve a return on investment in one year.

The expanded system will enable the city to complete data input for 300,000 remaining parcels and distribute processing throughout departments including Property Assessment, Planning, Transportation, and Utilities.

Background Information:

Intergraph Corp. offers a product line ranging from microprocessors to workstations, plus complete application-specific systems for geographic information systems (GIS), mapping, and energy exploration and production applications.

Founded in 1969, Intergraph serves cities and municipalities, natural resource agencies, map producers, defense agencies, state and federal governments, universities, and private firms with its GIS/mapping and energy solutions.

Intergraph also provides systems for computer-aided dispatch, utilities, facilities management, architectural design, engineering, construction, manufacturiing, and publishing. A member of the Fortune 500, Intergraph is the world's largest company dedicated to developing and manufacturing interactive computer graphics systems.

#90200b0715 07/19/1990 ~Business Wire

TOLEDO, OH (JULY 19) BUSINESS WIRE - Owens-Corning Fiberglas Corp. (NYSE:

OCF) reported results today for the second quarter and six months ended June 30, 1990.

Net income for the quarter was $39 million, or $.92 per share, compared to $54 million, or $1.28 per share, for the same 1989 period.

Consolidated net sales for the 1990 second quarter were $771 million versus $721 million for the comparable period in 1989. Results of Fiberglas Canada are included in 1990, but not in the comparable 1989 periods.

Owens-Corning said that most areas of its Construction Products businesses were down, consistent with declining new housing and commercial construction in the U.S. and Canada. However, sales of insulation and roofing products for home improvement and remodeling are being sustained at year ago levels.

Industrial Materials Group sales for the second quarter 1990, which include reinforcements, yarns and resins, were up slightly due to the addition of results of Fiberglas Canada. The company said that demand for industrial materials is showing weakness both in North America and Europe.

Second quarter 1990 sales were ahead of expectations in Brazil but substantially lower than the exceptional first quarter performance. The company is cautious about the prospects in Brazil due to the uncertain effect of the sweeping economic changes being adopted.

Owens-Corning said inventories of finished goods were up $52 million from the end of 1989, which is the company's normal seasonal pattern to service peak demand in the last half of the year. The company will continue to keep inventories under tight control.

Net income for the first six months of 1990 was $71 million, or $1.68 per share. This compares to $89 million, or $2.10 per share, in the first half of 1989. The 1990 results include an extraordinary charge of one million dollars or $.03 per share, for the early retirement of debt.

Consolidated net sales for the 1990 first half were $1.5 billion compared with $1.4 billion for the same period in 1989, which did not include sales of Fiberglas Canada, Inc.

#90200b0716 07/19/1990 ~Business Wire

VANCOUVER, BC (JULY 19) BUSINESS WIRE - Miramar Mining Corp. has received an independent consulting geologist's report that substantially increases the potential resource base at the Flowery Mine.

The report was prepared by John Schilling, a mining geologist with 40 years experience as an economic geologist and recently retired from 14 years as the head of the Nevada Bureau of Mines and Geology, the Nevada state geologic survey.

The proven reserves lie mostly in the Lady Bryan and Berry areas. The Lady Bryan is the area currently being actively open pit mined, while the Berry is a nearby strike extension of the Lady Bryan area.

Proven reserves are defined by sufficiently closely spaced drilling and sampling to give a high degree of confidence in the continuity and grade of the block. These two areas also contain additional reserves in the probable category (2.9 million tons), with the balance of the probable reserves lying in the Bonanza zone (2 million tons).

The Bonanza zone was the target of a drill program by the Company in December 1989. Probable reserves are defined by less closely spaced drilling, but where there is little risk of failure of continuity.

Possible reserves lie both on strike and down dip of all the above mentioned areas, as well as in the Josephine and North Extension areas. The possible reserves are in mineralized areas widely spaced drill hole, sampling and some geophysics and geochemistry, with reasonable projections based on the geologic knowledge available.

The large inferred resource is based on undrilled, unsampled speculative potential based solely on geologic data, including geophysical, geochemical and/or structural factors.

One such area is the ''Connection'', linking the Berry and Bonanza area, where the Flowery Lode has been traced geologically and by geochemistry, but is largely unexplored and is poorly understood at this stage. Several other similar areas remain to be explored.

This significant increase in the reserve potential of the Flowery Mine, combined with the fully permitted, operating status of the mining operation, considerably enhances the value of Miramar's 60 percent share of the Flowery Mine.

#90200b0717 07/19/1990 ~Business Wire
BOISE, ID (JULY 19) BUSINESS WIRE - TJ International Inc. (NASDAQ: TJCO), a Boise-based manufacturer of specialty building materials, Thursday announced 3 percent higher sales and 11 percent lower earnings for the second quarter of 1990.

Sales increased to $98,185,000 compared with sales of $95,384,000 in 1989's second quarter. Net income dropped to $5,287,000 vs. the $5,913,000 earned during the same period in 1989. Net income per share was down 11 percent to 73 cents per share from second quarter 1989's 82 cents per share.

Results for the first half of the year were similar. Sales improved 6 percent from $163,229,000 in 1989's first half to $172,555,000 in the first six months of 1990. Net income was off 12 percent from $7,902,000 in 1989's first half to $6,917,000 this year. Earnings per share declined 12 percent from $1.10 to 96 cents per share during the first six months of this year.

Walk Minnick, TJ International chief executive officer, characterized these results as, ''Disappointing, but respectable given the softness this year in new residential construction.'' Minnick believes the new housing market is headed for its fourth annual decline in a row and predicted little improvement for the balance of the year in either the United States or Canada, the company's two primary markets. He blamed the extremely depressed market conditions on high mortgage rates in Canada and the continued shock waves thrown off in the United States by attempts to straighten out the savings and loan scandal.

According to Minnick, ''Many builders and developers simply can't find construction financing -- at any price. TJ International's business in the east, particularly that of its Dashwood window subsidiary in eastern Canada, has been especially hard hit.''

Looking to the future, Minnick indicated that, despite the depressed markets, he believes continuing growth in market share and efficient manufacturing operations may yet make it possible for the company to achieve an ''up'' year in terms of sales and earnings.

#90200b0718 07/19/1990 ~Business Wire
HOUSTON (JULY 19) BUSINESS WIRE - Seitel Inc. (ASE:SEI) Thursday reported

record revenues and earnings for the second quarter and first half ended June 30.

Revenues for the first half of 1990 were a record $10,853,166, a 34 percent increase over the revenues of $8,105,431 reported for the first half of 1989. Net income for the first half was a record $2,176,712 or 47 cents per fully diluted share, compared with 1989 first half net income of $1,359,109 or 34 cents per fully diluted share, despite an increase in the weighted average number of fully diluted shares outstanding from 4,013,880 to 4,608,276.

Revenues for the quarter ended June 30, 1990 reached a second quarter record of $5,996,852, a 35 percent increase over second quarter 1989 revenues of $4,440,669. Net income for the 1990 quarter was a record $1,233,381, or 26 cents per fully diluted share (4,828,612) compared with $714,819, or 17 cents per fully diluted share (4,139,295) in 1989.

Seitel Inc. is engaged in the development of a proprietary seismic data bank and arranging the acquisition, marketing and brokering of seismic data.

PROVIDENCE, RI (JULY 19) BUSINESS WIRE - James H. Dodge, president and chief executive officer of Vermont Gas Systems, Thursday was named president and chief executive officer of Providence Energy Corp. (AMEX:PVY) by its board of directors.

Providence Energy is the parent of Providence Gas Co., Rhode Island's largest natural gas distributor, with 700 employees serving more than 150,000 customers.

Dodge, 50, who will begin his new duties on August 20, was chosen after a year-long search by the board of directors. He will be taking over the role currently handled by Louis R. Hampton, retired president and chief executive officer, who returned in that capacity temporarily following the resignation of William S. LaLonde in April 1989. Hampton will remain as chairman of Providence Energy Corp.

A long-time New England resident, Dodge became president and chief executive officer at Vermont Gas in 1984. He had previously served as

vice president for planning from 1978 to 1983 for Eastern Gas and Fuel Associates, Boston, and as vice president and controller at Boston Gas Co. from 1976 to 1978.

Dodge also created and chaired the Champlain Pipeline, one of the two major natural gas transmission projects expected to bring Canadian gas supplies to the Northeast within the decade.

Dodge received his bachelors and masters degrees from the University of Michigan and has taken advanced courses in management development, planning, marketing, and computer management at Harvard, Northeastern University, and Boston University, among others.

He has also been active in community affairs, having served as chairman and director of the Chittenden County (VT) United Way; director of the Champlain Valley Crimestoppers; and director of Associated Industries of Vermont. He also serves on the board of directors of The Howard Bank, Burlington, VT.

Dodge is currently chairman and director of the New England Gas Association; member of the American Gas Association; and member of the Guild of Gas Managers.

He is married and has three children.

Providence Energy utility subsidiaries provide natural gas service to approximately 154,000 customers in Providence, Newport, and 22 other cities and towns in Rhode Island and nearby Massachusetts. In addition, Providence Energy owns Newport America Corporation, which operates five non-utility subsidiaries with interests in energy-related activities.

#90200b0722 07/19/1990 ~Business Wire

ATLANTA (JULY 19) BUSINESS WIRE - First Financial Management Corp. (NYSE:FFM) Thursday announced the signing of a definitive agreement to acquire Zytron Corp., a wholly owned subsidiary of The Dun & Bradstreet Corp., for $82.5 million in cash.

The transaction is conditional upon applicable regulatory approval. Zytron headquartered in Menlo Park, Calif., is a leading provider of computer output micrographics and other data imaging services and products to a

broad customer base.

Zytron had gross revenues of approximately $75 million in 1989, of which 80 percent represented service revenues, with the balance in sales of equipment and supplies. Zytron is the second largest provider of computer output services in the industry and serves 23 major geographic markets across the United States.

In addition to computer output microfilm, Zytron also offers laser printing services, specialized printing and mail services, source document microfilming, film processing, microprinting and sells micrographic equipment and supplies.

The Dun & Bradstreet Corp. is the world's largest marketer of business information and related services with worldwide operating revenues of $4.3 billion in 1989. Dun & Bradstreet announced that it was seeking a buyer for Zytron on April 11.

FFMC is an information services company which offers a broad range of data processing and related services to a large and diverse customer base. The company provides products and services to financial institutions, retail merchants, governments and other industries.

It is a leader in data imaging, micrographics, electronic data base services, and health and pharmaceutical claims processing and is one of the largest merchant credit card processors in the country.

FFMC also owns Georgia Federal Bank FSB, the largest savings institution and one of the largest retail banks based in Georgia, and its subsidiary, First Family Financial Services, a major regional consumer finance company. Its common stock is currently traded on the NYSE under the symbol FFM. Its debentures are quoted through NASDAQ under the symbol FFMCG.

#90200b0724 07/19/1990 ~Business Wire

FRAMINGHAM, MA (JULY 19) BUSINESS WIRE - Dennison Manufacturing Co. Thursday announced its sales and earnings for the second quarter of 1990.

Net sales for the second quarter ended June 30, 1990 were $195.6 million

compared to $196.6 million in 1989, and net earnings were $4.1 million ($.26 per share), compared to $10.2 million ($.64 per share). For the first six months of 1990 net sales were $374.4 million vs. $376.9 million in 1989, while net earnings for the period were $6.2 million ($.38 per share) compared to $16.4 million ($1.03 per share) last year.

Included in the current quarter's results is a provision in the amount of $2 million to increase reserves for environmental issues at several of the company's facilities and a provision in the amount of $400 thousand for costs incurred during the quarter related to the company's proposed merger with Avery International Corp.

On a combined basis, these provisions reduced net earnings by $1.4 million ($.09 per share). The company also realized an extraordinary gain of $400 thousand ($.03 per share) from the redemption of SFr 13.8 million of its long-term Swiss franc debt.

Commenting on these results, Nelson S. Gifford, chairman, said, ''The earnings recovery from the very depressed level of the first quarter was encouraging and in line with earlier expectations. While the company's domestic business continues to be depressed by sluggish market conditions, our downsizing and early retirement programs, implemented over the last six months, are beginning to yield positive results. Our non-U.S. businesses are performing ahead of expectations and last year's levels. We expect this trend will continue.''

Dennison has determined that holders of record of outstanding shares of Dennison common stock at the close of business on July 23, 1990 will be entitled to vote on the proposed merger with Avery at the special meeting of Dennison stockholders called for Sept. 11, 1990. The company expects to distribute definitive proxy materials relating to the special meeting at the end of July.

Dennison is a diversified ''Fortune 500'' manufacturer serving worldwide markets for stationery and office supplies for use in business, school and home; printing systems and fastener products for identification and control; and package decoration systems and materials.

#90200b0727 07/19/1990 ~Business Wire

KANSAS CITY, MO (JULY 19) BUSINESS WIRE - Revenues and profits of La Petite Academy in the second quarter ending June 30 continued their upward course, reflecting increases in operating and profit margins compared to the prior year.

Net income in the second quarter increased to $2,512,000, equal to 16 cents a share compared to $2,070,000, or 13 cents a share in the like 1989 period, a gain of $442,000, or 21.4 percent.

Revenues in the second quarter amounted to $51,036,000, up from $43,351,000 a year earlier, an increase of $7,685,000, or 17.7 percent. Expenses as a percentage of revenue decreased to 91.2 from 91.8 in the same 1989 period. The operating margin of 8.8 percent compared to 8.2 percent a year earlier. The operating income was $4,484,000 against $3,551,000, an increase of 26.3 percent.

Net earnings for the first half of 1990 were $5,181,000 compared to $4,106,000 a year before, a gain of $1,075,000, or 26.2 percent. The earnings were equal to 33 cents a share, based on 15,898,505 shares outstanding, compared to 26 cents a share on the 15,880,185 shares outstanding the year before, an increase of 26.9 percent.

For the six months revenues were $100,935,000 compared to $85,342,000, a gain of $15,593,000, or 18.3 percent. Expenses were 91.1 percent of revenues, down from 91.6 percent a year earlier.

The operating income was $9,019,000, equal to an 8.9 percent operating margin, compared to $7,140,000 of operating income, equal to an 8.4 percent operating margin a year ago.

In June 1990, the Internal Revenue Service asserted a deficiency against the company for federal income taxes for 1984 and 1985. La Petite paid $863,000, which included a tax deficiency of $532,000 and accrued interest of $331,000.

This interest was charged to expense in the second quarter. The company has provided adequate tax reserves to cover the proposed tax deficiency. The company intends to vigorously protest the tax deficiency. However, at this time, the ultimate resolution of the matter cannot be determined.

As of June 30, 1990, La Petite had an enrollment of about 80,000 children in its 735 child care centers located in 30 states. The company entered the state of Pennsylvania with a corporate care center in Lansdale, a suburb of Philadelphia.

#90200b0729 07/19/1990 ~Business Wire

TUCSON, AZ (JULY 19) BUSINESS WIRE - Sierra Tucson Companies Inc. (NASDAQ:STSN) Thursday announced its unaudited results of operations for the second quarter ended June 30.

Revenues for the quarter ended June 30, 1990, are $7,088,000 vs. $4,134,000 for the quarter ended June 30, 1989. Net income for the quarter ended June 30, 1990, is $1,478,000, or 21 cents per share, vs. $713,000, or 13 cents per share, for the second quarter of 1989.

The results reflect an increase in net income per share, from 13 cents per share for the second quarter, 1989, to 21 cents per share for the second quarter this year. Earnings growth was a result of increased patient demand and daily rate increases.

William T. O'Donnell Jr., president and chairman of the board of Sierra Tucson Companies, attributed the continued demand for services to the company's commitment to providing quality, comprehensive mental health care.

Sierra Tucson is dedicated to providing the highest level of care to treat addictions to drugs such as alcohol and cocaine, and mental, emotional and behavioral disorders at its facilities in Tucson, Ariz., and in Garmisch, West Germany.

#90200b0734 07/19/1990 ~Business Wire

PAWTUCKET, RI (JULY 19) BUSINESS WIRE - Hasbro Inc. (ASE:HAS) Thursday reported its results for the second quarter ended July 1.

Revenues were $277,291,000, compared to $301,373,000 in the second quarter of 1989. Net earnings for the quarter were $8,725,000, down from $18,155,000 last year. Earnings per share were 15 cents compared to 31 cents a year ago. The weighted average number of common shares outstanding was 58,326,000 compared to 59,012,000 a year earlier.

For the first half of 1990, revenues totaled $578,443,000, compared to $589,684,000 in 1989. Net earnings for the six months were $28,156,000 or 48 cents per share while for the same period of 1989, earnings were $36,882,000 or 63 cents per share. The weighted average number of shares outstanding was 58,761,000 for the first half of 1990 compared to 59,008,000 the prior year.

''Both revenues and earnings are consistent with our estimates as reported last month in a Dow Jones release,'' said Alan G. Hassenfeld, chairman and chief executive officer. ''While our European units are enjoying continued strong levels of revenues and earnings, both in U.S. dollars and their local currencies, our domestic units have not fared as well,'' Hassenfeld added.

He concluded, ''If anticipated improvements in customer order trends in the second half of the year occur and there is a positive response to new promotional products being shipped in the third quarter, we believe 1990 full year results will approximate those of 1989.''

#90200b0736 07/19/1990 ~Business Wire

BOSTON (JULY 19) BUSINESS WIRE - Digital Equipment Corp. Thursday highlighted the use of its software product BASEstar as a key element in a live discrete manufacturing demonstration which has been running on the floor of DECWORLD'90 this month at the World Trade Center.

Continuing on display through August 1, this Flexible Work Cell demonstration features the integration of robots, programmable controllers and applications through BASEstar software and the Network Application Support (NAS) environment for manufacturing.

It has proven to be one of the most notable customer attractions on the floor of DECWORLD'90.

This manufacturing integration environment is also being stressed at many of the DECWORLD'90 seminars, where customers are able to get a more detailed understanding of BASEstar through an interactive workshop which

has been operational since DECWORLD opened on July 9. BASEstar provides integration facilities for highly automated assembly, fabrication, and/or material handling applications for manufacturing operations - especially those which are heavily dependent on programmable controllers.

Digital officials noted that BASEstar has been provided for several years as a service ''ASSET'' offered by Digital, and over this period it has developed a sizeable installed base at many of Digital's customer sites around the world.

Because of this significant installed base and an expanding demand from customers, Digital today formally announced support for BASEstar as a standard corporate product. Support is provided by Digital's worldwide service organization.

BASEstar is a software platform designed to facilitate the integration of manufacturing equipment and applications, accelerate the development of integrated manufacturing systems, and provide a platform for the consistent development of manufacturing applications.

BASEstar is designed for use in a distributed VAX processing environment, and offers application integration features such as the ability to collect manage, and distribute plant data, automatically notify applications of critical changes in plant information, and synchronize the execution of manufacturing applications.

Digital officials noted that BASEstar lowers development and maintenance costs over the life of a project through its common execution environment.

This provides services for data management, device access, messaging, and application control. And, Digital officials stressed, these services are written, maintained, updated, and supported by Digital.

Bob Burke, Digital's Vice President of the Eastern Manufacturing Digital Customer Center (DCC) in Detroit, explains that BASEstar has enabled him to achieve high customer satisfaction in complex manufacturing environments.

Digital Equipment Corp., headquartered in Maynard, Mass., is the leading worldwide supplier of networked computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desktop to the data center.

#90200b0741 07/19/1990 ~Business Wire

DAYTON, OH (JULY 19) BUSINESS WIRE - The Reynolds and Reynolds Co. (NYSE:REY) Thursday reported sales for the third quarter ended June 30 of $149.4 million.

Sales for the same period last year were $146.8 million. Net income was $6.4 million or 60 cents per share, compared with $5.6 million or 52 cents a year ago.

For the nine months, sales were $439.8 million compared to $452.3 million last year. Net income was $19 million or $1.79 per share compared to $20.3 million or $1.88 per share last year.

The business forms segment reported sales of $85.6 million for the quarter compared to $85.9 million a year ago. Operating income for the segment was $4.5 million vs. $3.4 million last year. Sales for the computer systems segment for the quarter were $63.8 million, compared to $60.9 million last year. Operating income was $7.5 million vs. $8 million last year.

David R. Holmes, president and chief executive officer, said, ''We are pleased with our performance considering the current conditions in the automotive industry. Car unit sales are well off manufacturers' estimates and in some regions dealers are experiencing significant difficulties.

''Despite these challenging times for car dealers, we are increasing market share and competitive system knock-outs as the acceptance of our ERA in-house computer system increases. Sales for our automotive computer systems exceed our performance from a year ago. However, the extremely competitive nature of the market has squeezed our profit margins.

''While sales of automotive forms have not grown, our profitability remains strong. Our major challenge on the business forms side remains our general printing unit. Profit levels, while improved over last year, continue below our targets. We are taking measures to improve profitability. There is no question that industry conditions and the overall economic climate are having its impact on our general printing business.

''Our balance sheet and cash flow remain strong. We expect performance in the fourth quarter will continue to be good despite the challenging environment.''

Reynolds and Reynolds, headquartered in Dayton, is a major supplier of information processing systems, including business forms and computer systems to automotive, professional, medical and general business markets.

CINCINNATI (JULY 19) BUSINESS WIRE - Omnicare Inc. (NYSE:OCR) Thursday announced that for the quarter ended June 30, 1990, earnings per share from continuing operations were up 57 percent, net income from continuing operations increased 40 percent and sales rose 34 percent.

Earnings per share from continuing operations for the three months ended June 30, 1990, were 11 cents as compared with 7 cents earned in the like period of 1989. Net income from continuing operations totalled $959,000 vs. the $685,000 earned in the prior-year quarter. The average number of shares outstanding for the second quarter of 1990 of 8,746,000 was 7 percent lower than in the prior year quarter owing to the company's stock repurchase program. Sales for the second quarter of 1990 reached $26,265,000 as compared with the $19,539,000 recorded in the same period of 1989.

For the six months ended June 30, 1990, earnings per share from continuing operations of 18 cents were 38 percent higher than the 13 cents earned in the same period of 1989. Net income from continuing operations increased 27 percent to $1,583,000 from the $1,248,000 earned in the 1989 period. The average number of shares outstanding declined by 8 percent to 8,777,000. Sales for the first half of 1990 grew 27 percent to $50,724,000 from the $40,078,000 recorded in the first half of 1989.

In total, including discontinued operations, net income for the second quarter of 1990 of $959,000, or 11 cents per share, was essentially even with the total net income of $993,000, or 11 cents per share, earned in the comparable prior year period. For the year-to-date, an aftertax loss of $1,203,000, or 14 cents per share, for the 1990 period compares with net income of $1,966,000, or 21 cents per share, earned in the first half of 1989.

Income from discontinued operations in the 1989 quarter and the year-to-date period of $308,000 and $718,000, respectively, represent earnings from HPI Health Care Services Inc. prior to its divestiture Aug. 1, 1989, partially offset by losses from the Bunn/Xorbox Group prior to its divestiture in March 31, 1990. The 1990 first half loss includes the charge taken in the first quarter of $2,478,000 related to the Bunn/Xorbox divestiture.

Commenting on the results for the quarter, Joel F. Gemunder, Omnicare's president, stated, ''We are gratified that with the restructuring of Omnicare completely behind us, the company's full growth potential is now emerging as evidenced by our second quarter results.

''Our strong results for the second quarter and the first half are in large measure due to the excellent performance of our Sequoia Pharmacy Services Group which comprises our nursing home pharmacy businesses. Both sales and profit growth in the Sequoia Group have exceeded our expectations. Growth in the number of nursing home patients served by the Sequoia Group has doubled since the second quarter of last year attributable, in part, to two acquisitions in January and April of 1990 which together added approximately 6,200 patients.

''Equally important, however, substantial internal growth is being achieved. Excluding the incremental nursing home beds from acquisitions, the number of patients served has grown 17 percent since June 1989. Moreover, we have experienced a widening of our profit margins due largely to the introduction of infusion therapy programs earlier this year. Since January, we have begun providing sophisticated intravenous therapy services such as total parenteral nutrition, antibiotic therapy and intravenous therapies for pain management in the nursing home setting.

''Already infusion therapy services are contributing over 5 percent of monthly revenues and are expected to grow rapidly as hospital discharge planners seek a lower cost environment for the care of these patients.

''Our Veratex Group, Omnicare's largest operating group, generated strong sales growth in the second quarter; however, profit margins lagged somewhat due largely to the start-up expenses associated with the relocation of production for our Acco line of medical and dental gauze and cotton products acquired late in 1989. As scheduled, all Acco operations have now been fully integrated in our Lakeland, Fla., manufacturing facilities. As a result, greater operating efficiencies and lower manufacturing costs will be realized for the second half of 1990.

''With Acco sales continuing to build at a rate well ahead of our expectations, the widening of the profit margins will enhance the profit growth of the Veratex Group substantially for the balance of 1990 and beyond. Also during the quarter, we made a significant investment in our Veratex retail business with a 28 percent year-to-year increase in our telemarketing force. The efforts of these additional telemarketing representatives, combined with increased investments in marketing activities, will serve to enhance our future growth in the private practice and alternate care markets.''

Commenting on the outlook for Omnicare, Gemunder said, ''Our results for the second quarter demonstrate the pattern of growth the 'new Omnicare'

can achieve. We remain confident that the favorable trend in sales and earnings will continue for the balance of the year and beyond.''

Omnicare Inc., headquartered in Cincinnati, is a health care company with leading positions in medical and dental supplies for the private practice and alternate care markets and pharmacy management services for the long-term care market.

CHARLOTTE, NC (JULY 19) BUSINESS WIRE - Bowles Hollowell Conner & Co., a leading investment banking firm providing merger and acquisition and structured financing advisory services for middle-market transactions, Thursday announced the closing of a $165 million recapitalization and refinancing for CJC Holdings Inc. of Austin, Texas.

Purchased as an LBO in 1988, CJC Holdings is one of the nation's leading manufacturers of prestige wedding jewelry and college and high school class rings marketed under the ArtCarved, Keepsake and R. Johns brand names.

The original LBO was sponsored by The Sterling Group, a leveraged buyout firm in Houston that has completed numerous LBO transactions, including Cain Chemical and Fiber Industries.

The restructuring effort provides the company with additional operating capital and a more appropriate amortization of the company's senior debt, and also develops a layer of more permanent junior capital.

Bowles Hollowell Conner & Co. was successful in refinancing a $35 million revolving credit and letter of credit facility, restructuring $80 million of existing senior term debt, negotiating amendments to $35 million of junior securities and placing $15 million of subordinated debt in the private capital markets.

Texas Commerce Bank and Banque Paribas acted as co-agents for the new revolving credit and letter of credit facility, while Equitable Capital Management Corp., Teachers Insurance and Annuity Association and Travelers Insurance were the lead lenders for the remainder of the debt capital.

CJC Holdings Inc. is one of the largest manufacturers and distributors of prestige class rings and bridal jewelry in the United States. The company has been a pioneer in the industry for more than 140 years, with such innovations as the double-ring wedding ceremony. CJC Holdings markets

class, wedding and engagement rings under the ArtCarved, Keepsake, R. Johns and Orange Blossom brand names.

Bowles Hollowell Conner & Co. is a leading investment banking firm and is considered an authority in all aspects of middle-market transactions.

LOS ANGELES (JULY 19) BUSINESS WIRE - Occidental Petroleum Corp. (NYSE:OXY) Thursday announced second quarter net income of $89 million (30 cents per share) on sales of $5.1 billion in 1990, compared with net income of $80 million (29 cents per share) on sales of $5.1 billion for the second quarter of 1989.

The 1990 results included an after-tax gain of $41 million from the sale of certain domestic oil and gas properties. The second quarter 1990 results also included a net extraordinary gain of $20 million (7 cents per share), primarily due to the federal income tax benefit realized from the application of a capital loss carry forward to offset capital gains.

The second quarter 1989 results included an extraordinary loss of $4 million (2 cents per share), which resulted from the early extinguishment of debt.

Oil and gas divisional earnings for the second quarter of 1990 were $48 million, compared with $26 million for 1989. The 1990 results were significantly impacted by lower worldwide oil and gas prices and lower domestic production rates.

This effect was more than offset by the gain on the sale of Occidental's Appalachian oil and gas properties, increased international crude oil volumes and a $10 million lower income tax allocation due to the reversal of certain tax reserves.

Chemical operations reported divisional earnings for the second quarter 1990 of $172 million, compared with $306 million for 1989. The 1990 earnings reflected lower margins in most major business units, primarily reflecting lower sales prices industry wide.

The effect of lower margins was partially offset by increased volumes and continued cost reductions. The second quarter 1990 earnings also benefited by an $11 million lower income tax allocation due to the reversal of tax reserves.

Natural gas transmission operations reported increased divisional earnings for the second quarter of 1990 of $51 million, compared with $21 million for 1989. Revenues declined in 1990 due to decreased throughput volumes as a result of warm weather.

The impact of lower volumes was more than offset by the income from the new Amarillo/Gulf transmission line connecting MidCon's two major systems, which was placed in service in February of this year, significantly lower operating and administrative costs, a $12 million (pretax) favorable contract renegotiation and a $6 million lower income tax allocation due to the reversal of tax reserves.

CAMBRIDGE, MA (JULY 19) BUSINESS WIRE - Following Thursday's announcement of the new Basestar network by Digital Equipment Corp., Gensym Corp. -- a Digital Complimentary Solutions House -- today announced a data interface between Basestar and Gensym's Real-Time Expert System, G2.

This new Gensym data interface, called G2/Bridge-Basestar, allows Basestar network users to create distributed, knowledge-based applications that utilize G2 for on-line monitoring and control. With G2/Bridge-Basestar, applications incorporating control systems, PLCs, databases, simulations, and other plant equipment can be controlled and optimized with the expert knowledge continuously applied by G2.

Basestar has Device Connect Modules available for distributed data sources and when used with DECnet allows real-time information to be accessed from remote areas. Gensym's G2 allows the customer's defined knowledge to be set up as a knowledge base, to be applied to the decision process, accessing data from Basestar, continuously and in real time.

G2 is a real-time expert system development and delivery environment that allows engineering professionals to create complex, time-critical applications for operations that require uninterrupted knowledge-based monitoring and control. It is designed to be used by engineers who are fluent in their area of expertise, but not skilled in computer programming.

G2 features dynamic models, graphics and structured natural language to allow engineers to quickly and easily develop powerful applications for on-line or off-line use. G2 combines real-time execution, heuristic and procedural reasoning, dynamic simulation, user interface, and database interface capabilities in a single, easy-to-use system.

G2 is available on Digital VAXstations (running VMS or Ultrix), DECstations (running Ultrix), as well as systems from other vendors.

G2/Bridge-Basestar has been in beta test in two installations; one at a major U.S. chemical company and the other at an Australian food processing company. In these applications, Basestar is used to acquire and maintain a real-time database, while G2 provides decision support, operator guidance and some high-level control.

Both appliations include plant-wide decisions, such as dynamic scheduling, to optimize the allocation of production resources. These applications require current information from a variety of sources around the plant and need to integrate data from many sources.

Founded in 1986 and based in Cambridge, Gensym Corp. is the leading supplier of real-time expert system products for commercial, industrial and scientific applications. The company's real-time expert system, G2, is currently installed wordwide at more than 400 customer sites in a range of applications, including aerospace, chemical plant control, manufacturing, petrochemical processing, network management, water treatment, robotics and other real-time, on-line tasks.

MURRAY HILL, NJ (JULY 19) BUSINESS WIRE - C. R. Bard, Inc. (NYSE-BCR) Thursday reported sales totaling $194.1 million, net income of $10.1 million and earnings per share of 19 cents for the quarter ended June 30, 1990.

These results are lower than the second quarter a year ago and reflect the impact of Bard's temporary withdrawal from the balloon catheter segment of the U.S. angioplasty market.

Net sales of $194.1 million compare with $201.0 million in 1989, a decline of 3 percent. Domestic sales were $137.3 million, down 8 percent; international sales were up 11 percent to $56.8 million. Net income for the quarter was $10.1 million or 19 cents per share,compared with $21.8 million or 39 cents per share a year ago, down 54 and 51 percent respectively.

''Our surgical products turned in a strong performance for the quarter, and our urological business is doing well,'' said George T. Maloney, Bard's President and Chief Executive Officer.

''We aredisappointed at not being in the U.S. balloon angioplasty catheter market but continue to work with the Food and Drug Administration to regain approval of our balloon catheters for the U.S. market. We cannot, however, predict when these approvals may be received.''

C. R. Bard, Inc., headquartered in Murray Hill, N.J., is a leading multinational developer, manufacturer and marketer of health care products.

FRANKLIN LAKES, NJ (JULY 19) BUSINESS WIRE - Becton Dickinson and Company reported Thursday that sales for its third fiscal quarter, which ended June 30, were $497 million, an increase of 12.1 percent over the $443 million reported a year ago.

Earnings per share for the quarter were $1.20 compared with $.99 from continuing operations a year ago.

Net income for the quarter was $47 million compared with $39 million a year ago from continuing operations.

''Our third quarter results continue to confirm that our annual rate of sales growth is accelerating and that operating margins continue to improve,'' said Raymond V. Gilmartin, president and chief executive officer of Becton Dickinson.

On a geographic basis, U.S. sales grew 8.0 percent to $283 million, while sales outside the United States grew 18.1 percent to $214 million.

On a business segment basis, diagnostic systems sales increased 12.1 percent to $210 million, and medical supplies and devices revenue grew 12.2 percent to $287 million.

For the nine months ended June 30, the company reported sales of $1.446 billion, a 10.2 percent increase over the $1.312 billion reported last year.

Earnings per share for the nine months were $3.07 compared with $2.60 a year ago from continuing operations.

Net income for the first nine months of the fiscal year was $120 million compared with $104 million from continuing operations last year.

Earnings per share for the three and nine month periods a year ago,

including income from discontinued operations and a gain on a sale of a business, were $2.19 and $4.00, respectively.

#90200b0768 07/19/1990 ~Business Wire
SOUTHBOROUGH, MA (JULY 19) BUSINESS WIRE - Bytex Corp. Thursday announced its financial results for the second quarter of 1990.

Revenues rose to $10.6 million for the fiscal quarter ended June 30, 1990, which represents a 15 percent increase over second quarter 1989 revenues of $9.2 million. Year-to-date 1990 revenues of $20.4 million increased 15 percent from 1989 year-to-date revenues of $17.8 million.

Net income of $984,000 for the second quarter of 1990 increased 38 percent from $711,000 reported for the second quarter of 1989. Year-to-date 1990 net income of $1,902,000 was 57 percent greater than net income of $1,209,000 for the six months ended June 30, 1989. Earnings per share were 16 cents and 12 cents in the second quarters of 1990 and 1989, respectively. Year-to-date earnings per share were 31 cents vs. 22 cents in the corresponding period of 1989.

1989 EPS reflect dilution from the one million share increase in outstanding shares as a result of the company's initial public offering completed in April 1989. 1989 results through April 13, 1989 were not impacted by this dilution. Gross margin was 61.2 percent in the second quarter and 61.9 percent year-to-date, a significant improvement over second quarter and year-to-date 1989 gross margin of 57.3 percent and 56.9 percent respectively.

Bytex President and Chief Executive Officer Jeffrey Goodman states, ''We are pleased with our results through the first six months of this year. We have met our financial goals during the second quarter and year-to-date. Our domestic market growth has continued to be strong. While our international orders improved over first quarter 1990 with the award of significant new order in West Germany, we are behind our 1990 plan. Activity in our international markets is increasing and we look forward to further improvements in the third quarter. We are also pleased with the new account penetration recorded during the second quarter. Thirty percent of the total orders received were awarded from new competitive accounts.''

''We have recently announced several strategic thrusts, including an expansion of our business focus into the local area network market. The acquisition of the assets of VANCE Systems Inc. signals our entry into

this market. Bytex will have the exclusive development, manufacturing and distribution rights for all VANCE Systems' products. The marketing of the VANCE LAN 1000 protocol analyzer is the first step in providing products that will improve the reliability and availability of critical LANs for our customers.

''In addition, we also announced the consummation of a value-added reseller agreement with Codex Corp. Under this agreement, Codex will sell Bytex products with Codex provided systems, thereby extending Bytex market reach into markets not currently covered.''

Cynthia Deysher, vice president and chief financial officer, commented, ''We have continued to experience favorable gross margin performance in the second quarter of 1990, reflecting continued focus on manufacturing efficiencies plus revenues with domestic content higher than plan. Our investment in product development increased to 17 percent of sales in the second quarter as we continued to fund key development projects, including those relating to the LAN product family.''

Bytex designs, manufactures, markets and supports fault-tolerant electronic matrix switching systems and related data communication products. Bytex is the leading worldwide supplier of electronic matrix switching systems with an installed base of more than 4000 switches. Bytex is traded on the NASDAQ National Market symbol BYTX.

NEW ORLEANS (JULY 19) BUSINESS WIRE - For the second time in nine months, Tidewater Inc. (NYSE:TDW) has announced a quarterly net profit.

First quarter consolidated net earnings of $6.3 million or 22 cents per

share on revenues of $55.8 million reflected the increased activity in the oil service market. This compares with a consolidated net loss of $5.1 million or 24 cents per share for the same period last year and a loss of $1.4 million or 6 cents per share in the fourth quarter of fiscal 1990.

The last profitable three month period recorded by Tidewater was the third quarter of fiscal 1990, with $.5 million or 1 cent per share posted Dec. 31, 1989.

Tidewater Chairman, President and Chief Executive Officer John P. Laborde said, ''Marine revenues were enhanced by the steady daily charter rates and utilization experienced by Tidewater's domestic marine fleet coupled with increased day rates and utilization in the company's international fleet.

''Performance of Tidewater's Compression Division has held steady. We are very pleased with the results and the progress we are making. Opportunities for growth, expansion and profitability for near and long-term are very real.''

The weighted average number of common and common equivalent shares outstanding was 28,617,741 compared with 22,428,895 outstanding shares a year ago.

Tidewater owns and operates one of the largest fleets of vessels serving the international offshore energy industry and owns and operates one of the largest fleets of natural gas and air compressors in the United States. The company also has modest interests in domestic oil and gas operations, real estate and insurance.

NEW YORK (JULY 19) BUSINESS WIRE - The Leslie Fay Companies Inc., announced Thursday that for its second quarter, which ended June 30, net sales were $166,302,000, compared to net sales of $154,965,000 reported for the comparable 1989 period.

Net income for the second quarter of 1990 was $1,089,000, or 6 cents per share, compared to net income of $309,000, or 2 cents per share for the 1989 second quarter.

For the 26 weeks ended June 30, net sales were $389,180,000, compared to $358,349,000 for the 1989 26 week period, and net income was $10,749,000 as against net income of $9,879,000 for the 1989 period. On a per share

basis, net income was 56 cents for the 1990 26 week period and 52 cents for the similar period in 1989.

John J. Pomerantz, chairman and chief executive officer of The Leslie Fay Companies Inc., stated, ''I am pleased to once again report a profit for our second quarter, which, since it falls between our summer and fall seasons, is the weakest of our four quarters.

''It is especially gratifying since a significant part of the increase in the results of the company during the 13 week period was attributable to the improvement in performance of our sportswear divisions. The programs we instituted in 1989 to accomplish this appear to be bearing fruit.''

Pomerantz also said, ''Leslie Fay continues in a strong financial position. At June 30, 1990, working capital increased to $178,183,000 from $136,963,000 at July 1, 1989, and stockholders' equity increased to $170,659,000 from $143,375,000.''

The Leslie Fay Companies Inc. is a leading manufacturer of women's dresses suits, blouses, sportswear and activewear. Its common stock is listed on the New York Stock Exchange under the symbol LES.

#90200b0790 07/19/1990 ~Business Wire

EATONTOWN, NJ (JULY 19) BUSINESS WIRE - Roberts Pharmaceutical Corp. (NASDAQ: RPCX) announced Thursday that it had signed a letter of intent to acquire Medical Market Specialties Inc., a privately owned pharmaceutical company based in Boonton, N.J.

Terms of the acquisition were not announced. However, Roberts' indicated that the purchase price consists of a combination of cash and stock plus contingency payments based on the achievement of certain objectives. Closing of the transaction is expected prior to the end of August subject to a mutually satisfactory stock purchase agreement and Board approval.

Dr. Robert Vukovich, chairman and president, stated that there are several significant strategic and financial advantages of the acquisition. ''MMS has pharmaceutical products on the market and under development in the endocrinology, urology, oncology and hematology fields. These areas of development and marketing are a direct strategic match with Roberts' interest, focus and expertise.

''In addition, MMS is a profitable company with annual products revenues

exceeding one million dollars. As a result, the combination of the two companies will improve Roberts' overall profitability.

''The sales growth of MMS products will be enhanced from the concentrated efforts of the Roberts current sales and marketing organization which will further add to the positive cash flow contribution resulting from the acquisition."

MMS was founded in 1985 by its present co-chairmen, two former Schering-Plough executives, Marvin Smolan and Joseph Ingolia. The company's primary products include PROGLYCEM (diazoxide), a currently marketed product which is used in the treatment of pediatric and adult hypoglycemia. Substantial synergistic effects are expected as a result of the Roberts current commitment to the endocrinology area.

A second product, ELMIRON (pentosan polysulfate sodium), is being sold under provisions of an FDA approved treatment protocol for use in the treatment of Interstitial Cystitis, a serious bladder disorder. The new drug application for ELMIRON is nearing completion and is expected to be filed with the FDA prior to the end of the year. Roberts has significant interest in urology as evidenced by its work in urinary incontinence.

The third product in the MMS product line is Cetiedil Citrate which is in late Phase II development. Cetiedil Citrate is intended for the treatment of patients with sickle cell crisis. This late stage development program should benefit from Roberts current development work in hematology.

Roberts Pharmaceutical Corp. is engaged in the development of drugs for use in the treatment of cancer, asthma, cardiovascular disease, endocrine disorders, acute and chronic pain, urinary incontinence and iron overload conditions in the United States and abroad.

#90200b0802 07/19/1990 ~Business Wire

BUFFALO, NY (JULY 19) BUSINESS WIRE - Chemical Fabrics Corp. (CHEMFAB) (OTC:CMFB) Thursday announced that its subsidiary, CHEMFAB New York Inc., located in Buffalo, has been awarded a $2 million contract by the Canadian Department of National Defense (DND) to design, fabricate and install 18 spherical radomes for its Precision Approach Radar system.

The 30 foot diameter ground-mounted radomes will cover and protect radar

antenna equipment located at Canadian military bases within Canada and in Germany. The Precision Approach Radar system locates and guides incoming military aircraft. Radome installation will commence in the fall and continue through mid-summer 1991.

CHEMFAB radomes were selected by DND due to their superior performance during extensive testing and evaluation against alternative radome systems. CHEMFAB's Raydel Microwave Transmissive Fabric, which will be used for the radome envelopes, was virtually transparent at the tested frequencies according to the Electronics Systems Group at DND.

Other performance features which contributed to the contract award include the long service life of CHEMFAB's radomes and their ability to accommodate Canada's climatic extremes and periodic high winds. The radomes are designed to withstand wind speeds up to 140 miles per hour.

CHEMFAB is an international advanced performance materials company that designs, manufactures and markets flexible composite products intended for use in extreme environments. Typical products consist of woven fiberglass or other high-strength reinforcements coated or laminated with thermoplastics and elastomers, and specialty flouropolymer films. Worldwide end-use applications are in industrial, architectural, communcations, military and protective clothing markets.

#90200b0806 07/19/1990 ~Business Wire

AUSTIN, TX (JULY 19) BUSINESS WIRE - The Continuum Company Inc. (ASE: CNU) announced that for the quarter ended June 30, net income was $1,485,000, or 17 cents per share, compared to a loss of $297,000, or 3 cents per share for the same quarter last year.

Per share amounts reflect the 2-for-1 stock split which was declared on May 17, for shareholders of record June 29. Revenues for the most recent quarter increased 25 percent from $17,309,000 to $21,574,000 compared to last year, entirely due to increased service revenues.

While service revenues grew approximately $4,300,000 compared to last year service expenses other than marketing and administration grew approximately $2,700,000, resulting in an increased contribution of $1.6 million, or 37 percent of the revenue increase.

Marketing and administration expenses decreased approximately $1.2 million due to the absence of legal expenses which were significant during the first half of last year.

For the most recent quarter compared with the quarter ended March 31, net income declined approximately $1 million, or approximately $1.5 million on a pretax basis, resulting from decreased license revenue of approximately $1.1 million.

Additionally, profits from service activities decreased approximately $400,000 while revenues increased approximately $900,000. Several factors caused expenses to increase more rapidly than revenues. In Austin, Continuum increased its computer capacity with an upgrade to an IBM 3090-500J. In Europe, the company moved to larger facilities in London and Paris, as well as new facilities in Frankfurt. Compensation expense increased with total personnel increasing from 807 to 836 during the quarter.

The Continuum Company is an international consulting and computer services firm based in Austin, Texas, serving the needs of life insurance and other financial services companies for computer software and services.

EVANSVILLE, IND. (JULY 19) BUSINESS WIRE - Old National Bancorp (NASDAQ:OLDB) Thursday reported an improvement in second quarter earnings vs. the first quarter results.

Net income per share increased 3 cents, from 44 cents to 47 cents. Net income in the second quarter was $5,223,000, compared to $4,950,000 in the first quarter.

On a year-to-year comparison, the second quarter net income of $5,223,000, or 47 cents per share, compared to $5,430,000 and 47 cents per share for the same period in 1989. The 3.8 percent decline in net income resulted from an increase in the provision for loan losses.

A relatively small number of under-performing loans led to the company's decision to increase the loan loss provision in 1990. The company was able to maintain level earnings per share as the result of a stock repurchase program which left about 4 percent fewer shares on the market. Year-to-date, earnings per share are down only 4.2 percent at 91 cents, compared to 95 cents in the first six months of 1989.

Old National Bancorp Chairman, Dan W. Mitchell, cited the work of the company loan administrators for their swift attention to the problem loans: ''Our under-performing loans, which were 2.3 percent of outstandings at year-end, are now down to 1.7 percent -- much closer to our historical performance.

''Our non-accrual loans, which accounted for $14 million of the under-performing category, have been out nearly in half since year-end. Continued progress in this area, along with reasonable loan growth, should put us on an improving earnings track for the remainder of 1990.''

Net income year-to-date is off 8.2 percent at $10,173,000 vs. $11,084,000 in 1989. Old National Bancorp plans to complete three pending mergers in the fall and expects the new banks to be included in company earnings by year-end.

#90200b0811 07/19/1990 ~Business Wire

HARTFORD, Conn. (JULY 19) BUSINESS WIRE - The Advest Group Inc. Thursday reported a loss for the third quarter ended June 30 of $.7 million or 7 cents per share compared with earnings of $2.4 million or 24 cents per share for the year earlier period.

For the nine month period losses were $4.4 million compared with a profit of $5.3 million a year ago.

Revenues for the quarter were $53.4 million down 3.3 percent from the $55.3 million reported during the same period last year. Revenues for the nine months were $156.8 million vs. $160.4 million for the year earlier period.

A major component of the revenue decline was a reduction in interest income of $1.4 million, resulting from higher levels of non-performing assets. Expenses increased $3.3 million or 6.3 percent primarily attributable to higher compensation and benefit costs associated with two recent acquisitions and charges associated with reserves.

Advest Bank posted a profit on an after tax basis despite charges of $1.5 million for non-performing loans and real estate owned.

A bright spot was also provided by Advest Inc., the broker/dealer subsidiary, which reported its first quarterly profit for this fiscal year.

The company continued to generate positive cash flow (losses reduced by amortization, depreciation and reserves for credit losses) of $2.8 million for the quarter and $10.8 million for the nine month period.

The Advest Group Inc. is a diversified financial services company. In addition to Advest Inc. and Advest Bank, its other subsidiaries include Lyons Zomback & Ostrowski, financial consultants specializing in the banking industry; Boston Security Counsellors, an investment management company; and Shore & Reich Ltd., a retirement plan administrator.

#90200b0814 07/19/1990 ~Business Wire

MONTGOMERY, Ala. (JULY 19) BUSINESS WIRE - Durr-Fillauer Medical Inc. (NASDAQ/NMS:DUFM) Thursday announced results for the second quarter and six months ended June 30, 1990.

Revenues for the second quarter of 1990 increased 18 percent to $204,959,000 from second quarter 1989 revenues of $173,345,000. Net income for the second quarter of 1990 was $4,131,000, an increase of 20 percent over net income of $3,448,000 earned in year-earlier period. The fully diluted per share earnings comparison for the second quarter was 40 cents versus 34 cents.

For the first six months ended June 30, 1990, revenues were $405,766,000, up 18 percent over revenues of $345,221,000 for the first half of 1989. Net income for the first half of 1990 was $7,699,000, an increase of 24 percent over net income of $6,234,000 earned in the similar period last year. The fully diluted earnings per share comparison was 75 cents versus 66 cents.

Commenting on the results, W.A. Williamson Jr., chairman, said, ''Our basic business trends remained strong for all three divisions during the first half. The two largest divisions, Wholesale Drug and Medical-Surgical, recorded first half sales increases of 21 percent and 9 percent, respectively.

''From a balance sheet viewpoint, we were able to achieve higher sales without increasing inventories and with only a slight increase in accounts receivable from last year end. This better asset utilization resulted in an improved return on total assets.

''The outlook is favorable and we expect the final two quarters of 1990 will continue to show strong growth,'' Williamson concluded.

Durr-Fillauer Medical Inc. distributes pharmaceuticals, drugstore sundries medical products, veterinary supplies and orthopedic devices. Durr-Fillauer's shares are traded in the NASDAQ National Market System with the Symbol DUFM.

#90200b0825 07/19/1990 ~Business Wire

EAST HARTFORD, Conn. (JULY 19) BUSINESS WIRE - First Federal Savings & Loan Association of East Hartford (NASDAQ: FFES) recorded net earnings of

$587,000, or $0.24 per share, for the second quarter ended June 30, 1990.

This represents an increase of 140 percent over the same period in 1989. Net earnings for the six-month period ending June 30, 1990 were $1,240,000 or $0.52 per share, a 67 percent increase over the first six months of 1989.

James D. Shelton, President and CEO, stated, ''Despite a most difficult economic environment, First Federal produced solid core earnings. The combination of more stable interest rates and controlled operating expenses generated improved results not only for the second quarter, but for the six-month period ended June 30.''

Shelton also announced that the Board of Directors declared a quarterly cash dividend of $0.07 per share to be paid to stockholders of record as of August 1, 1990 and to be distributed on August 10, 1990. This represents the eighth consecutive quarterly dividend paid by First Federal.

Additionally, the institution also announced that it has retained the services of Bear, Stearns & Co. Inc., as financial advisor to actively explore various alternatives to assist First Federal in maximizing shareholder value. The Association had announced in April that a shareholder initiative requesting the directors to initiate discussions with possible purchasers of First Federal had been approved by shareholders at the Association's annual meeting.

As a result of the shareholder initiative, the Board announced that it would undertake efforts to initiate the shareholders' petition and to continue to investigate other ways of maximizing shareholder value.

Shelton further stated, ''While we are pleased with the second quarter results, management and the board recognize that economic conditions in New England, specifically in the real estate sector, continue to deteriorate, and in this light First Federal constantly and diligently reviews its loan portfolio to identify any potential problems. At June 30 1990, non-performing loans stood at $1,943,000, 0.79 percent of total loans. While this figure remains at the same level as first quarter 1990, additions have been made to the institution's loan loss reserve bringing the total to over $500,000.''

First Federal is a $425 million institution with nine offices located in Greater Hartford, Conn.

#90200b0838 07/19/1990 ~Business Wire

NEW YORK (JULY 19) BUSINESS WIRE - Bassett S. Winmill, chairman and president of Bull & Bear Group Inc., Thursday announced the appointment of two Bull & Bear executives as co-chairman of the firm's investment policy committee.

Bull & Bear Group is a New York-based manager of 10 mutual funds and a discount brokerage service.

Winmill said that Brett B. Sneed, senior vice president, will be co-chairman with responsibility for equity portfolios and that G. Clifford McCarthy, senior vice president, will be co-chairman in charge of fixed income portfolios. Together, they will oversee the Bull & Bear mutual fund portfolios whose assets amount to almost $400 million.

Before joining Bull & Bear Group in 1988, Sneed was vice president of Morgan Stanley Asset Management Inc., and portfolio manager and member of the finance and investment committees of American International Group Inc. A Chartered Financial Analyst and member of the New York Society of Security Analysts, he holds B.A. and M.B.A. degrees from Columbia University.

McCarthy began his career with Salomon Brothers in 1956 and became a partner in 1968. He later directed Citicorp Investment Management's fixed income department. Before joining Bull & Bear Group earlier this month, he was associated with Balfour Maclaine Capital Markets as vice president and Printon, Kane & Co. as a general partner.

In both posts, he was responsible for high yield bond sales and trading. He is an alumnus of Wagner College and a member of the Bond Club of New York.

Bassett S. Winmill, chairman and president of Bull & Bear Group, said, ''The Bull & Bear funds and their shareholders will benefit from the experience and judgement of these investment professionals who have demonstrated strong leadership qualities and performance capabilities.''

Winmill pointed out that Bull & Bear Special Equities Fund, which has been under the guidance of Sneed since 1988, is ranked Number 1 for the year ended June 30, 1990, among all 134 capital appreciation funds according to Lipper Analytical Services Inc., a mutual fund rating concern.

NEW HYDE PARK, NY (JULY 19) BUSINESS WIRE - Bamberger Polymers Inc. (ASE:BPI) announced Thursday that a judge has signed an order that temporarily enjoins a group of 12 former employees who recently left the company's employ from approaching or soliciting other Bamberger employees, contacting, soliciting or accepting business from any of Bamberger's customers and using any confidential information obtained from Bamberger while in its employ.

Bamberger announced on July 16 that it had received notice from the group of employees, all involved in sales and sales management positions of Bamberger's domestic operations, that they have left the employ of the company. The order, filed and issued from the New York State Supreme Court, Nassau County, enjoins these former employees from the stated activities until a full hearing on a preliminary injunction can be heard on July 24.

Bamberger has also filed suit against the former employees, their newly-created business entity and their financial backers for alleged RICO violations, Breach of Contract, Tortious Interference with Contract and Business Relationships, Unfair Competition, Breach of Fiduciary Duty, Commercial Piracy and Fraud.

The suit seeks a preliminary and permanent injunction against these former employees and punitive damages. Bamberger alleges that the resigning employees breached their ethical and legal duties to the company and engaged in premeditated and pernicious actions to divert Bamberger's business, its customers, trade secrets and proprietary and confidential information. The company's legal counsel has been instructed to seek every available remedy and to seek damages to the fullest extent provable from all of the named Defendants.

Bamberger Polymers is an international plastics merchant involved in compounding, distribution and sales of thermoplastic resins, the raw materials for a broad range of plastic products.

NEW YORK (JULY 19) BUSINESS WIRE - American Express Co. reports second quarter results:

Highlights Travel Related Services, IDS Financial Services and American Express Information Services Corporation post record results.

Shearson Lehman Hutton returns to profitability with second quarter earnings of $51 million.

American Express raises $900 million from the sale of Common Shares: -- $600 million from this year's largest public equity offering to date -- $300 million from the pending sale of shares to Nippon Life

American Express Co. Thursday reported second quarter consolidated net income of $320 million, up from $316 million in last year's quarter. Earnings per share in both periods were $0.73.

Record second quarter performances by Travel Related Services (TRS), IDS Financial Services (IDS) and American Express Information Services Corporation (ISC) highlighted the period. TRS's net income rose 16 percent to $249 million. IDS's earnings rose 21 percent to $52 million. ISC posted net income of $22 million, up 25 percent.

Shearson Lehman Hutton (SLH) reported second quarter net income of $51 million, compared with $55 million last year. American Express Company's share of SLH's earnings was $26 million, taking into account preferred dividend requirements, compared with $34 million a year ago.

American Express Bank (AEB) posted quarterly earnings of $32 million, compared with $35 million a year ago. In addition, American Express Company's second quarter results include the costs of funding the $750 million convertible exchangeable preferred stock purchased from SLH at the end of the first quarter.

''Demand for American Express products and services remained generally strong in the face of softness in certain segments of the economy,'' said James D. Robinson III, chairman and chief executive officer. ''TRS, IDS and ISC once again achieved record results, while Shearson's progress in the second quarter is encouraging. A highlight of the quarter was the enthusiastic response to our public equity offering of 20 million Common Shares.''

As previously announced, American Express will issue a total of 25.4 million additional Common Shares in August 1990 in connection with the SLH merger, the $300 million sale of Common Shares to Nippon Life Insurance Co. agreed to in June, and the acquisition of Epsilon Data Management, Inc.

American Express Company's revenues for the 1990 quarter were $6.1 billion compared with $6.4 billion a year ago. The company reported a

consolidated net loss of $300 million, or $0.75 per share, for the six months ended June 30, 1990, compared with net income of $568 million, or $1.32 per share, a year ago. The 1990 results reflect Shearson Lehman Hutton's first quarter net loss of $915 million, which included a restructuring charge of approximately $630 million and a charge of $157 million representing the cumulative effect of a change in accounting for software development costs. Consolidated revenues for the first six months of 1990 were $12.0 billion, compared with $12.2 billion last year.

#90200b0847 07/19/1990 ~Business Wire

COSTA MESA, Calif.- (JULY 19) BUSINESS WIRE - Emulex Corp. (NASDAQ:EMLX), a leading supplier of system- and network-enhancement products for the computer industry, has introduced the Performance 8000 Communications Server, a product the company claims as its most significant new networking product since it entered the local-area network market in 1987.

Emulex addresses the Ethernet local-area network market with a product family of high-performance terminal servers and printer servers that extend the connectivity of both Digital Equipment Corp. and mixed-vendor computer systems.

According to Jon Asahina, Emulex's director of marketing for connectivity products, ''Introduction of this new server-product demonstrates Emulex's strategy to establish the industry's most complete line of the highest-performance local-area network servers. Based on dual microprocessors, Emulex terminal servers can't be touched in benchmark testing.

''The new Performance 8000 product expands this product family upwards to accommodate network access for up to 128 users and its modular design allows for operations to meet future requirements of networked systems.''

Asahina explained, ''This is the first step in fulfilling Emulex's goal of expanding the thrust of terminal servers beyond simply accommodating local-area network access for asynchronous terminals. The modular architecture offered in the Performance 8000 allows a variety of different types of communications interfaces to be added in the future by means of plug-in controller boards that could include interfaces to wide-area networks.

''This modular product forms the basis for future expansion to fulfill our customers' growing networking needs.''

The Performance 8000 offers a number of features critical for networking a large number of users through one ''box,'' including high-speed data-transfer rates, printer-sharing capabilities, redundancy in several component areas, extended security and a new ''hot swap'' capability which allows repair without shutting down the server.

It also offers the many ease-of-use features that have made Emulex's terminal servers leaders in the marketplace.

The performance 8000 is priced at $11,500 for the basic product with one 32-port terminal-controller board. Additional 32-port terminal-controller boards, each of which is equipped with an Intel 80286 microprocessor and an Emulex-proprietary microprocessor, are priced at $3,795. First-customer units have alrady been shipped and the product is expected to be in full production in August.

Emulex designs, manufactures and markets high-performance computer-enhancement products in the areas of system/network connectivity and storage control. Emulex addresses the DEC and IBM PC marketplaces, as well as markets for industry-standard SCSI and UNIX-based systems.

The company sells worldwide to end-users, OEMs, systems integrators and value-added resellers through direct sales and indirect distribution channels.

#90200b0848 07/19/1990 ~Business Wire

SUNNYVALE, CA (JULY 19) BUSINESS WIRE - Sunrise Technologies Inc. (NASDAQ:SNRS), Thursday reported revenues for the six months ended June 30 1990 of $2,591,401, a 186 percent increase over the $906,879 for the same period a year ago.

Net income for the period was $280,969, representing a 360 percent increase over the $61,075 for the comparable 1989 six months. This translated to 4 cents per share for the first six months, which compares to 1 cent per share last year.

For the three months ended June 30, revenues were $1,417,339, a 155 percent increase from $556,835 last year and net income was $ 162,069, a 303 percent increase over the $40,228 posted a year ago.

The company reported earning 2 cents per share for the quarter, and that compared to 1 cent for the second quarter of 1989.

''The increased revenues experienced during the second quarter reflect the continuing penetration of international markets as well as initial sales by the company's exclusive distributor to the United States dental market. Sunrise was awarded approval by the FDA for the sale of its dLase 300 for soft tissue applications on May 12, 1990, thus making it possible to market this breakthrough in the United States,'' said Arthur Vassiliadis, chairman.

Vassiliadis also said that Sunrise will submit the clinical results of the testing of its ophthalmic laser gLase 210, used in the treatment of glaucoma, to the FDA during the third quarter of 1990 under a 510K application for approval to market this unit in the United States.

#90200b0864 07/19/1990 ~Business Wire

LONDON (JULY 19) BUSINESS WIRE - LASMO plc, the international oil and gas exploration and production company, Thursday announced two transactions that add to the Company's North Sea exploration portfolio and substantially increase the Company's interest in UK Block 16/12a, which contains the Birch, North Birch and Elm oil discoveries.

In the first transaction, LASMO has agreed, subject to certain approvals, to purchase the share capital of Placid Oil Company (United Kingdom) from Placid Oil Company. The principal asset held by Placid UK is a 22.97 percent working interest in Block 16/12a which lies between the Brae and Miller Fields to the north and the

T-Block fields to the south.

Ten wells have been drilled in Block 16/12a resulting in three significant oil discoveries in the Elm, Birch, and North Birch fields. The discovery wells in each of these fields tested oil at rates of 4,288, 8,964 and 12,472 barrels of oil per day, respectively. Placid UK also owns interests in five other North Sea blocks which complement LASMO's existing interests in those, or adjacent, blocks.

In the second transaction, LASMO is to acquire the 26.74 percent working interest in Block 16/12a held by Occidental in return for a swap of acreage which includes 8.32 percent of LASMO's interest in the undeveloped Chanter Field in Block 15/17. The transaction is subject to the approval of the Secretary of State for Energy and to the rights of certain partners.

Together with its existing interest, the two transactions will increase LASMO's ownership in Block 16/12a to 58.85 percent. LASMO's interest in

the Chanter Field is reduced from 28.32 percent to 20.00 percent. LASMO views these transactions as a further step in rationalizing its North Sea interests following the major acquisition of Thomson North Sea for L358 million in March 1989. Two other deals were announced by LASMO earlier this year as part of this process.

John Hogan, Managing Director of LASMO North Sea, said: ''We are pleased to acquire more acreage and the additional exploration drilling potential that this offers. In particular, a number of oil discoveries exist in Block 16/12a which offer potential for early development and production through the extensive infrastructure in the area.

''LASMO already has interests in several blocks in this significant oil producing area and these transactions further consolidate that position. We look forward to an active appraisal drilling program to confirm the commercial status of these fields, and to exploration drilling on oil and gas prospects identified on the new acreage.''

LASMO plc, with operations in 16 countries, reported 1989 revenues of L263 million ($425 million at year-end exchange rates). LASMO shares trade on London's International Stock Exchange and in the US in ADR form (symbol 3LSMOY on the electronic OTC Bulletin Board). Shares are quoted on the SEAQ International System and prices may be accessed on the Reuters Equities 2000 service under the symbol LSMR.L, and on Quotron under the symbol LSMRU.EU. -0- Note: The full list of North Sea assets acquired through the purchase of Placid Oil Company (United Kingdom) includes:

Block No. Working Interest Acquired Pct. 16/12a(a)
22.97 29/1b 8.35 29/2a
14.90 47/25a(a) 38.88
48/21a(a) 38.88 211/8a
18.50 (a) Existing LASMO block

The acquisition increases LASMO's interests in Blocks 47/25a and 48/21a to 72.32 percent.

PROVIDENCE, R.I.- (JULY 19) BUSINESS WIRE - Old Stone Corp., a Providence-based $3.7 billion asset diversified financial services company Thursday announced that Edward J. Braks will join the company on July 30th as executive vice president and chief financial officer.

Braks is currently a partner in the international accounting firm of

Deloitte & Touche in New York City and has worked at Deloitte over a twenty-four year career. He has worked extensively with clients in the commercial banking and thrift industries.

Theodore W. Barnes, president and chief executive officer of Old Stone Corp., stated, ''We are very fortunate in having someone of Ed Braks' stature join Old Stone at this time, in the midst of our restructuring efforts. His background and knowledge of the financial services industry will be most helpful to us as we work through the difficult issues ahead.''

Braks is a graduate of Manhattan College and a member of the American Institute of Certified Public Accountants, the Savings Bank Association of New York State, and the Institute of International Bankers. Braks and his wife will be moving to Rhode Island in the near future.

Braks replaces Thomas F. Hogg as chief financial officer. Hogg will remain as executive vice president and treasurer of Old Stone Corp. He will continue to direct the corporation's strategic planning and asset/liability management functions.

In addition, Hogg will be devoting considerable time to Stone Capital Partners, a limited partnership to be formed for the purpose of acquiring, recapitalizing and eventually selling thrift institutions which have been acquired by the Resolution Trust Corp.

''This strengthening of our senior management team and shift in responsibilities will be a great help as we take on new challenges,'' said Barnes.

Hogg is a graduate of Brown University and received an M.B.A. from the University of Rhode Island. He, his wife and his four children reside in Cranston, R.I.

Both Braks and Hogg will report to Barnes.

#90200b0877 07/19/1990 ~Business Wire

COLUMBUS, OH (JULY 19) BUSINESS WIRE - American Electric Power Co. (NYSE:AEP) today reported second quarter earnings of $112,291,000, a decrease of 13.1 percent from the $129,288,000 earned in 1989.

Earnings per share for the quarter were 60 cents, a decrease of 7 cents or 10.4 percent from the 67 cents earned in 1989.

For the 12 months ended June 30, earnings decreased 4 percent to $597,005,000 from $621,700,000 and decreased 9 cents per share to $3.12 from $3.21 for the same period a year earlier.

Earnings per share for the current three-month and 12-month periods reflect a decrease in the average number of shares outstanding from a recently completed common stock repurchase plan, which reduced the shares outstanding by 9,000,000 shares.

Operating revenues for the second quarter were $1.260 billion, an increase of 5.2 percent from $1.197 billion in 1989. For the 12 months, revenues were $5.239 billion, an increase of 5.2 percent from $4.979 billion reported a year ago.

W.S. White Jr., AEP chairman and chief executive officer, said that although revenues increased in both comparative periods, earnings and earnings per share declined in the 12-month period primarily as a result of the impact of commercial operation of a subsidiary's new generating unit in December 1989, the cost of which is not yet fully reflected in revenues, and a lower-than-normal level of internal sales due to unseasonably mild winter weather in the first quarter of 1990. The second quarter earnings decline was affected primarily by the impact of the new generating unit. The revenue increases for both periods reflect increased levels of less profitable sales to unaffiliated utilities.

American Electric Power is the parent holding company of eight operating electric utilities providing service to 7 million people in Ohio, Indiana, Michigan, Kentucky, Virginia, West Virginia and Tennessee.

CINCINNATI (JULY 19) BUSINESS WIRE - National Sanitary Supply Co. (NASDAQ:NSSX) Thursday reported that net income for the second quarter of 1990 was $927,000, 15 percent below net income of $1,093,000 in the second quarter of 1989.

Earnings per share for the second quarter of 1990 were 15 cents, three cents below earnings per share of 18 cents for the second quarter of 1989.

For the six months ended June 30, 1990, National's net income was $1,635,000, 15 percent below net income of $1,934,000 for the comparable six-month period of 1989. Earnings per share for the first half of 1990 were 27 cents, five cents below earnings per share of 32 cents for the first half of 1989.

Sales for the second quarter of 1990 were $66,365,000, essentially unchanged from sales of $66,909,000 in the second quarter of 1989. Sales for the six months ended June 30, 1990 reached $129,923,000, 1 percent above the comparable sales figure of $128,917,000 in the prior year.

National Sanitary Supply Co., headquartered in Cincinnati, is the largest distributor of sanitary maintenance supplies in the United States. Through more than 650 sales representatives in 55 branch sales and distribution facilities located in 14 western, southwestern and midwestern states, National distributes chemical cleaning compounds, paper and packaging products and other maintenance supplies and equipment to a wide variety of customers.

LONDON (JULY 19) BUSINESS WIRE - British Gas (NYSE:BRG) has announced reductions averaging 5 percent in gas prices for its long period interruptible customers in industry and commerce.

A reduction of 1 pence per therm will apply to all volume bands in the long period interruptible price schedules with effect from the first meter reading at the customer's premises on or after July 1, 1990.

Gas prices in these schedules are market related and this reduction follows the recent fall in oil prices.

Long period interruptible schedules are for customers who are prepared to have their supply interrupted for up to a maximum of 90 days in any one year.

British Gas, headquartered in London, is the largest integrated gas company in the Western world and is primarily involved in the purchase, transmission, and sale of natural gas to domestic, industrial and commercial customers in Great Britain. Important support activities to its marketing efforts include appliance trading and customer service to domestic gas customers. British Gas is also active in the exploration for and production of hydrocarbons both offshore and onshore. Expertise developed in the gas business is offered for sale overseas through the British Gas International Consultancy Service. British Gas American Depositary Receipts are traded on the New York Stock Exchange. One ADR is equivalent to the ten ordinary shares.

#90200b0888 07/19/1990 ~Business Wire
CHICAGO (JULY 19) BUSINESS WIRE - Illinois Tool Works Inc. Thursday reported record second quarter and first half operating revenues, operating income and net income.

Second quarter 1990 operating revenues were $652.6 million, an increase of 14 percent over 1989 second quarter operating revenues of $572.8 million. Operating income in the 1990 second quarter was $90.2 million, an increase of 9 percent over the 1989 second quarter. Net income in the 1990 second quarter was $49.9 million or 92 cents per share, an increase of 12 percent over 1989 second quarter net income of $44.4 million or 83 cents per share.

First half 1990 operating revenues were $1.2 billion, an increase of 14 percent over 1989 first half operating revenues of $1.1 billion. Operating income in the 1990 first half was $167.1 million, an increase of 10 percent over the 1989 first half.

Net income in the 1990 first half was $90.5 million or $1.68 per share, an increase of 11 percent over 1989 first half net income of $81.4 million or $1.53 per share.

Operating revenues increased in both domestic and international operations in the second quarter and the first half. Domestic operating income was down slightly in the second quarter and first half. International operating income was up in both the quarter and the first half.

The company's two segments, Engineered Components and Industrial Systems and Consumables, had increases in operating revenues in the 1990 second quarter compared to the same period a year earlier.

Operating income ws up in the second quarter for Engineered Components and essentially flat for Industrial Systems and Consumables. Both segments were up in revenues and operating income in the first half.

SANTA ANA, CALIF. (JULY 19) BUSINESS WIRE - Alpha Microsystems

(NASDAQ:ALMI) announed Thursday that its VCRCopy data backup controller and software has been formally recognized and listed by IBM as an add-on for IBM's Personal System/1 (PS/1) home computer, introduced June 26.

VCRCopy includes a PS/1 controller and software, and is ready for use with any existing home VCR. A special VCRCopy demonstration kit with point-of-purchase sales aids will be made available for computer resellers and mass merchandisers.

According to the announcement by Alpha Microsystems' Executive Vice President Douglas J. Tullio, Alpha Microsystems has launched a distribution recruiting campaign for VCRCopy directed at authorized IBM Personal Computer Dealers, mass merchandisers, computer distributors and resellers.

Alpha Microsystems was one of only eight third-party suppliers of adapter cards initially recognized by IBM for the PS/1, and the only supplier of videotape backup products.

In commenting on the announcement, Tullio said, ''We are very pleased and excited about IBM's recognition of VCRCopy. VCRCopy is based on our patented VIDEOTRAX technology, a product with over eight years of successful use in a variety of business computing environments. With a suggested retail price of $175, our new VCRCopy provides a proven, cost-effective and simple means of backing up and restoring data held in home computer disk files.

''With the addition of VCRCopy, PS/1 home computer users can use their existing VCR, regardless of videotape format, as a backup device; it's simply a matter of installing the controller card in the PS/1's optional Adapter Card Unit, connecting the VCR, and following the simple instructions graphically displayed on the PS/1's video display screen in pull-down menu format by the VCRCopy software.''

Alpha Microsystems manufactures, markets and services multi-user business computer solutions for a variety of verticle markets and industries worldwide. The company's products support a range of business-oriented operating software environments including Alpha Microsystems' proprietary AMOS and RECAP multi-user operating systems; the widely used XENIX, Pick and MS-DOS operating systems; and Business Basic. The company also manufactures, markets and services VCRCopy, based on its patented VIDEOTRAX technology, for IBM PS/1 computers.

#90200b0892 07/19/1990 ~Business Wire

PUNTA GORDA, FL (JULY 19) BUSINESS WIRE - First Federal Savings Bank of Charlotte County (NASDAQ:FSCC) announced Thursday that the Board of Directors voted to increase its quarterly cash dividend from 10 cents per share paid in the third quarter of 1990, to 15 cents per share for the fourth quarter of 1990.

Dividends of seven cents, 10 cents, and 10 cents per share were paid on Nov. 16, 1989, Feb. 14, 1990, and May 15, 1990, respectively.

With the current dividend of 15 cents per share, the total dividends paid from the earnings of this fiscal year total 42 cents per share.

In addition, the Board declared a special dividend of 58 cents per share, giving total dividends for the fiscal year of $1.00 per share. Both the regular dividend of 15 cents per share and the special dividend of 58 cents per share will be payable Aug. 13, to shareholders of record July 31.

In a news release dated July 17, First Federal reported that consolidated net earnings for the fourth quarter ended June 30, 1990, were $844,731, or 26 cents per share, compared to $726,219, or 22 cents per share, for the quarter ended June 30, 1989, an increase of $118,512. Earnings per share for periods prior to December 1989 have been restated to account for the 10 percent stock dividend issued in November 1989.

For the 12-month period ended June 30, consolidated net earnings were $3,219,251, or 99 cents per share, compared to $3,751,943, or $1.17 per share, for the like period one year ago. This $532,692 decrease in earnings was partially due to the fact that the Savings Bank sold a 10-acre tract of land in November 1988, which accounted for a net profit, after taxes, of $1,141,901.

First Federal is located in southwest Florida and has seven offices serving Charlotte and south Sarasota Counties. Reported assets at June 30 were $347,442,812. The Savings Bank's shares of common stock are traded in the over-the-counter market and quoted through the NASDAQ National Market System under the symbol ''FSCC.''

#90200b0894 07/19/1990 ~Business Wire

SADDLE BROOK, NJ (JULY 19) BUSINESS WIRE - Anthony S. Abbate, president and chief executive officer of Interchange Financial Services Corp., reported net earnings for the six-month period ended June 30 of $1,245,872

as compared to the June 30, 1989 amount of $1,723,663.

On a per share basis, after the deduction of dividends paid on preferred stock, this amounted to 60 cents per share in 1990 as compared to 87 cents per share for the same period in 1989, or a 31 percent decrease.

Abbate stated that 1990's results include the absorption of expansionary activities begun in 1989 and that significant steps have been taken to control overhead, particularly in the area of staffing. In addition, the corporation has discontinued operations of its mortgage subsidiary, Clover Leaf Mortgage Co., as an additional means of expense control. The 1989 results include a non-recurring amount of approximately $525,000 net of income taxes from the sale of mortgage servicing rights.

Asset quality continues to be strong and profits year to date have not been affected to the extent that any extraordinary provisions have been necessary for loan losses.

As of June 21, utilizing its excess liquidity, the corporation purchased from a savings and loan a seasoned home equity line of credit portfolio of approximately $12.5 million consisting of close to 600 quality loans. ''This was one of the opportunities we positioned oursevles for,'' Abbate stated, ''and this will have a positive effect on earnings for the remainder of the year and in years to come.''

Interchange Financial Services Corp. is a one bank holding company of Interchange State Bank based in Saddle Brook, which maintains 10 offices throughout Bergen County.

#90200b0905 07/19/1990 ~Business Wire
NEW YORK (JULY 19) BUSINESS WIRE - CEL COMMUNICATIONS Inc. (NASDAQ: CELC) announced Thursday its operating results for the fiscal year ended March 31, 1990. These results do not include the effects of a subsequent recapitalization which was consumated on May 11, 1990, which effects are shown below as supplemental pro forma financial information.

For the fiscal year ended March 31, 1990, CEL reported total revenue of

$4,610,000 and an operating loss, before net interest expense, of $468,000. After interest charges, CEL showed a net loss of $1,407,000, or $1.18 per weighted average common share. This compares to total revenue of $5,391,000 and a net loss of $2,832,000, or $2.29 per share, for the fiscal year ended March 31, 1989.

Because of the substantial management effort dedicated to the company's successful recapitalization overall revenues for the fiscal year decreased by 14.5 percent principally in the Television and Video Programming segment. The temporary softness in CEL's programming segment was partially offset by the successful consummation of an agreement with IBM Corp. Through it's Educational Resources division, CEL and IBM are developing video-oriented computer materials for the nation's educational market.

Martin Waldman, president and chief executive officer of CEL Communications, commented, ''Since CEL's successful financial recapitalization in May 1990, we quickly closed two significant programming contracts, and we are now moving forward to extablish a positive growth trend in sales and earnings. Our balance sheet is the strongest in recent history. We possess invaluable resources with our film archive and the talented professionals to best utilize it. We are confident in our ability to build CEL into a more significant leader in the entertainment and informational programming business.''

Based in New York, CEL is a diversified media company which produces original programming for television and home video markets, as well as providing social studies and history oriented programming to the nation's schools, universities and libraries. Currently, CEL has two television series airing on PBS, one on the A&E Cable Network, one on ESPN and two on The Disney Channel. The company is currently in production on two new television series for A&E and The Disney Channel, scheduled to premiere in late 1991. CEL's preeminent educational product is called The Video Encyclopedia of the 20th Century which consists of 79 hours of historical film clips on 40 laser videodiscs. CEL recently announced it had entered into an agreement with IBM Corp. to assist IBM in its development of video-oriented computer materials for the nation's educational market.

GARDEN CITY, NY (JULY 19) BUSINESS WIRE - Cable Applications Inc. Thursday announced a further delay in the filing of its Form 10-k for the year ended Mar. 31.

On June 29, the company filed a request for an automatic extension of 15 days to July 15. The company now believes its Form 10-k will be filed by Aug. 10. Reductions in the company's telecommunications operations and a delay in the completion of the audit by the company's independent accountants necessitated the extra time.

NEW YORK (JULY 19) BUSINESS WIRE - MECA Software Inc. (NASDAQ:MECA), a Delaware company, announced Thursday that it made an underwritten offering of 1,750,000 shares of its common stock at a price of $10.00 per share.

Of the 1,750,000 shares being offered, 1 million are being sold by the company and 750,000 are being sold by certain stockholders. The offering was made through an underwriting group managed by Needham & Co. Inc., Hambrecht & Quist Inc. and Piper, Jaffray & Hopwood Inc. Net proceeds will

be used for general corporate purposes, including expansion of marketing efforts, new product development, possible acquisitions and working capital.

MECA develops, publishes and markets a family of personal productivity software products designed to assist individuals in managing personal legal affairs. MECA products incorporate the knowledge and perspective of recognized experts in these fields and are designed to provide users with the information needed to solve complex problems and make informed decisions. Each product provides a complete solution through the integration of features under a common, easy-to-use interface. The company believes that the expertise incorporated in its products, together with the integration of features and ease of use, are distinguishing characteristics which provide them with a significant competitive advantage.

MECA products, which include Andrew Tobias Managing Your Money, Andrew Tobias TaxCut and Hyatt Legal Services Home Lawyer, have received several awards from industry publications for quality and innovation and have regularly appeared on industry best seller lists. The company's products operate on IBM PC's and compatibles; Managing Your Money also operates on Macintosh and Apple II computers.

A final prospectus relating to these securities may be obtained from Needham & Co. Inc., 400 Park Ave., New York, New York 10022, 212/371-8300.

FARMINGTON, CT (JULY 19) BUSINESS WIRE - Otis Elevator Co. was awarded a $7.6 million contract for an Otis Shuttle system at the J. Paul Getty Museum in West Los Angeles, Calif.

The Otis Shuttle incorporates elevator technology into a horizontal transit system. It uses a standard gearless traction elevator machine and steel cable to pull passenger cars over a concrete guideway. The cars hover above the running surface on a cushion of air.

The Otis HOVAIR air-film suspension system lifts each shuttle car approximately one-half inch off the ground, providing a smooth ride in any weather condition. As in an elevator, the system is automatic.

''Museum visitors riding the Otis Shuttle will get a panoramic view of the museum grounds, Los Angeles and the Pacific Ocean,'' said Kris Balch, manager, shuttle systems, at Otis.

The system will operate 16 hours a day, seven days a week transporting passengers seven-tenths of a mile from a parking area at the bottom of a hill to the museum at the top. A one-way trip will take less than four minutes. Two 93-passenger trains moving at 13 mph will enable the system to transport 1,350 passengers per hour in each direction.

The Otis Shuttle project is scheduled for completion in 1994.

Otis Elevator Co. is a wholly owned subsidiary of United Technologies Corp. United Technologies provides a broad range of products and support services to the aerospace, building systems and automotive industries.

The Hartford, Conn.-based corporation's best known products include Pratt & Whitney aircraft engines, Carrier heating and air conditioning systems, Otis elevators and escalators, Sikorsky helicopters, Hamilton Standard aerospace systems, Norden defense systems, and United Technologies Automotive components and systems.

#90200b0920 07/19/1990 ~Business Wire

QUINCY, MA (JULY 19) BUSINESS WIRE - Excel Bancorp Inc. (OTC:XCEL) parent company of Quincy Savings Bank and Lincoln Trust Co., Wednesday reported a consolidated net loss for the second quarter ended June 30, 1990, of $2.0 million, or 36 cents per share compared to consolidated net income of $1.2 million, or 20 cents per share for the same period in 1989.

The consolidated net loss for the six months ended June 30, 1990, was $1.8 million, or 32 cents per share compared to consolidated net income of $3.3 million, or 54 cents per share for the same period in 1989.

As previously announced, the second quarter loss is the result of additions to the allowance for possible loan losses and reserve for other real estate owned totalling $5.2 million. These additions are $4.4 million greater than those made during the second quarter of 1989.

Charles R. Simpson Jr., president and chief executive officer of Excel Bancorp Inc., commented that ''Excel has and will continue to devote considerable resources to monitor and control its loan and real estate portfolio, however, the ongoing deterioration of real estate values and the slowdown in the Massachusetts economy have directly led to increased levels of non-performing assets. Nevertheless, Excel and its subsidiaries continue to exceed all capital requirements of the Federal Reserve Board and the FDIC.''

Simpson added that although the second quarter will produce a loss, the previously announced cash dividend payable on July 20, 1990 will be paid.

The deterioration in the real estate market had other effects on the second quarter results. Income lost as a result of non-performing loans contributed to the decrease of $377,000 in total interest and dividend income. A loss of $368,000 was recognized as a result of various discount financing arrangements offered to purchasers of real estate owned by the banks.

At June 30, 1990, non-performing loans totalled $18.7 million representing 2.09 percent of total assets and 3.07 percent of total loans. Non-performing loans at Dec. 31, 1989 were $8.2 million representing .91 percent of total assets and 1.38 percent of total loans. Other real estate owned and real estate held for investment that is not performing amounted to $13.8 million at June 30, 1990.

Total non-performing assets as a percentage of total assets were 3.65 percent as of June 30, 1990. The allowance for loan losses and reserves on other real estate owned in the amount of $10.4 million cover 50.2 percent of non-performing loans and 31.9 percent of non-performing assets at June 30, 1990.

On June 30, 1990, Excel Bancorp Inc. had total assets of $891.5 million, total deposits of $735.3 million and total loans of $606.3 million.

Excel Bancorp Inc. is the holding company for Quincy Savings Bank, a state chartered stock savings bank, headquartered in Quincy, Mass., and Lincoln Trust Co., a state chartered savings bank, headquartered in Hingham, Mass. The subsidiaries conduct business through 17 offices located on the South Shore of Massachusetts.

Quincy Savings Bank and Lincoln Trust Co. are member of the Federal Deposit Insurance Corp. (FDIC). Quincy is also a member of the Deposit Insurance Fund of Massachusetts (DIFM).

BRISTOL, CT (JULY 19) BUSINESS WIRE - Eagle Financial Corp. (AMEX: EAG) Thursday reported net income of $1,006,000, or $0.37 per share, for the quarter ended June 30, 1990.

This compares to net income of $775,000, or $0.29 per share, for the same period in fiscal 1989. Net interest income for the current quarter increased 17 percent over the 1989 quarter to $3.8 million.

For the nine months ended June 30, 1990, Eagle recorded net income of $2.5 million, or $0.93 per share, compared to $2.6 million, or $0.98 per share, for the first three quarters of fiscal 1989. Net interest income for the first nine months of fiscal 1990 was $11.0 million compared to $9.8 million for the prior year, a 13 percent increase.

Frank J. Pascale, chairman and chief executive officer, in making the announcement, commented, ''Our strong results for the first nine months of fiscal 1990 are especially gratifying in light of two specific, non-recurring events that reduced income before income taxes: merger expenses of $450,000 relating to the termination of the proposed merger with Webster Financial Corporation, and a write-down of $272,000 on our portion of a previously foreclosed participation loan. Net income for the first nine months of this fiscal year would have been over $2.7 million, or $1.02 per share, without the merger costs.''

At June 30, 1990, Eagle had total non-performing loans in the amount of $2.9 million, or 0.70 percent of total loans. Total non-performing assets including $650,000 in real estate owned, totaled $3.6 million, or 0.75 percent of total assets.

Ralph T. Linsley, vice chairman and president, said, ''Although Eagle's ratio of non-performing loans to total loans continues to be well below industry averages, we have added $181,000 to general loan loss reserves during 1990 as a prudent measure and because of uncertainty in the New England economy. While we believe that our current loan loss reserves are adequate, we will continue to scrutinize reserves as long as the region's economy remains uncertain.''

Pascale added, ''Our core earnings continue to show positive trends and we ar on target with our business plan in reducing operating expenses. Eagle will continue to emphasize asset quality, recurring earnings and control

of expenses.''

#90200b0928 07/19/1990 ~Business Wire

CHARLOTTE, NC (JULY 19) BUSINESS WIRE - Ruddick Corp. (ASE: RDK) announced consolidated sales in the third fiscal quarter of $358 million increased 6 percent over the $339 million for the like period last year.

Total operating profit of $14.9 million increased 3 percent. Net income of $6.4 million increased 8 percent over the $5.9 million reported last year. Fully diluted per share earnings were 57 cents (63 cents primary) vs. 54 cents (60 cents primary) last year.

For the nine months ended July 1, 1990, consolidated sales of $1.1 billion were 10 percent above the $966 million reported last year, while opearing profit of $43 million improved 16 percent. Net income for the nine months to date this year of $18.1 million or $1.64 a share fully diluted ($1.80 primary), increased 27 percent over the 14.2 million, or $1.34 ($1.46 primary) last year.

American & Efird sales in the June quarter of $50.7 million showed a modest 2 percent decline from last year, while operating profit of $4.5 million declined 16 percent. Industrial thread sales softened in May and June and the combination of lower sales and shorter plant schedules are the principal contributors to the lower reported operating profit.

Harris Teeter sales of $293 million in the June quarter increased $20 million over the sales reported in the like period last year. Operating profit of $8.6 million rose 12 percent over the $7.7 million last year. Increased sales in conjunction with improved margins were primarily responsible for the increase in operating profit.

Jordan sales of $14.1 million in the quarter showed a slight decline from $14.4 million reported last year, although operating profit of $1.2 million was 2 percent over last year. The modest increase in operating profit came principally from lower administrative costs as compared to last year.

Ruddick Corp. is a diversified holding company which, through its subsidiaries, is engaged in four primary businesses: Harris Teeter Inc. operates a chain of supermarkets in four southeastern states; American & Efird Inc., manufactures and distributes industrial sewing thread and sales yarn; Jordan Graphics Inc. produces and distributes business forms, tags and labels; Ruddick Investment Co. operates an investment management

and venture capital business.

#90200b0931 07/19/1990 ~Business Wire

STAMFORD, CT (JULY 19) BUSINESS WIRE - Champion International Corporation Thursday reported second quarter fully diluted earnings per share of 60 cents, down from $1.16 for the second quarter of 1989 and 67 cents last quarter. Net income of $63 million was down from $114 million a year ago and $70 million last quarter.

Results include several non-recurring items, the net effect of which was to add approximately eight cents per share to second quarter earnings. This gain partially offset the impact of second quarter production losses resulting from various rebuilding and modernization projects, and a sharp drop in earnings at the company's Brazilian subsidiary following radical economic reforms imposed by the new government in that country.

For the first six months, fully diluted per share earnings were $1.27, down from $2.32 for the first six months of 1989. Net income of $133 million was off from $227 million.

Second quarter income from operations in the company's paper segment was $75 million including $43 million of non-recurring expense in connection with the recently announced modernization of the company's mill in Canton,

North Carolina, and other modernization projects. Excluding this expense, results were $118 million, down from $182 million a year ago and $150 million last quarter.

- For domestic printing and writing papers, operating income before the charge for non-recurring expenses was down substantially from a year ago due to lower prices for uncoated papers and production losses incurred in connection with rebuilds of the company's No. 3 machine in Pensacola, Florida, and its No. 30 machine in Courtland, Alabama. Compared with last quarter, however, results were up before the one-time provision. Prices for uncoated papers recovered somewhat in the second quarter as business strengthened, and demand for coated grades remained healthy. The company's new coated paper machine at its Quinnesec, Michigan, mill is due to start up in early fall.

- At the company's Brazilian subsidiary, results were down dramatically from a year ago and from last quarter due primarily to the radical economic reform package, which includes higher taxes, that was imposed by the Brazilian government in March. However, recent results are somewhat encouraging.

- For publication grades, results were up from last year and last quarter. Continued improvement during the quarter at the company's mill in Bucksport, Maine, was partially offset by continuing labor-related operating problems at the company's mills in Sartell, Minnesota, and Deferiet, New York.

- For the company's combined U.S. and Canadian pulp operations, earnings were off both year-to-year and from last quarter. Prices were down, and the company's newly expanded pulp mill in Hinton, Alberta, operated below expectations due to start-up problems.

- Results for the company's newsprint operations were down from a year ago. Prices were weaker, and volumes were off due to downtime for the recent twin-wire conversion of a second machine at the Sheldon, Texas, mill. Compared with the first quarter, however, results were up reflecting continuing strong performance at the mill in Lufkin, Texas, and some improvement in prices in June.

- Lower volumes and slowly eroding linerboard prices caused results for the company's packaging operations to decline both from last year and last quarter.

#90200b0941 07/19/1990 ~Business Wire

LAWRENCEVILLE, NJ (JULY 19) BUSINESS WIRE - Reflecting the previously announced increase in its reserve for possible credit losses, First Fidelity Bancorporation (NYSE:FFB) Thursday reported a second quarter 1990 loss of $150.4 million or $2.61 per common share on a primary basis.

In the second quarter, the company's provision for possible credit losses was $300 million and $13.9 million was added to a reserve for other real estate owned.

The company had net income in the second quarter of 1989 of $63.2 million or $1.03 per share on a primary basis, and net income of $21.1 million or 30 cents per share on a primary basis in the first quarter of 1990.

The credit loss provision in the second quarter of 1989 was $19.2 million and in the first quarter of 1990 it was $65 million.

The company had announced in May that there would be an increased credit loss provision based on an internal loan review. At that time, the company said that new management believed that deterioration in the real estate market and a general softening of the economy in recent months as well as a change in the regulatory environment made a comprehensive asset quality review necessary.

The loan review has now been completed using current regulatory standards and practices as the company understands them.

In addition, the company said that it expected to realize one-time gains in the third quarter from the sales of two subsidiaries, Fidelcor Business Credit Corp., an asset-based lender headquartered in New York City, and Latimer & Buck, Inc., a Philadelphia-based commercial mortgage banking company.

The company also anticipates a special gain from the settlement of certain pension obligations made possible because of the excess of pension plan assets over projected pension benefit obligations.

Non-performing assets, which included non-performing loans and other real estate owned (OREO) net of the OREO reserve, totaled $839.9 million at June 30, 1990, up 39 percent from March 31.

First Fidelity, a leader in providing financial services to the New Jersey-Pennsylvania region, operates through some 500 offices and is among the nation's 25 largest banking organizations.

#90200b0944 07/19/1990 ~Business Wire

BAYSIDE, NY (JULY 19) BUSINESS WIRE - The Home Savings Bank (NASDAQ:HMSB) Thursday reported net income of $2.5 million, or $0.21 per share, for the three months ended June 30, 1990 compared with net income of $6.3 million, or $0.52 per share, in the second quarter of 1989. For the first half of 1990, net income was $6.7 million, or $.55 per share, versus net income of $12.4 million, or $1.02 per share, in the year-ago six months.

The quarterly and year-to-date performance in 1990 can be attributed primarily to continued pressure on the net interest margin as a result of the rise in the level of nonperforming assets over the comparable 1989 periods, according to Richard A. Kraemer, Chairman, President and Chief Executive Officer. He also noted the impact of certain nonrecurring charges taken during the quarter, relating principally to the expenses associated with Home's previously announced merger with a subsidiary of H.F. Ahmanson & Company, and to a tax adjustment related to the conversion of the Bank from a cash basis taxpayer to an accrual basis taxpayer.

Net interest income after provision for loan losses was $11.3 million for the 1990 second quarter compared with $13.8 million in the year-ago three months. For the 1990 first half, net interest income was $23.3 million versus $27.5 million in the same period of 1989. The net interest margin was 3.11 percent for the 1990 second quarter compared with 3.17 percent for the 1990 first quarter and 3.63 percent for the second quarter of 1989.

The provision for loan losses was $225,000 for the quarter and $450,000 year to date in 1990, unchanged from the comparable prior year periods. The allowance for loan losses totaled $5.9 million at June 30, 1990, up from $2.0 million at the same date in 1989. Nonaccrual loans and other real estate owned were $62.0 million and $3.4 million, respectively, at the end of the 1990 second quarter, compared with respective totals of $58.1 million and $2.0 million at March 31, 1990. Restructured loans totaled $4.5 million at June 30, 1990.

Other operating income was $595,000 for the quarter and $1.2 million for the six months in 1990 versus $1.5 million and $2.1 million in the respective periods of 1989 (which included net gains on sales of securities and loans). Noninterest expenses totaled $6.1 million for the 1990 second quarter compared with $5.5 million in the year-ago quarter, and were $11.6 million for the first half of 1990 versus $10.9 million in the year-ago six months. Included in the 1990 totals were nonrecurring expenses of approximately $365,000 in the second quarter associated with the proposed merger with a subsidiary of H.F. Ahmanson & Company.

Income tax expense was $3.3 million for the quarter and $6.2 million for the six months in 1990 compared with $3.5 million in the year-ago quarter and $6.3 million in the year-ago six months. The effective tax rate was 48.1 percent for the six months ended June 30, 1990 compared with 33.8 percent for the six months ended June 30, 1989. The increas in the effective tax rate is primarily due to a loss for income tax purposes on the sale of loans during 1989 which reduced the 1989 effective tax rate, and an increase in the New York State tax surcharge for financial institutions during 1990. The income tax expense for the 1990 second quarter includes a $743,000 non-recurring adjustment related to the Bank's conversion from a cash basis taxpayer to an accrual basis taxpayer.

Total assets were $1.52 billion at June 30, 1990, total net loans amounted to $1.24 billion, and deposits totaled $1.15 billion. At the same date, shareholders' equity of $241.9 million represented 15.86 percent of total assets or $20.11 per share.

On April 2, 1990, The Home Savings Bank and H.F. Ahmanson & Company (NYSE:AHM), parent company of Home Savings of America and The Bowery Savings Bank, jointly announced a definitive agreement to merge The Home Savings Bank with a subsidiary of Home Savings of America. The transaction, which calls for HMSB shareholders to receive Ahmanson common stock with a market value of approximately $25 per share, will be accounted for on a pooling-of-interests basis. Pending the appropriate shareholder and regulatory approvals, the merger is expected to be completed by the end of 1990.

The Home Savings Bank, with 13 full-service banking offices in the New York metropolitan area, offers deposit accounts, mortgage lending and other traditional banking services.

NEW YORK (JULY 19) BUSINESS WIRE - Grace J. Fippinger, vice president - Secretary and Treasurer of NYNEX Corporation, Thursday announced she will retire from NYNEX by the end of 1990, after 42 years of service. Miss Fippinger was appointed the first woman officer in the Bell System in 1974. She has been an officer at NYNEX since its inception in 1984.

For many years Miss Fippinger has been one of the leading women in corporate America. As treasurer and secretary at one of the nation's

leading companies, she has played a powerful role in the business community, particularly in the financial arena, and has been a dynamic role model for businesswomen.

A graduate of St. Lawrence University in Canton, N.Y., Miss Fippinger joined New York Telephone in 1948 and held a variety of operating assignments in Long Island, Brooklyn and Queens. In 1974, Miss Fippinger became the first woman officer in the Bell System when she was elected vice president, Secretary and Treasurer of New York Telephone.

"Grace has had a long and outstanding career with NYNEX and at New York Telephone, and among America's business leadership," said NYNEX Chairman William C. Ferguson. "Her intelligence, insight and charm have earned the respect and friendship of her many business colleagues, and she has been instrumental in shaping and leading our corporation. She will be greatly missed."

"I was very fortunate to pursue a career with the Bell System and then with NYNEX," said Miss Fippinger. "From early on, the company was committed to recognizing and promoting the talents of women. It has been a long and rewarding journey, with many wonderful friends and colleagues."

Miss Fippinger serves on a number of business and community boards. She is a director of Pfizer Inc., Connecticut Mutual Life Insurance Company, The Bear Stearns Companies Inc., Paramount Communications, Inc., and Apple Bank for Savings. She is a trustee of the Citizen's Budget Commission. She is an honorary member of the Ladies Professional Golf Association (LPGA).

Among honors Miss Fippinger has received are: the John Peter Zenger Award for outstanding service and achievement in 1975 from the Nassau County Press Association; the Catalyst Award for Achievement by Businesswomen in 1977; and the Catholic Medical Center of Brooklyn/Queens' award for Achievement and Excellence.

With Miss Fippinger's pending retirement, the NYNEX Board of Directors today appointed Jeffrey S. Rubin to the position of vice president - Finance, effective August 1. Miss Fippinger will continue her duties as corporate secretary while her responsibilities as corporate treasurer will be assumed by Rubin.

#90200b0958 07/19/1990 ~Business Wire

BOSTON (JULY 19) BUSINESS WIRE - Sales and profit from operations of The Gillette Company (NYSE: GS) in the second quarter and for the six months ended June 30, 1990, rose from those of the same period a year ago. Income

per common share increased in the quarter and was level for the six months, Colman M. Mockler, Jr., chairman and chief executive officer, said today.

Sales for the three months ended June 30, 1990, were $1.03 billion, an increase of 14 percent from $903.9 million for the same period in 1989. Profit from operations was $172.8 million, up seven percent from $162.0 million a year earlier.

Pretax income was $136.2 million, compared with $106.3 million in 1989, an increase of 28 percent. Net income of $82.1 million was 31 percent higher than the $62.5 million reported in the same period last year. Net income per common share of $.70 compared with $.65 a year earlier, an increase of eight percent.

For the six months ended June 30, 1990, sales rose 13 percent to $2.08 billion, compared with $1.84 billion in 1989. Profit from operations was $379.4 million, an increase of ten percent from $344.6 in million the prior year. Pretax income of $280.5 million increased 18 percent from $238.6 million in 1989. Net income per common share of $1.45 was level with the year before.

Sales of Gillette North Atlantic in the quarter were well above and operating profits were higher than the corresponding period of a year ago. For the six months, sales were moderately above and operating profits were virtually unchanged from those of 1989.

Gillette International/Diversified Operations sales and operating profits in the quarter were well above the levels of a year ago. For the six months, sales were well above, while operating profits rose sharply above 1989. Net interest expense, exchange losses and the effective tax rate were lower in the quarter and for the six months, compared with a year ago.

The Board declared the regular quarterly dividend of 27 cents per common share, payable September 5, 1990, to stockholders of record on August 1, 1990.

In addition, the Board declared the regular quarterly dividend of $21.875 per share on the 8 3/4 percent Series B Cumulative Convertible preferred stock, payable September 28, 1990, to holders of record on August 29, 1990 and the initial dividend of $34.0289 per share for the period from January 17, 1990 through September 30, 1990, on the eight percent Series C ESOP Convertible preferred stock, payable on September 28, 1990.

CHICAGO (JULY 19) BUSINESS WIRE - UAL Corp. (NYSE:UAL) announced Thursday that Lawrence M. Nagin, senior vice president - Corporate and External Affairs, will become senior vice president - Corporate Affairs and general counsel for UAL Corp. and United Airlines.

He succeeds Edward H. Hoenicke, who will retire as senior vice president and general counsel.

United Airlines Chairman and President Stephen M. Wolf said, ''Ed Hoenicke has served United ably since he joined the company in 1977 as Vice President - Associate General Counsel. United has valued his counsel and extends to Ed best wishes for the future.''

Nagin, who joined United in September 1988, has been responsible for the company's international and government affairs, corporate communications and airport affairs. He will continue with those responsibilities, along with assuming his new role as the corporation's chief legal officer.

''Larry Nagin's valuable contributions to the company, coupled with his experience and accomplishments in the aviation industry, make him well-qualified to assume the position of General Counsel,'' Wolf said.

Prior to joining United, Nagin was senior vice president - Administration and general counsel of The Flying Tiger Line Inc., the air freight subsidiary of Tiger International, from 1984 to 1988. He was vice president - Law from 1980 to 1984. Tiger International was subsequently acquired by Federal Express Corp.

Nagin also has served as senior assistant city attorney for the city of Los Angeles, representing its Department of Airports.

He holds a Juris Doctor degree from the University of California's Hastings College of Law and a bachelor's degree in international relations from the University of Southern California. He is admitted to practice law in the state of California and before the U.S. Supreme Court and the Court of Appeals for the District of Columbia.

Nagin resides with his wife in Chicago. They have two sons in college.

#90200b0971 07/19/1990 ~Business Wire

MEMPHIS, TN (JULY 19) BUSINESS WIRE - Union Planters Corp. (NYSE:UPC) Thursday reported net earnings of $6.0 million, or 31 cents per common share for the second quarter of 1990.

In the second quarter of 1989, net earnings were $3.1 million, or 16 cents per common share. For the first six months of 1990, net earnings were $11.8 million, or 61 cents per common share, compared to $10.5 million, or 55 cents per common share for the same period in 1989.

Net interest income for the second quarter of 1990 was $32.4 million, compared to $30.8 million for the same period in 1989 and $30.5 million for the first quarter of 1990. The improvement over the second quarter of 1989 is the result of the purchase of three banks and a bank holding company while the improvement over the first quarter of 1990 was due to growth in net interest income and the purchase of a bank holding company.

The provision for losses on loans was $3.2 million for the quarter, compared to $9.8 million for the second quarter of 1989. The second quarter of 1989 included a special provision for losses on loans of $7.0 million ($4.4 million after taxes) which related primarily to the deterioration of two large credits along with a deterioration of several smaller credits in the Nashville region.

The broker/dealer operations reported an after-tax loss of $309,000 for the second quarter of 1990 on revenues of $6.7 million which compares to net earnings of $55,000 for the second quarter of 1989 on revenues of $12.0 million.

Noninterest income, excluding broker/dealer profits and commissions, for the second quarter of 1990 decreased 3 percent, compared to the same period in 1989 and increased 4 percent compared to the first quarter of 1990. Noninterest expenses, excluding broker/dealer commissions paid and noninterest expenses of purchased banks, for the second quarter of 1990 increased 1 percent, compared to the same period in 1989 and increased 2 percent, compared to the first quarter of 1990.

The increase in expenses is primarily the result of a continued high level of legal expenses and increases in FDIC insurance assessments.

Noninterest expenses of purchased banks were $1.8 million and $33,000 for second quarter 1990 and 1989, respectively, and $712,000 for first quarter 1990.

Nonperforming assets (including loans 90 days or more past due) were $38.2 million at June 30, 1990, compared to $35.6 million at March 31, 1990. Nonperforming assets at June 30, 1990 included $3.4 million related to an acquisition completed during the second quarter of 1990.

As a percentage of loans plus foreclosed properties, nonperforming assets were 1.69 percent at June 30, 1990, compared to 1.73 percent at March 31, 1990. The allowance for losses on loans was $48.7 million and 127.5 percent of nonperforming assets at June 30, 1990.

Union Planters Corp. ended the quarter with $4.1 billion in assets and total shareholders' equity of $248 million. Loans and leases at June 30, 1990 were $2.3 billion and total deposits were $3.4 billion.

The board of directors declared a quarterly cash dividend of 12 cents per share, payable Aug. 17, 1990 to shareholders of record on Aug. 3, 1990.

Union Planters Corp. is a multi-bank holding company with 19 banks in Tennessee, Mississippi, Arkansas and Alabama. The corporation's lead bank is Union Planters National Bank in Memphis.

WILLIAMSPORT, PA (JULY 19) BUSINESS WIRE - Commonwealth Bancshares Corp. (NASDAQ: CBKS) Thursday announced second quarter 1990 net income of $3,208,000, up $247,000 or 8.3 percent from second quarter of 1989. The second quarter was also up slightly from the first quarter 1990 earnings of $3,201,000.

On a per-share basis, second quarter net income increased to 52 cents per share from 47 cents for the same quarter last year, and 51 cents reported for the first quarter of 1990. On a year-to-date basis, net income totaled

$6,409,000, a substantial 16.5 percent increase from the $5.5 million reported in 1989.

Earnings amounted to $1.03 in 1990, up 17 percent. Return on assets for the second quarter was 0.92 percent, as compared to 0.91 percent for the second quarter of 1989 and 0.93 percent for the first quarter of 1990. Return on equity increased to 11.92 percent from 11.83 percent for the same quarter last year. The return on assets for the first six months of 1990 was 0.93 percent, as compared with 0.85 percent in 1989. The return on equity has improved as well with 11.16 percent reported in 1989 to 12.08 percent in 1990, an 8.2 percent increase.

In May, Commonwealth Bank introduced a customer service guarantee. It is unique in that no other financial institution in the market area offers such a guarantee in writing on service.

Recent events in the financial services industry have placed downward pressure on the market price of this industry's stocks. Commonwealth Bancshares Corp.'s market price has also shown some signs of weakness but to a much lesser extent than many other financial institutions. It is expected that as continued positive performance is recorded, Commonwealth Bancshares Corp. will be recognized as undervalued, and the market price of the stock will react accordingly. Commonwealth Bancshares Corp., a multi-bank holding company, will have assets exceeding $1.5 billion after the merger of First Bank of Greater Pittston. The corporation will serve 14 counties with 60 community offices throughout northcentral and northeastern Pennsylvania.

#90200b0984 07/19/1990 ~Business Wire

CLEVELAND (JULY 19) BUSINESS WIRE - Ferro Corporation (NYSE-FOE), today reported earnings for the second quarter and first half ended June 30, 1990.

For the three months ended June 30, 1990, Ferro's worldwide sales were $282.1 million compared with $275.5 million in the second quarter of 1989. Net income totaled $7.1 million, or 33 cents per common share (primary) versus $13.2 million, or 59 cents per common share a year ago.

For the six months ended June 30, 1990, worldwide sales of the Company's specialty materials were $561.8 million compared with $546.9 million in the first half of 1989. Net income was $13.1 million, or 59 cents per common share (primary) compared with $25.5 million, or $1.19 per common share last year.

Ferro officials noted that second quarter earnings showed significant improvement over the first quarter, although several factors continued to affect results. Austere economic conditions in Latin America, especially Brazil where Ferro has major manufacturing operations, continued to affect volume. However, operations are now beginning to return to normal levels. Sales of the Specialty Chemicals Group remained strong, but earnings were lower than expected due to added start-up costs of new chemical operations in France. In the U.S., plant consolidations and cost- cutting programs implemented in the Coatings and Plastics Groups have helped to offset continued weak demand in automotive and appliance markets.

Additionally, the effective tax rate and net income for the first half of 1990 have been significantly affected by the temporary inability to recognize the tax benefit of the losses incurred in Brazil and the French chemical operation.

Ferro Corporation, based in Cleveland, produces industrial specialty materials, including coatings and colors, plastics, specialty chemicals and ceramics. The Company has production facilities in 22 countries and markets its products in over 100 nations.

WASHINGTON (JULY 19) COMTEX - The 8-K report filed at the SEC shows on June 25, 1990, director of American Confectionary Corp. Rudy Rausch resigned from his position to pursue other interests. The resignation was accepted retroactive upon May 25, 1990. As of the July 10, 1990 date of this filing, no replacement had been named.

The executive office of American Confectionary Corp. is located at 11030 White Rock Road, Suite 210, Rancho Cordova, California 95670, and its telephone number is (916) 635-3131.

-30- 661

#90200c0034 07/19/1990 ~Comtex

WASHINGTON (JULY 19) COMTEX - The 8-K report filed at the SEC shows in a press release dated July 3, 1990, Talman Home Federal Savings and Loan Association announced that the purchase offer by a group of investors headed by Harrison I. Steans was terminated by that group.

Mr. Steans attributed his decision to terminate to revised earnings

expectations for Talman resulting from a due dilligence report.

Talman anticipated the release of its second-quarter earnings approximately ten days following the July 3, 1990 date of the release. It anticipated second-quarterly earnings lower than those of its first quarter, principally as a result of increased costs of funds.

#90200c0519 07/19/1990 ~Comtex
WASHINGTON (JULY 19) COMTEX - The 8-K report filed at the SEC shows in a letter dated July 7, 1990, National Bancshares Corp. of Texas (TICKER:NBCT) was notified by the National Association of Securities Dealers that both National Bancshare's common stock and its 10% convertible subordinate debentures due in 2006 were removed from the NASDAQ National Market System. Those actions were taken effective upon June 22, 1990 for the common stock and July 10, 1990 for the debentures.

The stock and securities were removed from the system because of the National Bancshares' non-satisfaction of capital and surplus requirements and because "there are no longer any active market makers registered to trade the securities," according to the NASD. Until the time of their removal, National Bancshares had operated under an exception granted by the NASD to its capital and surplus rules.

WASHINGTON (JULY 19) COMTEX - The 8-K report filed at the SEC shows J. W. Mays Inc. (TICKER:MAYS) entered an agreement, dated July 5, 1990, for the lease of an approximate 26% of its former Brooklyn store.

The 20-year lease, to commence on March 1, 1990 and expire on April 30, 2011, is for retail sale of general merchandise as well as a restaurant.

J.W. Mays continues to offer the remainder of that building for lease.

The aggreate lease charge, as per the fixed rent agreement, sums to an approximate $7 million. Further, the lease requires proportionately shared payment of such items as real estate taxes, assessments, etc., as determined from a base year.

WASHINGTON (July 19) COMTEX - The 8-K report filed at the SEC shows effective upon June 29, 1990, Mid Am Inc. acquired Citizens Loan and Building Co.(TICKER:CINN), of Lima, Ohio. The acquisition was achieved through the meger of Citizens with Citizens Interim Savings Association, a wholly-owned subsidiary of Mid Am formed solely for the purposes of the merge. That merger was pusuant to an agreement and plan of reorganization and a related agreement of merger, both dated Oct. 27, 1989.

With the merger, Citizens became a wholly-owned subsidiary of Mid Am through the pooling of interest accounting method. Shareholders of Citizens received an aggregate consideration of $2.7 million, payed in common stock by a conversion ratio of 64.24 shares of Mid Am per share of Citizens, with fractional remainders paid in cash.

On June 21, 1990, Mid Am completed its 1.15 million common share offering, yielding to the company net proceeds $19.07 million. Of those proceeds, $7.0 million were assigned for Citizen as a one-time capital contribution.

That contribution caused Citizen to exceed the fully-phased in capital requirements as per federal regulations. Following the offering, approximately 5.36 million Mid Am shares were outstanding.

WASHINGTON (JULY 19) COMTEX - The 8-K report filed at the SEC shows on July 3, 1990, a wholly-owned West German subsidiary of Varlen Corp., KV Buchhandels- und Verlags GmbH, purchased all of the outstanding capital stock of Walter Herzog GmbH. The purchase was made from sellers, including Walter Herzog, Ingeborg Herzog, Paul Bruggeman, Anton Fiedler and Heinz Janicke, in accordance with a purchase agreement dated of July 3, 1990.

The purchase price was 25 million Deutsche Marks (approximately $15 million U.S. dollars), plus acquisition costs.

Herzog is a Lauda-Konigshofen, West Germany based manufacturer of petroleum industry laboratory-analysis equipment.

At the same time, Varlen's West German subsidiary purchased the principal manufacturing facility of Herzog from Walter Herzog for 3 million Deusche Marks (approximately 1.8 million U.S. dollars), pursuant to a real estate purchase agreement dated of July 3, 1990.

The purchases were financed under credit agreements with Mellon Bank, N.A., Harris Trust and Savings Bank and First National Bank of Chicago. Terms of the agreements were arrived at via arms-length negotiations between the parties.

WASHINGTON (JULY 19) COMTEX - The 8-K report filed at the SEC shows Attwoods PLC, in a press release dated July 12, 1990, announced its acquisition of a construction and demolition landfill located in Jacksonville, Florida. The site has remaining airspace of 3.7 million cubic yards, yielding an estimated life of approximately fifteen years. It is one of two landfills serving Duval County. Effective August 1, 1990, however, landfills in Florida must segregate construction and demolition waste from other debris, and it is not known whether the Duval County-owned landfill - the other landfill servicing Duval - will continue accepting construction debris. The acquisition represents Attwoods's first U.S. landfill.

Attwoods also announced its purchase of 49% of ordinary shares of A. & J. Bull (Holdings) Ltd. With the purchase, Attwoods assumed A. & J.'s 7.5% unsecured debt and paid a consideration of 21.5 British pounds sterling. A. & J. Bull is a leading United Kingdom waste company, operating collection services in eight locations in the south and southeast of England, as well as seven transfer stations in the Greater London area and six landfills in the south and southeast of England. It possesses an 130 vehicle fleet.

By MICHAEL STRAUSS - Comtex Washington Correspondent

WASHINGTON (JULY 19) COMTEX - Securities and Exchange Commission Chairman

Richard Breeden told the Senate Banking Committee today that reform of the nation's financial markets should begin with changes in the Glass-Steagall Act and the Bank Holding Company Act (BHCA).

"The combined effect of the Glass-Steagall Act and the Bank Holding Company Act is to prevent most affiliations between commercial banks and securities firms," Breeden said. "This rigid separation between banking and securities activities is no longer necessary or desirable."

The Glass-Steagall Act generally bars banks from securities activities and the BHCA prohibits ownership of banks by non-banking firms.

The SEC chief noted that large securities firms such as Kidder Peabody, a unit of General Electric, and Shearson Lehman, a subsidiary of American Express, are owned by commercial enterprises which include non-financial activities.

"What works in the securities industry should work in the banking industry as long as proper firewalls are in place," Breeden said. "These parent firms have provided capital for needed restructuring and liquidity in times of financial adversity."

Breeden suggested Congress repeal the Bank Holding Company Act and eliminate or modify the Glass-Steagall Act to allow a holding company to own both bank and securities subsidiaries. Rather than a single holding company regulator, each subsidiary would have a chosen regulator based on its line of business -- i.e. a banking regulator for a banking unit, insurance regulator for an insurance subsidiary.

In order for this system to be effective, Breeden said each subsidiary would need adequate capital and the regulator should have "early intervention" authority to take immediate action when a regulated entity's capital position is threatened or falls below the mandated level.

"The subsidiary oversight model assumes that the system must be designed so that the regulated banking, securities, or insurance entities can be 'uncoupled' from the parent, like railroad cars uncoupled from a train," Breeden explained.

Breeden said firewalls, or regulatory structures, are an essential ingredient to any new regulatory system.

"Firewalls can prevent the regulated entities from being stripped of capital or liquidity reserves to prop up a failed parent, thus ensuring that the regulated entities do not suffer traumatic losses simultaneously with the failure of the holding company," Breeden said. "Thus, the key importance of firewalls and similar restrictions against upstreaming capital or liquidity to a parent is not that they will prevent failure

from occurring, but rather that they will permit regulators to manage failure."

As for the issue of deposit insurance, Breeden said deposit insurance should be reduced and not expanded, though he offered no specific figures.

"There are several ways to reduce deposit insurance," Breeden said. "You can limit the number of accounts, amount per account, or let individuals decide for themselves how much they want. If we price at its real price instead of subsidizing, Americans could choose as if they were choosing the amount of life insurance they wished to buy."

-30- 3499
#90200c0557 07/19/1990 ~Comtex
By MICHAEL STRAUSS - Comtex Washington Correspondent

WASHINGTON (JULY 19) COMTEX - Two senators today questioned the Bush administration's commitment to legislation it recently introduced calling for the jurisdictional switch of stock index futures from the Commodity Futures Trading Commission to the Securities and Exchange Commission.

The topic was raised as SEC Chairman Richard Breeden was appearing before the Senate Banking Committee to testify on the need to modernize the regulation of financial services in the U.S.

"There is not a full court press going on that is observable," said panel chairman Donald Riegle (D-Mich.). "In terms of an all out effort to get this accomplished, I'm not seeing that. There is a gap."

"I'm trying to do everything I can to show it's a serious potential risk to the public," Breeden responded. "I've done everything I can do demonstrate the seriousness of the subject."

The controversial bill, which is opposed by the CFTC and most agricultural groups, also provides federal oversight authority over the ability of the futures markets to set margins on stock index futures, the good faith money needed for trading, and modifies the exclusivity clause of the Commodity Exchange Act to allow products with futures and stock characteristics to trade in either market.

Stock index futures allow investors to bet on the movement of a basket of stocks without buying the actual securities. Traders utilizing index arbitrage through computerized program trading attempt to profit from the differences in the prices of futures contracts on stock indexes and corresponding stocks.

Sen. Alfonse D'Amato (R-N.Y.) expressed concern that program trading is a

cause of market volatility, but the SEC chairman disagreed.

"I don't have any concern over the utilization of any technology," Breeden said. "I have concern over the leverage level of the stock index markets. You can't treat the system. You go to the source of the disease -- 98 percent leverage in the stock index market."

Breeden added the two most important issues in the administration's bill are oversight of margins and the exclusivity clause.

"The margin question and the exclusivity problem pose a continuing ongoing threat to the public," Breeden said.

Sen. Timothy Wirth (D-Colo.) asked if this issue is as important as Breeden and Treasury Secretary Nicholas Brady suggest, why does the administration support the renomination of Wendy Gramm as chief of the CFTC if she is staunchly opposed to the bill, and thus administration policy?

Wirth answered his own question, saying "One reason is she is the wife of a very important senator (Texas republican Phil Gramm), or they don't think it is important. The third option is we'll (administration) make an effort and when it doesn't pass, we can say we told you so. We made a proposal to clean it up, it didn't clean up and now its Congress' fault."

"Another possibility is the genuine belief that the administration believes it is a serious problem which puts financial markets at risk," Breeden said. "It allows someone who disagrees with policies to express their reservations."

Riegle responded Breeden was being "a good soldier" and then made his statement that there was a gap between the importance Breeden places on the issue and the pressure the Senate is receiving from the administration concerning the proposed legislation.

#90200c0558 07/19/1990 ~Comtex
By MICHAEL STRAUSS - Comtex Washington Correspondent

WASHINGTON (JULY 19) COMTEX - The Senate last night passed by voice vote a bill granting the Securities and Exchange Commission expanded enforcement powers, including cease and desist authority and the ability to impose monetary penalties.

The SEC is currently empowered to impose fines or civil penalties only for insider trading cases.

Cease and desist orders provide the agency the power to halt illegal

conduct without going to court, and allows the SEC to order the disgorgement of illegal profits. The bill would also provide a three-tier system whereby the SEC could fine securities law violators, ranging from a minimum of $5,000 to $100,000 for individuals or $50,000 to $500,000 for corporations.

In addition, the bill authorizes the SEC to seek, through the federal courts, to bar or suspend a securities law violator from serving as an officer or director of a public company.

"This legislation will allow us to better protect the 50 million Americans who are engaged in the securities markets," SEC Chairman Richard Breeden said today while testifying before the Senate Banking Committee on the topic of reforming the U.S. financial system. "We have every intention of using this authority aggressively but wisely and carefully."

#90200d0950 07/19/1990 ~French/German News Agency

WASHINGTON (JULY 19) - The U.S. Army has decided to go ahead with plans to transfer several hundred of tons of chemical weapons from West Germany to a Pacific atoll where they are to be incinerated.

In a statement Wednesday, the army said the operation "is expected to have minimal public health, safety and environmental effects" on Johnston Island, 1,125 kilometers (700 miles) southwest of Hawaii.

The army is under orders from Congress to begin destroying its arsenal of older weapons, including those in West Germany, by 1997.

Moreover, the United States and the Soviet Union have agreed to reduce their chemical stockpiles by 80 per cent over the next decade. The U.S. chemical weapon stockpile is believed to be about 30,000 tonnes.

The army began testing the Johnston Atoll Chemical Agent Disposal System June 30 but was forced to halt the tests the same day because of what army officials said were minor problems.

Tests resumed last weekend and the facility is expected to be in operation in 1992.

JOHANNESBURG (JULY 19) - South Africa's diamond giant De Beers is to cease underground operations in October at the mine on which it built its fortune, the De Beers Diamond Mine at Kimberley.

The smallest of the four De Beers mines in Kimberley, it has reached the end of its economic life, nearly 120 years after it was discovered, De Beers said in a statement late Wednesday.

Discovered in May 1871 the 5.1 hectare De Beers Pipe was one of five historic mines which spawned the city of Kimberley, in northeastern Cape Province.

Last year the mine contributed 60,902 carats to Kimberley's production of 762,843 carats.

#90200d0980 07/19/1990 ~French/German News Agency

GULF BREEZE, Florida (JULY 19) - Six army intelligence specialists missing from their unit in West Germany, have been arrested in the United States where they said they were Christian fundamentalists who hoped to ascend into heaven from a Florida beach in October.

The five men and a woman were arrested here over the weekend and taken to Fort Benning, Georgia where they are being held pending a counter-intelligence investigation, a U.S. Army spokesman said. No charges have been filed.

They were arrested after their van was pulled over by motorway police Breeze because of a faulty tail light. A computer check showed that the driver, Private First Class Michael Huckstaedt, 19, and the other five were wanted by military authorities.

The man who sold the soldiers the van, William Grant, said they told him they were Christian fundamentalists who believed in "the Rapture", a supernatural phenomenon in which the faithful would be swept into heaven seven years before the end of the world.

"They believed the Rapture was going to happen in Pensacola Beach in October," Mr. Grant said in an interview published Wednesday by the Pensacola News Journal.

"I don't want to talk down to anyone about anyone else's religious beliefs, but they said if they weren't on the beach in Pensacola they wouldn't go to heaven," he said.

U.S. Army spokesman Major Joe Padilla said Wednesday the phrase "End of the World" was found scribbled on doodles found in the room of one of the soldiers in West Germany.

But he said the six did not belong to a cult or group called "End of the World," as he had reported Tuesday. "There is no group as far as we can

tell," he said.

The six, members of the 701st Military Intelligence Brigade in Augsburg, West Germany, were intelligence analysts responsible for intercepting, identifying and exploiting foreign communications, Maj. Padilla said. All held top secret security clearance, he said.

#90200d1000 07/19/1990 ~French/German News Agency

UMTATA, South Africa (JULY 19) - Umkhonto we Sizwe (MK), the army of the anti-apartheid African National Congress (ANC), might still have to "seize power" in South Africa, MK Chief-of-Staff Chris Hani said here late Wednesday.

He told some 3,000 students at the University of Transkei, one of four tribal homelands granted nominal independence by South Africa, that there were no guarantees that the government would not go back on the reforms launched by President Frederik de Klerk on February 2.

The war MK had waged against the government had forced it to unban the ANC and other organisations, Mr. Hani said.

"The struggle still goes on. We are still deploying our cadres inside South Africa and that's no secret."

His remarks appeared to scotch a report in the Johannesburg Sunday Star last week that, in the interests of the search for peace to which the ANC the government agreed at their historic first talks in Cape Town on May 2-4, the ANC had assured the government that its MK fighters were "confined to base".

ANC Deputy President Nelson Mandela on his return from a 14-nation tour Wednesday again said he was not ready to declare a formal ceasefire.

#90200d1050 07/19/1990 ~French/German News Agency

JAKARTA (JULY 19) - BP Chemical Investment Ltd. of Britain and Mitsui and Co. Ltd. and Sumitomo Corp. of Japan Thursday joined forces in an 800 million dollar polyethylene venture in Indonesia, company officials announced here.

The three companies, with a group of Indonesian investors, will build the country's first plant to manufacture polyethylene, a widely used plastic raw material, the officials said.

PT Petrokimia Nusantara Interindo, the joint venture, planned to build the

plant on the western coast of Java with an annual capacity of 400,000 tons.

When completed, the plant would save Indonesia some 200 million dollars in imports, the officials added.

BP Chemical Invesment holds 51 percent of the joint-venture's equity with Mistui and Sumitomo taking 12.5 percent each. PT Arseto Petrokimia has a 15 percent stake while the other nine percent is held by Sigit Harjojudanto, a son of President Suharto.

SEOUL (JULY 19) - South Korea's ruling party Thursday rejected the opposition's call for the dissolution of parliament and snap elections as a violation of the country's constitution.

All 78 opposition deputies have decided to submit their resignations to the National Assembly next week to protest the ruling party's passage of contested bills single handedly. They have called for polls to follow their resignation.

But the spokesman of the ruling Democratic Liberal Party, Park Hee-Tae, said that the only legal way out of the situation would be by-elections for the seats vacated by the opposition.

"We cannot accept the call for the dissolution of parliament since it is undemocratic and an offensive trampling of the Constitution," he said after party co-leader Kim Young-Sam presided over a 47-member party affairs committee meeting to study the political crisis.

Mr. Park pointed out that the present constitution has no stipulation on the possible disbanding of the legislature.

He added that the general elections were due to be held in about one and a half years time anyway and argued that 70 per cent of the people opposed an early election as it is economically burdensome.

An opinion poll taken Sunday said over 60 per cent of the population were against a snap election.

The opposition camp is planning to hold a mass rally in a Seoul park on Saturday to press its political demand.

BEIJING (JULY 19) - Canada has told China that it is poised to end its

recognition of the Cambodian resistance coalition in the United Nations, Ottawa's deputy foreign minister said Thursday.

De Montigny Marchand broke the news to Chinese officials prior to Wednesday's announcement that Washington would no longer recognize the U.N. seat held by the tripartite resistance that includes the Khmer Rouge.

"We told the Chinese that Canada was finding it more and more difficult to support the coalition government," Mr. Marchand, who is under-secretary of state for external affairs, told reporters.

"I also told them that... we would most probably favor an empty seat for Cambodia" in the United Nations if a Supreme National Council (SNC) is not formed before the next U.N. General Assembly in September, he added.

Such a council, bringing together all three resistance groups and the Hanoi-backed government in Phnom Penh, would assume Cambodia's sovereignty pending free elections once a peace plan is in place.

Mr. Marchand has been in Beijing since Tuesday for talks with Foreign Minister Qian Qichen and other officials. He is the most senior Canadian official to come to China since the Tiananmen Square crackdown last year.

He leaves Friday for Tokyo, where he will join Canadian External Affairs Minister Joe Clark who is travelling to the Association of Southeast Asian Nations (ASEAN) summit in Jakarta.

Mr. Marchand said Canada's plans were not taken in consultation with the United States, and that the decision to reveal them to China was taken before last week's Group of Seven summit in Houston, Texas.

China gives military and political backing to the Cambodian resistance, particularly the Khmer Rouge which is condemned in the West for its rein of terror from 1975 until its ouster by Vietnam in 1979.

#90200d1210 07/19/1990 ~French/German News Agency

LIMA (JULY 19) - President-elect Alberto Fujimori has named Juan Carlos Hurtado Miller to the posts of prime minister and finance minister, giving the conservative politician a key role in rescuing the country from prolonged economic crisis.

The appointment Wednesday came as a surprise because Mr. Hurtado had been a leader of the conservative Popular Action party that backed the rival presidential candidacy of Mario Vargas Llosa.

Just hours before being named prime minister, Mr. Hurtado resigned from the

Popular Action party, which opposed any cooperation with Mr. Fujimori.

The new Cabinet, whose 14 members Mr. Hurtado was to name Thursday, is expected to be ideologically mixed, including politicians from the right as well as the left.

Mr. Fujimori's government faces the formidable task of taming runaway inflation, building up its depleted foreign reserves and reducing a burgeoning fiscal deficit.

Although he campaigned against the liberal economic policies Mr. Vargas Llosa espoused, Mr. Fujimori has signalled that he plans to impose a tough austerity program when he assumes office July 28.

#90200d1230 07/19/1990 ~French/German News Agency

PARIS (JULY 19) - Agence France-Presse is to launch an economic and financial service in English in equal partnership with the British Extel Financial agency following a decision by the AFP supervisory board late Wednesday.

Extel Financial is a subsidiary of the British United Newspapers group which owns the Daily Express newspaper, eight regional papers and 40 magazines.

The service will be produced by a company, owned equally by the two partners, and based in London. The company will set up a network in the main European capitals and in New York and Tokyo, to collect and process specialist economic and financial information.

The information, which will be mainly European to begin with, will be intended essentially for non-media clients. The service, due to begin operation in 1991, will also use information provided by the economic services of AFP and Extel.

The board of United Newspapers approved the project on May 24.

#90200d1310 07/19/1990 ~French/German News Agency

BEIJING (JULY 19) - China Thursday deplored the U.S. decision to drop recognition of the Cambodian resistance's U.N. seat and said it would continue arming the guerrillas until a peace settlement was put in place.

Foreign Ministry spokesman Jin Guihua told a weekly press briefing that the resistance coalition of the Khmer Rouge, and followers of Prince Norodom Sihanouk and former premier Son Sann, should continue to represent

Cambodia.

"Before a comprehensive political settlement of the Kampuchean (Cambodia) question is reached, the seat of Kampuchea in the United Nations should not be left vacant, otherwise it would not help to promote a comprehensive fair and reasonable settlement of the Kampuchean question," Mr. Jin said.

Mr. Jin said China would continue supplying arms to the resistance, and especially to the Khmer Rouge, the most powerful guerrilla faction, until a settlement was reached.

The resistance should hold onto the U.N. seat until a four-party government, including the Vietnamese-installed government in Phnom Penh, was set up and all Vietnamese troops withdrawn under U.N. supervision.

"So long as Vietnam does not genuinely withdraw all its troops from Cambodia, China will continue to supportthe Cambodian people in their resistance against foreign invaders and their just struggle for national liberations," he said.

Vietnam invaded Cambodia in late 1978 to oust the Chinese-backed Khmer Rouge, whose murderous regime took power in 1975.

Hanoi announced in September it had pulled all its troops out of Cambodia.

Asked about the U.S. stand on the Khmer rouge, Mr. Jin said: "No party should be excluded (from a settlement). No party should have a dominating" role.

Mr. Jin refused to comment on Mr. Baker's proposal that Washington and Hanoi discuss the Cambodian issue, the first time the two sides would hold such talks since the end of the American war in Vietnam in 1975.

#90200d1390 07/19/1990 ~French/German News Agency

PARIS (JULY 19) - A series of strikes in the French airline industry, which have disrupted European air traffic, seemed set to worsen this weekend after most pilots and flight engineers of the Air Inter company voted late Wednesday to support ground staff.

Ground staff, headed by the Communist-led CGT union movement, and by an autonomous union, have called a strike for Friday and Saturday, and one of the main unions representing pilots and flight engineers for the domestic Air Inter airline decided to strike with them.

On July 13, ahead of the July 14 Bastille Day holiday weekend, Air Inter had to cancel 15 percent of its flights because of a 24-hour strike.

Ground staff are in dispute with management over pay and qualifications, and over the effects of the purchase of Air Inter by Air France.

The pilots have said that they are concerned mainly about pay.

Since the beginning of July French air traffic has also been disrupted by a 36-hour strike by some Air France ground staff and by three days of strikes by air-traffic controllers responsible for northern France which disrupted holiday traffic elsewhere in Europe.

PRETORIA (JULY 19) - Surging exports and weak imports boosted South Africa's trade surplus in June to 1.54 billion rands (578.9 million dollars), figures received from Customs and Excise indicated Thursday.

Despite a weak gold price in June, the monthly surplus showed a 43 percent increase on the May surplus of 1.083 billion rands (412.6 million dollars) and an 18.46 percent increase on the 1.3 billion (469.3 million dollars) surplus recorded in May 1989.

In April the monthly surplus stood at 971 million rands (367 million dollars) while in March the surplus was 1.171 billion rands (450 million dollars).

The June surplus is the second highest recorded this year after the February peak of 1.765 billion rands (690 million dollars).

The Customs and Excise figures showed exports were up 11.5 percent in June over May to 5.22 billion rands (1.96 billion dollars), the highest level this year.

Imports rose slightly in June to 3.68 billion rands (1.38 billion dollars) from the preceding month's 3.6 billion rands (1.35 billion dollars).

In June 1989, exports stood at 5.72 billion rands (2.06 billion dollars) while imports amounted to 4.44 billion rands (1.6 billion dollars).

LONDON (JULY 19) - The number of jobless in Britain rose in June for the third month in a row, with an increase of 5,600, according to seasonally-adjusted figures released here Thursday.

But the unemployment rate remained stable at 5.7 per cent, the employment

ministry said.

Market forecasts had predicted an increase of 8,200 in the number of unemployed in June.

#90200d1610 07/19/1990 ~French/German News Agency

AUCKLAND, NEW ZEALAND (JULY 19) - An American who says he made his money at a casino and lives in New Zealand to escape what he says is inevitable nuclear war is now the biggest single shareholder in New Zealand's only private network television.

Michael Sherry, who also says he has tested a new video technique that doubles the speed of broadcasts but could still be understood, owns 10 per cent of the shares in TV3 which went into receivership in May.

Its single biggest shareholder previously was the United States company NBC,
but they bailed out shortly after receivership.

Mr. Sherry said TV3 could broadcast Parliament at the new, higher speed, and people could record it on videos which would then decode it.

TV3 officials are, however, unimpressed with Mr. Sherry's ideas and do not want him involved in programming.

Mr. Sherry wants a seat on the board so he can have a greater say in the way TV3 is run. He said he wants to use off-peak time for educational, political and news broadcasting.

Mr. Sherry paid 430,000 New Zealand dollars (253,700 dollars U.S) for his share of TV3 soon after it went into receivership. Slighter brighter prospects have seen the value of his holding rise to 550,000 dollars (324,500 dollars).

TV3's former programming head Kel Geddes said recently Mr. Sherry would have no say in programming.

Mr. Sherry said he would present a proposal at TV3's annual meeting, which has yet to be scheduled. "The first annual meeting should be quite unforgettable," he promised.

But the New Yorker is currently trying to maintain residency in New Zealand. He has already been refused twice and is appealing again.

Mr. Sherry said he invested in TV3 because his money, much of which he gave to charity, was being depleted.

He has no more money to spare for other ventures.

#90200d1630 07/19/1990 ~French/German News Agency

AUCKLAND, New Zealand (JULY 19) - The New Zealand government's controversial sell-off of state-owned assets was over, the minister responsible, Richard Prebble, said here Thursday.

His announcement came three weeks after the government made its single biggest sale, Telecoms, to a joint U.S-New Zealand firm.

The government, facing an election in three months, claims assets have had to be sold to pay off debt.

Mr. Prebble said that with the Telecom sale the government had "at long last reached the end of the programme of selling Government assets to repay public debt".

The "debt crisis" was resolved and the debate over the sell-off was completed,
he said.

Mr. Prebble said clearly debt was still too high but he believed New Zealand could reach a debt level of 40 percent of gross domestic product in the 1990's without the need to sell any more assets.

However some businesses, including Coalcorp, remained on the existing sales programme, and Mr. Prebble said the Bank of New Zealand could also be sold.

Cutting rights to state-owned forests are also to be sold, he said.

The nationwide electricity generator and distributor, Electricorp, the largest state enterprise, had never been included on the government's list of assets for sale because the government had resolved never to sell a business until the regulatory issues had been satisfactorily resolved, he said.

The issues involved in deregulating the electricity industry were much more complex than those involved in telecommunications.

It would take three or four years to reform the industry "so any debate over whether to privatise Electricorp is therefore an issue for the 1993 election, not this one", Mr. Prebble said.

The Government would also not consider privatising New Zealand Post,the mail service, as long as it remained a monopoly.

Among the state assets sold were Government Printing Office, Air New Zealand, Postbank, Petrocorp, Telecoms, the National Film Unit and the New Zealand Tourist and Publicity Department.

#90200d1650 07/19/1990 ~French/German News Agency

AUCKLAND, NEW ZEALAND (JULY 19) - France's Societe Francaise d'Innovations pour l'Elevage (SFIE) has been asked to buy out the minority shareholding in a New Zealand firm, Allflex Holdings Ltd., that it does not already own, Allflex chairman Bill McPhail said Thursday.

SFIE bought 65.4 per cent of Allflex from New Zealand's Goodman Fielder Wattie's a year ago. The firm manufactures animal eartags and a range of marking devices.

Mr. McPhail said the independent directors saw the move, at 2.15 New Zealand dollars (1.26 U.S) a share, as in the best interests of SFIE, Allflex, and the minor shareholders.

The takeover would ensure Allflex and SFIE did not become competitors in the French market.

"They are involved in similar business to Allflex, and we were concerned the two companies should not get into any competitive situations in France.

"We were concerned we could be getting into conflict, and saw the acquisition of minority Allflex holdings as a solution to that," he said.

TOKYO (JULY 19) - Japanese electronics firm TDK Corp. has agreed to form a joint venture with West German automotive parts concern Robert Bosch GmbH to produce ferrite magnets for car engines, a TDK official said Thursday.

The new company, capitalised at 10 million marks (6.1 million dollars), is expected to be set up in West Germany early next year and will be owned equally by the two partners, the official said.

Sales of ferrite magnets, which are also used in video cassette recorders and audio equipment, are targetted to reach 120 million marks (73 million dollars) in the first year.

TDK is the world's biggest manufacturer of magnetic tapes and a leading producer of ferrite magnets and cores which accounted for 28 per cent of

its sales of 385 billion yen (2.6 billion dollars) in the year to March.

KUALA LUMPUR (JULY 19) - Malaysia's crude palm oil production rose 16 percent to 2.8 million tons in the first half of the year from 2.4 million tons in the same period last year, the statistics department said Thursday.

Total palm oil stocks at the end of June fell to 822,397 tons from 842,905 tons but were higher compared to 586,237 tons a year earlier.

The Palm Oil Registration and Licensing Authority reported Monday that stocks stood at 824,668 tons.

The statistics department said that Malaysia exported 2.4 million tonnes of processed palm oil in the first five months of the year compared to 2.0 million tonnes in the same period last year.

The oil was shipped mainly to Pakistan (361,248 tons), Singapore (317,395 tons), China (225,591 tons), India (202,070 tons) and Egypt (122,400 tons).

#90200d1710 07/19/1990 ~French/German News Agency
SEOUL (JULY 19) - South Korea has signed an agreement with the Soviet Union to open a direct shipping route, but was still locked Thursday in tough negotiations with China on establishing a ferry link, officials said.

Officials of the Korea Maritime and Port Adminstration (KMPA) said they had signed Wednesday an agreement with the Soviet Ministry of Merchant Marine on opening a direct sea route between South Korea and the Soviet Union.

The agreement would pave the way for shipping companies of the two countries to link South Korea's southeastern port of Pusan to the Soviet Far Eastern port of Vostochny, near Vladivostok, they said.

South Korea's Hyundai Shipping Co. and Chunkyung Shipping Co. will set up a joint venture to ply the route, probably starting in October. The Soviet shipping company Fesco will also operate the route.

The three companies are engaged in talks on jointly operating a container service on the route, they said.

The Soviet Union and South Korea are to start ministerial-level talks in Moscow in August to discuss the establishment of diplomatic ties, ending four decades of animosity.

South Korea is however having much more trouble in negotiations which started here Monday on opening a ferry link with China. The operation is due to be in place before the Asian Games begin in Beijing in late September.

An official involved with the talks said a delegation of 11 Chinese officials had put forth a final offer and did not seem willing to back down. The bone of contention is where the joint venture that will operate the ferries will set up headquarters.

Six local firms -- Yukong Line, Pan Continental Shipping, Korea Long Term Credit Bank, Dongwon Fisheries, Dongnama Shipping and Pacific Cruise Ferry -- are seeking a joint venture with Weihai Shipping and Sinotrans of China.

#90200d1720 07/19/1990 ~French/German News Agency

PARIS (JULY 19) - Washington's decision to change its Indochina policy and start talks with Vietnam on settling the Cambodian conflict was "a major step in the right direction", Soviet deputy foreign minister Igor Rogachev said here Thursday.

In an interview with AFP, he said it was "impossible to picture stability in South-East Asia without normalisation of the United States with Vietnam and Cambodia".

Mr. Rogachev, who supervises Moscow's Asian policies, said the U.S. switch was a logical consequence of changed attitudes in Congress and the United States towards the Khmer Rouge, and would contribute to Soviet-U.S. understanding in the U.N. Security Council and ought to make its work more relaxed.

The minister, who headed the Soviet team at the latest session of informal talks on Cambodia by the five permanent members of the Security Council held here Monday and Tuesday, disclosed that Moscow had been informed a change of tack was going to take place, but did not know exactly when. Similar changes had been noted in the European parliament, he added.

The American attitude had been "constructive" during the 25 hours of talks which had started off in a "somewhat pessimistic" mood, Mr. Rogachev said. He felt there was an increasingly pressing need for a meeting of Cambodia's transitional national supreme council.

He said the call by the five Security Council permanent powers for intra-Cambodian dialogue was addressed above all to the Khmer Rouge.

He said Moscow was not backing down on cooperation with its allies in Vietnam, Cambodia and Laos, but aid was being restructured and

decentralised. The Soviet Union would take an active part in providing material support for U.N. supervisory operations in Cambodia, he added.

Mr. Rogachev said China's position on Cambodia had come closer to that of other countries, including the Soviet Union's.

-30- 2071

#90200d1770 07/19/1990 ~French/German News Agency

TEHERAN (JULY 19) - The Tehran Times Thursday slammed United States "hostility" towards the Iranian government of President Ali Akbar Hashemi Rafsanjani.

The editorial was a response to a letter of support from 160 U.S congressmen sent Tuesday to Massoud Rajavi, head of Iran's main armed opposition movement.

The letter had offered support for the Iraqi-based People's Mujahadeen of Iran and its "peaceful and democratic aims".

The movement is regarded as a terrorist outfit by Iran, and the United States has officially refused to endorse any Iranian opposition group, despite strained relations between Tehran and Washington.

On Wednesday the speaker of the Iranian parliament Mehdi Karoubi also criticised the letter.

According to the English-language daily Tehran Times, the letter's "profound sympathy" for Mr. Rajavi must have received "the green light from the White House".

The paper attacked the United States for failing to respond in kind to Iran's implicit goodwill shown by its efforts to secure the release of two American hostages in Lebanon.

"Iran displayed an immense amount of goodwill in securing the release of two American hostages in Lebanon," the paper said, " naturally reciprocation was expected."

The paper also accused Israel of attacking Moslems whenever there was a possibility that hostages would be released.

In criticising the favourable findings of United Nations' special envoy Reynaldo Galindo Pohl on the human rights situation in Iran, the U.S congress wanted to "weaken" the United Nations and its secretary general Javier Perez de Cuellar, the newspaper added.

#90200d1810 07/19/1990 ~French/German News Agency

TALLAHASSEE, FL (JULY 19) - The electric chair in Florida has been idled while a state court of appeals decides whether death by electrocution constitutes cruel and unusual punishment.

The court of appeals decided Wednesday to consider an appeal filed on behalf of Jerry White, convicted murderer who was scheduled to die Thursday in the electric chair.

The court explained that it will give every condemned prisoner a reprieve until it decides on the question of the state electric chair, which has been the target of protests since the execution May 4 of Jesse Tafero.

Witnesses said Mr. Tafero continued to move before being given a third electric charge and that flames and smoke came out of the hood covering his face.

The appeals court will examine this question within the context of the 8th amendment of the U.S. constitution, which prohibits cruel and unusual punishment.

Florida prison officials said Mr. Tafero died instantly and that the flames and smoke were caused by a synthetic sponge, which would in the future be replaced by a natural one.

#90200d1820 07/19/1990 ~French/German News Agency

LONDON (JULY 19) - Troubled British electronics group Ferranti International said Thursday it made a pre-tax loss of 161.7 million pounds 294 million dollars) in the year to March, against a profit of 13.1 million (23.8 million dollars) the previous year.

The group, hit by an alleged false contracts fraud discovered last year, said there would be no final dividend, after issuing no interim dividend, and said it was unlikely to pay a dividend before the 1991-92 year.

The loss in the year to March was due to the exceptional provision of 122.3 million pounds (222.3 million dollars) to cover the costs of reorganisation and revision of contracts already under way, and a 59 percent rise in interest payments to 49.6 million pounds from 31.2, Ferranti said.

The figures also included, however, exceptional profit of 200.7 million pounds from the sale of assets, and the group showed a net profit of 43.2 million pounds, against a loss of 6.6 million in 1988-89.

Turnover was down 14 per cent at 794.9 million pounds (1.44 billion dollars) from 927.5 million (1.68 billion dollars).

Ferranti shares fell two pence to 31 after the release of the figures.

The group last year discovered alleged false contracts totalling 215 million pounds (390 million dollars) in the accounts of U.S. subsidiary International Signal and Control (ISC), acquired by Ferranti in 1987.

The group is trying to recover at least part of the money through the courts, but said Thursday it would be premature to comment on the likelihood of success.

#90200d1860 07/19/1990 ~French/German News Agency

PARIS (JULY 19) - Three French police officers were brought back from Washington and Beirut Thursday for questioning over an alleged gun-running racket between Lebanon and France believed to have involved police and possibly diplomats as well, a reliable source said.

One was Jean-Claude Labourdette, said to be a "linch-pin" at the centre of the scandal involving security police at the French embassy in Beirut. The two others who were not named, are now in Washington but were formerly posted in Beirut.

On Wednesday, police seized three missile-launchers, ammunition and a large number of hand guns at the home of Mr. Labourdette in the Paris area.

Two security policemen: Pierre Bessonat and Patrick Schaller, who both served in Beirut, have already been charged and jailed pending their trial on arms smuggling charges.

They were taken into custody Tuesday and "charged with the illicit importantion of illegal material, the purchase, storage and resale of first category arms, amassing an arsenal and association with criminals".

Since the affair came to light, police have seized a score of assault rifles, sub-machine guns, pistols, revolvers and ammunition from homes in Mulhouse, eastern Francem, the territorial base of the police unit to which the men involved belong.

The French Interior Ministry meanwhile as ordered an enquiry into the "employment conditions for civil servants and police posted abroad".

The arms smuggled from Lebanon, are believed to have been sold to gangsters and other members of the underworld in southern France and police say some may have been used in commando-style attacks on security vans in the

recent past.

Rocket-launchers have been used in several such robberies in the Marseilles area to blast through the armour-plating in security vans.

The arrests followed revelations made by a former policeman imprisoned for dealing in luxury cars, that Lebanese arms were being smuggled into France.

The relatives of several policemen are also being questioned in connection with the affair.

Sources close to the investigation say the traffickers bought arms from Beirut militias and smuggled them to France in military containers, evading customs checks. They then allegedly sold them to French criminal gangs.

A group who allegedly acquired hand-guns from traffickers were interviewed and released in Bandol, South of France.

#90200d1900 07/19/1990 ~French/German News Agency

RANGOON (JULY 19) - Troops and riot police were still out in strength in the Burmese capital Thursday after the country's main pro-democracy party cancelled a planned march to commemorate a national anniversary for fear of incidents, witnesses said.

A plan by the National League for Democracy (NLD) to march to the Martyrs' mausoleum to pay tribute to Burma's independence hero General Aung San, murdered in 1947, was cancelled by the NLD leadership Wednesday.

Party members instead marked the anniversary at their homes, residents said.

Only cinema-goers and holdiay makers were seen on the streets of the flag-bedecked capital.

The NLD decision to call off the march calmed fears of a possible confrontation with troops.

With the NLD's charismatic leader Aung San Suu Kyi, the 45-year-old daughther of Gen, Aung San, still under house arrest and the junta's decision to delay handing over power to the NLD despite its crushing victory in May general elections, diplomats and residents had feared there could be clashes.

Political parties and other organisations kept a low profile, opting to send only a handful of leaders to the mausoleum at the foot of the famous Shwedagon pagoda while most people conducted indoor prayer meetings, party

sources said.

The NLD, which called off the planned march considering it too risky, decided instead to send only a five-member delegation to lay a wreath there.

Government dignitaries, led by Home Minister Lieutenant General Phone Myint, held a simple wreath laying ceremony early Thursday before going to City Hall for a religious ceremony where food and alms were offered to 50 invited monks.

Resident diplomats and United Nations officials also laid wreaths at the mausoleum.

#90200d1980 07/19/1990 ~French/German News Agency

JOHANNESBURG (JULY 19) - The architect of plans for a white Afrikaner state in South Africa's barren north-west said Thursday Wednesday he will negotiate his concept with all parties involved in creating a post-apartheid South Africa.

Carel Boshoff, chairman of the Afrikanervolkswag (Guardians of the Afrikaner Nation), said he did not believe it would be possible to preserve Afrikaner values in an unitary state ruled by a black majority, Business Day reported Thursday.

Professor Boshoff is the first right wing leader to state that the future of the Afrikaner nation could form part of a negotiated settlement to be thrashed out between the white-minority government, the anti-apartheid African National Congress (ANC) and other black liberation movements.

In return for an Afrikaner state with internationally recognised borders he would offer good neighbourliness, peaceful co-existence and aid to the new South Africa, he said.

The state envisaged by Professor Boshoff would ultimately house about two million Afrikaners and be larger than the Orange Free State province, 127,993 square kilometres (80,000 square miles).

The Broederbond, a secret pro-government think-tank, has called for an Afrikaner summit to settle division in Afrikaner ranks on the question of partition before the start of negotiations about the development of a new South African constitution, Business Day reported, citing a Broederbond document released in April.

The document states before the Afrikaner sits at the negotiating table he owes it to his fellow Afrikaners to hold a summit on partition.

Professor Boshoff said an Afrikaner state could defuse righ wing frustration about any erosion of their freedom in a black-ruled South Africa.

According to observers, the Broederbond has helped persuade President Frederik de Klerk to launch sweeping reforms in the country since February 2, including the unbanning of the ANC after 30 years and the release of black nationalist leader Nelson Mandela after 27 years in South African prisons.

The secret organisation allows only Afrikaners into its ranks and is considered to be a powerful force behind the ruling National Party.

Last Wednesday a co-leader of the white liberal opposition Democratic Party (DP), Wynand Malan, sent white liberal politics reeling when he resigned from the DP rather than resign from the Broederbond.

#90200d2090 07/19/1990 ~French/German News Agency

BEIJING (JULY 19) - Canada's deputy foreign minister Thursday said he has asked China's acquiescence for a set of agreements that Ottawa plans to conclude with Hong Kong's British colonial administration.

At a press briefing, De Montigny Marchand said the agreements -- "not spectacular, but not trivial" -- were designed to inspire confidence in the jittery territory before it reverts to Chinese rule in July 1997.

They deal with economic and legal technicalities, including double taxation, mutual legal assistance and financial services, and once concluded they would remain in force past 1997.

"For them to be fully effective, the constructive acquiescence, or complicity, of the Chinese is essential, and they have thus far given us that," said Mr. Marchand, under-secretary of state for external affairs.

He did not specify when Canadian and Hong Kong British negotiators would finalize the pacts.

With seven years to go until 1997, China is sensitive about foreign governments' dealings with Hong Kong, and it has indicated that it prefers to be consulted on any moves.

Mr. Marchand, who leaves Friday after a four-day stay here, also said that Beijing officials he met did not appear unduely concerned about the pre-1997 flight of Hong Kong Chinese to Canada, Australia and elsewhere.

~HL:PLAYERS INT'L TO WORK WITH CONGRESSMAN GORDON TO IMPROVE 900 NUMBER PROTECTIOX
CALABASAS, CA (JULY 19) PR NEWSWIRE - Top executives of Players International, Inc. (NASDAQ: PLAY), and Congressman Bart Gordon (D-Tenn.) and his staff met Tuesday, July 17, in Washington to discuss cooperation with legislative efforts to insure better protection for consumers using 900 numbers.

After 18 months of technical and consumer research Players International is currently testing Telephone Jeopardy in selected markets around the country. Players International Chairman Ed Fishman stated, "We support and welcome Congressman Gordon's efforts to eliminate abuses and to set reasonable standards for interactive consumer telecommunications. In the long run these efforts will be beneficial to the growth of the 900 number industry. The industry's image will be enhanced by eliminating marginal operators. Obviously, Players International will also benefit from an environment in which users need not fear being taken advantage of."

Fishman added, "The congressman asked us to cooperate in this effort and we are delighted to accept."

Players International, which produces Telephone Jeopardy and will soon introduce Telephone Wheel of Fortune, will make available to the congressman all the results of the company's research and technological developments. These include computerized methods of preventing unauthorized play by children and automatically restricting the number of plays per day, as well as tested methods of insuring that consumers know all potential charges in advance, all of which are now being used in Telephone Jeopardy.

Gordon indicated he has not, nor does he presently intend to, ask for an investigation of Telephone Jeopardy.

CONTACT: Lynn Morgen or JoAnn Horne of Morgen-Walke Associates, 212-986-5900, for Players International

#90200d2100 07/19/1990 ~French/German News Agency
TOKYO (JULY 19) - Japanese Prime Minister Toshiki Kaifu Thursday welcomed the U.S. decision to drop recognition of the Cambodian resistance's U.N. seat and begin talks with Hanoi on the Cambodian conflict.

"It is a good thing. It is a new wind blowing toward Cambodian peace," Mr. Kaifu said when asked about U.S. Secretary of State James Baker's announcement in Paris Wednesday.

Mr. Kaifu said that the new U.S. position would not alter that of Japan, the only major Western-allied country to formally recognise the resistance coalition as the government of Cambodia.

"This won't have any impact (on our position). Japan also wants to cooperate for peace (there) and it is a good thing for various countries to take various approaches," the prime minister said.

The foreign ministry reacted cautiously to the news, stressing that Japan would await the response of the Association of Southeast Asian Nations (ASEAN), which backs the resistance in the United Nations, before considering any change to its own position.

The subject will no doubt figure prominently at the ASEAN foreign ministers' meeting in Jakarta later this month. Japanese Foreign Minister Taro Nakayama will attend as one of the organisation's dialogue partners.

ASEAN groups Brunei, Indonesia, Malaysia, the Philippines, Singapore and Thailand.

Observers here said that Tokyo has considerably hardened its position over the past few months on the Khmer Rouge, militarily the most powerful of the resistance factions.

Phnom Penh Prime Minister Hun Sen was given a very warm welcome last month when he came to Tokyo for talks with Prince Sihanouk, with Japan stepping up its diplomatic efforts to end the Cambodian conflict.

A foreign ministry source here said Washington had consulted Tokyo before Mr. Baker made his announcement.

#90200d2120 07/19/1990 ~French/German News Agency

HANOI (JULY 19) - Vietnam on Thursday welcomed the U.S. decision to drop recognition of the Cambodian resistance coalition's U.N. seat while Beijing responded with official silence and other Asian nations reacted cautiously.

Australia came out strongly in support of the U.S. policy switch while non-communist Southeast Asian nations reserved comment.

Hanoi indicated it is ready for talks with Washington on Cambodia and the government in Phnom Penh welcomed the U.S. move as a step towards peace and improved relations between the two countries.

U.S. Secretary of State James Baker said in Paris on Wednesday that Washington would no longer recognise the United Nations seat held by the

three-party resistance alliance since 1982.

He added that the United States was willing to open a dialogue with Vietnam on Cambodia but denied that this involved a normalisation of ties between the countries.

Vietnamese Foreign Minister Nguyen Co Thach said Thursday in a statement: "Vietnam is ready to negotiate with all countries affected by the Cambodian problem... that is why Vietnam welcomes the declaration made by the American secretary of state."

Washington does not recognise Hanoi, which ousted a genocidal Khmer Rouge regime in January 1979 and installed the current government in Phnom Penh.

Mr. Baker said the U.S. move was aimed at preventing a return to power by the Khmer Rouge, which spearheads the military effort of the resistance alliance against the Phnom Penh government.

The Chinese government, a key backer of the Cambodian resistance movement, made no official comment early Thursday.

There was also no immediate response to comments from a resistence leader in Bangkok that the Chinese government, which supplies the bulk of military aid to the Khmer Rouge resistance faction, was ready to step in to replace the United States.

"China is already ready to replace the United States. It has let us know that if the United States cuts off seven million dollars, it is ready to provide 14 million," said Prince Norodom Ranariddh, commander of guerrillas forces loyal to his father, Prince Norodom Sihanouk, the head of the resistance coalition.

The Paris announcement came only hours after the five permanent U.N. Security Council members ended talks on Cambodia.

Observers said that in the wake of Mr. Baker's announcement, several countries are likely to challenge the tripartite resistance's hold on the Cambodian seat when the U.N. General Assembly convenes in the autumn.

The United States, which previously voted for the coalition and has helped supply the resistance coalition's two non-communist factions, will vote against or abstain, as France has done.

If other states follow suit, the coalition will lose its majority.

China has never waivered on its political and military backing for the Khmer Rouge, which along with non-communist supporters of Prince Sihanouk and former prime minister Son Sann, form the resistance coalition.

In Phnom Penh, chief foreign ministry spokesman Chum Bun Rong welcomed the U.S. decision as "paving the way for a settlement in Cambodia."

In Tokyo, increasingly active in the search for a peace settlement to the 11-year-old Cambodian conflift, Mr. Baker's announcement was greeted with caution.

A foreign affairs ministry spokesman said, "The situation surrounding it (the resistance coalition government) will become more difficult."

Japan, along with the non-communist Association of Southeast Asian Nations (ASEAN) -- comprising Brunei, Indonesia, Malaysia, the Philippines, Singapore, and Thailand -- recognises the resistance coalition but has been hardening its stance towards the genocidal Khmer Rouge in recent months.

But the spokesman added that Tokyo must consider the U.S. move "very carefully in view of the impact on the peace process and taking into account ASEAN countries.

ASEAN members were expected to discuss the U.S. move before issuing a joint statement at their meeting in Jakarta next week.

The Australian government welcomed the U.S. announcement, with Foreign Minister Gareth Evans saying it showed progress towards a settlement of the Cambodian issue was "well on track."

But Mr. Evans said Australia would continue to withhold diplomatic recognition from the Cambodian government "at least" until the comprehensive settlement itself was "on track."

LONDON (JULY 19) - Britain called Thursday for Kuwait and Iraq to resolve their border dispute through peaceful dialogue.

"Britain hopes any disagreements between Arab governments on these important issues will be settled by discussion and peaceful means," a Foreign Office spokesman said.

Iraq has accused Kuwait of "stealing" Iraqi oil from fields along the border between the two countries. Kuwait rejected the charge and called Thursday for the Arab League to set up a mediating commission.

SOFIA (JULY 19) - Several towns in Bulgaria with large Turkish communities were paralysed by striking Bulgarian nationalists Thursday, Bulgarian radio said.

The nationalists were protesting the formation of a Turkish minority group within parliament, the radio said.

They have been angered by the influence wielded by the Movement for Rights and Freedoms which, with 23 pro-Turkish deputies in parliament, emerged as Bulgaria's third-ranked political force in the country's first free elections last month.

In Kardjali, in the south, strike action closed down local authorities, banks, radios and companies. Public transport also came to a halt. The towns of Razgad, Choumen, Aitos, Isperich in the north east and Haskovo in the south west were also hit.

A visit to Kardjali by deputy prime minister Chudomir Alexandrov on Wednesday failed to calm the situation.

Several nationalists from villages where Turks are in a majority staged hunger strikes outside the local assembly in Kardjali and the national assembly in Sofia over "assimilation plans" for Turks.

Pavel Stadnjev, a member of the Kardjali committee for the defence of national interests, told AFP that things could get worse if, as expected, Turks sweep to positions of power in municipal elections to be held soon.

Fear of Turkey, which dominated Bulgaria for almost five centuries until 1908, is still widespread in areas bordering Turkey.

MOSCOW (JULY 19) - The confirmed number of dead in an avalanche that swept away a high altitude mountainering camp in the Soviet Pamir range last week has risen to 42, Tass news agency reported here Thursday.

At least 13 foreign mountaineers were among those killed when an avalanche, caused by an earthquake, swept down the slopes of Mount Lenin, one of the highest peaks in the Siberian region on July 13.

Most of the dead were from the Leningrad region, but also included six Czechoslovaks, four Israelis, two Swiss and a Spaniard.

Two alpinists were also injured.

Tass said however that other groups of climbers might also have been caught up in the avalanche, including some from Bulgaria and East Germany.

More than 100 people were currently searching the area in difficult conditions given the high altitude of about 5,000 meters (17,000 feet), intense cold and gusting winds, the agency added.

PARIS (JULY 19) - Anglo-French packaging giant CMB Packaging said Thursday that it had bought packaging companies in West Germany and Italy whose sales last year totalled 420 million francs (76.3 million dollars).

The acquisition of Raku of West Germany and Speedprint of Italy are CMB's 15th and 16th since the group was created with the merger of Carnaud of France and Metal Box of Britain in April last year.

The group, which made a profit last year of 1.1 billion francs (200 million dollars) on sales of 21 billion (3.8 billion dollars), is Europe's leading packaging concern and is targeting a 10 per cent market share.

Raku, which had sales totalling 300 million francs (54.5 million dollars) last year, specialises in plastic packaging for the pharmaceuticals, health and beauty, food and chemicals sectors.

The company, which employs 570 people, was ceded to CMB by Swedish group PLM which is seeking to concentrate its activities on packaging for drinks and glass items.

Speedprint, which employs 100 people, specialises in flexible packaging for food and had sales totalling 120 million francs (21.8 million dollars) last year.

#90200d2360 07/19/1990 ~French/German News Agency

TOKYO (JULY 19) - Indonesia's state-run oil company Pertamina has turned down a Japanese request for increased crude shipments in August due to rising demand in the domestic market, a Japanese newspaper reported Thursday.

The Nihon Keizai Shimbun quoted industry sources as saying that Japanese oil importers sought up to 300,000 barrels a day of low-sulfur crude to meet growing electricity demand in August, Japan's hottest month.

But Pertamina rejected the request and will instead maintain shipments at the July level of 180,000 barrels, the report said.

Japan's electricity demand has hit a series of successive highs this week as temperatures soar, prompting heavy use of air conditioners.

Power consumption across Japan hit a record 140 million kilowatts an hour Thursday afternoon, exceeding the previous record of 128 million kilowatts set last year.

Jiji Press reported Tuesday that Saudi Arabia and the United Arab Emirates have cut their August shipments to Japan by four per cent and 30 per cent.

The planned cut was apparently aimed at boosting crude oil prices before a meeting of the Organisation of Petroleum Exporting Countries due to begin in Geneva on July 26, it added.

#90200d2370 07/19/1990 ~French/German News Agency

JOHANNESBURG (JULY 19) - A prominent lawyer was arrested late Wednesday in connection with recent explosions at hotels here which killed two black men and injured at least 21 others, police said Thursday.

The lawyer, A.A. Smith, was arrested after police raided his home in Johannesburg's southern suburbs late Wednesday and found three hand grenades, police spokesman Captain Eugene Opperman told Agence France-Presse.

Last Saturday explosions rocked two hotels in the Johannesburg area and in one of the incidents a man was killed when a white man lobbed a hand grenade into a packed bar, patronised mainly by blacks.

Commercial explosives was used in the other explosion which killed a hotel waiter. Rightwing extremists using commercial explosives have been linked to a spate of explosions here in the past four weeks.

Mr. Smith is well-known in rightwing circles and provides legal assistance to members of the extremist Afrikaner Resistance Movement (AWB), Capt. Opperman said.

Police were expecting to make further arrests soon.

They also believe they are "rapidly closing" in on fugitive rightwinger Piet "Skiet" Rudolph, on the run since April 16 after admitting responsibity for a massive weapons theft from the South African Air Force (SAAF) in Pretoria.

Mr. Smith and another rightwing suspect, John Roesch, appeared in court Thursday afternoon in connection with illegal possession of hand grenades,

Capt. Opperman said.

He refused to divulge more information, saying the investigation was at a sensitive stage.

ISLAMABAD (JULY 19) - India and Pakistan on Thursday were to begin substantive discussions on Kashmir after having pinpointed causes that have created the crisis, negotiators said.

Pakistani Prime Minister Benazir Bhutto meanwhile warned that a war between India and Pakistan would be terrible as both countries were fully equipped with modern weapons, according to the Associated Press of Pakistan.

"We will talk in more substance now," said Indian Foreign Minister Muchkund Dubey, arriving at the Pakistani Foreign Office where he was to hold a third round of talks with his Pakistani counterpart Tanvir Ahmed Khan.

"We discussed some of the causes" of the tension on the opening day of the talks Wednesday, Mr. Khan said.

Pakistani officials want to settle the conflict in India's only Moslem-majority state through a U.N.-sponsored plebiscite that allows the people to decide whether they want to remain part of India or join Pakistan.

The Moslem separatist campaign there has left more than 800 people dead this year.

Indian officials meanwhile consider their northern state to be an integral part of India and have accused Pakistan of arming and funding the Moslem separatists.

As a way of restoring trust, the Indian delegation has asked Pakistan to help stop Moslem separatists and weapons from entering India from Pakistani-controlled Kashmir to the north. They suggested joint patrols.

The talks, opposed by some militant groups, coincided with the spiralling of violence in Indian-held Kashmir where more than 50 people were killed Wednesday.

Pakistan's main opposition leader, Nawaz Sharif, has also opposed the talks, saying that these would "undermine" the freedom struggle of the people of Jammu and Kashmir.

Regretting that the Bhutto government has "failed even to feel the pulse of

the freedom fighters" before initiating the dialogue, he said no consideration was given to their sacrifices.

A vetern politician, Nawabzada Nasrullah, Khan also dismissed the present discussions as an "exercise in futility."

The parleys follow almost six months of renewed border tension between the two countries who have fought two wars over Kashmir in the past 42 years.

The Indian delegation also held separate meetings with President Ghulam Ishaq Khan and Prime Minister Benazir Bhutto, meetings that Mr. Dubey described as "extremely important."

The Pakistani president told the Indian team to negotiate a permamnent solution to the dispute.

"It must be solved in the interest of durable peace and friendship once for all," the elderly Pakistani leader told the Indian negotiators.

Mr. Dubey, while expressing satisfaction over the common desire to avoid an armed conflict, emphasised the need for tackling the issues cautiously.

The present parleys were to end Thursday, but sources here said it could be extended by another round before the Indian delegation's departure for New Delhi Friday.

The two foreign secretaries were scheduled to meet again in the Indian capital in two weeks time.

The Pakistani press meanwhile expressed satisfaction that the Kashmir issue "dominated" the first day's talks.

The state-owned Pakistan Times attached much importance to the fact that India, which has been refusing to discuss the Kashmir problem, was this time prepared to listen to Pakistan's stance on the issue.

It has improved the situation as far as the process of normalisation is concerned, the paper said.

Ms. Bhutto meanwhile said Pakistan was seeking a peaceful solution to the Kashmir problem in accordance with international law, but it would repel any agression with full force, she was quoted as saying at the airport in Punjab's capital, Lahore.

Pakistan was aware of all the missiles and other modern technology weapons available to India, but she said she had full confidence in the ability of Pakistan's armed forces and the unity of its people.

#90200d2540 07/19/1990 ~French/German News Agency
CANBERRA (JULY 19) - Prime Minister Bob Hawke invited Australians on Thursday to prepare "a more contemporary constitution" to celebrate 100 years of federation in 2001.

The present system of a federal administration, six state governments and two self-governing territories had produced inefficient public services, "bureaucratic overlap" and a "Balkanised" economy, he said.

But, in a 40-minute speech to the National Press Club, Mr. Hawke gave no hint of seeking to concentrate power in Canberra.

He specified only one possible change to the constitution -- to extend the life of national parliaments from three years to four.

He announced that Canberra would relinquish to the states responsibility for the bank accounts debits tax, worth about 400 million dollars (320 million U.S.) at present.

He also said his government would consider reversing a trend of four decades towards tied grants, which now account for about 40 per cent of all federal funds allocated to the states.

Nick Greiner, premier of New South Wales, the most populous state, said the speech had created "an excellent opportunity."

Mr. Greiner, a Liberal and the only state premier who does not belong to Mr. Hawke's Labor party, said: "I think he's fair dinkum about it."

The speech came less than three weeks after an acrimonious Premiers' Conference, where Federal Treasurer Paul Keating forced the states to accept a cut in their annual funding of 400 million dollars.

Mr. Hawke said he had invited the premiers to a special conference in Brisbane on October 31 to discuss "everything from micro-economic reform and program delivery to industrial relations and the environment."

He was seeking "better services, better delivered," and any cost savings "would be a bonus."

Completing a list of examples of inefficient performance, he said a cargo travelling from Sydney to Perth, a journey of 3,950 kilometres (2,370 miles), might encounter three different rail systems, four changes of locomotive, five safety systems and 10 different engineering standards.

Mr. Hawke also announced that a committee had been set up under former

governor general Sir Ninian Stephen to draft an agenda for a conference in 1991, marking the centenary of the first Australasian Constitutional Convention.

The 1891 convention, held in Sydney, started a process culminating in federation in 1901.

Next year's conference would begin "a continuing process to identify the areas of agreement, to achieve constitutional change."

He said he wanted to "break away from the situation" where the federal government put reforms to referendum "only to find that we do not have the requisite support from the states."

Constitutional changes in Australia require a majority of the popular vote nationwide and in at least four states. Last year, state elections in Queensland and Tasmania removed conservative governments from office and Mr. Hawke agreed that "there has not been a more propitious time, a more propitious conjunction of political circumstances, than we have today."

#90200d2610 07/19/1990 ~French/German News Agency

NEW YORK (JULY 19) - In 100 years, the Seneca Indians have mastered the art of the deal.

Exploited since granting a 99-year lease in 1892 to the village of Salamanca, they have just negotiated a new contract that will force the village to pay far more for the land it is built on.

The 6,600 inhabitants of Salamanca, the only U.S. village located entirely on an Indian reservation, rented their land from the Seneca for a song for almost a century.

But that arrangement was based on a 99-year-lease that expires at the end of the year. And negotiations between descendants of the pioneers and those of this Iroquois tribe have been somewhat more arduous this time than they were at the end of the 19th century.

After two years of secret negotiations, the Salamanca municipal council found itself caught between losing the village or submitting to the financial dictates of the Seneca. It finally caved in and agreed to terms for a new 80-year lease.

Instead of paying 57,000 dollars a year, as they have in recent years, the village must pay the Senaca 800,000 dollars a year. Unlike the original lease, this one links the annual rent to the cost of land.

That's not all. As reparation for damages, the Seneca received compensation of 60 million dollars -- 35 million dollars from the federal government and 25 million dollars from the state of New York.

With average annual rent jumping to some 200 dollars per lot residents of Salamanca are crying foul, especially elderly people on fixed incomes. "I saw an old man this morning. He was on the verge o tears and I'm surprised that no one has tried to commit suicide," said former Salamanca mayor Keith Reed.

Meanwhile, the 6,000 Senecas plan to use 37 million dollars of the compensation money to buy more land and enlarge the reservation. That has prompted grumbling among Salamanca residents. Indians are exempt from paying taxes, so any property they buy is subtracted from the tax rolls.

That means less taxable property and a bigger bill for the village at the same time that the state and federal governments have made it clear they won't foot the bill for the higher rent.

Salamanca's residents "must and I think already have begun to face reality " Lorretta Crane, who headed the Seneca committee that renegotiated the lease, said calmly. "We subsidized the village for 114 years and we are not going to continue," she said.

The beginning of this story goes back more than 100 years.

At the end of the war of Independance, during the last years of the 18th century, the six Iroquois tribes of northern New York state were pushed west.

In the 1840s, a railroad company that began building a line between New York and Chicago, bought rights of passage from the Seneca. Soon other railroad lines were built, and railroad workers began renting land from the Indians, founding the village of Salamanca.

In 1873, the courts revoked all the leases because they were not approved by Congress. In the following years, the Congress -- not entirely free of the influence of the railroad lobbies -- arranged a series of new leases that were unfavorable to the Senecas.

The lease of 1892 was one of them. It initially called for an annual rent of 17,000 dollars, but renegotiations in 1960 and 1970 raised the amount to 57,000 dollars.

Almost 100 years later, the lease negotiated last week by the two communities must once again pass through Congress to become official.

Apparently, the Indians today have the means to make themselves understood,

even at the risk of ending the goodwill with whites that has prevailed until now.

In Salamaca, "for sale" signs are beginning to spring up.

#90200d2630 07/19/1990 ~French/German News Agency

PARIS (JULY 19) - Antoine Gallimard, the head of the French Gallimard publishing company, on Thursday ensured editorial independence and consolidated his power after a long family feud over control of the company which publishes 17 Nobel literature prize winners.

The elder sister and brother Francoise and Christian had sold a holding totalling 24.3 percent. The Italian publisher Einaudi has bought a stake of 10 percent. Einaudi is part of the Elemond group of which 49 percent is owned by the Italian publishing giant Mondadori.

The French comunication conglomerate Havas has bought a stake of seven percent.

French financial institutions and private investors have bought the remaining stake of 7.3 percent.

Mr. Antoine Gallimard retains a blocking stake of 33.5 percent, and the new shareholders have undertaken, in an unusual protocol, to guarantee the independence of the company, and to respect his literary, financial and commercial decisions.

He also has the support of the Banque Nationale de Paris, which recently bought a stake of 12.5 percent from another sister, Isabelle.

The company, founded in 1911 by Gaston Gallimard, has a catalogue of 16,000 titles by some of the best-known French authors including Andre Gide, Andre Malraux, Marguerite Yourcenar, Jean-Paul Sartre and Albert Camus.

Its last results showed a profit of 20 million francs (3.6 million dollars) on sales of one billion francs (180 million dollars).

#90200d2640 07/19/1990 ~French/German News Agency

TOULOUSE, France (JULY 19) - The Romanian airline TAROM signed a contract here Thursday to buy three Airbus A310-300 long-haul passenger planes, making it the fourth East European client of the European Airbus Industrie consortium.

Romanian Prime Minister Petre Roman, who attended the signing ceremony

after visiting the Airbus assembly line at Toulouse, said that "Romania's entry into Europe cannot be achieved without a communications base, particularly in the field of air-links."

TAROM director-general Lorin Dumitrescu who signed for the Romanian airline said that the purchase of the planes marked "a new era of international opening up for Romania."

Airbus Industrie's Jean Pierson said he hoped the order "will contribute to the development of new relations between Romania and Western Europe."

The first of the planes, which can carry up to 265 passengers and have a range of 8,000 kilometers (5,000 miles), is to be delivered in March 1992. The second will be delivered later that year and the third in 1993.

TAROM is to use them on intercontinental flights from Bucharest to such destinations as New York and Beijing.

#90200d2650 07/19/1990 ~French/German News Agency

ABIDJAN (JULY 19) - Fighting continued Thursday around the Liberian capital Monrovia between government troops and rebels of the National Patriotic Front, as meanwhile teams from both sides resumed peace talks in neighbouring Sierra Leone.

The rebels were meeting stiff resistance at the Schiefflin encampment 20 kilometres (12 miles) to the south-east of Monrovia, in the Paynesville and Caldwell suburbs, and at Careysburg 30 kilometres (18 miles) to the north.

Soldiers of the 72nd infantry battalion guarding the eastern approaches were mounting a far better defence than other troops who have abandoned more than a third of the country to rebel forces in nearly seven months of combat.

On the western side, the rebels lacked full control of the road to Freetown, the Sierra Leone capital and site of the peace talks. Government convoys have got through in both directions this week with food supplies for some of the 500,000 people in the capital region.

Food stores and other shops in Monrovia closed a long time ago, and the city has been without water and electricity and telephone and telex services for several weeks.

#90200d2710 07/19/1990 ~French/German News Agency

NEW DELHI (JULY 19) - Floods have killed 360 people across India, where

monsoon-fed rivers have swamped vast areas of farmland and destroyed millions of homes, the Press Trust of India (PTI) said Thursday.

Extensive damage to property and crops was reported from 10 worst-hit states as overflowing rivers hampered relief efforts in many areas, PTI said.

More than 600,000 people were marooned in eastern Bihar state, where flood waters destroyed some 50,000 hectares (123,500 acres) of standing rice crops, the news agency said.

Meanwhile, another 18 people died in the past 24 hours in neighbouring Uttar Pradesh, pushing the death toll in India's most populous state to 156, it added.

This year's monsoon floods have submerged some 3,500 villages in Uttar Pradesh, uprooting an estimated 2.5 million people.

#90200d2840 07/19/1990 ~French/German News Agency

LONDON (JULY 19) - The National Union of Mineworkers said Thursday it was beginning legal proceedings to recover missing funds donated by the Soviet Union to assist NUM members' families during a nationwide British miners' strike in 1984 and 1985.

"The national executive committee has unanimously decided to commence proceedings in the name of the NUM for the recovery of various sums identified in the report of Mr. Gavin Lightman," the union said in a statement.

The announcement came hard on the heels of publication of the Lightman report which concluded after an independent investigation that the Paris-based International Miners' Organization (IMO) had benefitted from the funds at the expense of the NUM and was highly critical of NUM president Arthur Scargill.

Mr. Scargill is also president of the IMO.

The funds to be sought by the NUM include some 1.4 million pounds (2.5 million dollars) "received into an international trust fund in Dublin during 1985 and believed to have originated from sources in the Soviet Union, East Germany and other eastern European countries," the statement said.

The announcement said Mr. Scargill and NUM general secretary Peter Heathfield "will be parties to the action" and cast further doubt on Mr. Scargill's leadership of the union.

Mr. Scargill, 52, confirmed that he and Mr. Heathfield were being sued personally by the NUM and said it was "sad" that the union had decided to take the legal action to recover the missing funds.

"I think it is sad in the sense that we are embarking on litigation involving officials of the NUM who are also officials of the IMO," Mr. Scargill said, adding: "We have done no more or less than carry out the wishes of the donors."

Mr. Scargill, who has maintained that no laws were broken in handling the funds, said he was "totally innocent of any allegations made against me."

Union officials declined any further comment on what action they were planning to take to recover the money, including about one million dollars which was believed to have been donated by the national Soviet mineworkers' union.

Labour MP Kim Howells, who worked as an NUM research officer during the 1984-1985 strike, welcomed the national executive committee's announcement and said "I think the NEC is now being seen to be doing its duty to recover the funds which were targeted at miners' families who suffered considerable hardships" during the strike.

"I hope now that the whole sordid mess will be cleared up by this action," Mr. Howells added.

Meanwhile, an independent union watchdog body has asked for a copy of the Lightman report.

The British domestic news agency Press Association reported that Matthew Wake, a government appointed certification officer at the head of the watchdog, believed the union may have breached the 1974 Trade Union and Labour Relations Act in the way it set up bank accounts to collect the strike funds.

BERLIN (JULY 19) - Industrial production in East Germany fell by 16 percent in June over the same month last year, giving a fall of 7.3 percent the first six months of the year, the national statistics office said Thursday.

But 24 of the 69 industrial sectors considered by the statistics office saw production slump by more than 10 percent in the first half of the year.

The preserves, coffee, cocoa and tea sectors saw production drop 40 percent

and the food industry was down 23 percent.

RASHAYA, LEBANON (JULY 19) - Israel fears there could be an upsurge of attacks on Israeli forces in southern Lebanon following the deployment of Palestinians there to separate fighting rival Shia factions, an Israeli military spokesman said Thursday.

As a brief truce went into effect after three days of fighting, Israeli forces monitoring the situation closely feared a possible "escalation of attacks against the Israeli Army security zone", the spokesman said.

His comments, quoted by the radio station of the Israeli-backed South Lebanese Army, marked Israel's first public reaction after some 500 troops of Fatah, the main faction in the Palestinian Liberation Organisation (PLO), went into the region Tuesday.

Fatah forces succeeded Wednesday in stopping a fresh offensive by the Iranian-backed Hezbollah movement against the pro-Syrian Amal militia.

On Thursday rival Shia militias agreed a ceasefire so victims of the clashes could be evacuated from the Iqlim al-Touffah mountains southwest of Sidon.

The toll stood at more than 25 dead and 100 wounded.

However Palestinian forces were now to be deployed some 10 kilometers (six miles) from Marjayoun, base of the Israeli command in the so-called security zone created by Israeli forces in southern Lebanon.

Meanwhile two Palestinian organizations based in Damascus deplored the fighting which began Sunday.

Abu Jaber, head of the Popular Front for the Liberation of Palestine, denounced the violence as a "deviation by the national Lebanese rifle from its essential target in the struggle against the Zionist enemy, which occupies part of Lebanon".

Mr. Jaber, whose group is one of three factions that make up the PLO, urged the rival factions "to patch up their differences" and concentrate on "fighting the Zionist enemy to liberate southern Lebanon and support the Palestinian intifida (uprising)".

Pro-Syrian Colonel Abu Mussa, head of the uprising in the Israeli-occupied Arab territories, denounced "the suspect intervention of (Yasser) Arafat partisans, which only foment the (inter-Shia) conflict".

CINCINNATI, OH (JULY 19) - Former American baseball star Pete Rose, who was banned from the sport in 1989 year after betting on his team, was sentenced to five months' jail for tax fraud on Thursday.

Rose, the former boss of the Cincinnati Reds, will then have to spend three months in a rehabilitation centre and do 1,000 hours of community service.

The 48-year-old holds 19 records in the U.S. baseball championships.

HARARE (JULY 19) - Zimbabwe will free its last detainee -- a suspected South African assassin -- before the country's 25-year-old state of emergency is lifted next week, a government minister said Thursday.

Home Affairs Minister Moven Mahachi said the detainee is Leslie Johannes Lesia, 53, who has been in detention without trial for the past three years.

He was was accused of plotting to use a booby-trapped television set to kill the chief representative in Harare of South Africa's African National Congress (ANC).

The Zimbabwean wife of another ANC member was killed when the set exploded in a flat in Harare in May 1987. Charges against Mr. Lesia were withdrawn in October 1988, but he was immediately redetained under the emergency powers, which allow for indefinite detention without trial.

Mr. Mahachi said Thursday: "We think he is no longer a security risk, because we have kept him for so long that the information he might have had is out of date."

The minister told local reporters he took "great exception" to people who compared Zimbabwe's state of emergency with that in neighbouring South Africa -- which was lifted over most of the country earlier this year. He said white-minority ruled south africa used its emergency to "repress blacks", while Zimbabwe used it to protect innocent people from Pretoria's commandos.

Six other suspected South African agents who had been held without trial in Zimbabwe for more than two years were released last year.

Trade unionists and human rights groups Thursday welcomed Wednesday's

announcement of the lifting of the emergency -- which was first imposed by the former white-minority government of Ian Smith when it unilaterally declared independence from Britain in 1965.

The Secretary-General of the Zimbabwe Congress of Trade Unions (ZCTU), Morgan Tsvangirai, said it "shows the international community that we are democratising our society and allowing personal freedom."

Mr. Tsvangirai was himself detained without trial for more than a month under the sweeping emergency powers in October last year when he criticised what he called the government's "rising state repression."

The trade union leader said he hoped opposition party members would no longer be detained without trial and that people would now be able to give their opinions freely.

A respected Zimbabwean human rights group, the Catholic Commission for Justice and Peace, also welcomed the news that the emergency would be allowed to lapse at midnight on July 25 when it came up for its regular six-monthly renewal.

The commission's director, Nicholas Ndebele, said: "We are really overjoyed with this announcement. Now our people are going to experience real independence, real freedom."

Mr. Mahachi announced Wednesday that the emergency would not be renewed because the country was experiencing domestic peace and because "it appears the South African government is now seriously extending a hand of friendship and is now ceasing the carrying out of commando raids on our territory."

#90200d2950 07/19/1990 ~French/German News Agency

TOKYO (JULY 19) - Mitsubishi Metal Corp., Japan's largest integrated non-ferrous smelter, said Thursday it will gain control of Cox Creek Refining Co. (CCRC), a copper refining firm based in the United States, in September.

Under an agreement with CCRC, Mitsubishi's American subsidiary Mitsubishi Metal America will purchase 60 percent of CCRC's stock for an undisclosed sum,
Mitsubishi officials said.

Mitsubishi Metal America will then have an 80 percent interest in CCRC, they said.

The U.S. firm has a blister copper electrolytic refining plant with an

annual production capacity of 270,000 tons, and a copper wire rod plant with annual capacity of 170,000 tons, they said.

HAVANA (JULY 19) - Five Cuban asylum seekers who had spent a week hiding in a Czechoslovak diplomat's residence here surrendered to authorities Thursday.

Reporters saw the four men and a woman, their heads covered to hide their identities, escorted from the residence of Charge d'Affaires Jan Domok and placed in a waiting police car, which took them away.

The five, who stormed into the diplomat's house July 12 and asked for political asylum, met Wednesday with a Cuban Foreign Ministry official and were told they would not be arrested if they left the building, one of the refugees told Agence France-Presse by telephone after the meeting.

Fourteen other Cubans sought refuge last week at the Czechoslovak Embassy, but they voluntarily left the compound in two groups Friday and Monday.

An additional four Cubans have sought refuge in the Italian ambassador's residence and another four in the Spanish Embassy.

The situation has sparked a sharp deterioration in Spanish-Cuban relations as the two governments traded criticism over each other's handling of the problem.

President Fidel Castro, an orthodox coummunist who has vehemently rejected the economic and political reforms sweeping Eastern Europe, has refused to negotiate the refugees' safe passage out of this Caribbean island nation.

Wednesday, Cuba issued a scathing, personal attack on Spain for its statements on the refugee situation. The criticism prompted Madrid to recall its ambassador, Antonio Serrano de Haro.

Thursday Spanish officials in Brussels said Spain was suspending economic cooperation with Cuba until a solution was found to the reguee situation.

The presence of the dissidents and asylum seekers in the Czechoslovak diplomatic posts also strained relations between the newly democratic government in Prague and Havana's hardline communist leadership.

At the height of the tensions earlier this week, Czechoslovak Deputy Foreign Minister Vojtech Wagner met with senior officials here to discuss the crisis. After returning to Prague, Mr. Wagner said Thursday that the tensions which surfaced over the refugee issue were not expected to affect

Czechoslovakia's role as host to Cuba's Interests Section in Washington, where Havana has no formal diplomatic presence of its own.

#90200d3020 07/19/1990 ~French/German News Agency

PARIS (JULY 19) - French Economy and Finance Minister Pierre Beregovoy on Thursday reaffirmed his opposition to two-speed European economic union, saying the whole point of the European Monetary System was to bring economic policies closer together.

The system should function "in such a way that each country can come closer to the best results in terms of price stability and monetary stability," Mr. Beregovoy told a press conference.

"It is in this spirit that one can conceive economic and monetary union .. and the worst thing to do would be to set up to-speed economic and monetary union."

The example given by West Germany, France, the Netherlands and Belgium "must inspire the monetary and budget policy of other (European Economic) Community countries," the French minister said.

He recognised Spain and Italy's difficulties and did not want to tell them what to do, but stressed the largeness of Italy's public deficit.

#90200d3070 07/19/1990 ~French/German News Agency

WASHINGTON (JULY 19) - Jonathan Jay Pollard, the U.S. analyst given a life sentence in 1986 for spying for Israel, has filed for a divorce from his wife Anne, according to reports Thursday.

''I'm in shock,'' Pollard told the Washington Post from her New York hospital bed. ''It's the last thing in the world I would've expected. I've

given my life to my husband.''

The 30-year-old former consultant, who was given a five-year jail term for aiding her husband, left prison last March and has been actively campaigning to win her husband's release.

The Post said her attorney, Mark Baker, said some of Jonathan Pollard's relatives had turned him against her during his years of solitary confinement in an Illinois prison.

But Judith Barnett, Jonathan Pollard's attorney, said it was ''100 per cent Jonathan's action,'' and that ''irreconcilable differences'' had caused ''a breakdown in the marriage.''

Anne Pollard's father, Bernard Henderson, said she suffered from an intestinal disorder diagnosed as pancreatic disease, and would fly to Israel for medical treatment. He said an Israeli insurance company was paying her medical bills as a humanitarian gesture.

MANILA (JULY 19) - A bomb exploded in a commuter bus in a suburb of the Philippine capital Thursday, injuring at least seven people, witnesses and police said.

The explosion ripped the top from the bus, witnesses said.

Police spokesmen said they were still trying to determine the type of explosive used.

Six bombs exploded within minutes of each other in the Education Department building and near luxury hotels before dawn July 13, and several other bombs were found elsewhere.

Investigators said commercial explosives, rifle grenades and plastic explosives were used in the bombings.

Spokesmen for rightist military renegades involved in past coup attempts issued conflicting statements on the bombings.

#90200d3090 07/19/1990 ~French/German News Agency

MEDELLIN, COLOMBIA (JULY 19) - The reputed press officer for the Medellin drug cartel and biographer for cartel boss Pablo Escobar Gaviria was arrested Wednesday at an undisclosed location, police here said Thursday.

Edgar Roberto Escobar Taborda, was the 22nd senior aide to cartel boss Pablo Escobar Gaviria to have been captured since a 4,000-member, police-army search for the notorious drug baron began more than a week ago.

Mr. Escobar Taborda and Pablo Escobar are not related, police said.

Also known as "the poet," Mr. Escobar Taborda was writing his boss's biography, police said.

Police seized a facsimile machine which apparently had been used by Mr. Escobar Taborda to send the cartel's communiques to news media.

Mr. Escobar Gaviria was still at large despite the intense search carried out on foot and by helicopter over mountains and jungle in the Magdalena Medio region near here.

Meanwhile, two men were killed early Thursday in Rionegro, 40 kilometers (25 miles) north of here, when a bomb they were apparently transporting in their truck exploded, police said.

The explosion slightly injured another two people, they said.

Two policeman were gunned down late Wednesday in towns near here, and a third one died in hospital after being recently wounded in another attack, bringing to 200 the number of lawmen killed in and around Medellin since the beginning of the year.

Judicial police in Bogota said Wednesday that the murder rate in Colombia so far this year was more than 50 per cent higher than for all of 1989. It put the number of killings at 11,439, and kidnappings at 619.

The report said 349 terrorist attacks have been carried out since January 1.

Although no precise data was available, many of the killings and bombings were attributed to the war between the government and the drug cartels begun in August of last year.

#90200d3110 07/19/1990 ~French/German News Agency

MOGADISHU (JULY 19) - Embattled Somali President Mohamed Siad Barre said Thursday his government was ready to talk to opposition figures including exiled dissidents, as a powerful bomb blast rocked Mogadishu.

A bomb was hurled from a car near the headquarters of the Criminal Investigation Department early Thursday, police said.

The blast, which followed an explosion in the grounds of the Chinese embassy here Sunday, was heard kilometres (miles) away, but no damage or casualties were reported.

Mr. Siad Barre, whose beleagured regime has lost control of much of northern Somalia to rebels, announced that he had appointed a seven-member committee to open a dialogue with his political opponents.

The move follows his promise Monday to hold multi-party elections on February 1.

Mr. Siad Barre said his government was ready to open discussions in Somalia or with exiled dissidents abroad, "anytime and anywhere".

The announcement signals a dramatic policy shift by the Somali regime, after years of repression.

The committee, headed by Mohamed Buraleh Ismail, chairman of the permanent committee of the people's assembly, will publish its programme within two weeks, Mogadishu radio said.

On Tuesday Mr. Barre, who has come under intense pressure from the West to introduce reforms, told 45 opposition figures released from jail Sunday that he was paving the way for political pluralism. He urged them to cooperate with the government.

ANKARA (JULY 19) - Turkey warned the United Nations and the European Community (E.C.) Thursday that the Greek Cypriot government's recent application for E.C. membership would block a settlement in Cyprus and urged its rejection.

The call was made in letters sent by Foreign Minister Ali Bozer to United Nations Secretary-General Javier Perez de Cuellar and the current E.C. President, Italian Foreign Minister Gianni de Michelis.

''We request that no action be taken on the Greek Cypriot 'application' even by way of its transmission to the (E.C.) Commission. This would be the course of action that could preserve the chances of a negotiated settlement in Cyprus,'' Bozer said.

In the letter Bozer argued that the Greek Cypriot Government had no ''legal or factual'' right and competence to speak for the whole island and its two communities.

The government in South Cyprus is in fact a pure Greek Cypriot

administration, elected exclusively by Greek Cypriots and protecting their interests only. Corresponding political authority in the north is the Turkish Republic of Northern Cyprus which is elected by and is exclusively entitled to represent the Turkish Cypriots,'' he noted.

Bozer said the Greek Cypriot application was ''nothing but an act which aggravates the situation in contravention of the U.N. Security Council resolution 649 (issued last March)'' and that ''now there is a need for the prompt elimination of this obstacle that is preventing the pursuit of effective talks in Cyprus.''

Ankara, whose own bid for early E.C. membership was turned down in January, fears the admittance of Greek Cyprus would be tantamaount to an E.C. endorsement of the Greek position on Cyprus.

#90200d3220 07/19/1990 ~French/German News Agency
LONDON (JULY 19) - Wall Street's weak re-opening gave shares a downward shove after an otherwise directionless day on the stock market here Thursday.

The Footsie 100 shares index closed down 14.7 points on Wednesday's finish at 2,87.3, and the FT-30 index closed down 11.9 points at 1,888.7.

In a quiet day's trading a total of 410 million shares changed hands against 590 million on Wednesday.

Neither shares nor gilts reacted to a set of British economic pointers which included earnings figures for May and money supply and unemployment figures for June.

After the afternoon downturn STC stood out as a rare strong climber following news that it and Fujitsu are in talks which could lead to a majority stake in STC's ICL computer subsidiary for the Japanese company.

Great Universal Stores (GUS) provided the gloomy message of the day with an annual profits statement which disappointed the market. Elsewhere in the sector Sears eased in sympathy with GUS 'A' shares and Burton reacted downwards to a broker's sell note.

Meanwhile operators looked nervously over their shoulders at the latest evidence of corporate ill health, after industrial conglomerate Parkfield's shares were suspended at 48 pence each late Wednesday.

Cable and Wireless suffered among electricals, but computer services group Hoskyns firmed further in the wake of French group Cap Gemini Sogetti's winning control on Wednesday.

Ferranti eased after announcing a 47 million pound (85 million dollar) cash call along with a 162 million (292 million) interim pre-tax loss.

Redland was a climber among builders on suggestion that it is to pull out of the highly compeitive plasterboard market.

#90200d3230 07/19/1990 ~French/German News Agency
MOSCOW (JULY 19) - Industrial production in the Soviet Union fell by 0.7 percent during the first six months of this year, compared to the same period last year, the Izvestia newspaper reported here Thursday.

Quoting official statistics, the paper said oil production had dropped by

five percent and coal by six percent during the first semester, though natural gas production was up by three percent on last year's.

Industrial production in the Caucasus was badly affected by strikes and ethnic conflicts, with figures down by 13 percent in Azerbaijan, 7.4 percent in Armenia and 6.9 percent in Georgia.

No figures were given for industries in Lithuania, the Baltic republic which was subjected to an economic blockade following its declaration of independence, but the paper said production there had not overtaken that of last year.

During the first six months of the year, a total of 10 million working days were lost because of strikes, the paper said.

Wages, which were expected to have gone up by an average 7 percent during the first semester, soared by 12 percent, Izvestia said.

-30- 1310

#90200d3240 07/19/1990 ~French/German News Agency

LONDON (JULY 19) - British Prime Minister Margaret Thatcher on Thursday welcomed the strong pound, saying it would help keep wage costs down and improve the competitiveness of British goods.

"We prefer a strong pound whether in or outside the exchange rate mechanism (of the European Monetary System), or to put it the other way round, whether outside or eventually in the exchange rate mechanism," Mrs. Thatcher said in answer to a question in parliament.

"A strong pound will exert downward pressure on unit wage costs. It will mean that our goods will become more competitive."

The pound has risen in recent days to come close to the three Deutsche mark level on speculation, among other things, of Britain's forthcoming entry into the exchange rate mechanism.

The government has been giving verbal support to a strong pound, as a way to slow down economic activity without having to further raise already high interest rates, observers said.

#90200d3250 07/19/1990 ~French/German News Agency

LONDON (JULY 19) - The International Bar Association announced Thursday it would not hold its biennial world conference in Nairobi as scheduled in September because of fears over security of delegates and the human rights situation in Kenya.

"Safety of delegates is paramount and following three days of serious unrest in Nairobi and other central areas ... I and my fellow officers feel that such safety cannot be guaranteed," IBA executive director Madeleine May said.

In a letter informing delegates of the cancellation, Ms. May added that "another matter of great concern to us is the state of human rights and the rule of law in Kenya."

"A number of persons are detained without being charged, including four lawyers. Many hold the view that by proceeding with our conference the IBA would be lending support to a regime that has suppressed those attempting peacefully to express their political views and exercise their internationally recognized human rights," the letter stated.

The conference of the IBA, which claims membership of around 13,000 lawyers worldwide, will instead be held in New York from September 19 to 23, the IBA said.

An IBA statement noted that this was the first time the organization had cancelled holding its conference at the originally-planned site.

Kenya's attorney general Justice Mathew Muli last May cancelled approval for the holding of the confence in Nairobi citing "continuing wrangling" among members of the Law Society of Kenya. It was reinstated a few days later after President Daniel arap Moi met with IBA officials.

#90200d3270 07/19/1990 ~French/German News Agency

NEW YORK (JULY 19) - U.S. telecommunications giant American Telephone and Telegraph (AT&T) reported Thursday a six percent decline in its second quarter earnings and a 2.5 percent drop in revenues.

Net earnings fell to 657 million dollars for the three months under review, compared to 699 million dollars for the same period last year, from revenues of 9.02 billion dollars (9.26 billion dollars in the second quarter of 1989).

The company said the declines were due primarily to drops in sales of telephone equipment and computers, which it blamed on the sluggish state of the U.S. economy.

For the first half of the year, however, AT&T's net earnings are up about 2.5 percent compared to the same period last year.

#90200d3310 07/19/1990 ~French/German News Agency
ISLAMABAD (JULY 19) - The government held talks with the opposition Thursday to try to develop a common approach on the introduction of Islamic law into Pakistan, National Assembly speaker Malik Meraj Khalid said.

He told reporters after a two-hour meeting that the two sides were not in dispute about the introduction of Islamic law, but differences existed on how it should be done.

The Senate passed a bill to introduce Islamic law, or shariah, in May, and the bill must be voted on by the National Assembly by August 19. Opposition leaders later said that it was agreed that the lower house would be convened in the first week of August.

Mr. Khalid said he hoped the assembly would complete the exercise with "harmony and consensus."

The government would give deputies a dossier of published views on shariah of religious scholars, lawyers, journalists, political parties and other groups, he added.

The government side at the talks was represented by Law and Justice Minister Syed Iftikhar Ahmed Gilani and Religious Affairs Minister Khan Bahadur Khan.

Chaudhry Abdul Ghafoor, deputy leader of the opposition, led a six-member opposition delegation.

Prime Minister Benazir Bhutto said on Tuesday that the government could not be a party to any legislation that takes away powers from the parliament.

The government believes that the bill would erode the powers of the parliament by giving sweeping powers to the courts to examine and decide whether any prevailing law is repugnant to Islam.

Speaking to reporters in Lahore Thursday, Ms. Bhutto, the first woman prime minister of a Moslem country, said her government wanted to enact an Islamic system bestowed by God.

But she repeated that the people were "agents of Allah" and a parliament elected by them should be supreme.

She also said that punishments such as chopping off a foot or hand "may not look proper." Such penalties for theft are imposed in Saudi Arabia, where the shariah laws are applied.

#90200d3320 07/19/1990 ~French/German News Agency
COLOMBO (JULY 19) - The casualty toll in more than three months of fierce fighting in Sri Lanka's northeast has risen to 1,900 as another 57 Tamil rebels and two soldiers were reported killed on Thursday.

The Defence Ministry said 55 guerrillas of the Liberation Tigers of Tamil Eelam (LTTE) and two soldiers died in the northeast during the last 24 hours, while a military spokesman said two rebels were killed in Tirukkovil in the east during a cordon-and-search operation.

A compilation of unofficial and government reports put the death toll of government troops and LTTE guerrillas at more than 1,900.

Defence Secretary Cyril Ranatunga told a press briefing earlier Thursday that 433 members of the security forces and police have died and more than 800 LTTE guerrillas killed since the armed conflict began.

General Ranatunga said that 654 troops and policemen were missing and 611 others wounded in the fighting, which has intensfied in the last few days with thousands of troops being moved from the east to the northern province to fight the Tigers.

Military officials here said that most of those troops and policemen listed as missing were believed killed.

Minister of State for Defence Ranjan Wijeratne, who was also at the press briefing, said that military operations were under way in the north, parts of which are rebel-controlled.

Fighting continued around the main army garrison at Jaffna Fort and the army camps at Kankesanthurai and Kilinochchi in the north, military officials said.

The rebels were pounding the camps with rocket, mortar and machine-gun fire and the troops were repulsing the attacks, an army officer said.

#90200d3330 07/19/1990 ~French/German News Agency
HONG KONG (JULY 19) - Beijing's top representative in Hong Kong on Thursday expressed optimism for a breakthrough in ties between China and Taiwan.

Zhou Nan, head of the New China News Agency's Hong Kong office, told participants of a conference on national reunification that he was optimistic a breakthrough would come "in the near future."

"Increasing contacts between the two sides have removed barriers between the mainland and Taiwan," he said, adding that communications across the Taiwan Strait had "reached a maturity."

The news agency, China's de facto consulate in this British colony, reportedly intervened on behalf of a prominent Taiwan writer who the government had denied a visa to attend the conference here.

Writer Chen Ying-chen was among 15 members of the Taiwan Alliance for the Unification of China to attend the three-day seminar, which ended Wednesday with a call for direct talks between Taipei and Beijing and increased people-to-people contacts.

The Chinese side was represented in the meeting by a delegation led by two vice chairmen of the country's highest government advisory body, the Chinese People's Political Consultative Committee.

#90200d3340 07/19/1990 ~French/German News Agency

BRUSSELS (JULY 19) - The European Economic Community is to impose a 43.4 percent anti-dumping duty on imported Chinese sacks used for such items as manure and cereals, the European Commission said Thursday.

The sacks had been offered at prices with a dumping margin of up to 80 percent between the normal value and the export price, the Commission said after an enquiry opened in January last year.

The share of Chinese sacks of this type of the European market rose from 22.3 percent in 1985 to 32.5 percent in 1988, with a value of 21 million European Currency Units (ECU's) (25.2 million dollars).

Average EEC prices of the sacks fell by 6.9 percent between 1986 and 1988.

The level of use of EEC production capacity in the sector had fallen from 79.5 percent in 1985 to 73.6 percent in 1988, and EEC producers had gone from profits at 9.4 percent of turnover in 1985 to losses from 1987 as Chinese imports increased.

Of 11 EEC producers who had complained to the commission, three had partly or totally stopped producing the sacks between 1987 and 1988.

#90200d3350 07/19/1990 ~French/German News Agency

MOSCOW (JULY 19) - The top military official of the seven-nation Warsaw Pact said Thursday Soviet troops stationed in what is now East Germany would sooner or later return home and the pullout would take up three to

four years.

Chief of staff of the Warsaw Pact countries' joint armed forces, General Vladimir Lobov, in an interview with Tass news agency, gave no date for the possible start of a Soviet troop pullout.

But he said this may be linked to the completion of a transitional period of German unification and to the North Atlantic Treaty Organisation's review of its political guidelines, doctrine, strategy and their practical implementation.

''The return of Soviet military contingents, I believe will take three to four years,'' he said. ''This is due to many factors, including the Soviet Union's economic difficulties,'' he added.

He noted that the presence of Soviet troops in East Germany - like that of American, English and French troops in West Germany - was in line with the four World War Two allies post-war commitments.

The decision to withdraw Soviet troops must thus coincide with a decision on the troop presence in Germany of other countries.

The withdrawal of Soviet and other troops from Germany should be linked to the creation o pan-European security structures, he said.

In Bonn, West German government officials meanwhile confirmed that the pullout of 100,000 U.S. chemical artillery shells from West Germany will start next week.

#90200d3360 07/19/1990 ~French/German News Agency

WASHINGTON (JULY 19) - The time is not right for withdrawing U.N. recognition of the Cambodian resistance coalition, an Association of Southeast Asian Nations (ASEAN) diplomat said here Thursday.

The diplomat was commenting on U.S. Secretary of State James Baker's announcement that Washington would no longer recognize the U.N. seat held by the tripartite Cambodian resistance and would be willing to open a dialogue with Vietnam on Cambodia.

Mr. Baker said the policy reversal was aimed at preventing the Khmer Rouge, the dominant military force within the U.N.-recognized coalition, from regaining power.

"We're not supporting the coalition seat indefinitely ... But the timing and manner in which (a change) is done is very important. We all have to agree that this is not the time to do it," said the diplomat, who requested

anonymity.

Speaking to reporters here ahead of next week's talks in Jakarta between ASEAN foreign ministers and their counterparts from the United States, Canada, the European Economic Community, Japan, Australia and New Zealand, ASEAN envoys said they were briefed Tuesday on the U.S. policy change by Under Secretary of State for political affairs Robert Kimmitt.

They said they were still awaiting word from their governments on a formal response.

An ASEAN envoy said Mr. Baker had originally intended to make the announcement at the Jakarta meeting.

The envoys -- from Indonesia, Malaysia, Brunei, the Philippines, Singapore and Thailand -- said there was no disagreement between ASEAN and Washington on the need to support the non-communist resistance and to ensure that they are part of the political equation.

"We want a non-communist Cambodia, that's the bottom line," one diplomat said.

"One of the objectives of the Soviet Union, the PRK (Phnom Penh Government) and Vietnam has been to get the (resistance) coalition out of the U.N. We don't want to hand it to them on a platter," she said.

"We want to keep it that way as long as we can ... as a bargaining chip," she added, and effect a change "at a point when we feel it is useful for the peace process."

The envoys said Mr. Baker's talks with ASEAN foreign ministers in Jakarta next week would also afford an opportunity to discuss the issue as well as the controversial presence of Vietnamese boat people in first asylum countries such as Malaysia, Indonesia and Hong Kong.

ASEAN and Hong Kong want all boat people that are not genuine refugees sent home, a policy opposed by Washington.

The United States has come under criticism from ASEAN for refusing to establish a holding center for boat people on U.S. soil to relieve pressure on first asylum nations.

A Malaysian envoy said the key to resolving the refugee situation was normalization of U.S.-Vietnamese relations.

Noting that Mr. Baker said in Paris Wednesday that a normalization would have to await a comprehensive Cambodian settlement, the envoy urged Hanoi to move toward that goal. "The ball is in Vietnam's court," he said.

LONDON (JULY 19) - Member brokerages of markets overseen by the London Futures and Options Exchange (London FOX) will in future be allowed to trade on any of its member markets, a statement from London FOX said here Thursday.

The new plan, which was approved by FOX members on Wednesday, will allow members of an individual market to become members of FOX as a whole.

The scheme will increase flexibility and enable London FOX to grow at a much faster pace, the statement said.

London FOX, which oversees markets in coffee, sugar and cocoa and which recently introduced a rubber market and a metals index future, plans to add electricity, property and rice index futures onto its trading floors in the next six months.

SINGAPORE (JULY 19) - Singapore on Thursday rejected requests from the Asian Wall Street Journal and the Far Eastern Economic Review to cover the Asia Pacific Economic Cooperation conference here later this month.

The government rejected applications made by the two publications to allow their correspondents into Singapore for the three-day conference beginning July 29, a government statement said.

Both publications have been gazetted by the Newspaper and Printing Presses Act (NPPA) and their circulation has been restricted for alleged interference in Singapore's domestic politics.

The Asian Wall Street Journal is permitted to sell only 400 copies daily while the Review has refused to accept a reduced circulation and does not sell in Singapore.

However, reproduced copies of the Review are on sale in Singapore. Under an amendment to the NPPA, reproductions of gazetted publications are permitted.

The government on Wednesday introduced an amendment to the NPPA in parliament which proposes requiring foreign newspapers with a circulation of more than 300 copies to obtain permits to distribute in Singapore.

They will also be required to have a representative in Singapore to accept

service of documents involving legal actions.

Twelve countries -- Brunei, Indonesia, Malaysia, Philippines, Singapore, Thailand, the United States, Australia, Japan, South Korea, New Zealand and Canada -- are to attend the APEC conference.

JOHANNESBURG (JULY 19) - West German embassy officials defused a tense situation outside their embassy in the capital Pretoria Thursday by inviting black demonstrators onto embassy premises after warnings by South African police that their gathering was illegal.

The demonstrators were at the embassy to deliver a memorandum in protest against the visit to the nominally independent South African homeland of Bophuthatswana by a small group of West German federal parliamentarians.

The Anti-Bophuthatswana Co-ordinating Committee said the visit amounted to West German recognition of the tribal homeland, created in terms of the ''grand apartheid'' vision of a whites-only South Africa.

An official said the embassy was not officially aware of the visit.

''Although it is normal practice that government officials coming to South Africa inform us about their visit, we have no such information regarding German nationals who are visiting, and it should be placed on record that our country does not recognise Bophuthatswana.''

South African sources said the delegation comprised six members of the Bonn Bundestag, including all main governing and opposition parties with the exception of the Greens.

In early 1988, the late Bavarian premier Franz Josef Strauss became the first politician of international standing to visit Bophuthatswana.

CAPE TOWN (JULY 19) - A leader of the hardline anti-apartheid Pan Africanist Congress (PAC), Barney Desai, is to appeal the banning of a book he wrote about the "murky and dreadful past" of the ruling National Party.

Mr. Desai, the Western Cape leader of the PAC, said at a media conference here Thursday he was informed by the government's Committee on Publications that distribution of the book, "The Killing of Imam", had been restricted and that it must remain unavailable to the general public.

The book chronicles the death in detention of a Muslim leader, Imam Abdullah Haroon, who was arrested by the South African Security Police in May 1969 and kept in solitary confinement.

"My book delves into a murky and dreadful past, some 350 years of white domination, climaxed by 42 years of (white) Nationalist rule -- a nightmare from which we are now emerging," Mr. Desai said.

He considered it his duty to remind all South Africans of the past, Mr. Desai said.

"I firmly believe that under no circumstances, irrespective of who rules Azania (the PAC's name for South Africa), will there ever be a repeat performance of man's inhumanity to man".

Mr. Desai returned to South Africa from exile after President Frederik de Klerk lifted the 30-year ban on the PAC on February 2.

#90200d3470 07/19/1990 ~French/German News Agency

BUCHAREST (JULY 19) - The "genocide" trial of 24 former top communist officials, including former Romanian prime minister Constantin Dascalescu, is set to open before a military tribunal here Saturday, police said Thursday.

The "genocide" charge against the former senior communists is related to the armed repression of demonstrations in Timisoara in western Romania last December, a few days before the overthrow of dictator Nicolae Ceausescu.

The 24 communists, 16 of whom were members of the Communist Party's executive political committee, are accused of having carried out orders by Mr. Ceausescu to crush demonstrations in Timisoara on December 17, 21, and 22.

According to the state prosecutor, 1,030 people were killed and 2,198 injured in anti-government demonstrations throughout Romania last December, more than half of them in Bucharest.

Besides Mr. Dascalescu, others accused include former first deputy prime minister Gheorghe Oprea, deputy prime ministers Lina Ciobanu, Stefan Andrei, and Ion Radu, as well as the former chairman of the state council, Gheorghe Radulescu.

The accused are facing possible sentences of life imprisonment. The death penalty has been abolished in Romania since the execution of Mr. Ceausescu and his wife on December 25.

The military tribunal is to be presided by General Ioan Mistor, who was one of the judges who sentenced the Ceausescus to death by firing squad on December 25. The prosecutor is Colonel Grigore Scarlatoiu, who headed inquiries into government repression in Cluj in central Romania last December.

The charge sheet is is 165 pages long and written evidence is contained in 10 volumes of 600 to 800 pages each.

At hearings into the charges which began last December 25, 164 people appeared and 55 have been summoned to testify at the trial.

The accused were originally also charged with "draining the national economy" but the charge was removed because "it covers a long period of time and further inquiries will have to be made," a judicial source said.

The four top officials in the ousted Ceausescu regime have already received life sentences for "complicity to commit genocide" and a military supreme court rejected their appeal on May 25.

#90200d3580 07/19/1990 ~French/German News Agency

BERLIN (JULY 19) - East Germany's centrist Liberals threatened Thursday to bring down Prime Minister Lothar de Maiziere's coalition government if he holds to his position that German reunification wait until after elections scheduled for early December.

"We are ready to go all the way," Liberal leader Rainer Ortleb said in an interview to appear Friday in the newspaper Hamburger Abendblatt.

Mr. Ortleb's Liberals, supported by the Social Democrats, want the East German parliament to vote before the end of the month in favour of German reunification on December 1, a day before elections they say should take place throughout the united country.

Their proposal, supported by their counterparts in West Germany, calls for proportional elections with a minimum of five per cent of the vote needed for parliamentary representation.

Mr. de Maiziere's Christian Democrats, supported by conservative allies in the German Social Union party, are in favour of East German adherence to the West German constitution after elections, which would take place separately in the two Germanies.

It is believed elections before reunification would permit small parties such as the German Social Union and the reformed Communist Party to reach

the five-per-cent level.

Mr. de Maiziere said in an interview to be published Friday in the newspaper Die Welt that he believed German reunification "can only take place with a constituent assembly" of the first parliament of a united Germany since World War II.

Christian Democrat spokesman Helmut Lueck said, however, that the party may isolate Mr. de Maiziere on the question.

Mr. Lueck told AFP there was "a growing tendency" within the party to support German reunification before general elections.

BELGRADE (JULY 19) - The Serbian republic accused the European Parliament Thursday of encouraging the province of Kosovo to set up a separate ethnic Albanian state in Yugoslavia.

In a letter, Serbia's parliament said a protest by European Parliament against alleged human rights violations in Kosovo was "anti-Serbian and anti-Yugoslav".

Serbian Interior Minister Radmilo Bogdanovic also said his republic, which controls Kosovo, would take legal action against ethnic Albanian members of the provincial parliament who proclaimed Kosovo independent on July 2.

He described their move as "illegal" and punishable by law, the official Yugoslav news agency Tanjug said.

Serbia dissolved the Kosovo parliament after 114 MPs declared the province "a federal unit equal to others" that make up Yugoslavia. The move sparked demonstrations by thousands in Pristina, capital of the mainly ethnic Albanian province.

In other developments, the new parliament of the northwestern republic of Slovenia accused Serbia Thursday of "usurping power" by dissolving the Kosovo government.

The Parliament, set up in the region's first free elections last April, said Serbia was "violating Yugoslavian constitutional order" by scrapping legally elected bodies "against the will of the Kosovo people".

The protest, drafted by minority pro-reform communist MPs, also blamed Belgrade for supporting the Serbian move.

BONN (JULY 19) - A west German airforce Phantom fighter plane Thursday accidentally lost an anti-aircraft Sidewinder missile while overflying the Black Forest mountains in the southwest of the country, the Bonn defence ministry said.

The 2.80-metre, 80-kilo missile was later found after a tip-off from local residents in a hilly forest near the city of Freudenstadt, 180 kilometres south of Frankfurt and some five kilometres away from the area where the two pilots believed they had lost the missile.

Earlier, some 100 police and soldiers spent hours unsuccessfully searching for the missile.

The accident caused no injuries. But the defence ministry ordered an immediate halt of all flights with Sidewinder missiles aboard.

The two pilots said they suspected that the missile was probably lost due to a ''technical defect'' while the were flying a looping at a height of 1,300 metres.

The plane took off from the Pferdsfeld airforce base in the Hunsrueck mountains, some 80 kilometres west of Frankfurt.

#90200d3750 07/19/1990 ~French/German News Agency
KUWAIT (JULY 19) - Kuwait has dismissed as untrue recent Iraqi accusations that it has been dumping crude oil on the market in order to weaken Iraq, it was reported Thursday here.

The official Kuwaiti News Agency (Kuna) said Kuwait's Foreign Minister Sheikh Sabah al-Ahmed as-Sabah has sent a letter to Arab League Secretary-General Chedli Klibi in which he dismissed as ''not based on reality'' Baghdad's claims that his country was stealing Iraqi oil.

As-Sabah expressed his ''dismay, extreme surprise and astonishment'' over the Iraqi charges and reminded Klibi that Kuwait had supported Iraq during its eight-year war against Iran, which was stopped by a truce in 1988.

Klibi received Monday a letter from Iraqi Foreign Minister Tariq Aziz accusing Kuwait of planning to undermine Iraqi's economy and security.

''Attempts by the governments of Kuwait and the United Arab Emirates to dump additional crude on the oil market is a deliberate plan aimed at weakening Iraq and undermining its economy and security,'' Aziz charged.

He accused Kuwait of stealing 2.4 billion dollars worth of Iraqi crude in the past ten years from the al-Rumeilah oilfields on the two countries' joint border.

As-Sabah said in his letter to Klibi that the al-Rumeilah oilfields were ''located inside Kuwaiti territories and Kuwait had pumped out oil from wells that lie south of the international borders''.

Both Ministers have requested in their letters that the Arab League end the dispute.

Aziz had called ''on our (Arab) brothers to urge those concerned to stop their deliberate action against Iraq'', while as-Sabah asked the League to form a committee and charge it with tracing the borders on the basis of existing accords between Kuwait and Iraq.

In an apparent bid to contain the dispute, Klibi Thursday headed from the League's headquarters in Tunis to Kuwait. He is expected to continue afterwards to Baghdad.

As-Sabah Thursday was explaining Kuwait's position in the Gulf state of Qatar, while two other Kuwaiti cabinet members were touring other Arab countries on similar missions.

BUENOS AIRES (JULY 19) - President Carlos Menem Thursday announced he would go ahead with further plans to privatize state-run power companies, oil concerns, railroads, airports, customs information services, and to franchise nuclear power and hydroelectric plants.

With these far-reaching measures, Mr. Menem wants to eliminate the budget deficit, stimulate economic growth by attracting foreign investment and

reduce the country's external debt which hovers around 60 billion dollars.

The budget deficit had grown by the end of last year to nearly 17 per cent of the gross domestic product: eight percent accrued by state-owned firms and the remainder by the Central Bank.

In January, the banking deficit was wiped clean by the government-enforces exchange of all savings deposits for 10-year, external-debt bonds payable in dollars.

A year since he took office, Mr. Menem's economic revamping program has led to the auctioning off of the national telephone company Entel to a group led by Spain's Telefonica and U.S. Bell Atlantic, and Argentinas Airlineas to a consortium led by Spain's Iberia airlines and the local privately owned airline Cielos del Sur (Southern Skies).

Both Entel and Argentinas Aerolineas are expected to be transferred to their new owners in September, a month ahead of time.

Also in the past 12 months, two state-run television channels have been privatized, several major oil fields leased, and some railroad lines have been put up for sale, while 40 per cent of the country's road repairs have been tendered out to private companies.

On Wednesday, Mr. Menem allowed local airlines and tourist operators to charter flights to and from countries which granted reciprocal rights. This is expected to bring some one billion dollars of much needed foreign currency to Argentina.

The government Thursday said it would ask Congress to approve the privatization of Servicios Electricos del Gran Buenos Aires, which provides power in the capital and which is running up a yearly 100-million-dollar deficit.

#90200d4080 07/19/1990 ~French/German News Agency

JERUSALEM (JULY 19) - Eight Israeli officers, including two lieutenant-colonels, were sacked Thursday following the accidental death of five soldiers two days earlier, military sources said.

The five soldiers were killed Tuesday when a shell was accidentally fired at them at an army base in southern Israel. Ten others were injured, three of them seriously.

An investigation showed that the incident could have been avoided if security measures had been respected.

Agriculture Minister Raphael Eytan, a former chief of staff, has called for the resignation of the current chief of staff, General Dan Shomron, accusing him of being responsible for the "indiscipline that reigns in the army."

Voice of Israel Radio meanwhile reported Thursday that a Western military observer was slightly wounded by a stray bullet a month ago while he attended army maneuvers.

The nationality of the officer was not revealed.

#90200d4100 07/19/1990 ~French/German News Agency

ANKARA (JULY 19) - Two people were killed and four injured during a "terrorist attack" on the village of Omerli near the Turkish border with Syria, the news agency Anatolia reported Thursday.

Citing local government sources in the area, Anatolie said the attack occurred in the home village of Abdullah Ocalan, alias Apo, the leader of the separatist Workers Party of Kurdistan (WPK).

The attackers killed the mayor of Omerli, Bozan Bindal and his six-year-old son and wounded four others while machine-gunning Mr. Bindal's house, Anatolia said.

The news agency did not say what group the "terrorists" belonged to, but the word is usually employed by authorities to describe Kurdish rebels who belong to Mr. Ocalan's pro-Marxist WPK.

Kurdish rebels have been involved in an armed struggle against the Turkish government since 1984. They have been demanding the creation of an independent state of Kurdistan in the region.

Since then fighting between Kurdish rebels and Turkish authorities has killed 1,954 people -- 765 civilians, 429 soliders, and 760 rebels, according to a tally kept by Agence France-Presse.

Three rebels and a pero-government militiman were reported killed in another clash near the Iraq border Tuesday.

Meanwhile, 11 Turkish MPs and founders of the Popular Workers Party continued Thursday their pro-Kurdish "march for freedom" through Turkey, which started Tuesday in Istanbul, Anatolia said.

The 11, formerly of the Populist Social Democratic Party (PSDP) but in disagreement with it on the Kurdish question, arrived in a coach and demonstrated in central Ankara holding up signs saying, "A secular Turkey,"

"General amnisty," and "No to exile and censoring."

Most of the 11 deputies were expelled from the PSDP for having attended a conference in Paris last October on the status of Turkish Kurds.

The 11 deputies are to finish their march on July 23 in Diyarbakir, the largest city in the southeastern Anatolia province, where the majority of the population is Kurdish. The deputies are also to visit the Anatolian towns of Urfa and Mardin.

#90200d4110 07/19/1990 ~French/German News Agency

WASHINGTON (JULY 19) - U.S. lawmakers introduced legislation Thursday to halt U.S. aid to Kenya until President Daniel arap Moi's government frees all political prisoners and introduces democratic reforms.

The proposals, put forth in both the Senate and the House of Representatives, were drawn up in reaction to the recent police repression of a pro-democracy demonstration in Nairobi which sparked five days of rioting that left 22 people dead.

Seven opposition figures including two former cabinet ministers have recently been detained without trial by Mr. Moi's government.

"Americans should not send these tax dollars to a government that denies its citizens their basic rights," said Senator Edward Kennedy on presenting his bill.

Neither house of Congress is expected to vote on the proposals until after the summer recess ending in September.

Kenya, the largest recipient of U.S. aid in sub-Saharan Africa, was slated to receive 46 million dollars in assitance this year, but 13 million dollars of the funds have been frozen by Senator Paul Simon, chairman of the subcommittee on Africa, in a sign of displeasure with Mr. Moi's government.

For next year, the White House has requested 42 million dollars in assistance for Kenya, one third of it in military aid.

Mr. Simon said that 27 per cent of Kenya's annual budget comes from foreign aid and loans.

#90200d4150 07/19/1990 ~French/German News Agency

BRUSSELS (JULY 19) - The European Economic Community will soon set the level of reduction in agricultural subsidies it plans to propose in GATT talks, a senior European Commission official said here Thursday.

The proposals would be in line with the EEC's overall favouring of a global reduction in the various forms of subsidy -- subsidies, production assistance and export aid, the official said.

The United States is seeking a reduction in export payments as a priority in the Uruguay Round of multilateral trade talks within the General Agreement on Tariffs and Trade, but this is categorically rejected by the EEC.

"If that is the aim, we cannot conclude" an agreement, the European Commission source warned.

GATT members are to meet in Geneva next week to try to reach agreement in principal on the main aspects of the Uruguay Round, which is due to be completed in December.

"Our aim is not to retain the Common Agricultural Policy, European farmers must expect reforms to continue, but within certain limits," the Commission official said.

European Commissioner for Agriculture Ray MacSharry in an interview published in a Dutch newspaper Thursday reaffirmed the EEC's opposition to ending agricultural subsidies, and said the Community had made no concessions on the issue at this month's Group of Seven summit in Houston.

Mr. MacSharry said in the interview with the NRC Handelsblad that during the Houston summit of the seven leading industrialised nations, the EEC "had only confirmed the position it adopted a year and a half ago."

Mr. MacSharry said that he did not believe the EEC would take the risk of totally blocking the GATT talks because of its disagreement over agricultural subsidies with the United States.

U.S. Agriculture Secretary Clayton Yeutter had on Wednesday warned of a

trade war if the EEC continued to block GATT negotiations on reducing agricultural subsidies.

"We accept a reduction in agricultural subsidies, but not their suppression," he said. "That goes for all support measures, including export subsidies," Mr. MacSharry said.

"The United States in fact gives two and a half times as much in subsidies per farmer as the EEC.

"We are ready to negotiate and we would like others to do the same, instead of talking about things which are impossible to realise, such as suppressing all support to agriculture."

Mr. MacSharry said that if export subsidies were stopped, three to four million European farmers would be in difficulty, and to avoid this situation it would cost five billion to seven billion European Currency Units (ECU's -- seven to 10 billion dollars) to destroy their surplus production.

"Neither of these is politically acceptable," he added.

-30- 2977

#90200d4180 07/19/1990 ~French/German News Agency

LONDON (JULY 19) - The dollar fell against major currencies except for the yen here Thursday and the pound also lost ground, despite a brief upsurge after Prime Minister Margaret Thatcher said she favoured a strong pound.

British economic figures published in the late morning gave no clear signals to markets, now awaiting balance of trade statistics due Monday, analysts said.

The dollar closed at 1.64 Deutsche marks compared with Wednesday's 1.6460 marks, at 1.4045 Swiss francs (1.4085), 5.5020 French francs (5.52) and 147.70 yen (147.40).

The pound closed at 1.8155 dollars against 1.8205 the previous day, at 2.9807 Deutsche marks (2.9929), 2.5499 Swiss francs (2.5642), 9.9889 French francs (10.0492) and 268.14 yen (268.34).

Gold rose to 362.50 dollars an ounce from 360.50 dollars.

The Eurodollar rate remained unchanged at 8.125 percent, as did the British Interbank rate at 14.9375 percent.

In Frankfurt, the dollar fell to 1.6415 Deutsche marks from Wednesday's

1.6450 marks.

In Zurich, the U.S. currency rose slightly to 1.4080 Swiss francs against Wednesday's 1.4030 francs.

Gold rose by 2.50 dollars an ounce and closed at between 361 and 364 dollars an ounce compared with the previous day's 358.50 to 361.50 dollars an ounce.

#90200d4220 07/19/1990 ~French/German News Agency

BRUSSELS (JULY 19) - The European Commission on Thursday expressed strong concern over a U.S. Senate vote to curb textile imports, saying it was blatantly protectionist.

The Commission, which is negotiating for the European Economic Community in the current Uruguay Round of multilateral trade talks within GATT, issued a statement criticising "the voting by one of the Chambers of the U.S. Congress of such openly protectionist legislation."

U.S. President George Bush has threatened to veto the legislation to curb increases in imports of textiles and clothing to one percent a year and hold shoe imports at 1989 levels.

The Senate passed the legislation Tuesday by 68 votes to 32, but it has yet to go before the House of Representatives.

The legislation is "diametrically opposed" to the objectives implies in current textile negotiations within the General Agreement on Tariffs and Trade,
the Commission statement said.

The Senate vote "cannot but sow serious doubt in the minds of U.S. trade partners as to the prospects of reaching a series of accords reflecting with a just balance th interests of developing and developed countries," it said.

Almost all participants in the GATT talks, except the United States and CAnada, support a proposal to integrate textiles within the General Agreement using the current Multi Fibre Arrangement as a base, it added.

Washington wants to replace the MFA by a system of global quotas which would rise gradually, while the EEC wants to preserve the current system and open it up gradually.

The EEC fears restrictions on its U.S. exports which have hitherto been unrestricted.

#90200d4250 07/19/1990 ~French/German News Agency

LONDON (JULY 19) - Australian entrepreneur Alan Bond has offered to resign as chairman of his flagship Bond Corporation at a meeting of the company's bond holders here Thursday, Peter Lucas, a Bond Corp director told reporters.

The meeting, already reconvened from three weeks ago, was adjourned for a further three weeks to give bond holders an opportunity to consider what was described as "this significant development".

Bond holders will meet again on August 9th.

Mr. Bond's offer to resign was among a number of concessions put forward at the meeting, where those attending were being asked to vote on a move to sell the company's Australian brewing interests to Bell Resources Limited, and to forego interest on their bonds for a year, part of a restructuring of Mr. Bond's debt-ridden empire which is seen as essential for its survival.

In another concession, Dallhold Investments Pty Ltd., the Bond family company which controls 58 percent of Bond Corporation's share capital, undertook to limit its votes to 25 percent pending reconstruction of the company, with Dallhold nominees to the Bond board restricted to a minority of directors.

The appointment of a new Bond Corporation chief executive to replace the incumbent Peter Beckwith was another concession put on the table.

The movement to adjourn the meeting was made by a representative of the Swiss Banking Corporation, one of the group of bondholders whose 340 million U.S. dollars worth of convertible bonds are estimated to be saleable at less than five cents in the dollar.

Mr. Bond, who is expected to stay in London this coming weekend, told the meeting that the proposed concessions "have been under consideration for some time".

"Our commitment to the bondholders to implement these changes within 30 days of their approving the brewery sale and the interest moratorium should confirm in peoples' minds our dedication to do everything necessary to restore full value to Bond Corporation," he said.

Bond Corporation has already made disposals worth 6.7 billion Australian dollars (5.2 billion U.S. dollars) in the past two years in attempt to dig itself out of the debt situation which began with heavy losses in the 1987

world stock market crash.

But the company still had debts estimated at around five billion U.S. dollars at the end of May this year. In 1989 the company made a 980 million Australian dollar (764 million U.S. dollar) loss.

#90200d4260 07/19/1990 ~French/German News Agency

YORBA LINDA, CA (JULY 19) - Four past and present U.S. presidents joined in this California town Thursday to inaugurate a library documenting the career of Richard Nixon, whose two-term administration ended with his 1974 resignation in the Watergate scandal.

Prominent politicians, including former secretary of state Henry Kissinger, packed the audience to hear President George Bush, his predecessors Ronald Reagan and Gerald Ford, and finally Nixon. All are members of the Republican Party.

The library, in Nixon's birthplace, is the latest in a string of privately-organised archives dedicated to the term of office of a U.S. president. It cost some 21 million dollars to build and equip, all of it raised privately, including two million dollars from Nixon himself.

LIMA (JULY 19) - Three people were killed Thursday by suspected Shining Path guerrillas, as violence flared nine days from the inauguration of Peruvian President-elect Alberto Fujimori.

The killings took place in the Andean city of Ayacucho, 300 kilometers (185 miles) southeast of here, police said.

The legal adviser of Ayacucho's Development Corporation, Maximo Rico, was shot while sleeping in his home, while two of his employees who had been kidnapped a week ago were found dead in another part of the city.

In other developments, authorities said 10 rebels were killed Tuesday and Wednesday in separate clashes with security forces in the northeastern department of Huanuco.

The outgoing government has stepped up security measures throughout the country to prevent a surge of terrorist attacks before Mr. Fujimori's inauguration.

Police said they found and deactivated some 30 explosive charges which had been placed in schools and other public buildings in different towns in the

eastern department of Huancayo.

Authorities here, meanwhile, were investigating the death of four drug enforcement officers in a helicopter crash Wednesday, which they think may have been caused by sabotage.

Four students at the North American Cultural Institute in the southestern city of Cuzco were wounded when an explosive charge went off in a rest room, police said.

JOHANNESBURG (JULY 19) - There has been a surge of serious interest in South Africa by potential immigrants from Hong Kong, the South African Broadcasting Corporation (SABC) reported.

As the Chinese look for alternatives to Hong Kong with the approach of communist rule in 1997, ten times more Chinese applied for residence in South Africa in the first five months of this year than in the whole of last year, the SABC said.

It quoted one company managing director who has recently returned from Hong Kong to promote investment there as saying there were were substantial economic advantages in Chinese immigration to South Africa.

Immigrants are required to bring a minimum of R200,000 (76,280 dollars) with them, or be highly skilled, Mr. Scott McRae said.

Most Chinese who have applied for immigration wish to set up their own businesses, he added, with the benefit of job creation for South Africa's own population.

SIDON, LEBANON (JULY 19) - Red Cross volunteers dodged bullets Thursday to evacuate the bodies of 11 Shiite Amal militiamen killed during three days of fighting near here against the Hezbollah movement, correspondents said.

Militiamen from the pro-Syrian Amal and the Iranian-backed Hezbollah (Party of God) ignored an earlier pledge to the Red Cross to observe a "humanitarian truce".

The fighting in the Iklim al-Touffah district, 20 kilometers (13 miles) south of this port city is the latest in a longstanding war between the two groups to dominate the Shiite community in Lebanon.

Red Cross volunteers entered the ruined village of Jarjouh, a former Amal stronghold that fell Monday to Hezbollah, and retrieved the decaying bodies of 11 Amal militiamen as bullets whizzed around their heads, correspondents said.

At least 44 people -- most of them combatants -- were killed since fighting erupted on Monday and 104 others were hurt according to a toll compiled by Agence France-Presse.

Among the latest deaths Wednesday and Thursday were two Palestinian guerrilla from the Palestine Liberation Organisation's mainstream Fatah group, which deployed 500 fighters in the zone to separate the belligerents.

Palestinian officials have said that the Fatah intervention helped stopped an advance by Hezbollah towards Nabatiyeh and Zahrani, two Amal-held towns further south.

Fatah representative Zeid Wehbe told reporters that the Palestinian guerrilla would not "intervene militarily".

He added that PLO leader Yasser Arafat received a positive reply from Iranian President Ali Akbar Hashemi Rafsanjani to his request that Iran pressure Hezbollah to withdraw its fighters from Jarjouh.

BEIRUT (JULY 19) - The Vatican's representative in Lebanon, Monsignor Pablo Puente, on Thursday warned that Lebanon could "disappear" unless rival Christian factions closed ranks and rallied around their president.

Msgr. Puente made the remarks after talks with Christian military leader Michel Aoun who refuses to recognise the authority of Syrian-backed President Elias Hrawi.

Army troops led by General Aoun have been fighting since January against Christian Lebanese Forces militiamen for supremacy in east Beirut and territory east and north of the Lebanese capital.

"This is probably one of the most critical moments in the modern history of Lebanon ... it is the momeent of the big sacrifice for global peace and an urgent and definitive unity and fraternity," Msgr. Puente said.

"Today, more than ever, the supreme well-being of the nation must be above any other consideration. Otherwise there is the grave risk that Lebanon will disappear," he warned.

Mgr. Puente met Tuesday with Arab League envoy Lakhdar Ibrahimi who has been visiting Beirut following a call launched by the Hrawi administration to Gen. Aoun urging him to "submit" to the government authority.

Mr. Hrawi was elected in November under the terms of an Arab peace plan for Lebanon drafted by Saudi Arabia, Morocco and Algeria, that also calls for political reforms that would bolster the power of the country's Moslems at the expense of the Christians.

Gen. Aoun has refused the plan for failing to call for a withdrawal of Syrian troops from Lebanon.

The Vatican secured in May a ceasea-fire between Gen. Aoun and the Christian militia but daily clashes have been reported, bringing the death toll since January to more than 1,000 people killed nearly 3,000 wounded.

JOHANNESBURG (JULY 19) - President Frederik De Klerk has, for the first time in South Africa's history, more support from blacks than whites, a poll conducted by the respected Markinor Research Group found.

Replies to the question of how well the State President was leading the country, received an 88 per cent very well or fairly well response among black people, while 70 per cent of whites were positive, the South African Broadcasting Corporation reported.

The survey was conducted in May among 1500 black men and women in metropolitan areas and 800 white women in urban and rural areas.

On the issue of confidence in the future, a phenomenal 76 per cent of black people were either very or fairly confident. The figure for whites was 58 per cent.

Political observers said the present trends indicated a fairly good climate for negotiation.

The South African government began preliminary talks on negotiations with the recently unbanned anti-apartheid African National Congress in Cape Town on May 2 to 4.

AMSTERDAM (JULY 19) - A Fokker passenger plane with 21 people aboard safely executed an emergency landing here Thursday evening after

experiencing problems with its undercarriage, airport sources said.

None of the 17 passengers or four crew members aboard was hurt when it crash-landed, the sources said, although the undercarriage was badly damaged with the impact.

The Fokker 27 plane of the British company Air UK had taken off from Norwich, in eastern England.

While the aircraft was waiting to make its emergency landing, firemen and ambulances were deployed around the airstrip at Schipol Airport to meet it.

JAMMU, INDIA (JULY 19) - Two bomb blasts and a shootout blamed on Moslem militants left nine people dead and 17 injured in northern Jammu and Kashmir state late Wednesday and Thursday, officials said.

The dead included four federal troopers and three militants killed in the bombings, which also left 11 people injured.

The new violence erupted as a militant-led strike paralysed Kashmir for the second straight day Thursday.

Armed militants spearheading a bloody campaign against Indian rule over Kashmir ambushed two security convoys Wednesday night, killing two paramilitary troopers and the same number of soldiers, officials here said.

Federal troopers overnight shot dead three militants in a renewed offensive which sources in New Delhi described as an "unprecedented operation" joint army and paramilitary operation to try and curb secessionist violence.

Bombs suspected to have been set by the militants exploded in two government offices here Thursday, injuring 11 people.

It was the first time Moslem militants leading a bloody separatist movement in the Kashmir valley had struck in Jammu, the Hindu-majority winter capital of Jammu and Kashmir state, to which thousands of Hindus have fled.

#90200d4540 07/19/1990 ~French/German News Agency

JOHANNESBURG (JULY 19) - The South African government and the anti-apartheid African National Congress (ANC) are to hold special meetings within the next fortnight, the South African Broadcasting Corporation (SABC) reported Thursday night.

The office of President Frederik De Klerk has confirmed that the cabinet is to hold a special planning meeting in Pretoria on July 30 and 31.

It said a so-called Bush Forum would also be attended by certain other "political functions" and was a continuation of similar meetings in the past. More such meetings would be held in the future, the SABC said.

The ANC, which embarked on preliminary talks with the government in Cape Town on May 2 to 4, said in a statement Thursday its national executive committee would begin a two-day meeting on Monday to discuss what it termed "various burning questions facing the people of South Africa, including negotiations".

Matters arising from the recent world tour by ANC deputy president Nelson Mandela would also be discussed.

It said Mr. Mandela, who stated on his return to South Africa Wednesday that he would like to hold talks with Mr. De Klerk as soon as possible, was taking a three-day break this weekend to spend time with his family.

The ANC said a statement would be issued after its meeting next Wednesday.

#90200d4570 07/19/1990 ~French/German News Agency

WASHINGTON (JULY 19) - U.S. Secretary of State James Baker is coming under increasing pressure to begin a new round of Middle East peacemaking with members of Israel's right-wing government.

The pressure has come in direct appeals, such as from Egypt's Foreign Minister Esmat Abdel-Meguid and Jordan's Marwan al Kal Kasim, and it has come indirectly.

Concerned by the five-month lull in peace efforts, United Nations Secretary General Javier Perez de Cuellar asked the five permanent members of the U.N. Security Council this week to consider discussing the Middle East in regular council meetings.

In Brussels, the European Community appointed delegates from Italy, Ireland, and Luxembourg to get the peace process going again by arranging personal visits with leaders in Israel, Washington, the Arab League, and the Palestine Liberation Organisation.

The 3-nation panel, headed by Italian Foreign Minister Gianni de Michelis, will begin its mission by setting out for Tunis and Jerusalem on July 23.

Although frustrated by Israel's virtual rejection of his 5-point peace plan for Palestinian elections, Baker is not pleased at the prospect of U.N. or

E.C. involvement.

Washington fears those organisations might try to pressure Israel into submitting to an international conference, something the Jewish state has sworn it will never agree to.

The U.S. administration is also loathe to give up its position as the primary mediator in the long-running dispute, something that would draw an outcry from pro-Israeli members of Congress.

Although Baker has twice threatened to abandon the peace process unless Israel knuckles down and agrees to cooperate, analysts contend that U.S. disengagement at this point would be unthinkable.

Charles Percy, a former senator recently back from a Middle East visit, warned that the five-month lull is bringing the region dangerously close to war.

''Unusual courage by leaders both here and in the Middle East will be required if a massive war of destruction is to be avoided,'' he told reporters last week.

Bellicose Iraqi posturing, massive Soviet Jewish emigration to Israel, and the breakdown of U.S.-Plo ties have embittered Arab-Israeli relations and dimmed prospects for peace.

Mindful of the situation, Baker requested a meeting this week with Israeli Foreign Minister David Levy to sound out the new Israeli leadership and determine what can be salvaged from his 5-point plan.

But Levy, still recuperating from a mild heart attack, has been too ill to travel, and his health problems have temporarily stifled U.S. efforts to get the ball rolling.

BUCHAREST (JULY 19) - Several thousand people demonstrated in Timisoara on Thursday night for the release of student leader Marian Munteanu, who was arrested and jailed in Bucharest during last month's anti-government protests.

Demonstrators gathered for two hours in Union Square, according to sources reached by telephone, in answer to a call from a number of groups, including the Timisoara Society which drafted the "Timisoara Proclamation" they said.

The March 11 proclamation demanded that no former communist be permitted to

stand for public office in Romania for the next three legislative terms. The same demand was echoed by anti-government protestors who occupied University Square in Bucharest for 50 days until cleared by police on June 13.

Romanian Prime Minister Petre Roman said in Paris on Wednesday it was "possible" Mr. Munteanu could be released.

In Bucharest on the same day, Romanian President Ion Iliescu said Mr. Munteanu had been arrested for inciting protestors to converge on police headquarters.

Mr. Munteanu was arrested on June 18 in a hospital emergency ward after having been beaten up four days earlier by miners sent in by authorities to crush the anti-government demonstration.

On Thursday, demonstrators in Timisoara called for the release both of Mr. Munteanu and others detained since last month.

They also called for the creation of an "Association of December 17" to "denounce the lack of attention paid to the injured and the families of those killed during last December's revolution."

The demonstrators read an open letter to the government calling for the publication of findings of a government commission looking into the violent events of last December in Timisoara.

They also demanded that the text of government bills be published in the press and that information be released about the fortunes of former communist leaders and the family of executed dictator Nicolai Ceausescu.

BEIJING (JULY 19) - China's foreign ministry on Thursday called on the foreign press not to be taken in by rumours that former communist party secretary general Zhao Ziyang would be rehabilitated politically.

"I have not come across this kind of rumour," the foreign ministry spokesman told a weekly press conference, "don't believe those rumours too easily."

Several articles have been published recently in Hong Kong, indicating that Mr. Zhao, who was disgraced after the crushing of pro-democracy protests in June 1989, could be publicly rehabilitated later this year.

Senior Chinese leader Deng Xiaoping has met Mr. Zhao in recent months and sent him on an inspection mission to the provinces to assess the results of

Beijing's open-door policy in a first move which could lead to his rehabilitation, the Hong Kong reports said.

They also said Mr. Zhao would no longer be kept under house arrest.

The spokesman refused to say whether Mr. Zhao was still under house arrest.

In recent weeks, two newspapers have criticised the former communist party chief for his work in the fields of arts and culture.

Mr. Zhao is still officially the subject of an inquest, having been accused of encouraging the "counter-revolutionary rebellion" in the spring of 1989.

NEW YORK (JULY 19) - The dollar was mixed Thursday in New York, edging up against the yen but slipping against the Deutsche mark, while gold lost fractions.

The U.S. unit ended the day here at 1.6410 Deutsche marks against Wednesday evening's 1.6480 and at 147.95 yen against 147.75. It dipped against the Swiss franc - to 1.4062 against Wednesday's 1.4153 - and the French franc, to 5.5050 francs against 5.5285.

But the dollar was virtually unchanged against sterling, inching up to 0.5508 pounds from Wednesday's 0.5507.

Gold was off 20 cents an ounce, at 361.40 dollars.

PORT OF SPAIN (JULY 19) - Caribbean transport ministers Thursday announced a plan to restructure the money-losing West Indies Shipping Corporation (WISCO) and recommended its privatization by 1993.

The plan calls for injection of 3.5 million dollars over three years as an alternative to closing down the company, which has its headquarters in Port of Spain.

The funds will be obtained from subsidies from shareholders such as the governments of Trinidad and Tobago, Jamaica, Barbados, Dominica, St Vincent, and Guyana.

New vessels will be bought, as the current ships, Caricom Venture and Caricom Express, "are in bad shape and are inappropriate for the type of work on the inter-island route," a report said.

WISCO's accumulated losses amount to 42 million US dollars, it was revealed.

WASHINGTON (JULY 19) - Secretary of State James Baker met Thursday with Estonian Foreign Minister Lennart Meri, who described their encounter - the first U.S.-Estonian meeting at such a high level in 45 years - as "excellent."

Meri expressed optimism over prospects for independence for the Baltic republics while predicting new difficulties with Moscow, which has rejected unilateral declarations of independence by Estonia, Latvia, and Lithuania.

The minister cited a recent Soviet decree, saying it was aimed at creating a "parallel government in Estonia" with Moscow directing the economy and naming a type of governor general who would represent the central government.

"That's a totally new approach. A totalitarian way of thinking, which leaves no place for an open society and a market economy. But I am not pessimistic," he told reporters.

Noting that Thursday's encounter was the first between a secretary of state and a foreign minister from Estonia since the Soviet Union annexed the Baltic states in 1940, Meri said he was "extremely happy to have established a working contact with the administration."

He said that Estonia would be happy to receive cultural and technological support from the United States, but gave no details.

State Department spokesman Richard Boucher said the exchange of views between the two men Thursday was part of efforts by the administration of President George Bush to follow developments closely in the Baltic republics. Last week, Baker met with Lithuanian Foreign Minister Algirdas Saudargas and he was expected next week to receive Latvian Prime Minister Ivais Godmanis.

Meri arrived in the United States Tuesday and was scheduled to meet with representatives of the Estonian community and members of Congress, Boucher said.

#90200d4830 07/19/1990 ~French/German News Agency

ISLAMABAD, (JULY 19) - India and Pakistan ended talks here Thursday without reaching agreement on the "vital issues" of Kashmir and the retreat of troops to peacetime positions, a Pakistani foreign office official said.

Another round of talks at foreign secretary level is to be held in New Delhi on August 9 and 10, the official said.

He said "a great deal of time was spent on the issue of Kashmir," where an ongoing uprising in the Indian part of the valley has led to serious tension between the two South Asian neighbours who went to war in 1948 and 1965 over the disputed territory.

The Indian delegation to the talks, led by Foreign Secretary Muchkund Dubey,

showed "constructive concern, but not flexibility on Kashmir," the official said.

The official said Pakistan had stressed at the talks that the withdrawal of troops would boost confidence and that there should be at least "a substantial draw-down on troop concentration as suggested by the United States."

The two sides have agreed to continue talks on the issue in New Delhi, although "we would have been happy if this basic impediment to mutual trust would have been removed right now," he said.

The official said there are some 350,000 Indian troops in Kashmir and northern Punjab state and most of them pose a threat to Pakistan's security.

He said there had recently been a "substantial withdrawal" of Indian troops and armoured personnel in the southern sector along Pakistan's Sindh province,

and said this should have been extended to Indian-held Kashmir and northern Punjab. "We hope to take it up at the next meeting," the official said.

Mr. Dubey and his Pakistani counterpart Tanvir Ahmed Khan held four rounds during a period of about nine hours at the foreign ministry here.

The Indian Foreign Secretary also met with President Ghulam Ishaq Khan, Prime Minister Benazir Bhutto, Foreign Minister Sahabzada Yakub Khan and National Security Advisor Iqbal Akhund.

The leader of the Pakistani delegation said "the greatest progress was that we sat together and exchanged perceptions in extremely frank and candid manner and were able to know each others' central concerns."

Meanwhile, Mr. Dubey told reporters the talks had been useful, marking a move towards improving bilateral relations. He said "we mainly discussed confidence-building measures, adding: "Matters of bilateral relations figured at the talks ...No particular issue could be singled out in this connection."

The Indian delegation is due to leave here for New Delhi early Friday.

Officials here said there was a divergence of views on the fundamental reasons for the current tension between the two countries.

Pakistan said the main causes were the crisis in Kashmir and the concentration of Indian forces close to its border.

However, India said the tension arose because of Pakistan's alleged assistance to Kashmiri militants battling for freedom from Indian rule, they said.

The foreign office official said Pakistan had again denied allegations of interference in India's affairs, although it said it could not abandon political and moral support for the Kashmiri people's right of self-determination.

He said Pakistan would welcome "any evidence" India has to verify the alleged interference.

The official said at the talks, Pakistan had renewed its proposals for the implementation of a bilateral or regional nuclear non-proliferation treaty as both countries possess nuclear capability.

He reported progress at the talks on some confidence-building measures, such as avoiding air violations and maintaining contacts between military commanders as well as prior notification of any troop movements and said he hoped agreement on these subjects could soon be formalised.

The official said India had again rejected a Pakistani proposal to set up a neutral mechanism to verify cross-border infiltration.

SINGAPORE (JULY 19) - A shipping joint venture between a Singapore firm and a Soviet company plans to be listed on the Stock Exchange of Singapore (SES) shortly, a senior official of the company said Thursday.

Boris Theseira, managing director of Singapore Soviet Shipping (SinSov), said the idea of floating the company was suggested by the Singapore partner, United Industrial Corp. (UIC).

He said the company's other partner, Sovfracht, was informed of the plans to float the company last month but had so far not replied to the proposal.

UIC and Sovfracht each have a 50 percent stake in the shipping agency, which is broadening its land and sea operations in Singapore.

Expansion plans include a 1.5 million U.S. dollar container depot to be set up here by the end of the year. SinSov will make an initial investment of about 500,000 U.S. dollars in the project. Another local warehouse operator is expected to take a stake in the container depot project.

Local executives said if the public listing is approved, Sinsov would be the first public company in Singapore with an Eastern bloc shareholder.

Sinsov, which acts as an agent for all Soviet ships calling in Singapore, has turned in profits annually since UIC took a stake in that company in 1986.

TEGUCIGALPA (JULY 19) - A 25-day strike by banana workers in Honduras enetered a critical stage Thursday with the Tela Railroad Company breaking off negotiations with the union and a a labor confederation threatening widespread sympathy strikes.

Honduras is the world's third-largest producer of bananas.

Tela president Karl Koch told a government mediating commission headed by Labor Minister Rodofo Rosales that the international banana company decided to end talks because of the union's "rigid position" on its demand for substantial wage increases.

The union is demanding a two-dollar hike in the daily wage of 3.50 dollars. Tela offered a 56 cent increase.

Rene Ayestas, the union president, said the union would not yield to the company's demands and warned that the union had the resources to maintain its strike as long as necessary. The union's first strike against Tela, in 1954, lasted 69 days, he noted.

By suspending direct talks, the company hopes the government will arbitrate the dispute as it has done in similar situations, Tela sources said.

President Rafael Callejas has said that only if negotiations broke down will his government step in to mediate the dispute.

Luis Llanes, head of the powerful Confederation of Workers in Honduras warned after negotiations failed that the confederation might call for general strikes.

The confederation includes some 75 unions, with more than 100,000 members.

The confederation has also asked that all its members to pay levies to finance the banana workers' strike until it is favorably resolved.

Meanwhile, the prolonged strike has seriously hurt the economy of Honduras.

Typically, Tela exports between 500,000 and 600,000 crates of bananas a week, with a world-market value between 2.3 million dollars and three million dollars.

BUENOS AIRES (JULY 19) - Argentinia's state-owned steel company Somisa has invited some 20 companies, both Argentine and foreign, to invest a total of 250 million dollars in a planned steel rolling mill.

Somisa said Thursday that the idea was to attract private capital to finance the new mill, dispensing with the need for government money.

The mill, according to Somisa, would offer economical production of steel plate by thermomechanical lamination.

The new plant, said the company, would be capable of producing 500,000 tonnes of steel which would be earmarked for both domestic use and export.

Somisa has asked potential investors to provide their proposals within 45 days.

TAIPEI (JULY 19) - Taiwan's Bureau of Investigation (BOI) has cracked down on 77 illegal futures trading companies in three months, as the government steps up efforts to curb illicit economic activities, BOI officials said here Thursday.

The BOI Wednesday raided 17 firms involved in futures trading and one illegal deposit-taking house pretending to be forming a new bank, the officials said, adding that after interrogation, executives of the 18 firms were referred to the Prosecutors' Office.

A total 255 companies had been engaging in overseas futures transactions and only a few had been granted permission to carry out such dealings, which are still illegal, they said.

Of the illegal concerns, 107 had stopped operations since the clampdown began in April, the BOI officials said, adding that agents would also step up efforts to investigate the remaining unlicensed companies.

The agency did not reveal how much money was involved.

On Tuesday, Premier Hau Pei-tsun encouraged Finance Ministry officials to "rule out lobbying and intervention" from interest groups and the "privileged class" while moving to rehabilitate the island's financial market, government spokesman Shaw Yu-ming said.

Mr. Hau also instructed the BOI to continue its island-wide crackdown on illegal futures firms to protect the interest of the people, the spokesman said.

#90200d5230 07/19/1990 ~French/German News Agency

NEW DELHI (JULY 19) - An independent human rights group Thursday accused the Indian government of abusing power and using violence in Kashmir, and stressed that women are the main victims of violence by the security forces there.

In a report published here, the Committee for Initiative on Kashmir charged that militants fighting for the independence of Kashmir are also guilty of human rights abuses, including numerous killings, and have spread fear among the population.

An 80-page document published by the group of four women after a week's investigation in June in Kashmir's Srinagar valley, the centre of the anti-Indian campaign in the province, documents many detailed examples of violence and rape allegedly carried out by the security forces.

"We found to our distress that women had become particular targets of the security forces. The methods and manners of attack on women had a definite pattern," the report states.

Kashmir, India's only Moslem-majority state, is at the heart of an armed campaign for secession from New Delhi that has left more than 800 dead since the beginning of this year.

The report charges that the government has issued secret instructions that give security forces broad powers. It says the army has been "asked to do the work of the police, but without any civilian authority to check the possible abuses of these vast powers by the security forces."

Since January, it says, even lower grade paramilitary troops "are authorised to break open doors and windows and enter "zenana" (women's quarters in houses) and make arrests without any warrant."

Before February, a male member of the household was present during any

search of the women's romms, but now "the male members are made to leave the house and the women are locked inside the house."

The report's authors produced an earlier document in March on human rights abuses in Kashmir. They say the situation has worsened since then.

The warn that if such abuses of power continue, "there will be no possibility of arriving at a real solution to the problem" of Kashmir.

#90200d5310 07/19/1990 ~French/German News Agency

BONN (JULY 20) - Two West German political parties have asked for an immediate end to low-altitude NATO flights over West Germany and other European countries, in view of the Kohl-Gorbachev accord and changes in NATO strategy.

The request was made Thursday by the opposition Social Democratic Party (SDP) and the Christian Social Union (CSU), the conservative Bavarian party.

The low-altitude training exercises by North Atlantic Treaty Organization aircraft have become increasingly unpopular in recent years, and most West Germans are now said to oppose them, following numerous accidents.

SDP arms expert Hermann Scheer said West Germans should no longer have to put up with the air exercises, given the changing face of European security.

The head of the CSU parliamentary group, Wolfgang Boetsch, meanwhile, sent

a letter to Defense Minister Gerhard Stoltenberg saying the new situation in Europe should lead to a review of the need for such flights, just as it led to a review of the West German draft.

Military service here was recently cut from 15 to 12 months.

Mr. Boetsch said his party felt that current conditions called for an end to all military low-altitude flights.

In the latest mishap Thursday, a West German Phantom fighter jet lost a potentially lethal Sidewinder missile in mid-flight, though it caused no damage. Police and soldiers found the weapon several hours later in a remote area of the Black Forest near Schramberg.

Police had issued a warning to local residents before the missile was found.

The reason for the incident was not known. The Sidewinder is an air-to-air missile.

On Monday, Soviet leader Mikhail Gorbachev finally agreed in a meeting with Chancellor Helmut Kohl that a unified Germany could join NATO.

HONG KONG (JULY 20) - Conservationists are celebrating Hong Kong's reluctant adherence to the international ban on the ivory trade. The ban came into force on July 17 and finally takes the most important centre for the ivory trade out of the world market place.

The conservationists' glee was hardly mirrored by the employees of the rundown Shui On ivory factory who are more concerned about the threat of unemployment than the fate of the African elephant herd.

The Shui On workers are among the British colony's 1,200 skilled craftsmen who have spent years perfecting the art of ivory carving. Half of them have already lost their jobs, the rest see unemployment as only a matter of time.

Last October the 103 countries who signed the convention on international trade in endangered species of wild flora and fauna (Cites) agreed to take more stringent action in order to save the African elephant herd which was deemed to be close to extinction. This meant imposing a total ban on the international trade in ivory.

LONDON (JULY 20) - Security services at Buckingham Palace on Thursday detected an incendiary device in a package addressed to the Princess of Wales at the palace, police said here.

They said the home-made device was made harmless without incident, and palace staff were at no time in danger.

Police added that the device was not believed to have been sent by a terrorist organization.

A palace spokesman confirmed the police report, but refused any further comment.

The Princess and her husband Prince Charles do not live in Buckingham Palace, which is the Queen's official residence.

The Prince and Princess of Wales live at Kensington Palace, also in London.

WASHINGTON (JULY 20) - The U.S. Export-Import Bank Thursday announced commercial loans to China of 14.3 million dollars to buy U.S.-made equipment for an airport and a plastics manufacturer in Shanghai.

The federal government bank granted the loans, which will be handled by the private Bank of America, at an internationally agreed rate of 8.3 percent a year for seven years.

President George Bush has maintained that loans to China should be granted only for basic human needs or to aid economic reform.

These loans fall within the criteria because they are commercial, said Ellen Schweppe, a press officer at the Export-Import Bank.

A 10 million dollar loan will be used to buy equipment from Aarotec-Airways Engineering Associates of Fairfax, Virginia, for the Hong Qiao International Airport. The purchase will include air conditioning, security systems and baggage handling equipment.

The second loan, for 4.3 million dollars, will finance the purchase of equipment from Rayonier C and C Ltd. of Seattle, Washington, for Gao Qiao Petrochemical International Trading Co., known as GITCO.

The Shanghai company is expanding its production of pellets of acrilonitrile-butadiene-styrene, a material used to line refrigerators and other appliances.

CHARLESTON, WV (JULY 20) - Tokyo Tower Development Co. Ltd. has bought West Virginia's largest ski resort for about 20 million dollars, the company announced Thursday.

Fukusabura Maeda, Tower's owner and chief executive officer, said the purchase of Snowshoe Ski Resort from Ski Venture Inc. was the Japanese leisure and recreational firm's first acquisition in the United States.

"Tokyo Tower Group studied a number of opportunities ranging from California to Florida," Mr. Maeda said. "We were very strongly impressed with the physical beauty of the nature in West Virginia."

Tokyo Tower Development is a branch of the Tokyo Tower Group of Companies, operated by Nippon Television City Corp.

A group of eight savings and loan banks bought the resort in October 1986 under the umbrella company Ski Venture Inc. for 13.4 million dollars and assumed 11.8 million dollars in debt.

West Virginia Governor Gaston Caperton welcomed the ski-resort purchase for his eastern state, one of the poorest in the nation, and hailed Tokyo Tower as a leading recreational developer. The governor has energetically pursued Japanese investment.

MEDELLIN, Colombia (JULY 19) EFE - Five people were wounded when a bomb exploded in a village near the northwestern city of Medellin, where the ongoing war between drug gangs and security forces claimed the lives of two more policemen.

The policemen were shot dead early Wednesday, bringing to 200 the number of officers killed this year in the drug war, centered in Medellin, the cocaine capital of the world.

Later Wednesday, a bomb composed of 30 kg of dynamite exploded in the village of Sabaneta, 20 km from Medellin, injuring five people and causing dlrs 20,000 in damage.

Sabaneta Mayor Gloria Elena Diez said witnesses saw a man place the bomb next to a fruit stand and run.

In another incident, unidentified attackers lobbed a bomb at a police

station in the residential neighborhood of Laureles in Medellin. No injuries were reported.

Police said they were closing in on the fugitive head of the notorious Medellin drug cartel, Pablo Escobar, after launching a massive manhunt earlier this month in which some of his closest associates were arrested.

But authorities warned violence could escalate as Escobar, feeling cornered, orders his henchmen to strike.

LUGO, Spain (JULY 19) EFE - Police raided a remote mountain commune in northwestern Spain and arrested 20 hippies for growing marijuana and opium officials said.

They said they opened an investigation into the commune, located near the village of Negreira de Muniz, in the northern Lugo province, after police caught members selling homegrown drugs in the provincial capital.

Because of the difficult access to the area, police borrowed mules from residents of the village to transport the some 500 plants of marijuana and opium confiscated in the raid.

The detainees were taken for questioning at the Civil Guard headquarters in the town of Fonsagrada.

The commune, one of the few remaining in Spain, survived by selling farm products and craftwork.

BEIJING (JULY 19) EFE - A Chinese man who hijacked a plane last year claiming he was fleeing persecution in China has been sentenced by a court in Beijing to eight years in jail, press reported Thursday.

Hijacker Zhang Zhenai seized a plane December 16, 1989 and flew to Japan alleging that he was being persecuted by Chinese authorities for his role in pro-democracy protests which ended with the massacre of student demonstrators in Tiananmen Square in June that same year.

Zhenai, who took his wife and child with him when he hijacked the aircraft was extradited from Japan in April after authorities there decided that the hijacking was not politically-motivated.

His lawyers in Japan agreed to the extradition after Chinese officials

promised that Zhenai would be sentenced to a maximum of 10 years in jail.

The Beijing court Wednesday also stripped Zhenai of his political rights for two years, according to reports in Chinese newspapers.

His wife and child, who along with Zhenai, were thrown onto the runway after the aircraft landed in Japan by the plane's crew, will not be imprisoned.

ATHENS (JULY 19) EFE - A raging forest fire on the Greek island of Samos in the Aegean Sea has destroyed more than 2,000 hectares of land and prompted tourists to make mass cancellations, authorities on the island said Thursday.

Strong winds have hampered efforts by the Greek Army and firemen to put out the four-day fire which has destroyed 20 houses, nearly a third of the island and forced the evacuation of numerous towns.

But authorities on Samos, just off the coast of Turkey, said that tourist zones had not been affected by the blaze, apparently set off by the cigarette of a 77-year-old farmer.

Greece is the European country with the least amount of wooded land, and fires have consumed 600,000 hectares of forests in the last 20 years.

TAIPEI (JULY 19) EFE - Saudi Arabia will withdraw its recognition of Taiwan and establish diplomatic relations with mainland communist China, a Taiwanese official said Thursday.

Deputy Foreign Minister Chen Chien-jen said Riyadh sent a special envoy to Taipei to inform the Taiwanese government of its decision.

Chen said his government "profoundly regrets" the move after 44 years of diplomatic relations with Saudi Arabia.

Fewer than 30 countries still recognize Taiwan as the legitimate government of China.

Nicosia (JULY 19) EFE - In strict secrecy, British and Iranian

parliamentarians have begun direct contacts aimed at renewing diplomatic relations between their countries and obtain British apologies for the publication of a book branded as blasphemous to Islam, European diplomats have said.

The deputy speaker of the Iranian parliament, Hojatoleslam Asadollah Bayat visited Britain in early June and met with British parliamentarians to discuss restoring ties, the European diplomats in Cyprus have told EFE.

The names of the British MPs were not disclosed.

Iran and Britain ruptured relations in February 1989 when the late Iranian spiritual leader Ayatollah Ruhollah Khomeini issued a +fatwa+, or death sentence, against British writer Salman Rushdie for his book "The Satanic Verses", considered by many Moslems as blasphemous to Islam.

According to the diplomats, who spoke on the condition of anonymity, the British MPs apologized to Iran in the name of the parliament for the "moral harm and insult which the Rushdie book has meant for Moslems all over the world".

Bayat, considered a mediator between Iranian hardline fundamentalists and moderates headed by President Ali Akbar Hashemi Rafsanjani, asked that the announcement be made public so that the "same mistake is not repeated".

London did not delay in its response.

During an interview June 3 with the British Broadcasting Corporation, Prime Minister Margaret Thatcher professed respect for the "great religion of Islam" and said she understood that they considered the book an "insult".

"Moslems worry a lot about something that seems insulting to Islam, the same as we do when people insult Christianity," Thatcher said.

Foreign Secretary Douglas Hurd has said on three different occassions that London wanted to normalize relations with Iran and that Britain had not wanted to offend Moslems.

The diplomats in Cyprus did not rule out a meeting between Iranians and Britons in the near future.

Britian's humbled reaction would mark a victory for Iranian fundamentalists, who control 164 of the 270 seats of the Iranian parliament, or Majlis and have insisted on an explicit public apology for the book.

The diplomats in Cyprus said the time had come to reestablish relations.

Rafsanjani is eager to open ties with Western nations which he considers vital to rebuilding Iran's shattered economy devastated by the eight-year-long Gulf War with Iraq, galloping inflation and crippling shortages.

"Now they have no excuse for putting up obstacles in front of the British. It is the moment (for the hardliners) to leave aside useless declarations and think about the reconstruction of Iran, together with the moderates, because finally they have to understand that they are all Iranians," the diplomats said.

But the full normalization of ties is also closely linked to the fate of three British hostages, Jack Mann, Terry Waite and John McCarthy, and one British-Irish hostage, Brian Keenan, being held in Lebanon by pro-Iranian militias.

The Iranian news agency IRNA reported earlier this month that a European hostage would soon be released, and it was believed it would most likely be Keenan.

PANAMA CITY (JULY 19) EFE - Panamanian police and U.S. soldiers rushed to the presidential palace Thursday after a parcel containing utensils stolen from the building's kitchens was mistaken for a bomb, security officials said.

Presidential security chief Carlos Bares told reporters that after inspecting the suspicious packet, police called in U.S. Southern Command bomb disposal experts.

Police and soldiers took up positions around the palace to prevent employees from entering or leaving the building while the parcel was exploded by the U.S. experts in nearby wasteland. The troop movements caused considerable alarm in the capital.

"The packet did not contain any explosives, only kitchen utensils," Bares explained to reporters.

President Guillermo Endara, who has his official home and office in the palace, confirmed in a telephone interview to a local radio that the utensils had been stolen from the presidential kitchen, although he did not say who the culprit could be.

Endara, who was installed when U.S. troops invaded Panama last December to oust former military strongman Manuel Antonio Noriega, said the palace

often received bomb threats.

#90200e0027 07/19/1990 ~Latin America New Agency
VIENNA (JULY 19) EFE - In a further attempt to gain international recognition, the three breakaway Soviet Baltic republics announced Thursday their intention to seek observer status at this year's Conference on Security and Cooperation in Europe (CSCE) summit.

Estonia, Latvia and Lithuania are later to present a formal joint request to attend the CSCE Paris summit slated for the fall and to join preparatory talks on the meeting currently being held in Vienna.

Diplomats involved in preparing the Paris summit said Thursday it was unlikely that the request would receive sufficient support among the CSCE's 35 member states which include the United States and Canada.

The CSCE turned down a request by the three Baltic republics to attend a meeting of the organization held in June in Copenhagen.

Lithuania, Latvia and Estonia have been seeking international support in their secessionist battles with Moscow.

#90200e0030 07/19/1990 ~Latin America New Agency
Brussels (JULY 19) EFE - A senior Spanish diplomat said Thursday that Madrid has suspended aid to Cuba and urged other European Community members to do the same in a wrangle over refugees who have taken shelter in the Spanish embassy in Havana.

Speaking in the Belgian capital, Secretary of State for Cooperation Luis Yanez Barnuevo said Spain's dlrs 2.5 million in annual aid to Havana would be frozen until the two countries solved the diplomatic row over the four Cuban asylum-seekers.

The suspension follows Spain's recall Wednesday of its ambassador to Cuba after Cuban authorities insulted Spanish Foreign Minister Francisco Fernandez Ordonez, who had pledged that Spain would guarantee the security of Cubans who entered its embassy.

A strongly-worded Cuban Foreign Ministry statement had accused Fernandez Ordonez of +manifest ignorance+ and called him a +distressed colonial administrator+.

Yanez made the announcement following a meeting with Spanish EC commissioners in charge of the 12-nation trade bloc's Latin American and

cooperation policies.

He also confirmed that Madrid has asked the European Commission to +do the same so that there would be a common political coordination in relation to Cuba+.

The suspension is to affect Spain's grants, credits, subsidies and other financial assistance to Cuba, but will not affect trade links.

+Spain is the umbilical cord that unites Cuba with the EC (European Community),+ Yanez said, adding that he was +surprised+ that the Cuban government would +alienate itself from the only comprehensive friend it has in Europe.+

Cuban leader +Fidel Castro is backing himself into a dead end street. It is not Spain that could lose, but Cuba in every aspect,+ Yanez said.

He added that +Cuba was like a dry field where the slightest spark could set it ablaze,+ and said that he sensed +an uneasiness in the regime+.

While the EC has not responded to Spain's call for similar sanctions, member countries Italy, France and the Netherlands have agreed to send their ambassadors to the Cuban authorities to demand that they comply with the sovereign rights of foreign embassies.
